Note: The wording in bold and italics denotes amendments made by the Community Committee.

The East Kildonan-Transcona Community Committee provided the following supporting reasons for its recommendation:

1. Today we are really concerned about a 17 unit rezoning, if we turn that down there is every indication that the trailer park would have access to Rivergrove drive and there's been very consistent, loud, opposition to that idea and again that's why we are making these changes here today.
2. I'm surprised about the height of the gabion wall, I'll admit that fully, that was a separate approval process that is really not part of what is here today, but again there has been on everyone's property titles on Summerview, that there should be some expectations that there would be some type of diking at some point on the property because it was on title; I know you've lived there since the 80s in many cases, and 30, 40 years later it comes as a bit of a surprise and it is a significant change but again that was part of the expectation, I recognize that.
3. The trailer park does, again, predate Rivergrove so again it is consistent with what has been there since the 1960s, so again nobody here today has complained about them being bad neighbours, my office hasn't received any complaints about them being bad neighbours, Mayor Cerasani seems to be a good neighbour from every indication I've heard from this point.

- is abutting the west bank of the Red River;
- is abutting the northern end of the Rivergrove Public Street Right-of-Way, which contains a collector road;
- has motor-vehicle access from Main Street;

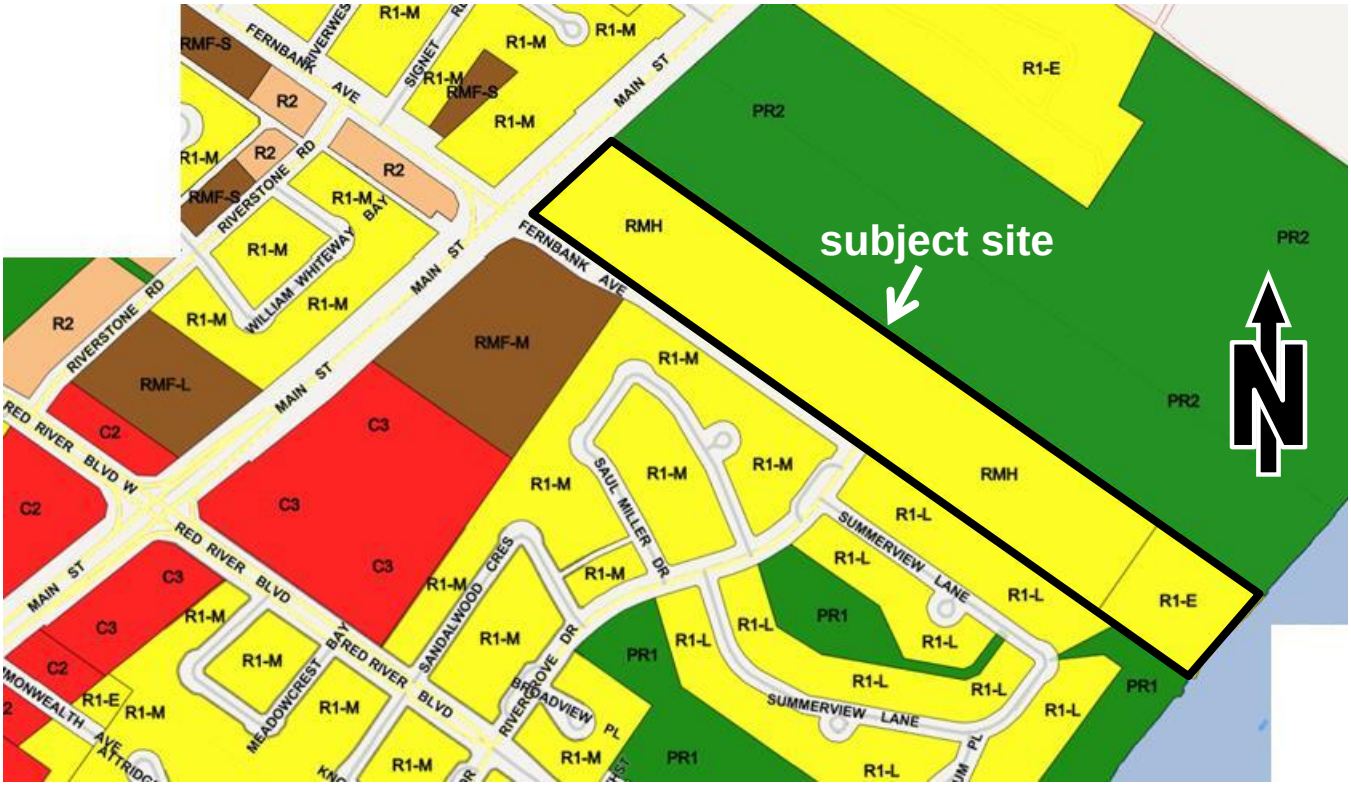

Figure 2: Existing Zoning

DESCRIPTION OF THE PROPOSED DEVELOPMENT

As previously stated, 81 mobile homes are proposed to be added to the site, 64 of which would be on the vacant portion of the site that is already in the “RMH” Residential Mobile Home Park District.

The site plan submitted by the applicant shows that the proposed rezoning, which is the subject of this report, is required to accommodate the addition of 17 mobile homes to the site. The 64 others to be added are not the subject of this report because they would be in the area already zoned “RMH”. The entire proposed expansion is subject to the requirements of Section 147 of Zoning By-law 200/2006, which states in part:

A mobile home park must contain a storage compound containing a minimum of 100 square feet of storage area for each mobile home space in the mobile home park and must be located as shown on plans submitted pursuant to the above-noted requirements.

A mobile home park must contain a common recreational area that:

(i) contains a minimum of 7 ½ percent of the mobile home park area;

(j) is not part of the required buffer area; and

(k) is bordered by a fence or hedge where it abuts any part of the internal roadway system.

A mobile home park must have internal roadway system rights-of-way as follows:

(l) the main spine or collector road of the internal roadway system must have a right-of-way a minimum of 50 feet in width; and

(m) other roadways of the internal roadway system must have a right-of-way a minimum of 33 feet in width.

