Comments in writing: It is good to see a motion that will mitigate the cost of sending 4 trucks to every house to collect materials. It is still very troubling that the public has not yet seen the results of the very expensive trial of RFW. What was called a report was not much more than a string of platitudes and clichés on the topic. If all the right data had been presented, we would all know the need for deleting half of our garbage collection. If you have not seen all that data, how can you vote to go down the biweekly road?
