Subject: Vote re Parkland in the Corydon Osborne Community

I object to the above designated parkland site being re-zoned to allow a commercial building to be constructed on that land.

Besides the fact that the property in question is very close to the Red River and the cycling/walking path along the river, the lot size is not conducive to a high density structure being built there.

Also, there is virtually little street parking in the area given its proximity to the underpass for the railroad and its proximity to Confusion Corner. A commercial building with its attendant people and cars would put a greater strain on traffic flow.

We need that space to be kept as parkland for future generations.
