Committee - other: N/A

Agenda item (number and title): Advanced Water Metering Solution Business Case

Service inquiry: Submit Comments in writing

Participation preference: N/A

Comments in writing: Hello, I am not interested in industrial smart meters or wireless tech in or on my home. My home is a wireless off zone. All my tech is wired, not wireless, and I minimize and mitigate radiation exposure on my children. My children are surrounded by wireless radiation all day in school and in every social environment. When they come home, I take pride in as a father in balance, providing them a healthy, safe home, as much as possible, so they can get the uninterrupted, undisturbed rest and repair after a long day of unhealthy exposures. Manmade wireless radiation is not natural and interferes with children's organic development of the brain and body.

I also ask that you do not penalize those who choose not to have this in or on their homes. This should be a choice that we can't currently afford. Government has already made things expensive enough without making it even harder for people to afford basic necessities. We have bigger problems in this city and in this country. Priorities?
