Re: Carsharing pilot project

Dear Mr. Topolniski;

On November 4, 2019, the Standing Policy Committee on Infrastructure Renewal and Public Works directed the Winnipeg Public Service to support the Winnipeg carshare industry, including a pilot project to allow for reserved on-street parking spaces for carshare users.

The goal of the one year carshare pilot project is to make carsharing accessible to more people. Carsharing in itself will alleviate traffic congestion by reducing the overall number of cars on the road, while providing more mobility options for those who want an alternative to owning a vehicle.

I support this pilot project and alignment with Winnipeg's Climate Action Plan to create a corporate culture that values climate action and acknowledges City leadership in climate action is essential to creating momentum for broad uptake and action in the community.

For the pilot project, I am in full support of installing one reserved 24-hour carshare parking space on Hanbury Street with signage indicating the parking space is reserved for carshare parking only.

At the conclusion of the pilot, the Public Service will review data and make recommendations to Council on whether to continue the program into the future, including if this particular space will remain reserved for carsharing.

Thank you,

Matt Allard

Re: Carsharing pilot project

Dear Mr. Topolniski;

On November 4, 2019, the Standing Policy Committee on Infrastructure Renewal and Public Works directed the Winnipeg Public Service to support the Winnipeg carshare industry, including a pilot project to allow for reserved on-street parking spaces for carshare users.

The goal of the one year carshare pilot project is to make carsharing accessible to more people. Carsharing in itself will alleviate traffic congestion by reducing the overall number of cars on the road, while providing more mobility options for those who want an alternative to owning a vehicle.

I support this pilot project and alignment with Winnipeg's Climate Action Plan to create a corporate culture that values climate action and acknowledges City leadership in climate action is essential to creating momentum for broad uptake and action in the community.

For the pilot project, I am in full support of installing reserved 24-hour carshare parking spaces at three locations within my ward. Peg City Car Co-op has secured support from the adjacent property owner at 100 Hargrave to have a reserved parking space for carshare parking at this downtown location. As such, I support moving forward with the 100 Hargrave location as part of this pilot.

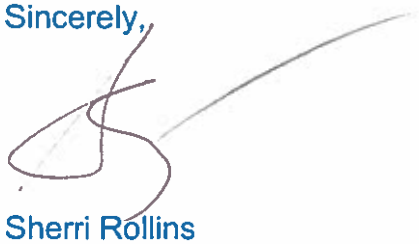

Council Building, 510 Main Street, Winnipeg, MB R3B 1B9| Immeuble du counseil • 510, rue Main • Winnipeg (Manitoba) R3B 1B9
204-986-5878 • srollins@winnipeg.ca

Peg City Co-op continues to pursue support for two other locations, one in Osborne Village area in close proximity to Roslyn Road and one in the Corydon area in close proximity to McMillan Avenue. I look forward to working with them further to formalize these other two locations.

To ensure the success of this pilot program, the Winnipeg Parking Authority and the Peg City Car Co-op will jointly circulate informational material to residents on each proposed block prior to the pilot commencing so that area residents are aware of the pilot. The information material being distributed to area residents will encourage area residents and surrounding property owners to provide feedback to the City throughout the duration of the pilot.

At the conclusion of the pilot, the Public Service will review data and make recommendations to Council on whether to continue the program into the future, including if this particular space will remain reserved for carsharing.

Sincerely,

Sherri Rollins
City Councillor, Fort Rouge – East Fort Garry Ward
