Pulliam

I would like to offer my opposition to the extension of the Bike Lane Pilot Project on Wellington. I actually reach out not as someone who is an avid cyclist, but as someone who has cyclist friends, colleagues and community members whose opinions (and lives) I value dearly. I agree with the sentiment that this particular project has felt delayed too long. Community members have continued to show up to express their need for this, and for the enforcement of 30kph, time and time again over the last several months. These same cyclists even make their own efforts, sooner than municipal representatives, to improve conditions of safety for people with accessibility needs, cyclists and pedestrians alike, as I witnessed last week on Bannatyne. As someone who has driven through that area with many other cyclists, I want nothing more than for everyone who passes through, really any part of urban Winnipeg & beyond, the ability to feel safe on their commute and it does NOT impede me as a driver if that is how I am navigating the area. In these residential areas, I don't want to feel the structural freedom to drive as fast as I want - I want all of the restrictions in place to go slow and respect the road. I understand that the city wants 30 days, but I urge you to enforce 30kph now. Thank you for your consideration.
