10. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

The East Kildonan-Transcona Community Committee provided the following supporting reasons for its recommendation:

1. More residents, more people in the area to call Transcona home. We see there is a lot of interest to live in Transcona and there will be for several more years. We are challenged with the new OurWinnipeg and Complete Communities that rank Transcona a little lower than some other areas in the city. I think it's the best place to live in the city, sorry to my Councillor colleagues who are on this call. Everybody wants to be in Transcona. Shop, live, eat. his will add more residents. I am a little challenged by the services, but I think over time, services will come and find a spot if the community warrants it. I look forward to this development.

- The subject site was part of the 77-acre Canterbury Park Neighbourhood subdivision under DASZ 10/2017. The current application (DASZ 25/2020) is a subdivision/rezoning of a 21.13 acre portion of the original subdivision.
- The subject property falls within the Area of Stability – Recent Communities policy area under the *Complete Communities Direction Strategy.* The subject property is currently zoned “R2” Residential Two-Family District; “RMF-M” Residential Multi-family District; “CMU” Commercial Mixed Use District; and “PR1” Parks and Recreation District.

SURROUNDING ZONING & USES (See Figure 2)

North: Vacant land zoned “R1-S” Residential single-Family Small, Renshaw Blvd and vacant land zoned “RMU” Residential Mixed Use.

