Committee - other: N/A

Agenda item (number and title): OCTOBER 30, 2023 Advanced Water Metering Solution Business Case

Service inquiry: Submit Comments in writing

Participation preference: N/A

Comments in writing: Please consider the following:

To defer the vote on installing Winnipeg installation of digital water meters until there is a full public consultation on this \$ 135 million project which would include the opportunity to examine and comment on the Diameter Services report mentioned in the public service report. This is the report the public service will likely use to "guide" the implementation of the Advanced Metering Infrastructure -AMI (2 way microwave transmitters) Note: one feature is that your water supply can be turned off remotely. Also, this system is more vulnerable to hacking.

There is the potential for adverse health effects has not been studied by Health Canada although there have been many reports of harm from exposures to emissions from wireless smart meters.

There should be an opt-out option for all residents who do not want the meter in their home, which are deemed 'private' property, for which the property owner has final jurisdiction on what and who resides in the home at any time and at all times. The opt-out should be at low or no-cost to the owner, and that no requirement, such as a medical letter, be needed to opt-out. Again, privacy and ownership are the essential reasons to opt out.

Finally,
