Dear City of Winnipeg officials:

I am writing to ask that Winnipeg Transit be funded at a level that enables it to offer on-time frequent service to its users. While I own a car and am physically able, I choose to ride the bus to work. I do this, because I don't want to tie up my family's one car and I want to use sustainable transportation whenever feasible.

I can get to work by bus, but it takes significantly longer than if I were to drive. Given the infrequent service and the frequently ***crowded*** service, riding the bus is often not only not pleasant, it is inconvenient.

Better funding would improve service and, thus, improve the experience of using Winnipeg Transit.

The better the experience, the more people will choose it.

For that to happen, Winnipeg Transit needs decent funding.

I ask that you vote in favour of improved funding for public transit in our city.

Sincerely,
Amanda Le Rougetel
