CCFM – CoolStreetsWPG 2022 Seine River Pedestrian Bridge Improvements

LDR Funding Request Items 1 to 6.

1. CoolStreetsWPG is a community project continuing for the sixth year (2022). Last summers' (2021) project saw new pedestrian bridge improvements to five bridges over the Seine River & three bridges over Bunn's Creek. The project saw a total of 8 artists and multiple volunteers spend a total of 500+ hours creating the murals which saw countless families, kids, daycares, running groups & bike tours explore and interact with the project.

   Thanks to the overwhelming success of the past five years of projects totaling thirty-two installations we continue to be encouraged by Winnipeggers to create new ephemerals works to keep motivating residents to actively explore our city, rivers & creeks in theses pandemic times. It is for these reasons that we are working to create a new 2022 edition of the project on the five Seine River bridges & three Bunn's Creek bridges with plans to expand to more neighbourhoods in the city.

   New installations on the Seine river bridges for summer 2022 will once again be a great compliment to the highly successful Open-Streets, Enhanced Cycling Routes on Youville St & Egerton Rd as well as the highly utilized loop down Niakwa Trail & Niakwa Rd created by the active transportation tunnel opened under Fermor in 2020.

2. A conceptual presentation has been provided to illustrate and recap our past project. We will be reaching out in various ways to other community committees, community organizations & businesses for potential funding partners and sponsors to expand the scope of the project if possible.

3. Councillor Allard & Chambers have advised us of their support to re-apply for funding and we have also submitted our conceptual presentation to Councillor Mayes for their support at committee. We will follow up for new approvals from the City of Winnipeg, Public Works, Parks and Open Spaces Division and Engineering Division, specifically: Darren Burmey who provided approvals for the prior projects.

4. Scope of Work is to install child friendly designs on the five pedestrian bridge walking surfaces using approved designs and products as per any City of Winnipeg Parks and Open Space requirements. See attached pdf for locations of project.

5. Labour & Materials = 13 500$
   Signage, Marketing, Contest Materials & Cleanup = 3000$
   Preliminary Total 16 500$

6. Installations are to happen in June dependent upon any spring flood waters.
   On-Site removal if and when required for any location by the City of Winnipeg would occur spring 2023.
