9. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

Note: The wording in bold and italics denotes amendments made by the Community Committee.

The Riel Community Committee provided the following supporting reasons for its recommendation:

1. The development itself is a good densification of that major corridor along St. Anne's and St. Mary's. I voted for many of these. I think that's where we should be densifying so I have no issues with that.

2. The neighbours might not be pleased with the parking, on the other end if there's a lane to be obtained out of that, then I think that's a good benefit for the community.

3. I think its appropriate to seek paving of the lane. This is not going to be doable on some of these variances, some of these 50 foot lots in the middle of a long block on Imperial or something, but here where we've got relatively a large percentage of the block soaked-up by this one property and the lanes are shorter because they're north south – yes. I will tend to keep doing this.

9. That the proper officers of the City be authorized to do all things necessary to implement the intent of the foregoing

REASON FOR THE REPORT

- The applicant is proposing to rezone the site from 'RMF-S' Residential Multi-Family Small to 'CMU' Commercial Mixed Use to allow for the construction of a mixed-use residential and commercial building.
- Rezoning applications require a public hearing as per the *Development Procedures By-law* and *The City of Winnipeg Charter.*
- The Report is being submitted for the Committee's consideration of the development application at the public hearing.

IMPLICATIONS OF THE RECOMMENDATIONS

If the recommendations of the Urban Planning Division are concurred in, the subject property will be rezoned from 'RMF-S' to 'CMU'.

RECOMMENDATION: Approval with conditions

SITE DESCRIPTION

- The subject property is located on the west side of St. Anne's Road between Victory Place and Sherwood Place in the Varennes neighbourhood of the St Vital ward.
- The subject site is approximately 5,389 square feet in area. It is occupied by a one-storey single-family house built in 1952.
- The subject property is located along an "Urban Mixed Use Corridor" under the *Complete Communities Direction Strategy 2.0*. The property is zoned 'RMF-S' Residential Multi-Family Small.

SURROUNDING LAND USE AND ZONING (See Figure 2)

North: Single family residential house on land zoned Commercial Neighbourhood ('C1'); then Victory Place.

South: A single family residential house on land zoned Residential Multi-Family Small ('RMF-S'); then a 12-unit multi-family residential building on land zoned Residential Multi-Family Large ('RMF-L').

East: St. Anne's Road; then stand-alone commercial and mixed use development on land zoned Commercial Community ('C2').

West: Public lane; then single family residential uses on land zoned Residential Single-Family Medium ('R1-M').

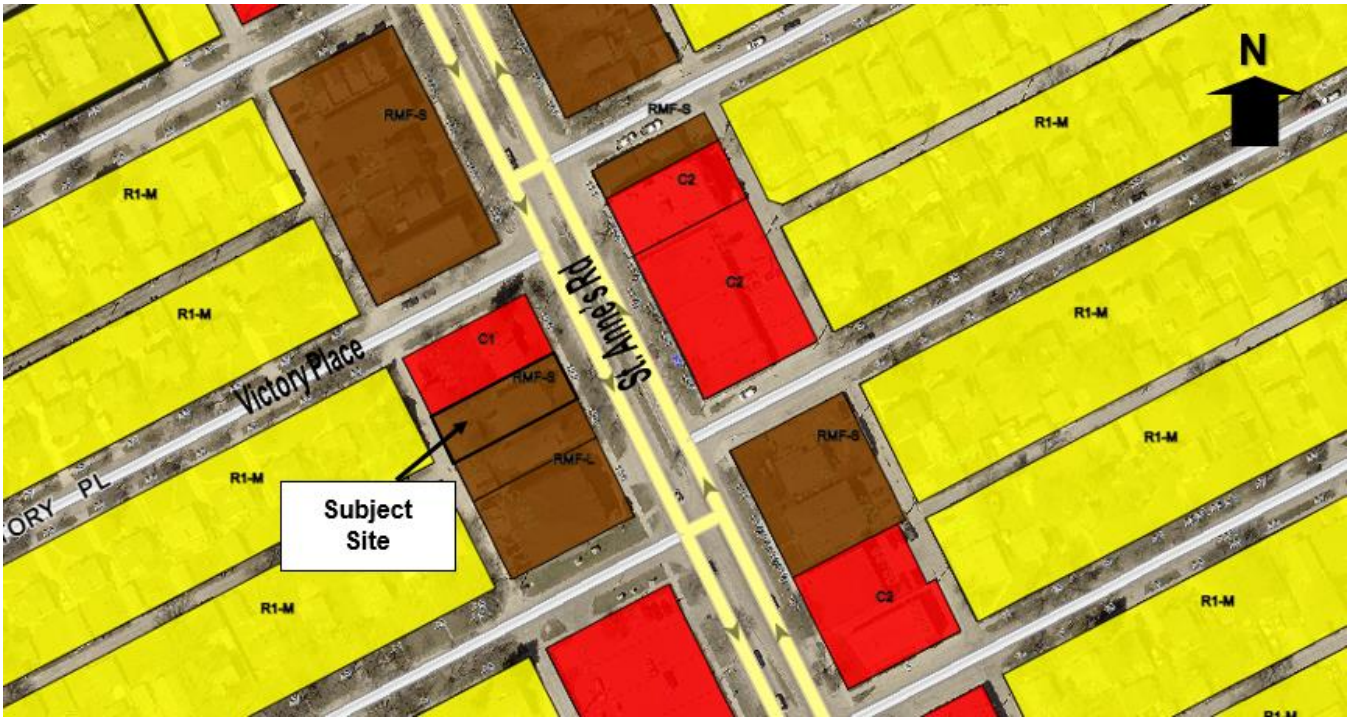

Figure 2: Zoning of the site and surrounding area.

