CCFM – CoolStreetsWPG 2023 Seine River Pedestrian Bridge Improvements

LDR Funding Request Items 1 to 6.

1. CoolStreetsWPG is a community project continuing for the seventh year (2023). Last summers' (2022) project saw new pedestrian improvements to 8 pedestrian bridges (5 over the Seine River and 3 over Bunn's Creek). The bridge project saw a total of 8 artists and multiple volunteers spend hundreds of hours physically installing the improvements which saw countless families, kids, daycares, walking, running and biking groups and tours explore and interact with the project.

With the enormous success of past six years of projects totaling 58 installations across Winnipeg we are excited to create new ephemeral works to keep motivating Winnipeggers to actively explore our city, rivers & creeks.

New installations on the Seine river bridges for summer 2023 will once again be a great compliment to the highly successful Enhanced Summer Cycling Routes on Youville St & Egerton Rd as well as the highly utilized loop down Niakwa Trail & Niakwa Rd created by the active transportation tunnel opened under Fermor in 2020.

1. A conceptual presentation has been provided to illustrate and recap our past 2022 project. We will be reaching out in various ways to other community committees, community organizations & businesses for potential funding partners and sponsors to expand the scope of the project if possible.

2. We have submitted the conceptual presentation to Councillors Allard, Chambers and Mayes and look forward to their continued support. We will follow up for new approvals from the City of Winnipeg, Public Works, Parks and Open Spaces Division and Engineering Division, specifically: Darren Burmey who provided approvals for the prior projects.

3. Scope of Work is to both maintain some of the existing murals (North St. Boniface, Edgewood/Tremblay) and create new child friendly designs on the pedestrian bridge walking surfaces (Niakwa Rd & John Bruce Rd) using approved designs and products as per any City of Winnipeg Parks and Open Space requirements. See attached pdf for locations of the project (Niakwa Trail bridge scope t.b.d. depending on potential flooding and existing on-site conditions).

4. Labour & Materials = 5000$
Coordination, Signage, Marketing, Prep/Cleanup/Removal = 4000$
Preliminary Total 9000$

5. Installations are to happen in June/July dependent upon any spring flood waters.
On-Site removal if and when required for any location by the City of Winnipeg would occur spring 2024.

CCFM – CoolStreetsWPG 2023 – Bunn's Creek - Pedestrian Bridge Improvements

LDR Funding Request Items 1 to 6.

1. CoolStreetsWPG is a community project continuing for the seventh year (2023). Last summers' (2022) project saw new pedestrian improvements to 8 pedestrian bridges (5 over the Seine River and 3 over Bunn's Creek). With the enormous success of past six years of projects totaling 58 installations across Winnipeg we are excited to create new ephemeral works to keep motivating Winnipeggers to actively explore our city, rivers & creeks.

2. A conceptual presentation has been provided to illustrate and recap our 2022 projects as well as the locations of the 3 bridges over Bunn's Creek in the Kildonan Ward. We will be reaching out in various ways to other community committees, community organizations & businesses for potential funding partners and sponsors to expand the scope of the project if possible.

3. We have submitted the conceptual presentation to councilor Jeff Browaty and look forward to his support. We will follow up for City of Winnipeg approvals to the various Public Works, Parks and Open Spaces Division and Engineering Division staff who provided past approvals. Specifically: Darren Burmey who provided approvals for the prior bridge projects.

4. Scope of Work is to install child friendly designs on the 3 pedestrian bridge walking surfaces using approved designs and products as per any City of Winnipeg Parks and Open Space requirements. See the provided pdf for locations of the project.

5. Labour & Materials = 5200$
Coordination, Signage, Marketing, Prep/Cleanup/Removal = 2300$
Preliminary Total 7500$

6. Installations are to happen in June dependent upon any spring flood waters.
On-Site removal if and when required for any location by the City of Winnipeg would occur summer 2024.

