# In Favour of Motion to Protect Urban Forests and Green Spaces

The motion to expropriate the Lemay Forest lands is now a mute point as the province has stepped up and are now expropriating. What is still in the motion and should be accepted is the rezoning of the city land at the end of De La Digue to parkland.

A new urgent motion should be brought forward and that is to put in place a **tree bylaw** to protect trees and vegetation removal of all kinds from developers and private owners until the proper zoning is approved and/or proper permits issued.

Thank you,
Paul Thorimbert