DESCRIPTION OF THE PROPOSED DEVELOPMENT

- The applicant is proposing to rezone from 'RMF-S' (Residential Multi-Family Small) to 'CMU' (Commercial Mixed Use) for the purposes of constructing a 3-storey mixed use building. The building will encompass 6 residential units and one small scale commercial unit on the ground floor.
- A total of five (5) parking stalls will be provided at-grade behind the building and accessed directly from the public lane.
- As part of the 5 parking stalls, there will be 2 accessible parking stalls.
- Landscaping is proposed in the front yard including two Amur Maples trees, 12 shrubs (i.e., Pygmy Caragana), and primarily river rock as ground cover.
- A total of ten (10) bicycle parking stalls will be provided. Five bicycle parking stalls will be located near the entrance to the commercial unit and five bicycle parking stalls will be located in a storage room located at the southwest corner of the building on the ground floor. The garbage and recycling bins are also proposed to be located in the storage room.
- The proposed development requires variances for yard setbacks as well as the access to and buffering of the parking area (see associated variance application and planner's report for DAV 22-177281\D).

COLLABORATION

With the Public Service

- The Urban Planning and Design Division has been in communication with the applicant about the proposal via email in which the details of the proposed development were discussed including additional refinements to the design.

With the Public

- The applicant did not indicate in the application submission whether any public consultation was undertaken.

ANALYSIS AND ISSUES

OURWINNIPEG AND COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

- *The Complete Communities Direction Strategy 2.0* (CCDS 2.0) is a citywide secondary plan that guides growth, development, and land use in the city of Winnipeg.
- This subject property is located along a portion of St. Anne's Road that is designated as an Urban Mixed-Use Corridor under the *CCDS 2.0*. Urban Mixed-Use Corridors are targeted segments of major roadways that, due to their excellent transit service via the Primary Transit Network as well as robust commercial opportunities, provide the best opportunity for mixed use intensification outside of the Downtown. They will provide a wide range of transportation options and will be vibrant destinations for people to live, work, and play. They will be designed to provide a comfortable pedestrian environment and attractive public realm.
- With regard to this proposal, the key policies guiding the development along Urban Mixed Use Corridors include:

  3.1 Ensure that development on Urban Mixed Use Corridors is designed to prioritize a comfortable pedestrian environment and attractive public realm through the use of design elements which may include, but are not limited to the following:

  3.1.1 Providing minimal building setbacks from the public right-of-way to define the street edge.
  3.1.2 Having entrances provide direct access to the public sidewalk.
  3.1.3 Promoting a fine-grained and transparent street-level façade with active ground floor uses.
  3.1.4 Encouraging balconies and public spaces, such as plazas, patios, or other pedestrian amenities.
  3.1.5 Minimizing impacts of vehicular access and parking on the pedestrian environment by having vehicular access off of existing lanes.
  3.1.6 Encouraging the location of parking above- or below-grade, or behind the primary building. Parking located beside the building may be acceptable if the parking area occupies a minimal area and high-quality screening from the public right-of-way is provided.
  3.1.7 Promoting pedestrian-scale signage.

  3.2 Fine-grained local commercial uses and vertical mixed-use buildings with ground floor commercial uses will be encouraged.

4.0 Use Corridors to provide local commercial amenities and opportunities for the surrounding neighbourhood and community.

CITY OF WINNIPEG ZONING BY-LAW 200/2006

ZONING

- Currently the lands are zoned 'RMF-S' Residential Multi-Family Small. The RMF zone is intended to accommodate the development of multi-family units in areas with medium to high residential densities. The dimensional standards for multi-family structures in the 'RMF-S' zone are: a minimum front yard of 20 feet; a minimum rear yard of 25 feet; a minimum interior side yard of 4 feet, a minimum corner side yard of 5 feet and, a maximum building height of 35 feet. The minimum lot area is 9,000 square feet and the minimum lot area per dwelling unit is 1250 square feet.
- The applicant is proposing to rezone the property to 'CMU' Commercial Mixed Use. The 'CMU' zone is intended to provide for community-serving mixed use development at a higher scale than is appropriate for neighbourhood locations. The district is intended to include attractive commercial, institutional, recreational, and service facilities needed to support surrounding neighbourhoods and the community at-large. Although the area, site, or building should have a predominantly commercial character, multi-family housing may be incorporated within the district, and development should facilitate pedestrian connections between residential and non-residential uses. The dimensional standards for commercial uses in the 'CMU' zone are: a minimum front yard of 10 feet to open parking and no front yard to a building wall; a minimum rear yard of 25 feet; no side yard requirement and, a maximum building height of 60 feet. The dimensional standards of the 'RMF-M' zoning district apply to residential multi-family uses in the 'CMU' zone including: the front yard setback is based on an average of the front yard setbacks of existing residential development on the subject block; a minimum rear yard of 25 feet; a minimum side yard of 8 feet (where the building is more than one storey in height the required interior side yard increases by 2 feet for each storey above the ground floor to a maximum of 20 feet) and, a maximum building height of 60 feet. The minimum lot area is 9,000 square feet and the minimum lot area per dwelling unit is 800 square feet.

