The City Centre Community Committee provided the following supporting reasons for its recommendation:

1. This provides rejuvenation for an area that needs more housing.

2. It’s on a corridor that has access to transit and active transportation.

3. There has been dialogue with the neighborhood, that’s important, very happy about that.

4. The design, it is fitting with the character of the area.

5. There is housing that is affordable, maybe not as much as some people would like it to be, but we heard an explanation from the administration today as to why that’s so.

COLLABORATIVE PLANNING

The applicant worked with the Urban Planning Division through a collaborative planning process leading up to completion of the application. The following plan adjustments were made:

Fine grained commercial streetscape

The applicant agreed to provide multiple commercial units along the street in order to strengthen the pedestrian oriented, small scale storefront rhythm of Sherbrook Street.

Sidewalk vitality

The applicant agreed to extend storefront windows back along the sides from the front on the ground floor, since those areas will be very visible from the sidewalk. On south side, windows are extended back along the full length of the retail unit.

Signage

The applicant agreed to include placeholders for the future storefront signage, to confirm that they will be pedestrian oriented in scale and height.

Landscaping

The applicant agreed to provide the full required complement of street edge landscaping.

Accessible and visitor parking

The applicant agreed to provide all required accessible parking stalls and some visitor parking stalls.

OURWINNIPEG 2045

Policy 4.4 States: *Affordable and Supportive Housing Options*

Enable collaborative partnerships that provide a continuum of existing or new affordable housing, making use of municipal supports such as fiscal, regulatory and measurement tools to ensure those most in need have increased access throughout the resident and building life-cycle.

The proposal makes use of municipal regulatory incentives to build new affordable housing.

COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0 (CCDS 2.0)

This portion of Sherbrook is designated as “Urban Mixed Use Corridor” under CCDS 2.0. The following are the key policies relevant to this proposal:

Goal 1

All Corridors

1.1 Support densities in accordance with Policy 3.1 of the General Growth section, at a height and scale compatible with surrounding land uses.

Policy 3.1 of the General Growth section states:

1.1 Where compatible with surrounding land uses and subject to other applicable policies of this By-law, direct the highest multifamily residential densities to the areas that provide the best transit service.

This location has transit routes within a block in all directions: Sherbrook Street, Maryland Street, Westminster Avenue and Broadway Avenue, plus high frequency transit further north on Portage Avenue.

Policy 3.4.1 states:

3.4.1. Use Corridor right-of-way width as a guide to determine maximum building height, where appropriate.

The width of Sherbrook is approximately 78 ft. and the height of the proposed building is approximately 71 ft. which complies with this policy.

Goal 3

3.0 Ensure Corridors provide a comfortable pedestrian environment and attractive public realm.

Urban Mixed Use Corridors

3.1 Ensure that development on Urban Mixed Use Corridors is designed to prioritize a comfortable pedestrian environment and attractive public realm by:

3.1.1 Providing minimal building setbacks from the public right-of-way to define the street edge.

3.1.2 Having entrances provide direct access to the public sidewalk.

3.1.3 Promoting a fine-grained and transparent street-level façade with active ground floor uses.

3.1.4 Encouraging balconies and public spaces, such as plazas, patios, or other pedestrian amenities.

3.1.5 Minimizing impacts of vehicular access and parking on the pedestrian environment by having vehicular access off of existing lanes.

3.1.7 Promoting pedestrian-scale signage.

Goal 4

4.0 Use Corridors to provide local commercial amenities and opportunities for the surrounding neighbourhood and community.

Urban Mixed Use Corridors

4.1 Maintain ground floor commercial space when redeveloping properties in Urban Mixed Use Corridors.

All Corridors

4.4 Support and protect Corridors' continued retail and service function by encouraging retail and service use intensification and by supporting reinvestment in existing Corridors.

4.5 Encourage the location of the most active retail and service uses to ground floor commercial spaces, and direct less active uses above-grade.

