Community Committee Recommendation:

On November 27, 2024, the Lord Selkirk-West Kildonan Community Committee concurred in the recommendation of the Winnipeg Public Service and, via the Priority Rezoning Process, recommended to the Executive Policy Committee:

1. That the Zoning Agreement dated December 13, 2018 (the "Zoning Agreement"), entered into pursuant to Development Application No. DASZ 17/2018 and registered against title to the land described therein as Caveat No. 5585766/1 be amended as follows:

    B. That Clause 2(e) be replaced with the following condition:
    Maximum building height of forty-five (45) feet.

2. That the City enter into, execute and deliver an agreement to amend the Zoning Agreement in accordance with recommendation 1 (the "Amending Agreement") and such other agreements as determined necessary by the City Solicitor/Director of Legal Services to be necessary to implement the intent of the foregoing (the "Ancillary Agreements").

3. That authority be delegated to the Director of Planning, Property and Development to negotiate and approve the Amending Agreement and any Ancillary Agreements in accordance with this report and such other terms and conditions deemed necessary by the City Solicitor/Director of Legal Services to protect the interests of the City.

4. That the proper officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

The Lord Selkirk-West Kildonan Community Committee provided the following supporting reasons for its recommendation:

1. As we heard from the applicant, Jon from L&M Architecture here, and of course Mile Rendulic from the Division, who has done a ton of work on this file, the area is rowing and that includes the Old Kildonan Ward, and your Ward, Councillor Santos, and we need to accommodate a new school in the area, specifically a high school that is going to have a daycare and is going to have a lot of components for the community to participate in as well as at this site.

2. I am really excited, I think the plans look good and they are going to further tweak them, I would certainly want those plans shared with me and I'm sure the rest of the Committee would as well, so it's good, and I hope this provincial funding comes in sooner rather than later so we can get constructing the school that is needed in the area.

RECOMMENDATIONS

1. That the Zoning Agreement dated December 13, 2018 (the "Zoning Agreement"), entered into pursuant to Development Application No. DASZ 17/2018 and registered against title to the land described therein as Caveat No. 5585766/1 be amended as follows:

   A. That Clause 2(d) be replaced with the following condition:

      Minimum reverse corner street side yard of nineteen (19) feet.

   B. That Clause 2(e) be replaced with the following condition:

      Maximum building height of forty-five (45) feet.

2. That the City enter into, execute and deliver an agreement to amend the Zoning Agreement in accordance with recommendation 1 (the "Amending Agreement") and such other agreements as determined necessary by the City Solicitor/Director of Legal Services to be necessary to implement the intent of the foregoing (the "Ancillary Agreements").
3. 4. That the proper officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

REASON FOR THE REPORT

- The applicant is proposing to amend the Zoning Agreement under File DASZ 17/2018 to facilitate a secondary school with a building height of 45 feet instead of 35 feet, and a reverse corner side yard of 19 feet to parking instead of 30 feet.
- Modification of caveats on a Land Title requires a Zoning Agreement Amendment application.
- Approval of a Zoning Agreement Amendment application requires a public hearing as per the Development Procedures By-law and The City of Winnipeg Charter.
- The Report is being submitted for the Committee's consideration of the development application at the public hearing.

IMPLICATIONS OF THE RECOMMENDATIONS

If the recommendations of the Urban Planning Division are concurred in, the subject Zoning Agreement under File DASZ 17/2018 will be amended.

HISTORY

DASZ 17/2018

On December 13, 2018, Council approved a subdivision and rezoning of the subject site to an "M1-PDO-2 Inksbrook Employment Lands Planned Development Overlay" Manufacturing Light District, subject to a zoning agreement restricting setbacks, height, lot coverage, and certain uses on the property, and requiring a minimum number of queueing spaces for school buses and passenger vehicles.