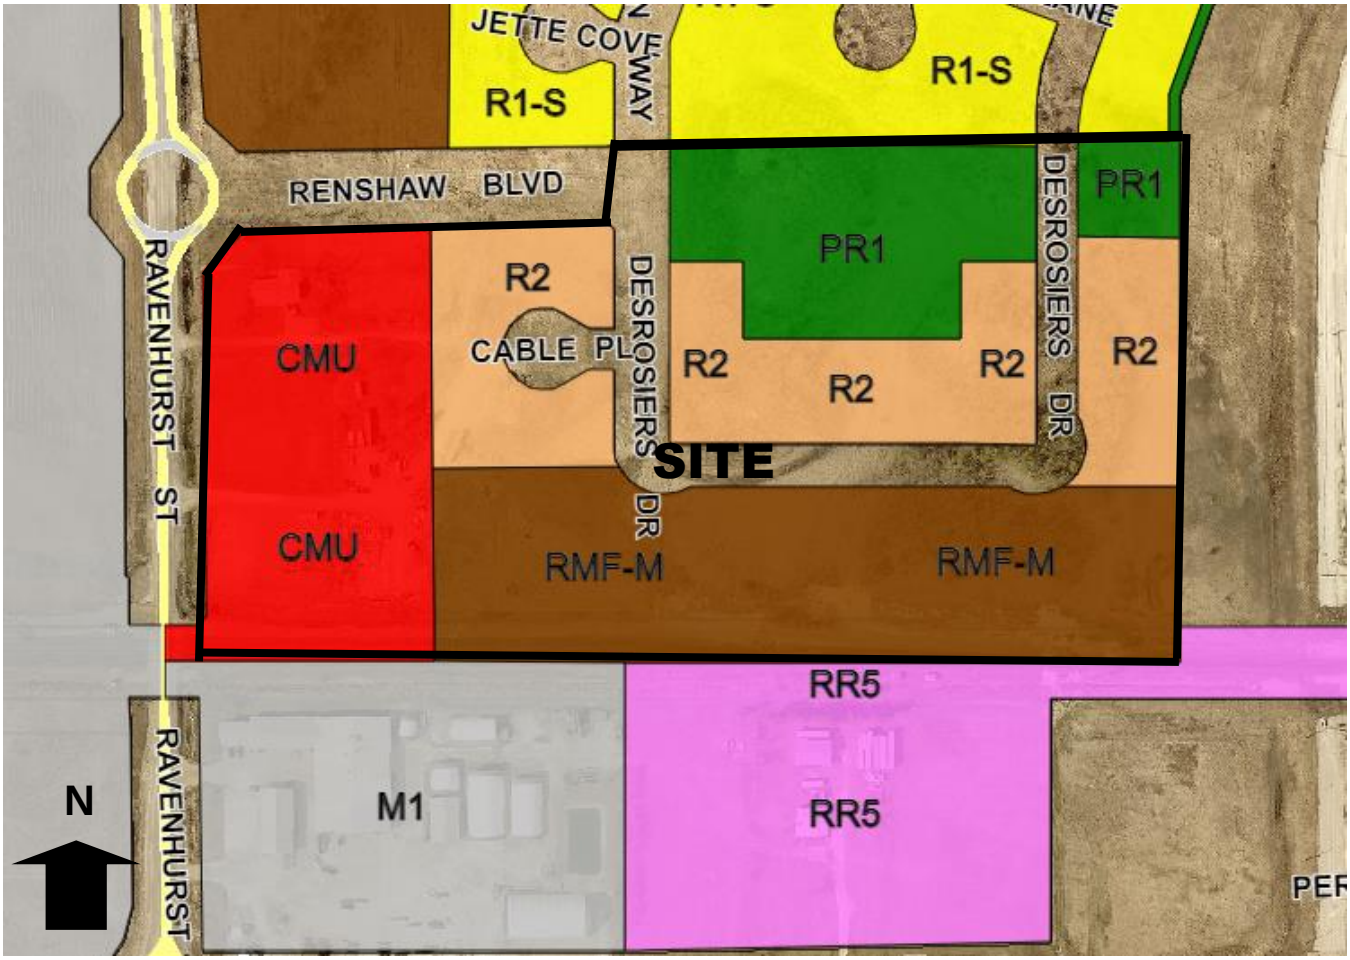

Figure 2: Existing zoning of subject property and surrounding neighbourhood

DESCRIPTION OF THE PROPOSED SUBDIVISION AND REZONING

- The subject site was part of a subdivision/rezoning application under DASZ 10/2017. Specifically, the subject site was rezoned from "RR5" Rural Residential 5 to different residential zoning categories; commercial mixed-use zoning and public reserve lands (R1-S, R2, RMU, CMU and PR lands, see Figure 2 above).

- The proposed plan of subdivision and rezoning, shown on Schedule "A," would create:
  - 66 lots zoned "R1-M" Residential Single-Family (Medium);
  - 48 lots zoned "R2" Residential Two-Family
  - Two public reserve lots zoned "PR-1" Parks and Recreation 1 (Neighbourhood).
  - A network of public streets connected to Renshaw Boulevard, Desrosiers Drive, a cul-de-sac and a public lane.

Figure 3: Original plan of subdivision under file DASZ 10/2017

COLLABORATION

During the application process, the Urban Planning Division brought to the applicant's attention how the required rear yard (per existing Zoning Agreement) would affect the buildable area of a few of the proposed lots backing unto the CNR Rail line.

In response to the aforementioned, the applicant made some adjustment to their subdivision plans by reducing the initial number of proposed lots within the plan area.

COMPLETE COMMUNITIES DIRECTION STRATEGY:

The subject site is in an “Area of Stability” policy area of *OurWinnipeg* and *Complete Communities*. Key Direction in these documents that applies to Area of Stability states: “Enhance the quality, diversity, completeness and sustainability of stable neighborhoods and expand housing options for Winnipeg’s changing population.”

Under the *Complete Communities Direction Strategy*, relevant policies for Area of Stability that apply directly to the proposed development include:

- Support the subdivision of a parcel of land into two or more lots when done in a context sensitive manner.

  The proposed subdivision and rezoning of subject site is consistent with the projected built form and character of the Canterbury Park Neighbourhood

- Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complimentary to the existing scale, character and built form.

  The creation of low-density residential lots (R1-M & R2) is consistent with the above policy.

- Promote the form of buildings and spaces that are sensitive to the community context and address the transition between new and existing developments.

  Given the types of zoning lots being created, the construction of single-family dwelling and duplexes, townhomes on the proposed lots will be consistent with the projected built form and scale in the neighborhood.

- Where intensification/densification of housing occurs, ensure that the types of open space – passive, active, and plazas – respond to community needs.

  The creation public reserve lands as part of the subject proposal is consistent with the above policy.

- In order to meet the full life-cycle of housing needs within the community, promote a mix of housing types and tenure, such as duplexes, low rise apartments, secondary suites, semi-detached homes, townhouses.

