Subject: please say no to sale of 409 Mulvey

To Mayor Bowman & Councilor Rollins:
I just learned this evening that the city-owned land at 409 Mulvey is being consider for sale rather than being developed as a green space for the people who live in the neighborhood.
As a long-time resident in downtown (since 1997), I have been saddened to see so many green spaces lost to development. If you want people to live downtown (not just have a mailing address, but actually live and be a neighborhood) green space to play and gather is essential. The greenspace corridor from the Norwood bridge to Osbourne is already isolated by the rapid transit corridor. As a cyclist I appreciate having a section to travel that is separate from vehicle traffic, but there are sections of that trail that I feel uncomfortable walking alone. Having 409 Mulvey developed as a community greenspace would not only change that section of the trail, but improve the feel of the whole trail from Main Street to Churchill Drive (or to the trail along the Winnipeg Transit Fort Rouge Garage).
In making your decision tomorrow, please consider those who live in the neighborhood and not just those who own property.
Respectfully yours,
Elizabeth Maw
