EXECUTIVE SUMMARY

The landowner of 828 St. Mary's Road (the "Land"), 14421302 Canada Inc., wishes to construct a mixed-use building. Developing the Land in this manner requires the construction and installation of land drainage works, routing a portion of stormwater runoff away from the combined sewer system, to ensure compliance with Environment Act Licence No. 3042.

An Agreement for Services with the landowner is required to define and apply the obligations related to undertaking the land drainage works.

RECOMMENDATIONS

1. That the Proposed Terms and Conditions for an Agreement for Services, attached hereto as Schedule A, in favour of 14421302 Canada Inc., to construct land drainage works, be approved.
2. That the City enter into, execute and deliver an Agreement for Services, pursuant to Section 211 of the City of Winnipeg Charter, with 14421302 Canada Inc., in accordance with the terms set out in the attached Proposed Terms and Conditions document (Schedule "A"), and to fulfill all the requirements outlined in the Proposed Terms and Conditions document, and such other agreements as are determined necessary by the Director of Legal Services and City Solicitor to implement the intent of the foregoing (the "Ancillary Agreements").
3. That authority be delegated to the Chief Administrative Officer to negotiate and approve the Terms and Conditions of the Agreement for Services and the Ancillary Agreements in accordance with this report and such other terms and conditions deemed necessary by the City Solicitor/Director of Legal Services to protect the interests of the City.

4. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

REASON FOR THE REPORT

Entering into an Agreement for Services requires Council approval.

IMPLICATIONS OF THE RECOMMENDATIONS

Concurrence with the recommendations will enable municipal servicing conditions to be applied to the development of the property located at 828 St. Mary's Road. 14421302 Canada Inc. is responsible for all costs associated with undertaking the land drainage works.

HISTORY/DISCUSSION

The land at 828 St. Mary's Road (the "Land") is serviced by the City's combined sewer system. The combined sewer system and land serviced by the combined sewer network are subject to Environment Act Licence (EAL) No. 3042. An overview of this licence is in the administrative report attached to [Minute No. 145 of the December 17, 2020, Council Minutes](#).

In September 2024, the Water and Waste Department (WWD) received a development permit application for a proposed mixed-use development on the Land. WWD staff identified that the proposed development would increase flows to the combined sewer system and did not comply with EAL No. 3042. To achieve compliance, the developer's engineering consultant proposed to extend the land drainage sewer on Fernwood Avenue and re-connect the existing catch basins from the combined sewer in Fernwood Avenue to the extended land drainage sewer (the "LD Works"). WWD reviewed and concurs the proposed works adequately offset the increased wastewater discharge to the combined sewer system, ensuring licence compliance.

To undertake the LD Works, the City and 14421302 Canada Inc. must enter into an agreement, under Section 211 of the City of Winnipeg Charter, to apply important obligations related to undertaking the LD Works. Section 211 permits the City to enter into agreements with any person to provide services in the City.

In December 2024, 14421302 Canada Inc. agreed to the Proposed Terms and Conditions (the "TCs") related to the LD Works, which are attached as Schedule "A" to this report. The purpose of the TCs is to outline the common understanding of the City and 14421302 Canada Inc. regarding 14421302 Canada Inc.'s obligations in undertaking the LD Works.

14421302 Canada Inc. is responsible for all costs associated with undertaking the LD Works, including the cost of engineering services. After completion of a warranty period, the City will be responsible for the land drainage infrastructure.
