Comment(s):
All costs associated with this proposal will be borne by the Applicant. There are no financial implications for the City of Winnipeg.

REASON FOR THE REPORT:

All street and lane closings require the consideration of the Community Committee.

HISTORY:
The public road proposed to be closed was dedicated in 1891. The road does not physically exist, and serves no apparent public purpose.
UMA Engineering has submitted an application to acquire the road. Their client intends to incorporate the closed right of way into DASZ 38/2003, an application to subdivide and rezone the adjoining lands.

DISCUSSION:

Administrative Approval

The proposal has been considered by all affected City departments and public utilities. There are no administrative objections to the closing.

Easements

Manitoba Hydro maintains underground distribution in the road. An easement will be required for the maintenance of this plant. No improvements other than paving or fencing will be allowed in the easement area.

Transfer of Road for $1.00, Transfer of Road in Stages

The area of the streets being created in the subdivision exceeds the area of the road to be closed. In accordance with City policy, the road will be transferred to the Developer for $1.00. The City of Winnipeg will retain title to the closed road and transfer the portions required as the individual stages of DASZ 38/2003 are developed.

Transfer of Jurisdiction Over Public Rights-of-Way

The road must be legally closed before it may be conveyed. Title to all public rights of way in Manitoba is vested in the name of the Province. The registration in the Winnipeg Land Titles Office of a closing by-law removes the public right of way status from the land and vests the ownership of the property in the City's name. The City is not entitled to dispose of the land until this has been done.
