I would like to register my support for the EPC to vote in favour of immediate protection of all trees adjacent to City property. And that this measure will progress expediently to a full City-wide tree protection bylaw including consideration of all trees on private property.
The City of Winnipeg, along with all municipalities, must maintain and preserve existing trees as much as possible. If it is deemed that existing trees must be removed in order to fulfill housing or other requirements, then the owner, or municipality or other body that has jurisdiction over the treed area, must replace the removed trees and plants, and be subject to penalties if there is failure to follow the requirement.
Fly way areas that are used by migratory birds and animals may not have trees removed in any circumstance, with heavy penalties for those who do not observe this law.