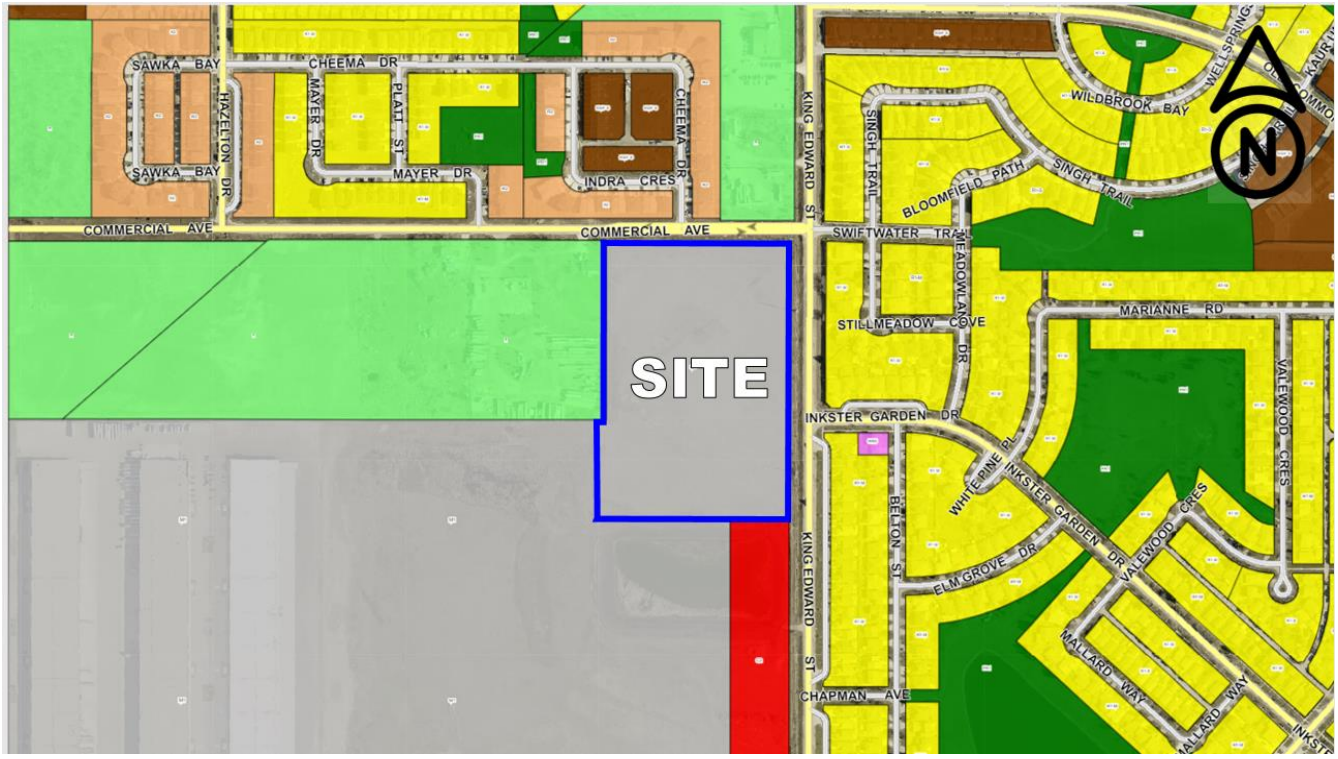

Figure 2: Zoning of the Site and Surrounding Area

DESCRIPTION OF THE PROPOSED DEVELOPMENT

- The applicant is proposing to amend the existing Zoning Agreement caveated on title when the site was approved for subdivision and rezoning in 2018 to permit an increased maximum building height for a Senior High School and Daycare Centre, and for a reduced north corner side yard to the accessory parking area along Commercial Avenue.
- The current Zoning Agreement restricts setbacks, height, lot coverage, and certain uses on the property, and requires a minimum number of queueing spaces for school buses and passenger vehicles.
- The zoning is “M1-PDO-2 Inksbrook Employment Lands Planned Development Overlay”, however a caveat on title currently restricts the building height to 35 feet, and requires a minimum reverse corner street side yard of 30 feet.
- Given the requested height is 44.84 feet, and 25 parking spaces are located in the north corner side yard the subject Zoning Agreement Amendment (ZAA) application has been submitted to request adjustment of these caveats.
- The proposal provides a high quality building design with articulated, mixed-material facades, landscaping, and a zoning-compliant number of parking stalls.
- The proposed high school will be a LEED certified building with a total floor area of 170,000 square feet to accommodate up to 1200 students, 74 daycare spaces, 130 teaching staff and 40 support staff.
- The proposed building will have a staggered massing based on programming and spatial requirements, consisting of the following:

- A vocational wing, 15.3 feet in height;
- A vocational and performing arts wing, 19.9 feet in height;
- Gymnasium and theatre, 34.7 feet in height; and,
- An academic wing, 44.84 feet in height.

