Delegation information
Committee: Council
Committee - council: Opposed to the recommendations
Committee - other: N/A
Agenda item (number and title): EPC 5,15, IRPW 2,5 water #1

Service inquiry: Register as a Delegation, Submit Comments in writing
Participation preference: Via Zoom
Comments in writing:

On water #1, sale of landfill gas, I see that we at last have some numbers. I see also that no one pursued the idea of using this very dilute methane stream to generate electricity, with far less expensive clean-up. I did this sort of estimate and cost analysis for many years for natural gas consumers and producers like Imperial Oil. In those days, companies would dismiss an idea, if its economics were as dismal as this one. When the interests of stakeholders are respected, you would never spend $10m and $2m every year, while expecting income of only $300k. This is a monstrous use of taxpayer money, for no tangible benefit.
