1. This is very much in keeping up with what we are seeing along Transcona Boulevard. This applicant could have sought a multi-family, but has chosen to do the side-by-sides and single-family homes. I think it is fitting and appropriate for this area.

REASONS FOR REPORT

This report is required because a proposed plan of subdivision and rezoning application requires a public hearing as per the *Development Procedures By-law* and *The City of Winnipeg Charter.*

IMPLICATIONS OF THE RECOMMENDATIONS

If the recommendations of the Urban Planning and Design Division are concurred in, the proposed plan of subdivision and rezoning can proceed in accordance with Schedule "A" to this report.

CONSULTATION

The Land Development Branch was consulted in the preparation of this report.

OURWINNIPEG POLICY ALIGNMENT

The Key Direction of *OurWinnipeg* that applies to the subject site states:

> *Enhance the quality, diversity, completeness and sustainability of stable neighbourhoods and expand housing options for Winnipeg's changing population.*

The proposed plan of subdivision and rezoning application aligns with this Key Direction because the associated development proposal would increase the supply of new single- and two-family dwellings in a location that has the full range of municipal infrastructure.

WINNIPEG CLIMATE ACTION PLAN ALIGNMENT

Strategic Opportunity # 4 of the *Winnipeg Climate Action Plan* states: "*Facilitate compact, complete development and increase density*."

The proposed plan of subdivision and rezoning application aligns with this Strategic Opportunity because, as stated above, the associated development proposal would increase the supply of new single- and two-family dwellings in a location that has the full range of municipal infrastructure.

DESCRIPTION OF THE PROPOSED DEVELOPMENT

The plan of subdivision and rezoning application (DASZ 38/2021) would create a new plan of subdivision and would rezone the proposed lots. Figure 4 shows the sizes, widths and zoning of the proposed lots.

The proposed development includes:

- The removal of the existing structures;
- The construction of a two-storey, single-family dwelling on each proposed "R1-M" Residential Single-Family (Medium) lot (proposed lots 1, 2 and 3);
- The construction of a two-storey, side-by-side two-family dwelling on proposed lots 4 and 5 and another on Proposed Lots 6 and 7 (all of which to be zoned "R2" Residential Two-Family).

The submitted plans show that the proposed buildings would be somewhat different from one another and that three types of exterior cladding would be used.

<u>The Special Boundary Conditions of Zoning By-law 200/2006 have to be varied to accommodate the proposed lots. An application and an administrative report have been submitted. The report recommends approval of the application (DAV 21-197091D).</u>

ANALYSIS AND ISSUES

OURWINNIPEG AND COMPLETE COMMUNITIES

OurWinnipeg is the City's development plan and *Complete Communities* is a "Direction Strategy" of *OurWinnipeg* that provides additional directions and policies on land use and development in the city.

The Key Direction of *OurWinnipeg* and *Complete Communities* that applies to the Recent Communities Policy Area is in the Areas of Stability sections of these plans. It states:

> *Enhance the quality, diversity, completeness and sustainability of stable neighbourhoods and expand housing options for Winnipeg's changing population.*

Certain policies under Direction 1 of the Areas of Stability section of *Complete Communities* apply to the proposal. They state:

- *Support low to moderate change in low-density neighbourhoods through development and redevelopment that is complementary to the existing scale, character and built form.*
- *Promote the form of buildings and spaces that are sensitive to the community context and address the transition between new and existing developments.*
- *Encourage intensification to occur at centres and along corridors.*
- *Focus housing growth to areas that have municipal service capacity to support intensification, in addition to commercial and recreational amenities.*
- *Support Complete Communities by ensuring diverse and high quality housing stock.*
- *In order to meet the full life-cycle of housing needs within the community, promote a mix of housing type and tenure, such as duplexes, low rise apartments, secondary suites, semi-detached homes, townhouses.*

The plan of subdivision and rezoning application and the associated development proposal comply with the aforementioned Directions and policies for the following reasons:

- The proposed “R1-M” lots (which are to be 3,838 square feet and 33.4 feet wide) and the proposed “R2” lots (which are to be 2,876 square feet and 25 feet wide) would be similar in size and width as nearby lots with the same zoning, as shown on Figure 3.
- The proposed development would also be similar to existing single- and two-family dwellings nearby;
- The proposed buildings would look somewhat different from one another and the exterior walls would consist of three types of exterior cladding (cultured stone, stucco and vertical siding);
- The “R2” lots would front onto a collector road;
- The ACG Report (Schedule “B” to this report) identifies the developer’s obligations with-respect-to the provision of municipal infrastructure; and
- The proposed development would add to the supply of new single- and two-family dwellings in the area.