Rachel Lancaster
IG: **@rachel_lancaster_artist**
Facebook: **@rachellancasterart**

Rachel est une artiste autodidacte basée à WPG. Son travail est unique et rempli d'imagination. Elle est une grande adepte du trait noir mélangé à des couleurs vives et audacieuses, prenant ce qui semble ordinaire et le rendant vibrant et extraordinaire. Certains disent qu'il est très distinctif et qu'ils peuvent facilement reconnaître l'art de Rachel des autres. On peut voir les murales de Rachel dans toute la province du Manitoba. Tout ce dont elle a besoin, c'est d'un thé Tim Hortons et de sa peinture pour créer de la magie.

Remerciements

Merci au conseiller Jeff Browaty pour son appui. Le Centre culturel franco-manitobain pour la direction du projet.

À propos de CoolStreetsWPG

Le projet des ponts de CoolStreetsWPG vise à mettre en évidence les avantages des ponts piétons. Imaginez une douzaine de ponts supplémentaires sur les rivières Rouge, Assiniboine et Seine. Avec plus de ponts pour les piétons et les cyclistes, nous pourrions réduire les distances à parcourir pour atteindre nos destinations et transformer nos habitudes de transport.

Organisateur, Stéphane Dorge

Rachel is a self-taught WPG based artist. Her work is unique and filled with imagination. She is a huge fan of black linework mixed with bold and bright colors, taking what seems plain and ordinary and making it vibrant and extraordinary. Some say it is very distinctive and that they can easily recognize Rachel's art from others. Rachel's murals can be seen all over the province of Manitoba. All she needs is a Tim Hortons Tea and her paint to make magic happen.

Acknowledgements

Thank you to Councillor Jeff Browaty for your support. Centre culturel franco-manitobain for shepherding the project.

About CoolStreetsWPG

The CoolStreetsWPG bridge project aims to highlight the benefits of pedestrian bridges in Winnipeg. Imagine a dozen additional pedestrian bridges over the Red, Assiniboine & Seine rivers. More walk/bike bridges would dynamically shift transportation habits by improving access across the rivers.

Mike Zastre
@iron_buddha

Mike est un artiste Métis basé à Winnipeg, qui créé des passerelles vers des mondes alternatifs et peaufine des missives inter-dimensionnelles nocturnes incompréhensibles en formes, en couleurs et parfois même en sons interprétables par les terriens.

Cette œuvre, intitulée **"01100110 01110010 0110100101100101 01101110 01100100 01110011"** essaye de promouvoir d'une façon visuelle l'idéale platonique d'amitié entre les êtres à base de carbone et ceux à base de silicium.

Remerciements

Merci au conseiller Jeff Browaty pour son appui. Le Centre culturel franco-manitobain pour la direction du projet.

Avec plus de ponts pour les piétons et les cyclistes, nous pourrions réduire les distances à parcourir pour atteindre nos destinations et transformer nos habitudes de transport.

Organisateur, Stéphane Dorge

Mike is a Métis artist working primarily from Winnipeg, crafting gateways to alternate worlds and finessing nightly incomprehensible inter-dimensional missives into interpretable shapes, colours and sometimes even sounds for earthlings to enjoy.

This piece, entitled **"01100110 01110010 01101001 01100101 01101110 01100100 01110011"** is meant to visually promote the platonic ideal of friendship between carbon-based and silicon-based lifeforms.

L'inspiration de cette pièce est basée sur le jeu des enfants. Les formes et les lignes ondulées permettent aux enfants de marcher et de sauter de couleur en couleur, de forme en forme. Quelque chose simple, ludique et amusant pour tout le monde.

Remerciements

Merci au conseiller Jeff Browaty pour son appui. Le Centre culturel franco-manitobain pour la direction du projet.

The Inspiration of this piece is based on children's play. The shapes and wiggly lines allow for children to walk and hop from colour to colour, shape to shape. Something simple, playful and fun for everyone.