Dimensional Standards

(w) minimum area per mobile home space - 2,800 square feet

(x) minimum width per mobile home space - 40 feet

When final plans of the proposed development that show this information are submitted for development permits, the Zoning and Permits Branch will determine whether they comply with Section 147.

ANALYSIS AND ISSUES

OURWINNIPEG AND COMPLETE COMMUNIITIES

OurWinnipeg is the City's development plan and *Complete Communities* is a "Direction Strategy" of *OurWinnipeg* that provides additional directions and policies on land use and development in the city.

The Key Direction that applies to the Recent Communities policy area is in the Areas of Stability sections of *OurWinnipeg* and *Complete Communities*. It states: "*Enhance the quality, diversity, completeness and sustainability of stable neighbourhoods and expand housing options for Winnipeg's changing population.*"

The following policies, under Direction 1 of Section 04 (Areas of Stability) of *Complete Communities*, also apply to the Recent Communities policy area:

Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complementary to the existing scale, character and built form.

Promote the form of buildings and spaces that are sensitive to the community context and address the transition between new and existing developments.

Focus housing growth to areas that have municipal service capacity to support intensification, in addition to commercial and recreational amenities.

In order to meet the full life-cycle of housing needs within the community, promote a mix of housing type and tenure, such as duplexes, low rise apartments, secondary suites, semi-detached homes, townhouses.

The proposed rezoning and the associated addition of 17 mobile homes (as shown on the submitted site plan) are consistent with the aforementioned Directions and policies because:

- they would add to the supply of mobile home type dwellings to the area;
- the site is near a wide range of amenities and services;
- the site is next to an arterial road and a collector road; and
- the proposal can be modified to include a fence, along the southern limit of the site, extending from Rivergrove Drive to the City park that is next to the Red River, the purpose of which would be to provide privacy to the residents of the single-family dwellings to the immediate south.

REASONS FOR THE RECOMMENDATIONS

The Urban Planning and Design Division is recommending approval subject to certain conditions including a condition that a zoning agreement be entered into that requires:

- the Owner to erect a fence between the proposed mobile homes and the northern limit of Lots 1 to 14, Block 6, Plan 19456;
- the fence to be designed and located in accordance with plans submitted to, and approved by, the Director of the Planning, Property and Development Department; and
- the fence to be maintained to the satisfaction of said Director.

These requirements would be consistent with the Directions and policies of *OurWinnipeg* and *Complete Communities* because they would enhance the compatibility of the proposed development with the single-family dwellings south of the site.
