I am writing to express my strong opposition to the recommendation that a 30-day extension be granted to report on the Wellington Crescent bike lane project.

This delay is inappropriate and undermines the accountability that was expected when the original deadline was set for December. Residents and stakeholders deserve timely action, not ongoing deferrals that erode public trust and leave the future of this key route in limbo.

The repeated extensions give the impression that this important issue is being sidelined. I urge the committee to reject the proposed extension and prioritize the completion and release of the report without further delay.

Thank you for your attention.
