Note: The wording in bold and italics denotes amendments made by the Community Committee.

The East Kildonan-Transcona Community Committee provided the following supporting reasons for its recommendation:

1. As one of the delegations, I believe it was Ronald, mentioned that development on this property should proceed. This development has been done, the Algonquin Estates neighbourhood has been done piecemeal. Parts of it started in 1983, I think was the very first lots on Ragsdill. Different parts have been added at different times. I live on Strongberg Drive, our house was the last house built in 1993. The next house over was built in 2003. That's just when different people sold their rear lots. You can tell even driving down the street, there's a difference between where the original lots were built and the rest of the street. There was a part of John Huyda that was built I think fairly early on in the development, and the piece that this is on is actually probably the newest part of the development.

2. At this point, in the entire Algonquin Estates Neighbourhood, there are three lots remaining. Again, if it were a whole new subdivision, a whole new bay, I think it would be more challenging to put this type of restriction on there. But because, again, we're talking three developments in a new community, I think it is supportable to put this extra qualification, extra restriction on this one property.

3. Again, the applicant has been only planning to build single-family. This puts it in writing, legally, that they are only allowed single family homes on these two lots that are being created today.

4. I appreciate the neighbourhood appearing in delegation on this one, I also believe, that because it's a recent community, the likelihood of other multi-family properties that could do so by right is very low. Most of the homes are $500,000 or $600,000 homes no one is going to tear one of those down to build a $800,000 duplex. It just doesn't make much sense in a recent community like this. Perhaps, different on the Bonner side but definitely not on the Algonquin Estates/John Huyda side.

OURWINNIPEG 2045 POLICY ALIGNMENT

OurWinnipeg 2045 Goal – City Building

A successful strategy for sustainable city growth uses a variety of planning approaches. It strikes a balance between 'growing out' and 'growing up', offering choices ranging from traditional, single-family neighbourhoods to denser forms of urban housing and new neighbourhoods designed around a mix of land uses and a sustainable transportation system (p.17).

Building a city of complete communities provides the following additional benefits:

- *Minimization of environmental impacts per capita, in support of better air quality, resource efficiency, waste management, and climate change mitigation*
- *Adaptability to climate change and resilience to natural hazards*
- *Promotion of more active lifestyles and increased social interaction* (p.17).

City Building Objectives

City Building Objective 1. Responsibly plan, prioritize and accommodate growth in areas that best support Complete Communities principles, to achieve this Plan's sustainable development goals:

Facilitate growth and change strategically within Winnipeg's unique Transformative Areas and Established Neighbourhoods, to enhance the ability of the urban environment to contribute towards this Plan's goals.

City Building Objective 2. Integrate resilient land use, transportation and infrastructure planning, and investments**:**

Ensure that land use, transportation, and infrastructure planning are aligned to provide the conditions for compact, complete and connected communities, supported by sustainable transportation options and municipal infrastructure capacity.

City Building Objective 3. Facilitate development opportunities that complete established communities, and plan new communities as complete and connected from the outset:

New and existing communities are complete when they demonstrate: universally designed environments; mixed-income neighbourhoods; a continuum of housing types; multi-modal connections within and to elsewhere in the city; heritage conservation; opportunities for physical activity, social interaction, and access to healthy food, daily needs, employment, education, recreation, and green infrastructure (p.31).

ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

- As part of *Complete Communities Direction Strategy 2.0*, the City has an intensification target under Section B1. General Growth Goal 2 - Policy 2.1 states that a minimum of 50% of all new dwelling units be accommodated in the intensification target area of the City of which this property is located within.
- The subject property is located in an Established Neighbourhood designated as a "Recent Community" as outlined in *Complete Communities Direction Strategy 2.0*.
- The vision for Established Neighbourhoods is for them to continue to evolve as complete communities to increase the diversity of housing choices, improve housing affordability, and more efficiently use land, infrastructure and services.
- Goal 1 states "encourage compatible residential development within Established Neighbourhoods to build more *Complete Communities* and align with the City's residential intensification target.
- General policies for Established Neighbourhoods that relate to the subject proposal are as follows:

  1.1 Encourage residential development that positively contributes to neighbourhood character while expanding housing options for residents in a manner that is sensitive and complementary to existing development

  1.2 Increase the population within Established Neighbourhoods to contribute to the physical renewal and revitalization of older neighbourhoods.

