The City Centre Community Committee provided the following supporting reasons for its recommendation:

1. This really does engage Our Winnipeg and Complete Communities in a really nice way. With respect to building density in West Broadway neighbourhood, increasing housing options in this beautiful neighborhood that is pedestrian friendly, bike friendly, transit connected and more, and hitting the City's intensification targets. It adds only 2 affordable dwelling units in West Broadway, but that isn't unimportant given the need for affordability in the city, and the need to use existing infrastructure in the City of Winnipeg.

COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

The City of Winnipeg's development plan, *OurWinnipeg*, and its citywide secondary plan, the *Complete Communities Direction Strategy 2.0* (CCDS 2.0), lay out the framework for how our City will grow over the next 25 years and how all other plans and City Council decisions must be consistent with it. The subject site is designated "Established Neighbourhood - Mature Community" under CCDS 2.0 and applicable goals and policies that apply to the proposal are noted below.

1.0 Encourage compatible residential development within Established Neighbourhoods to build more Complete Communities and align with the City's residential intensification target.

General Policies

- *1.1 Encourage residential development that positively contributes to neighbourhood character while expanding housing options for residents in a manner that is sensitive and complementary to existing development.*
- *1.2 Increase the population within Established Neighbourhoods to contribute to the physical renewal and revitalization of older neighbourhoods.*
- *1.4 Support opportunities for further residential intensification within approximately 400 metres of a rapid transit station, where appropriate and in accordance with the TOD Handbook.*
- *1.5 Support up to mid-rise residential development in Established Neighbourhoods that is compatible with neighbourhood context.*
- *1.6 In the absence of a secondary plan guiding the local development of an Established Neighbourhood, intensification should be guided by a number of factors to ensure compatible development, including:*
    - *a. Applicable City-endorsed policies or guidelines;*
    - *b. Existing zoning of the property and adjacent properties;*
    - *c. Characteristics of the immediately surrounding built form including building mass, height, lot coverage, setbacks, and layout;*
    - *d. Surrounding uses and their characteristics including residential density and the intensity of commercial and other non-residential uses;*
    - *e. Characteristics of the lot, including whether it is a corner lot, a larger lot than is typical for the neighbourhood, or the shape of the lot;*

- *f. Proximity to Downtown, Mixed Use Centres, Major Redevelopment Sites and Mixed-Use Corridors;*
- *g. The supporting street network (ex. local, collector, or arterial streets) and the street network's ability to support proposed development;*
- *h. The supporting transit, pedestrian and active transportation network; and*
- *i. The supporting water, wastewater, and land drainage infrastructure and capacity to accommodate a proposed development or ability to make the required upgrades necessary to accommodate a proposed development.*

Mature Communities

- *1.8 Low-rise residential uses will generally be accommodated on arterial and collector streets where compatible with adjacent land uses, where they can be conveniently served by transit and local commercial amenities, and in consideration of the factors listed in Policy section 1.6.*

The proposed development is consistent with the *Complete Communities Direction Strategy 2.0* in the following ways:

- The subject property is on Westminster Street, located in close proximity to both Sherbrook Street and Broadway Avenue (both Urban Mixed-Use Corridors) and approximately 500 metres from Downtown. Given its location, the property is well connected to several amenities, commercial uses, transit, and high-quality cycling infrastructure.
- This block of Westminster Avenue contains a mix of several multi-family buildings of varying densities.

Summary

The proposal is consistent with CCDS 2.0 in the following ways:

- The proposal will add two new affordable rental housing units to the West Broadway neighbourhood and provide secure indoor bicycle parking for residents through the repurposing of underutilized space within an existing building.
- The existing building is generally consistent with the design policies for Mature Communities, inclusive of a front entrance at grade and ground floor glazing facing Westminster Avenue and Langside Street, as well as a brick veneer.

REZONING

- The applicant is proposing to rezone the lands to "RMF-L" from its existing "R2" zoning to legally establish two new dwelling units.
- The rezoning is required because the proposed density the maximum density permitted in the "R2" zoning district.
- The proposed rezoning application is considered compatible with the surrounding area given it repurposes underutilized space in an existing building and adds two affordable dwelling units to an existing Mature Community and higher needs area, as identified in the Winnipeg Poverty Reduction Strategy.

LAND DEDICATION

- As a condition of a rezoning application, a developer is required to contribute a portion of the land to be developed to the City for parks purposes. The amount of land is not less than 10%. In the case of this rezoning, the Public Service is recommending that the developer provide 'cash in lieu' of a dedication of land as determined by the Planning, Property and Development Department.

REASONS FOR RECOMMENDATIONS

The Urban Planning Division recommends **approval subject to conditions,** of the application for the following reasons:

- The proposed development will increase residential density in the West Broadway neighbourhood, thereby increasing housing options in this pedestrian oriented, bikeable, transit connected, amenity rich mature neighbourhood as well as helping the city to achieve its residential intensification targets.
- The proposed development adds two affordable dwelling units to higher needs area, as identified in the Winnipeg Poverty Reduction Strategy.
- The proposed development will utilize existing infrastructure including the street network, active transportation paths to the east, water and wastewater service capacity and city services such as library, recreation and education.
