The Riel Community Committee provided the following supporting reasons for its recommendation:

DASZ 21/2014 (By-law 67/2015)

- Under DASZ 21/2014 (By-law 67/2015), approximately 243.31 acres of land located at the northwest corner of Melnick Road, Lagimodiere Boulevard and Four Mile Road was rezoned from "RR5" Rural Residential 5 and "R1-M" Residential Single-Family Medium to "R1-S" Residential Single-Family Small; "R1-M"; "RMF-S" Residential Multi-Family Small; "RMF-M" Residential Multi-Family Medium; "CMU" Commercial Mixed-Use; "PR1" Parks and Recreation 1 (Neighbourhood); and "PR2" Parks and Recreation 2 (Community). ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY

- Under *OurWinnipeg* and the *Complete Communities Direction Strategy* the proposed development is located within the New Communities policy area that is identified as Precinct "K." Section 03-4 of Complete Communities, and Section 01 A of OurWinnipeg (the City's development plan) state: "New Communities are large undeveloped land areas identified for future urban development and are not currently served by a full range of municipal services."
- As per *OurWinnipeg* and the *Complete Communities Direction Strategy*, New Communities and Precincts require an approved planning process to be implemented prior to intensification and development of the Precinct.
- Key directions and policies guiding the development of New Communities are as follows:
    - New Communities will be developed in a sustainable manner.

- Support new development that is adjacent to, and compatible with, existing development and which is designed to minimize the spatial use of land.

- Encourage greater choices in housing type, density, style and tenure.
    - New Communities will be developed with Complete Streets (See Sustainable Transportation), enabling safe and convenient spaces for pedestrians, bicyclists, public transit ridership and motorists to promote physical activity, health and active transportation.

- New Communities will increase opportunities to live, work, learn and play in the same neighbourhood.
    - Promote the design of all streets to maximize connectivity, visual appeal, amenity space and safety where practical and cost effective.

PRECINCT K SECONDARY PLAN (By-Law 48/2014)

- A secondary plan was adopted by Council for Precinct K on July 16, 2014 under By-law 48/2014.
- Key aspects of the vision and guiding principles of the Precinct K Secondary Plan that are most relevant to the subject site include:
    - Create a unique character and sense of place when designing new neighbourhoods.
    - Universal accessibility principles and guidelines should be considered in the design of all public, commercial, and multi-family buildings and any publically accessible outdoor spaces.
- The General Objective guiding development in the Residential policy areas reads as follows:
- The residential policy areas are intended to provide a mix of housing types, reflecting *Complete Communities* policy which encourages "…greater choices in housing type, density, style and tenure." A combination of sidewalks adjacent to collector roadways, active transportation routes, public walkways and pathways within linear parks will be provided in the residential areas to provide opportunities for recreational activity and connectivity.
- To support connectivity, one of the General Policies for the Residential policy area addresses visual connection to the street as follows:
    - Incorporate Crime Prevention Through Environmental Design (CPTED) principles into subdivision design. Ensure a safe community through adequate lighting, visible public spaces, opportunities for passive surveillance of public space from buildings, ensure doors to buildings are clearly visible from the street, and ensure boundaries between public and private space are well defined through visual cues.
- The subject site is guided by the following Lower Density Residential land use policy designation under the Precinct K Secondary Plan (section 3.1.3). The objective of this policy area is to provide for lower density residential style of development including single-family homes, duplexes and townhomes. Consequently, the proposed project meets the land use policies of the secondary plan.

CITY OF WINNIPEG ZONING BY-LAW 200/2006

"R1-M" Residential Single-Family Medium District

- The R1-M district requires: a minimum lot width of 25 feet, a minimum lot area of 3,500 square feet, side yards of 4 feet, a front yard of 15 feet, and a rear yard of 25 feet. The maximum building height is 35 feet and the maximum lot coverage is 45%.

