

1. HESA - Standing Committee on Health (Federal government committee) - The Liberal government reviewed the health impacts from wireless technology and came up with 12 recommendations. At the time, the committee was under the Conservative government, but the recommendations were brought forward and upheld after the Liberal government was voted in. These important recommendations to track injuries and cancers, protect people with EHS and other sensitive populations, etc, are still waiting to be actioned by the government.

- 12 HESA recommendations: <https://c4st.org/hesa-2015-recommendations/>
- Full HESA report: https://www.c4st.org/images/hesa-2015/412_HESA_Rpt13-e.pdf

2. IARC - International Agency for Research on Cancer

- The below link explains very well the information around the carcinogen classification around all wireless. Presently it's a 2b, possible carcinogen, based on an increased risk for glioma, a malignant type of brain cancer associated with wireless phone use, but experts feel it should be reclassified now as a full carcinogen, 1a. <https://ehtrust.org/science/who-arc-position-on-wireless-and-health/>
- IARC press release in 2011. https://www.iarc.who.int/wp-content/uploads/2018/07/pr208_E.pdf
- **WHO/IARC advisory committee released a report last year recommending wireless radiation be re-evaluated by 2024 as a “high priority.” (pg. 156)**
- https://monographs.iarc.who.int/wp-content/uploads/2019/10/IARCMonographs-AGReport-Priorities_2020-2024.pdf
- Recommendation for non-ionizing radiation (radiofrequency): **High priority (and ready for evaluation within 5 years. (end of 2024))**

Dr. Anthony Miller, Toronto scientist and adviser to the WHO/IARC has said all wireless needs to be upgraded to a full carcinogen.

- **Back in 2013, he already recommended to the Toronto Municipality that it be a 2b carcinogen:**

<https://www.youtube.com/watch?v=wARxnaxrRKk>

Since then he's recommended that all wireless be re-classified as a full 1a carcinogen.

- **Dr. Miller speaks in the below video at the Parliament in Toronto, Ontario from the 12 minute to 16 minute mark. I participated in this event, but you can't see me off to the right side. The other speakers include my personal physician, Dr. Riina Bray who diagnoses people in Ontario with EHS. Also, is Frank Clegg, former President of Microsoft Canada, Meg Sears from Prevent Cancer now and Dr. Magda Havas who taught about this topic at Trent University for many years. Magda is also the brilliant scientist who discovered acid rain in the 1970's. This presentation was to warn about the rollout of 5G.**

<https://www.youtube.com/watch?v=S16QI6-w9I8>

- **Here is Dr. Miller's part by itself. At the 5:15 mark he states that he and other scientists consider all wireless to be a full 1a carcinogen.**

3. EMF Scientist Appeal

<https://emfscientist.org/index.php/emf-scientist-appeal>

As of July 14, 2023, 259 EMF scientists from 44 nations

and 15 Supporting Scientists from 11 nations have signed the Appeal.

4. Telecommunications engineer wrote a document in which his outlines that fibre can be used to transmit data instead of doing it wirelessly.

I've attached the pdf at the bottom of this email.

5. Injuries from electromagnetic radiation is not covered by insurance. Insurance underwriters will not cover other insurance companies either.
