**Subject:** EPC committee support for wed oct 20th

Hi,

I hope this email finds you well.
I apologize for the late submission but am hopeful I can still have some impact to the EPC meeting tomorrow.

I would like to voice my support for active transportation motions referencing the Standing Policy Committee on Infrastructure Renewal and Public Works – October 12, 2021, item #'s 7, 8, and 9.
I am specifically concerned about the item requesting to allocate 10% of the road renewals budget to new active transportation improvements in the 2022 budget.
Jeff Browaty does not represent my interests in this matter. I am in full support of these motions and encourage other councillors to support this as well. Infrastructure for active transportation has seen funding drop in the last few years and our city will not meet the goals we set for reducing emissions without providing safe alternatives for pedestrians and cyclists. Active transportation isn't used just for recreational purposes but the network of bike lanes need to be connected enough to serve the purposes of commuting and running errands. Having these options open makes it easier to keep my car off the road and choose alternative options.
Roads should be for the community and not just for the people passing through.

Thank you

Theo Jerrett-Enns