TRANSCONA WEST AREA STRUCTURE PLAN

As previously stated, the subject site is partly in an Existing Low Density Residential Policy Area and partly in a Proposed Low Density Residential Policy Area of the *Transcona West Area Structure Plan*.

Also previously stated is that a Proposed Low Density Residential Policy Area is east of Peguis Street and another is north of Devonshire Drive West.

Given that the existing single-family dwelling is proposed to be removed and that three single-family dwellings and two two-family dwellings would be built on the site, the increase in the number of dwelling on the site would be six.

The applicable density policies of the *Transcona West Area Structure Plan* state the following:

6.1.2 Policies

(1) Low Density Residential Areas

(a) The required residential density to be achieved within the low density residential areas shall be a minimum of 10.0 units per gross developable hectare (4 units per gross developable acre) and a maximum of 17.3 units per gross developable hectare (7.0 units per gross developable acre).

(3) Application of Density Range

(a) At the Development Application stage, the density requirements of subsection 6.1.2(1) shall apply to…

(ii) Each Development Application submission in the community unless a developer can demonstrate that any inconsistency with the density requirements can be addressed through a future Development Application submission in the community.

The size of the site, measured in gross developable acres, is the site area (0.53 acres) plus half the area of the part of Golden Boy Lane that is north of the site (0.07 acres). Therefore, the proposed residential density is 11.7 dwelling units per gross developable acre.

However, if we consider the larger context, consisting of the Existing and Proposed Low Density Residential Areas north of Ravelston Avenue West and west of Peguis Street, the Proposed Low Density Residential Area east of Peguis Street and the Proposed Low Density Residential Area north of Devonshire Drive West, the total residential density, including the additional six units on the site, would be 6.2 dwelling units per gross developable acre.

Therefore, the proposal complies with the *Transcona West Area Structure Plan*.