"RMF-S" Residential Multi-Family Small District

- The RMF-S district requires: a minimum lot area of 9,000 square feet, minimum lot area per dwelling unit of 1,250 square feet, minimum front yard of 20 feet, a minimum rear yard of 25 feet, a minimum interior side yard of 4 feet, and a minimum corner side yard of 5 feet. The maximum building height is 35 feet.

COMPATIBILITY WITH EXISTING NEIGHBOURHOOD AND SURROUNDING USES

- The proposed "RMF-S" zoning and side by side dwellings would provide a mix of housing types and slight variation in densities within the neighbourhood, consistent with the *Precinct K Secondary Plan* policies regarding Low Density Residential area.
- Two-family dwellings in this location are a modest increase in density, compatible in form with the surrounding "R1-M" Single-family Medium zoning district.

RECOMMENDED CONDITIONS OF APPROVAL

- Both the *Complete Communities* policies guiding New Communities and Precinct K policies guiding the Residential policy areas address the use of design to maximize connectivity, visual appeal and safety. Under the General Policies for Residential Areas the following policy is included:
    - Incorporate Crime Prevention Through Environmental Design (CPTED) principles into subdivision design. Ensure a safe community through adequate lighting, visible public spaces, opportunities for passive surveillance of public space from buildings, ensure doors to buildings are clearly visible from the street, and ensure boundaries between public and private space are well defined through visual cues.
- One method for increasing passive surveillance of public spaces, such as public streets like Scholberg Lane, is by encouraging house designs that offer increased visibility of the street. To help encourage a building design that has a stronger visual connection to Scholberg Lane, the Urban Planning Division is recommending that garages be located at or to the rear of the front wall of the dwelling unit to which it is accessory. This would result in dwelling units having a stronger visual connection to the abutting public streets and an improved sense of safety for pedestrians.
- The dwellings proposed on Scholberg Lane (under DASZ 27/2018 and DASSF 506/19) will all be accessed by private front approaches. Establishing 7.62 meter (25 foot) wide lots introduces an increased number of approaches.
- In order to enhance safety and to accommodate adequate on street parking, snow storage, and permeable surfacing, while reducing potential vehicle and pedestrian conflicts, the Public Service is recommending the following conditions of approval:
    - Private approaches serving all RMF-S zoning lots shall be adjoining and there shall be a minimum of 4.57 metres (15 feet) between the edge of driveways (or hard surfaced area) to the opposite side lot line between lots, to the satisfaction of the Director of PPD.
    - That any attached garage or car port, accessory to a single- or two-family dwelling, must be located no more than three feet in front of a line adjacent to, and parallel with, the front wall of the dwelling unit to which it is accessory.

- Given that the proposed development is the conversion of one block face to multi-family zoning, the subject site has considerable development potential. However, it should be done in a manner that is sensitive to neighbouring land uses and meets policy. As a result, the Urban Planning Division recommends as a condition of approval that a Zoning Agreement be implemented and that any future plans be approved by the Director, Planning, Property and Development as well as the Riel Community Committee prior to the issuance of a development permit on the site.
- Plans for review should include the following:
    - Differentiation in the building form and façade articulation through architectural details;
    - A variety of materials between the units or buildings;
    - A well landscaped front to balance the appearance of driveways and front garages.

LAND DEDICATION

- When a developer rezones and/or subdivides a parcel of land, they are required to put in an application with the City of Winnipeg.
- As a condition of rezoning or subdivision, a developer is required to contribute a portion of the land to be developed, or cash in lieu, to the City for parks purposes.

RECOMMENDATION

The Urban Planning Division recommends **approval with conditions** for the following reasons:

- The subject rezoning complies with the Lower Density Residential land use policies of the *Precinct K Secondary Plan* and with policies guiding New Communities in the *Complete Communities Direction Strategy*.
- The proposed development is compatible with land uses in the vicinity of the proposed lots, while accommodating a mix of housing.