Reason for the Rezoning

The applicant is proposing to rezone from 'RMF-S' to 'CMU' to allow for the construction of a new 3-storey mixed use building. The building will encompass 6 residential units and one small scale commercial unit on the ground floor.

CONSISTENCY WITH *CCDS 2.0* AND SURROUNDING NEIGHBOURHOOD

- As noted above, the subject site is located along an "Urban Mixed Use Corridor" policy area under the *Complete Communities Direction Strategy 2.0* where vertical mixed-use buildings with ground floor commercial uses are encouraged. The subject proposal to construct a 3-storey mixed use building with a commercial unit on the ground floor and 6 residential units above aligns completely with the policies directing development along "Urban Mixed Use Corridors".

- It is also noted the site has access to quality transit service and the Winnipeg Transit Master Plan proposes significantly improving the all-day frequency of transit service on St. Anne's Road over the next 5 years. The site is also within walking distance to a number of commercial amenities including a major grocery store and is located in the St. Vital Business Improvement Zone.
- The applicant has submitted a design that supports a high quality, pedestrian-oriented urban environment. More specifically, the building and site design encompass the following considerations:
    - a strong pedestrian-oriented ground floor design that incorporates a small scale, fine grained commercial storefront with large transparent windows and a prominent front entrance;
    - units with balconies that face St. Anne's Road helping to add "eyes on the street" which can improve the perception of safety at the street level;
    - the parking area is concealed from street view by the building;
    - the building incorporates a quality façade design with varying articulations, a combination of cladding materials and colours which helps to break-up the massing of the building and enhance the overall look of the street edge along St. Anne's Road.

RECOMMENDED ZONING AGREEMENT

Plan Approval

The Urban Planning Division is recommending that final plans be submitted to the Director of Planning, Property and Development and Riel Community Committee for review prior to the issuance of a development permit on the lot. The inclusion of this clause will allow the Urban Planning Division and the Riel Community Committee to review final plans and design details before any future development takes place on the site. The expectation for the Plan Approval will be that the final plans are consistent with those submitted as part of the DASZ application. The Urban Planning and Design Division will be looking for some refinements to the landscaping plan including the provision of raised edging along the front property line in order to help prevent the proposed river rocks from spreading onto the public sidewalk.

No vehicular approaches

To help ensure the safety and comfort of pedestrians and cyclists is maintained and recognizing the subject property has access to a public lane, the Public Service is recommending that no private vehicular approaches be permitted on St. Anne's Road.

RECOMMENDATION

The Urban Planning Division recommends **approval** for the following reason:

- The proposal is consistent with the policies guiding development along “Urban Mixed Use Corridors” under the *Complete Communities Direction Strategy 2.0* where vertical mixed-use buildings with ground floor commercial uses encompassing a pedestrian-oriented design are encouraged.

SCHEDULE B

REPORT OF THE ADMINISTRATIVE COORDINATING GROUP

RE: PROPOSED REZONING OF LAND LOCATED AT 122 ST. ANNE'S ROAD

The Administrative Coordinating Group (ACG) reviewed the servicing requirements for DAZ 219/2022. The Developer should take into consideration the following servicing and design requirements and considerations in the redevelopment of the site:

Section I – General Comments

1) The Water and Waste Department wishes to advise that there is adequate water servicing for the proposed development based on the development plans provided. Additional review will be required by their Department should the plans of development change during the design process.

2) The Urban Forestry Division wishes to advise that the Developer is required to preserve and protect existing mature trees that are within City-owned land, including those immediately adjacent to the subject site, and within the right-of-way. The Developer shall adhere to the City's Tree Protection Specifications:

   https://winnipeg.ca/publicworks/parksOpenSpace/UrbanForestry/PDF/Tree_Removal_Guidelines.pdf

   The Developer will be required to compensate the City for any damage or removal thereof. The removal of City-owned trees must be pre-approved by Urban Forestry.

Section II - Servicing Considerations

1) Combined Sewer District

   The proposed development is located in a combined sewer district; the sum of the wastewater and land drainage runoff peak discharge from the proposed development cannot exceed the allowable discharge rate:

   i. The allowable discharge rate will be the sum of the existing peak wastewater and the peak land drainage discharged.

   ii. The peak land drainage discharged from the site must be based on a c-value of 0.35, with a 5 year rainfall event applied.

   iii. The existing and proposed peak wastewater discharge must be estimated using the Wastewater Flow Estimation guidelines found on the City of Winnipeg website (http://winnipeg.ca/waterandwaste/dept/wastewaterFlow.stm), unless otherwise approved.
