## DESCRIPTION OF THE PROPOSED DEVELOPMENT

The applicant is proposing to rezone the subject property from “R1-M” Residential Single-family (medium) to “C1” Commercial Neighbourhood for the purpose of legally establishing a commercial real estate office in the existing dwelling. The dwelling has already been converted to an office and has been used as an office for a number of years. The entrance to the single-storey building is facing Grant Avenue and vehicular parking is accessed via the back lane to the west of the building. The proposed rezoning will legalize the commercial use. Additionally, Variances related to the north side yard and parking area are required. Information on the required Variances can be found in the Administrative Report under file DAV 23-116030/D.

## ANALYSIS AND ISSUES

### COLLABORATIVE PLANNING

The applicant contacted the Planning, Property and Development Department to garner support for the proposed rezoning. The applicant had previously contacted the Department in 2018, which was supportive of the application at that time. The Department indicated support once again for the proposal under the new *Complete Communities Direction Strategy 2.0* policies, dependent on some modifications to the site including the provision of new landscaping and accessible parking. The changes were made to the satisfaction of the Department.

### COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

The City of Winnipeg’s development plan, *OurWinnipeg*, and its citywide secondary plan, the *Complete Communities Direction Strategy 2.0* (CCDS 2.0), lay out the framework for how our City will grow over the next 25 years and how all other plans and City Council decisions must be consistent with it. The subject site is designated “Established Neighbourhood - Mature Community” under CCDS 2.0 and applicable goals and policies that apply to the proposal are noted below.

*Goal 2*

*2.2 Encourage the location of commercial or mixed-use buildings at or near the front and corner side property lines to create a pedestrian orientation.*

*Building design*

*2.5 Encourage a variety of architectural styles.*

*2.6 Encourage building design to include a range of architectural features that create visual interest and positively contribute to the visual aesthetics of the street and neighbourhood.*

*2.8 Buildings with commercial uses should be designed to support pedestrian activity by providing building elements that increase visual interest which may include, but are not limited to, the following:*

*a. Direct pedestrian access to main building entrances from the street;*

*b. Transparent storefront displays;*

*c. Human scaled signage; and*

*d. Decorative lighting, awnings, benches and other pedestrian oriented amenities.*

*Massing and scale*

*2.12 New development should respect and complement the existing character of the built form of surrounding properties.*

*2.14 Avoid buildings that create long blank walls facing public streets.*

*Parking and loading*

*2.16 For properties with public lane access, vehicular access should be taken from the public lane in order to:*

*a. Reduce potential conflict between pedestrians using sidewalks and motor vehicles crossing the public right-of-way to access private property;*

*b. Preserve green space and protect existing trees that can be impacted by the establishment of front approaches and corresponding private driveways; and*

*c. Prevent fragmentation of the public boulevard in order to better accommodate on-street motor vehicle parking and public snow clearing.*

*2.17 Locate commercial, mixed-use, or multiple family residential parking underground or behind buildings in order to create a more pedestrian-oriented built form. Active uses should be located at grade when these buildings face public streets.*

*2.18 Strongly discourage locating surface parking lots between streets and building fronts.*

*Site design*

*2.22 Create or reinforce compact, pedestrian-oriented urban development patterns by ensuring the siting, form and scale of new development has a strong relationship to the street, public spaces and amenities in a way that is consistent with neighbourhood context.*

*Goal 4*

*4.0 Ensure neighbourhoods accommodate a range of commercial services and amenities within walking distance to meet daily needs.*

*General policies*

*4.2 In order to protect the vitality and viability of existing commercial areas, encourage the redevelopment and infill of existing commercial areas as the preferred method of accommodating new commercial development.*

*4.4 New commercial development should be complementary and context sensitive to nearby uses.*

*4.8 Commercial signage should be pedestrian-oriented and contextually sensitive to adjacent uses.*

*Mature Communities policies*

*4.10 Consider the establishment of new neighbourhood-focused, small scale commercial uses where at least one of the following criteria are met:*

a. *The property is a corner lot fronting a collector or arterial street;*
b. *The property abuts an existing commercial use on a collector or arterial street;*
c. *Immediately adjacent uses render the subject property unsuitable for residential development; or*
d. *The property contains existing non-residential uses or buildings that were not designed to accommodate residential uses.*

*4.11 Conserve traditional, fine-grained commercial store fronts where possible.*

The proposal is consistent with CCDS 2.0 in the following ways:

- The site is a corner lot that directly abuts Grant Avenue, which is an arterial street.
- The site also directly abuts other commercial uses on Grant Avenue, making the proposed rezoning an expansion of an existing commercial node.
- The proposal represents adaptive reuse of an existing residential dwelling.
- The site provides ample landscaping in exceedance of the minimum requirements.
- The building is appropriately scaled and contains quality façade materials and signage.

REZONING

- The applicant is proposing to rezone the lands to “C1” from its existing “R1-M” zoning to legally establish a commercial office use. . Commercial uses are not permitted in “R1.”
- The “C1” district is intended to accommodate small, compact commercial uses within or surrounded by residential areas that are attractive and compatible in scale and character with surrounding residential uses, to serve the convenience needs of the surrounding neighbourhood. This district is not intended to accommodate businesses sized or designed to serve a trade area more than one-half mile from the business. “C1” districts are generally located in Neighbourhood or Community mixed use centres or along Neighbourhood or Community mixed use corridors.
- In addition, there are variances to the proposed “C1” District associated with the development pertaining to the north side yard and accessory parking area. These are analyzed in the Administrative Report for Associated file No. DAV 23-116030\D.
- The proposed rezoning application is considered compatible with the surrounding area given it makes use of the existing dwelling and meets multiple of the *CCDS 2.0* criteria for establishing new commercial in a Mature Community.

**REASONS FOR RECOMMENDATIONS**

The Urban Planning Division recommends **approval** of the application for the following reasons:

- The proposed rezoning is consistent with Complete Communities 2.0 criteria for approving new commercial locations by expanding an existing commercial node on an arterial street;
- The proposal generally conforms with the Complete Communities 2.0 design polices for mature communities; and
- The conversion of an existing residential building for commercial uses on a corner lot minimizes the environmental and visual impacts of development and is complementary to the existing character of the area.
