**Subject: Short Time Rental Regulations**

Hi Jennifer,
My name is Ferdinand Ramos. I'm an Airbnb cleaner. I've been cleaning Airbnb for more than 3 years now. Cleaning Airbnb is life for me cause this is where I'm getting my all the financial support that my family needs. I'm a father of 2 and a foster dad for 4 children. My job at Airbnb gives me the freedom to give my best of care for these children. These children that we foster have no other place to go. They were all been rejected by so many foster families that's why we decided to take care of them and Airbnb is my only way to help and keep them. Airbnb job is only way for me to give my children their needs for emotional, financial, social and times to spend with them. I believe that children is the hope of the future cause they can bring social reform and can improve the condition of the society. If city will ban Airbnb, they are not only taking away the job from so many workers but taking away their life. Losing this job is like taking away the air that my family, my kids are breathing. What will happen to our future? How can I feed them? Some might say change profession or career. Not everyone are fortunate enough to get almost everything they want and I'm the one that can't have everything. I could change my path but I don't want to leave my 4 foster children behind who are depending on my family. Thank you!
