Postal code: R3G 1W7

Public Hearing information

Public Hearing item: Standing Policy Committee on Community Services Agenda item 11
City of Winnipeg Tree By-Law Proposed development: Opposition

Service inquiry: Submit comments in writing

Participation preference: N/A

Comments in writing: Dear Standing Policy Committee on Community Services, I write in opposition to the current City of Winnipeg delays and deferrals regarding protection of trees on private property. Our city needs trees, and trees need our protection. It's been a long wait and now they are saying wait another year till next December 2026, to move anything forward. With current development practices on private lands, many more trees could be cut before this is addressed. In a development on Wellington Crescent - Six Eleven on the river, I watched bulldozers take out many mature beautiful trees, many of which would not interfere with building. The riverbank was cleared of trees as well, a terrible practice for a number of habitat and riverbank stability reasons. In attached photo, their billboard shows very little replacement trees, just lots of lawn right down to the river. We need a public/private bylaw for tree protection urgently. Sincerely, Wendy Buelow
