I am asking for a deferment on recommendation 1. I do not want a smart water meter on my property!!! My children's health and safety is priority as a fire fighter and father. Fires may result as shown in Saskatchewan from smart power meters and the 24 hour emf exposure on my children is totally unacceptable. A little research on EMF's and smart meters will show there is liability.
We don't even have wifi in our home and my kids keep their phones off and at the front door as to ensure their wellness, safety and repair after our long day of exposure of wireless tech in school and at work. If there is no opt out program I will remain with the legacy system until there is more information. I won't take a chance for harm to my children or to our home as wireless meters and EMF's have shown to be unsafe. I will be happy to do the work to call in and submit my readings as usual.
Lastly, a penalization cost would look like an unwarranted cash grab, we are all paying enough taxes and as far as I know Canada still has freedom of choice. Thank you!
