Committee: Executive Policy Committee
Committee - council: N/A
Committee - other: N/A
Agenda item (number and title): SPAP

Service inquiry: Submit Comments in writing
Participation preference: N/A
Comments in writing: I would like to urge the committee to include the suggestions from the CEIR report in the SPAP for the four year budget. I appreciate the green initiatives that were included but I really believe the most effective change will come if we approach the problem in an integrated way as the CEIR outlined. The initiatives to make our city more resilient are only going to work if we attack this problem in a systematic and holistic way. If we do not make efforts to reduce greenhouse gases along with promoting alternative energy sources, the efforts will not make any effective change and will be a waste of money and energy. We cannot be cherry picking which initiatives to implement, it has to be a whole effort. Please adjust the budget to include the reduction of GHG so that we can move towards a more resilient city in the face of the climate crisis. We need big changes fast, and we do not have time to wait another four years before making these changes. Thank you.
