Class Estimate: 3

Currently all of the land in Winnipeg south of Abinojiii Mikanah (formerly Bishop Grandin Boulevard) and west of the Red River plus the communities of Lindenwoods and Whyte Ridge are serviced by the D'Arcy Wastewater Lift Station located at the Red River and the Fort Garry Ridge.

During high water events on the Red River, if pump capacity is lost at the South End Sewage Treatment Plant (SEWPCC) the risk to basement flooding is substantial. To mitigate this risk, the D'Arcy Wastewater Lift Station needs to be reconfigured to allow the use of lift pumps to pump flows to the Red River during emergency situations.

The estimated life of this asset is 50 years.
