Item No. 4 Wellington Crescent (Academy Road to Stradbrook Avenue) Bike Lane Pilot Project – formerly Speed Limit Reduction on Wellington Crescent

Submitted: Wed, 07/16/2025 - 11:49

The Wellington Crescent Bike Lane Pilot project should be created within the year of 2025, through the construction of a bike lane. Community consultations should follow, rather than be done prior to construction.
2. The speed limit is suggested to be lowered to 40km/h, which is an improvement from 50km/h, but as has been reflected in other areas of the city, a 30km/h limit would be more beneficial. This is not designed as a major traffic route, but it is, and has long been, a major cycling route. As such, the city is responsible for the safety of cyclists on this route, first and foremost.
