13. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

The Lord Selkirk-West Kildonan Community Committee provided the following supporting reasons for its recommendation:

1. I think that with all the development that has been happening around King Edward and Inkster, I think this is a good thing for this northeast corner to be developed.

2. What they're proposing to do as commercial operations are, I'll use the word mild, won't have a huge impact on bringing too much traffic to the area, in terms of visiting the various establishments that will be leasing space from this building.

3. It's a consolidation of a bunch of lots to ensure that they have the space to accomplish what's needed.

ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

- The *Complete Communities Direction Strategy 2.0* (*CCDS 2.0*) is one of four direction strategies supporting *OurWinnipeg 2045*, the city's long-range development plan, and has statutory authority as a secondary plan. The strategy guides land use and development in Winnipeg.
- The subject property is located in an "Established Neighbourhood – Recent Community" in *Complete Communities'* Urban Structure map. Established Neighbourhoods will accommodate contextually sensitive growth and change to increase the diversity of housing choices, improve housing affordability, and more efficiently use land, infrastructure and services.
- With regard to this proposal, the key policies guiding the development of Established Neighbourhoods include:

    1.6 In the absence of a secondary plan guiding the local development of an Established Neighbourhood, intensification should be guided by a number of factors to ensure compatible development, including:

    - *Applicable City-endorsed policies or guidelines;*
    - *Existing zoning of the property and adjacent properties;*
    - *Characteristics of the immediately surrounding built form including building mass, height, lot coverage, setbacks, and layout;*
    - *Surrounding uses and their characteristics including residential density and the intensity of commercial and other non-residential uses;*
    - *Characteristics of the lot, including whether it is a corner lot, a larger lot than is typical for the neighbourhood, or the shape of the lot;*

- *The supporting street network (ex. local, collector, or arterial streets) and the street network's ability to support proposed development;*
- *The supporting water, wastewater, and land drainage infrastructure and capacity to accommodate a proposed development or ability to make the required upgrades necessary to accommodate a proposed development.*

2.0 Design new development in Established Neighbourhoods to a high standard of urban design and construction to ensure new development adds value to public and private urban spaces to create a sense of place and civic pride.

2.4 Encourage the use of high-quality, energy efficient, and durable exterior building facade materials.

2.12 New development should respect and complement the existing character of the built form of surrounding properties.

2.21 Site design should take cues from the character of the neighbourhood or street and should mitigate the potential for land use conflict with adjacent properties that have different scales, densities and uses. Parking location (motor vehicle and bicycle), vehicular access, servicing elements, building placement and landscaping treatment will be important design elements to ensure context-sensitive design.

CITY OF WINNIPEG ZONING BY-LAW 200/2006

- The "C1" Commercial Neighbourhood district is intended to accommodate small, compact commercial uses within or surrounded by residential areas that are attractive and compatible in scale and character with surrounding residential uses, to serve the convenience needs of the surrounding neighbourhood. "C1" districts are generally located in Neighbourhood or Community mixed use centres or along Neighbourhood or Community mixed use corridors.
- In "C1" and "C2" zoning districts, dwelling units must not be located on the first storey of any principal building.
- The first storey of a principal building may only be used for any use in the following use categories:
  - Public and Institutional;
  - Cultural and Entertainment; and
  - Commercial Sales and Service, except the Billboard Signs use sub-category.

SUBDIVISION AND REZONING ANALYSIS

- The Urban Planning and Design Division is supportive of the proposed subdivision and rezoning for the following reasons:
  - The subject development is located at the corner of an arterial route (Inkster Boulevard) and a collector route (King Edward Street).
  - The proposed buildings and site plan are scaled and designed to compliment the character and built form of the surrounding neighbourhood.
  - The proposed "C1" zoning and commercial development would introduce low impact commercial uses consistent with the objectives in the *Complete Communities Direction*

Strategy 2.0 supporting a mix of commercial services and employment uses to serve the local community.

RECOMMENDED ZONING AGREEMENT

- The Urban Planning & Design Division is recommending that final plans be submitted to the Director of Planning, Property and Development for review prior to the issuance of a building or development permit for a new or expanded principal building on the site. The inclusion of this clause will allow the Public Service to review final plans for any future redevelopment on the land.
- In addition, the Public Service recommends that a 6-foot-tall privacy fence be constructed along the north and west property lines, as well as a minimum 8 foot landscaped buffer along the north property line to mitigate the impact of the commercial parking area on existing dwellings abutting the site.

RECOMMENDATION

The Urban Planning Division recommends **approval with conditions** as the subject proposal is complementary to the existing scale, character and built form of the neighbourhood, and is consistent with the *Complete Communities Direction Strategy 2.0*.