- The building has been sited to accommodate the proposed building layout, pathways, landscaped areas, drive aisles and approaches, parking, required queuing and drop-off areas. In addition, there are easements registered along both King Edward Street and Commercial Avenue that impact the developable area of the site.
- While King Edward Street is considered the front yard, the drawings provided show the building orientation toward Commercial Avenue. Servicing and loading areas have been placed along the west side of the building, adjacent to existing light industrial neighbouring properties.
- Plans provided show 195 parking spaces, including 8 accessible parking spaces, well above the Zoning By-law requirement of 110 spaces and 6 accessible parking spaces. Of the 195 parking spaces proposed, 14 will be EV ready parking stalls.
- The applicant is proposing to provide 72 bicycle parking spaces.
- The proposed development does not require any Variances.

COLLABORATION

- The applicant has worked cooperatively with the Urban Planning and Design Division to confirm support for the subject Zoning Agreement Amendment. In addition, the applicant worked with the Public Works Department to reconfigure approaches and provide a site plan supported by the Public Service.
- The applicant conducted a formal community open house on May 30, 2023 to present and review the project with the surrounding community.

ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

- The *Complete Communities Direction Strategy 2.0* (CCDS 2.0) is a citywide secondary plan that guides growth, development, and land use in the city of Winnipeg.
- Under CCDS 2.0, the subject property is designated Employment Lands – General Industrial. Relevant policies for General Industrial areas include:

  1.1 Ensure that General Industrial areas:

  a. Provide for light and medium industrial development;

  b. Provide for limited employment-supportive commercial uses to serve the needs of employees within the employment area. These areas should be subordinate to the larger intent of General Industrial areas;

  c. Provide for quasi-industrial uses that are more commercial in nature but may not fit well within other commercial designations due to their needs for large sites. These uses include, but may not be limited to: purpose-built commercial

recreation enterprises, places of assembly, car dealerships, and self-storage facilities; and

d. Provide for limited Small Office uses.

- In addition, *CCDS 2.0* identifies policies for quasi-industrial uses, which typically includes uses that are more commercial in nature that, due to larger land requirements, are drawn to Employment Lands as an economically viable means of supporting their operational requirements. Applicable policies for Quasi-Industrial uses are as follows:

  4.14 Manage quasi-industrial uses to mitigate land use incompatibility and to protect the City's supply of Employment Lands and industrial floor space for core industrial purposes, while also accommodating uses that have large land requirements and are not easily accommodated elsewhere.

  4.16 Permit quasi-industrial uses in General Industrial and Business Park areas where it can be demonstrated that such uses cannot be accommodated elsewhere in the Urban Structure.

CITY OF WINNIPEG ZONING BY-LAW 200/2006

"M1-PDO-2 Inksbrook Employment Lands Planned Development Overlay" Manufacturing-Light

- The "M1" zoning district is intended to provide for light manufacturing, processing, service, storage, wholesale, and distribution operations with all operations contained within an enclosed building with some limited outside storage.
- The subject site falls within Area 1 of the Inksbrook Employment Lands Planned Development Overlay area, the purpose of which is to support the development of the planned area as 'Employment Lands'.
- Within Area 1, certain principal uses, including a Senior high School. are permitted in addition to the permitted and conditional uses of the underlying "M1" zoning district.
- The dimensional standards for structures in the "M1" zone are: a minimum front yard of 25 feet; a minimum rear yard of 25 feet; a minimum corner side yard of 15 feet, and a maximum building height of 50 feet. There are no minimums related to lot area, rear yards, and interior side yards.

Zoning Agreement DASZ 17/2018

Amend clause 2(d) under Caveat No. 5585766/1, by capping the building height at 45 feet instead of the previous 35 feet.