  The construction of single-family dwellings, duplexes and townhouses is consistent with the above policy

In general, the residential zoning districts being proposed would facilitate;

- **A diversity of housing types; and**
- **A built form and scale that is consistent with *Complete Communities* policies and compatible with the Canterbury Park Neighbourhood plan.**

REZONING

- The applicant intends to rezone the property to “R1- M”, “R2”, “PR1” and “PR2”.
- The “R1-M” Residential Single-Family Medium is intended to accommodate primarily single-family residential development in lower density areas.
- The “R1-M” district requires: a minimum lot area of 3,500 sq. ft., side yard setback of 4 feet, a front yard of 15 feet (note c & d) and a rear yard setback of 25 feet. The maximum building height is 35 feet, minimum reverse corner side yard of 4 feet and minimum lot coverage of 45%.
- The “R2” Residential Two-Family is intended to accommodate the development of single- and two-family units and where appropriate limited multi-family units in lower-density areas.
- The “R2” district requires: a minimum lot width of 25 feet, a minimum lot area of 5,000 sq. ft. (2,500 sq. ft. per dwelling unit for two family; 800 per dwelling unit for multi-family), side yard setback of 4 feet, a front yard of 20 feet and a rear yard setback of 25 feet. The maximum building height is 35 feet and the reverse corner side yard of 10 feet.
- The “PR1” is intended for sites that are generally passive neighbourhood and community parks and facilities with predominantly pedestrian and cyclist access. These sites may provide unstructured drop-in play and recreation opportunities, including play structures, passive parks, plazas and natural areas. Generally, there are no parking facilities associated with these uses. These parks and open spaces typically occur in a residential neighbourhood or riverbank context and are generally accessed by residential street.
- The “PR2” is intended for sites that include community recreation facilities and parks that are accessed by a mix of pedestrian and vehicular traffic. These sites may provide active programs and activities, including community centres, hockey pens, arenas, indoor soccer, wading pools, pray parks, skateboard parks and athletic fields. Parking facilities ranging from 10 to 100 stalls may be associated with these uses. These parks and facility typically occur along collector streets.

COMPATIBILITY WITH SURROUNDING USES

- The subject property falls within the Area of Stability of *Complete Communities Direction Strategy* which supports low to moderate change in low-density neighbourhoods through developments and redevelopments that is complementary to the existing scale, character and built form. The proposed “R1-M” and “R2” lots and the future construction of single-family, two-family and town homes are consistent with the above policy.
- The Urban Planning Division believes that subdividing and rezoning the subject lands to “R1-M” and “R2” and the future construction of single-family homes and duplexes/town homes will be consistent and compatible with the overall future development of the Canterbury Park Neighbourhood.
- It is also important to note that the subject proposal will facilitate an increase in housing supply, both in terms of types and tenure in this part of Winnipeg.

- The required buffering of all the residential uses from the rail line right-of-way (as per the zoning agreement under DASZ 10/2017) along the southern limit of the site will mitigate any potential adverse effect of the rail operation on the proposed residential uses.
- The proposed park spaces, which serves as a communal amenity will facilitate opportunities for gathering and community interaction.
- The Urban Planning Division is supportive of the subject application.

LAND DEDICATION

- When a developer rezones and/or subdivides a parcel of land, they are required to put in an application with the City of Winnipeg.
- As a condition of rezoning or subdivision, a developer is required to contribute a portion of the land to be developed to the City for parks purposes.
- The land dedication requirement as applicable to the subject site is itemized in Schedule "B" (Report of the Administrative Coordinating Group) as per DASZ 10/2017 (AG 10/2017).

RECOMMENDATION

The Urban Planning Division recommends **approval** for the following reasons:

- The proposed development is consistent with the *Complete Communities Direction Strategy* in that the proposed subdivision/rezoning would create residential zoning lots that will facilitate a mix of housing typologies in this part of the city.
- Thus, the creation of "R2" Residential Two-Family district and "R1-M" Residential Single-Family district will facilitate a development that is compatible with the projected Canterbury Park neighbourhood development.
- The proposed subdivision and rezoning will not have any adverse effect on potential future development in the area.
