Bike Winnipeg Submission - February 4, 2026 Public Works Committee Meeting

Item No. 13 In-Service Road Safety Review for Osborne Street

Bike Winnipeg supports the motion to undertake an in-service road safety review of Osborne St between Broadway and the St. Vital Bridge. Osborne St. As the motion points out, collisions between motor vehicles and pedestrians have been a tragic and recurring problem on Osborne St. Osborne St provides a vibrant and diverse range of services, retail, residential, and office space that forms the backbone of the numerous neighbourhoods it passes through.

As part of the primary transit network, safety on Osborne St is key to increasing use of public transit, a key goal of the City, as well as the continued health of retail, service, and office destinations that activate the street.

Complete Communities 2.0 identifies this stretch of Osborne St as a priority urban mixed use corridor, where the City should prioritize the creation of vibrant pedestrian and transit-oriented places. As a prioritized urban mixed use corridor, Complete Communities 2 urges investment in urban design features that make Osborne St accessible, safe, and attractive for pedestrians and cyclists.