  1.6 In the absence of a secondary plan guiding the local development of an Established Neighbourhood, intensification should be guided by a number of factors to ensure compatible development, including:

  a. Applicable City-endorsed policies or guidelines;

b. Existing zoning of the property and adjacent properties;

c. Characteristics of the immediately surrounding built form including building mass, height, lot coverage, setbacks and layout;

d. Surrounding uses and their characteristics including residential density and the intensity of commercial and other non-residential uses;

e. Characteristics of the lot, including whether it is a corner lot, a larger lot than is typical for the neighbourhood, or the shape of the lot;

g. The supporting street network (ex. local, collector, or arterial streets) and the street network's ability to support proposed development;

h. The supporting transit, pedestrian and active transportation network; and

i. The supporting water, wastewater, and land drainage infrastructure and capacity to accommodate a proposed development or ability to make the required upgrades necessary to accommodate a proposed development.

1.17 Single-family residential uses will generally be directed to locate on collector streets and local streets.

CITY OF WINNIPEG ZONING BY-LAW 200/2006

Subdivision and Rezoning

- The intent is to subdivide the subject property into two properties and rezone proposed Lot 1 from "RR5" / "R1-L" to "R1-L" for the maintenance of an existing single-family dwelling, and to rezone proposed Lot 2 from "RR5" to "R1-L" for the construction of a single-family dwelling. Proposed Lot 1 is to be approximately 14,784 square feet and Proposed Lot 2 is to be approximately 12,859 square feet.

Current and Proposed Zones

- Currently, the lands are split-zoned "RR5" Rural Residential 5 and "R1-L" Residential Single-Family (Large) district. The "RR5" district is intended to provide areas for large-lot rural residential development, along with limited agricultural uses. The "R1" district is intended to accommodate primarily single-family residential development in lower-density areas.
- The applicant is proposing to rezone the entire subject site to the "R1-L" district.
- The dimensional standards for single-family residential uses in the "R1-L" zoning district are:
    - Minimum lot area of 5,500 square feet;
    - Minimum lot width of 25 feet;
    - Minimum front yard of 20 feet;
    - Minimum rear yard of 25 feet;
    - Minimum side yard of 4 feet;
    - Minimum reverse corner street side yard of 10 feet;
    - Maximum height of 35 feet; and
    - Maximum lot coverage of 40%.

COMPATIBILITY WITH THE SURROUNDING NEIGHBOURHOOD AND EXISTING LAND USES

- As noted above, the subject site is located in the Established Neighbourhoods – Recent Communities policy area under *Complete Communities Direction Strategy 2.0*. This proposal is aligned with *Complete Communities* policies for Recent Communities in that it contributes to the intensification targets and creates a new single-family lot on a local street.
- This proposal ends the split-zoning on the subject site by removing the residual "RR5" Rural Residential 5 zoning, with proposed Lots 1 and 2 rezoned to "R1-L" district. The most prevalent zoning district for the properties in the area south of Bonner Avenue and north of John Huyda Drive is the "R1-L" Residential Single-Family (Large) district. For these reasons, the "R1-L" district is an appropriate district for this property.
- The existing dwelling on proposed Lot 1 will remain, while the proposed development plans show a two-storey single-family dwelling will be built on proposed Lot 2. Both lots are comparable in width and depth to other lots on this block of Bonner and John Huyda. As such, the proposal keeps in character with the rest of the block.

RECOMMENDED SERVICING AGREEMENT

Details found in Schedule B, attached to this report.

LAND DEDICATION

- When a developer rezones and/or subdivides a parcel of land, they are required to put in an application with the City of Winnipeg.
- The developer is required to either provide land or 'cash in lieu' as determined by the Planning, Property and Development Department.
- The Public Service is requesting cash-in-lieu as part of this application.

RECOMMENDATION

The Urban Planning Division recommends **approval with conditions** for the following reasons:

- The proposal is consistent with the policies guiding development in the *Established Neighbourhoods – Recent Communities* policy area in the *Complete Communities Direction Strategy 2.0,* in that the proposal supports objectives of establishing 50% of development within the intensification target area and increases residential population in established neighbourhoods.
- The proposal is in character with the surrounding area consisting of mostly single-family dwellings located on "R1-L" zoned land.
