I am a resident of the South Osborne community and I support the motion to perform a comprehensive and detailed study aimed at improving pedestrian and cyclist safety in the Osborne community. I am a father of two children, ages 9 and 6, and I want to live in a community where I don't have to fear crossing the street or going on a family bike ride. I love to be outside with my kids, visiting the shops along Osborne, but the enjoyment is always dampened with the knowledge of the high fatality and injury risk associated with traffic collisions in that neighbourhood. I do not want my kids to grow up fearing to be on our city streets. I think all residents of Winnipeg deserve this. This is an important, historic, and busy neighbourhood in our city, and all residents will benefit from a road safety review, and to carry out the resulting recommendations. The pedestrian deaths and injuries along Osborne are not acceptable to anyone living in our city, and a road safety review is a critical early step in making our city more liveable and safer for all.