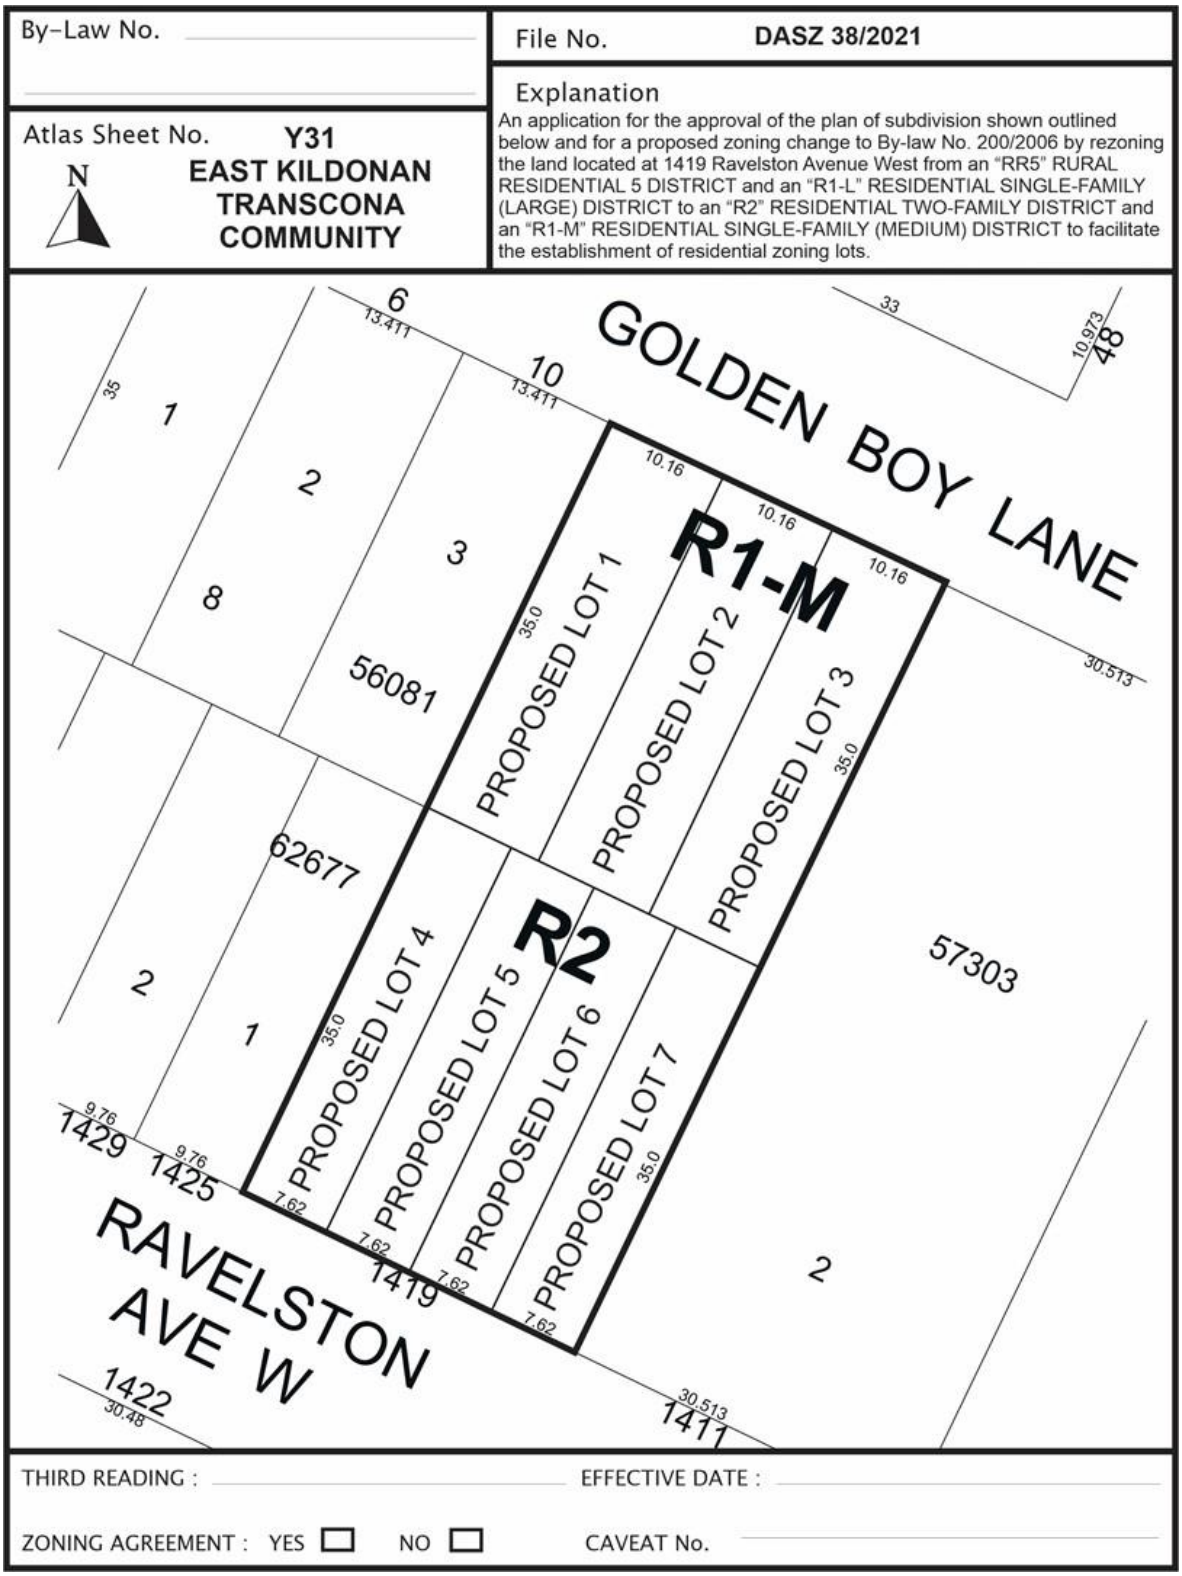

REASONS FOR THE RECOMMENDATIONS

The Urban Planning and Design Division recommends approval of Schedule “A” to this report because the proposed plan of subdivision and rezoning, and the associated development, comply with *OurWinnipeg*, *Complete Communities* and the *Transcona West Area Structure Plan*.
