June 18/2009

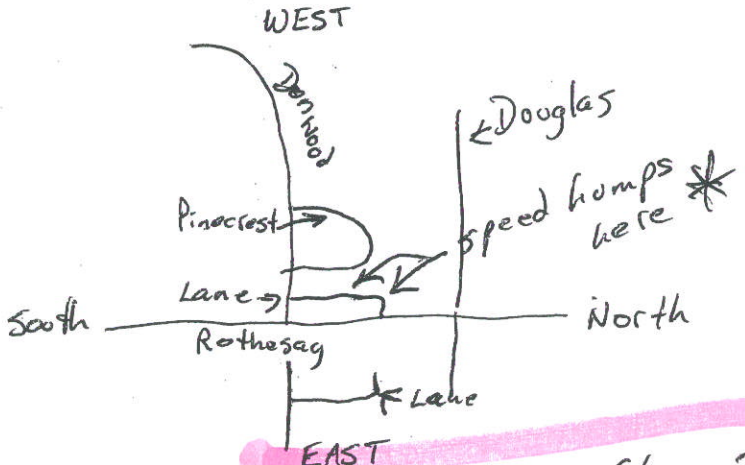

To the attn of Mark Lubosch.

Further to our telephone conversation regarding speed humps. Enclosed is a petition with names + signatures of those in favour of having them installed. These are people on Pinecrest, Rothesay + one from Donwood Drive who regularly access the back lane.

Out of a total of 27 households that could be affected I have found 1 who doesn't want them, 9 houses I could get a hold of, + 16 households in favor of having them installed.

I also had numerous people saying that the lane should be made into a one-way heading north bound from Donwood. Drive.

Below is a map.

Thank you,

Glen Tiel

Petition to Councillor Mark Lubosch and the City of Winnipeg:

R.E.: to install speed humps on the back lane between the east side of Pinecrest Bay and the West side of Rothesay Street between Douglas Avenue and Donwood Drive.

This is being requested to stem the traffic which uses the backlane as a detour during peak traffic hours in order to circumvent the instersection of Rothesay and Donwood, mainly in the morning rush hour period. Vehichles using the back lane tend to go faster than they would normally go if they were driving on the regular roadways. Creates a hazard for people who live there who may be pulling in or out of their garages or parking spots and is terribly dangerous for the number of people who walk down the back lane to get to school or nearby bus stops.
