I am opposed to receiving this item as information. The city should implement this. I want to live in a city that cares about its people and is a model employer. The costs are not that significant, especially if we start moving towards this. It's also part of our goals for Our Winnipeg 2045, which was adopted. Let's move towards that! Apparently, we have half a billion dollars we can find to build a highway through our city, but can't find money for our people? I urge council to refer this back and move that this item be adopted and implemented.
