Gatewood Green Condo Corporation WWC 145

This petition is in reference to the proposal of not providing garbage collection service to Condo and apartment complexes. The petition is in support of continued garbage collection to maintain the health of our community and the environment. Privatizing garbage collection to apartments and condos causes costs to be transferred to occupants so housing costs to residents will be increased unfairly. As taxpayers all citizens should receive equal service. Not providing such service is in opposition to policies supporting health, safety, housing and equality.
