I am a resident of the south Osborne area and have been for the last 9 years, in addition to growing up in the area.
It is a wonderful neighbourhood, but Osborne street is a growing concern, as is the fact that Lord Roberts is used as a common cut through between Jubilee and Osborne. The population in the area is growing due to continued development along the rapid transit corridor, but there have been inadequate investments in infrastructure to account for increasing traffic and the impacts on pedestrian and cyclist safety.
I don't claim to have all the answers which is why I full support a road safety review which should shed light on the most effective ways to improve road safety in the area. I do think that in addition to a study, the city could immediately implement additional measures to easily improve safety such as reduced speeds on the residential streets in the area.

I write this as a transit rider/pedestrian, cyclist and parent. There have been too many fatalities and close calls along Osborne and something needs to be done. Last year I witnessed a young girl get struck by a vehicle while riding her bike across Osborne, and it was horrible to witness. We need to stop sitting idly by while more people are hurt or killed in preventable accidents. It is widely recognized in this community that Osborne is unsafe and more needs to be done; please listen to the community.
