Delegation information

Committee: Council

Committee - council: Opposed to the recommendations

Committee - other: N/A

Agenda item (number and title): Water meter renewal program

Service inquiry: Submit Comments in writing

Participation preference: N/A

Comments in writing: It is my understanding there is going to be a meeting shortly regarding an approval of \$135 million to approve smart metres for Winnipeg homes.

I am writing today to ask that the committee considers deferring this vote until a full public consultation can take place in a proper manner so that all Winnipeggers, especially those with electromagnetic sensitivities, get to share their stories of how this type of technology added to our homes will be to the detriment of their health. Additionally, this proposal should go through the City's Public Engagement website so all residents can weigh in.

Hard wired options must be available without any associated fees or medical notes for those who suffer from these sensitivities or for those who have concerns about rapidly accelerating technology, that appears to make life easier and more efficient, yet actually exposes them to unwanted radiation risks associated millimeter waves with 5G technology.