Goal 6

6.0 Encourage the integration of land use and transportation.

All Corridors
6.1 Ensure the design and use of the public realm supports this By-law's vision for Corridors.

6.2 Ensure the design of Corridors encourages the use of the frequent transit service provided on routes in the Primary Transit Network as well as connections to the feeder network.

The proposal meets the above policies of CCDS 2.0. In addition, the proposal meets the CCDS 2.0 vision of Established Neighbourhoods to *"continue to evolve as complete communities to increase the diversity of housing choices, improve housing affordability, and more efficiently use land, infrastructure and services."*

OTHER CONSIDERATIONS

CONSULTATION

The applicant held public consultations on the proposed project. The applicant indicates:

> *"A thorough public engagement process was undertaken as part of this project, including a series of stakeholder meetings and public open houses over a 5-month period between February 2023 and June 2023. The Project Team met with directly adjacent residents, businesses, and stakeholders, those most likely to be potentially impacted by this proposal, and members of the general public on a total of two occasions."*

The full Consultation Report is found in Appendix 'B' of the Administrative Report for File DAV 23-237179\D.

SERVICING

The Water and Waste Department advises that:

- There is adequate water servicing for the proposed development.
- The proposed development is located in a combined sewer district; the sum of the wastewater and land drainage runoff peak discharge from the proposed development cannot exceed the allowable discharge rate.

See Schedule B - Report of the Administrative Coordinating Group for more information.

SUMMARY

The Urban Planning Division supports the subdivision and rezoning, with conditions, because:

- The proposal makes use of municipal regulatory incentives to build new affordable housing.
- The scale and density are appropriate given the location on an Urban Mixed Use Corridor surrounded by multiple transit and active transportation options.
- The proposal meets the CCDS 2.0 vision of Established Neighbourhoods to *"continue to evolve as complete communities to increase the diversity of housing choices, improve housing affordability, and more efficiently use land, infrastructure and services."*

OURWINNIPEG POLICY ALIGNMENT

The proposal aligns with the Key Direction of *OurWinnipeg* that applies to the Mature Communities Policy Area, which states: "*Enhance the quality, diversity, completeness and sustainability of stable neighbourhoods and expand housing options for Winnipeg's changing population."*

WINNIPEG CLIMATE ACTION PLAN ALIGNMENT

The proposal complies with the *Winnipeg Climate Action Plan* because the proposed development would increase the intensification of an established neighbourhood.

WINNIPEG POVERTY REDUCTION STRATEGY (WPRS) ALIGNMENT

The proposal aligns with the WPRS, which states:

"Measuring the supply of affordable and social housing against needs in the community serves as a reflection of how we are doing in promoting and maintaining the welfare of all residents."

SCHEDULE B

REPORT OF THE ADMINISTRATIVE COORDINATING GROUP

RE: PROPOSED SUBDIVISION AND REZONING OF LAND LOCATED AT 126 TO 140 SHERBROOK STREET

The Administrative Coordinating Group (ACG) reviewed the servicing requirements for DASZ 34/2023. The applicant should take into consideration the following servicing and design requirements and considerations in the redevelopment of the site:

Section II - Servicing Conditions

1) Water System Assessment

The Water and Waste Department has advised there is adequate water servicing for the proposed development based on the provided development plans. Additional review will be required by the Department should the plans of development change during the design process.

2) Combined Sewer District

The proposed development is located in a combined sewer district; the sum of the wastewater and land drainage runoff peak discharge from the proposed development cannot exceed the allowable discharge rate:

i. The allowable discharge rate will be the sum of the existing peak wastewater and the peak land drainage discharged.

ii. The peak land drainage discharged from the site must be based on a c-value of 0.35, with a 5 year rainfall event applied.

iii. The existing and proposed peak wastewater discharge must be estimated using the Wastewater Flow Estimation guidelines found on the City of Winnipeg website (http://winnipeg.ca/waterandwaste/dept/wastewaterFlow.stm), unless otherwise approved.
