Wellington Crescent 30 km

I would like to speak in favour of supporting 30 km speed limits on Wellington crescent. As a person who is a year round commuter cyclist, I believe its important to ensure we here in the city of Winnipeg have enough safe streets and options for those who cycle, and bike.

As someone who still is recovery mentally at times from being hit a car in a major intersection in another part of Winnipeg, I can attest the importance of how 30 km streets give me a sense of calmness while cycling. I can also attest numerous times cycling down Wellington crescent heading home towards Elmwood from when I use work in St James, the near calls I have had north of Academy. I worry one day that I may become severely injured or even killed down this street. I worry the impact this would have on my family, and friends.

I encourage you to support this motion and help make are city even safer for cycling.