- As previously mentioned, the building has been sited to accommodate pathways, landscaped areas, drive aisles and approaches, parking, required queuing and drop-off areas, the proposed layout and programming requirements including a daycare, as well as to observe easements registered along both King Edward Street and Commercial Avenue that impact the developable area of the site. For these reasons a portion of the building is required to be higher to accommodate the anticipated student numbers.
- The Urban Planning and Design Division recommends adjusting the height cap in the zoning agreement to align with the proposed building height of 45 feet, as this would be for a portion of the building rather than for the overall development, and is situated in such a manner that it would have little impact on adjacent properties due to the proposed configuration and massing.

Amend clause 2(e), by revising the north corner side yard setback to 19 feet from the previous requirement of 30 feet.

- The Division recommends revising the north corner side yard setback stipulated in the Zoning Agreement to 19 feet as this is solely to accommodate 25 parking spaces. The property that may be affected is an undeveloped site zoned for agricultural uses. The proposed parking spaces are screened with a parking fence and landscaping.

RECOMMENDATION

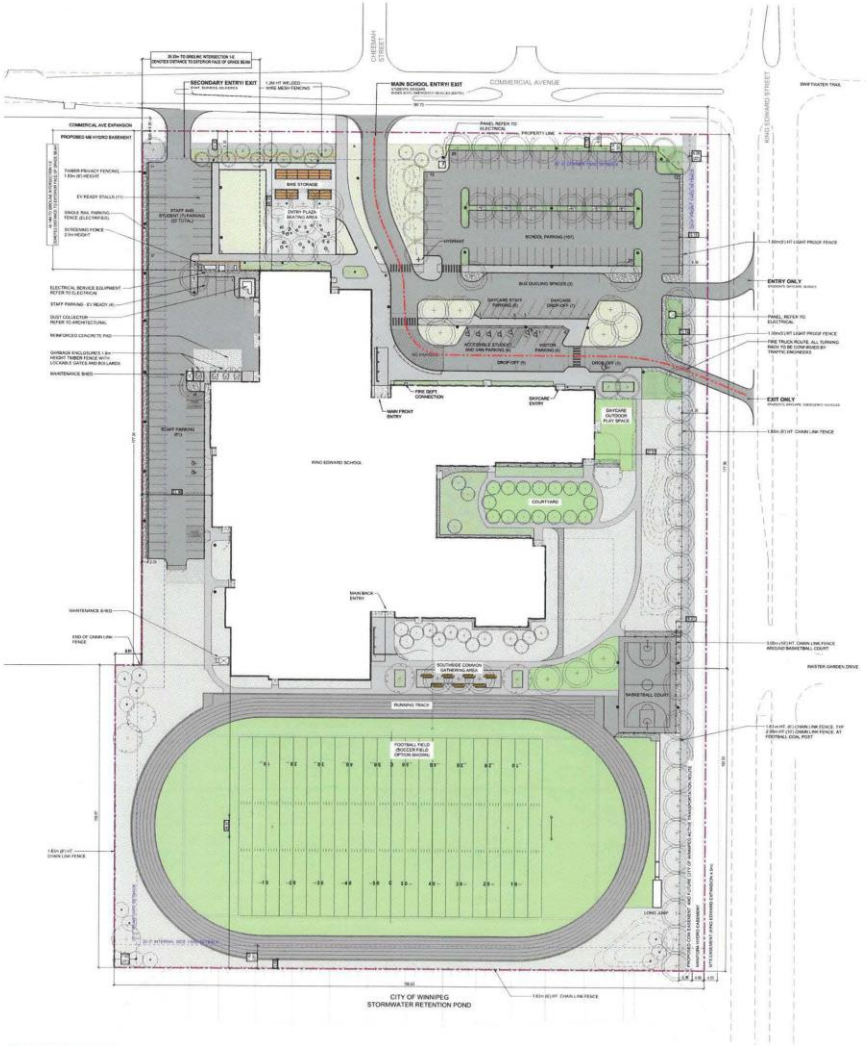

The Urban Planning Division recommends **approval** for the following reasons:

- The proposed use meets a need for the surrounding residential communities, while locating in an area where the scale and intensity of development does not have a significant impact on immediately adjacent uses.
