Agenda item (number and title): Regulating Short-Term Rentals Update

Service inquiry: Submit Comments in writing
Participation preference: N/A
Comments in writing: Hello, I wanted to say few words about proposed rules to Short Term Rentals. I work as cleaner for 2 Airbnb properties while also taking care of my young children. We don't have permanent child care and with flexible cleaning schedule, I am able to make additional income for my family. I clean single houses in residential areas in St Boniface and St Vital that is close to my home. I often speak with neighbors of one of the Airbnb houses I clean, and they only have good things to say: how it's more secure in the area now with cameras on the Airbnb house, how paths are now always cleaned from snow and how yard is always taken care since its became AirBnb. Previously, whole street always had issue with particular house because of constant parties, noise and crime. This became win win situation for the whole street - why would you want to prohibit it?????Banning residential houses to be part of AirBnb is also going to reduce my family's income while we already struggle with huge increase in mortgage payments and food prices. This is just crazy to me that city councils would take away my job instead of trying to create more jobs for people. City should take care of the residents and restricting Short Term Rentals is doing exact opposite.
Daria Militsin
Resident of St. Vital area
