Fleet Size

Fleet CAMFM Size

In 2024 there was a total of 1,787 units (chassis only), an increase of 33 units from the previous year.

This graph illustrates the breakdown of units by category from 2022-2024.

Light Duty

- Municipal and Emergency vehicles (Light Duty Trucks, Vans (Cargo and Passenger), Sedans and SUVs) with GVW < 4,500 kg.
- Construction Equipment with Original purchase cost less than $30,000.

Medium Duty

- Municipal and Emergency vehicles (Medium Duty Trucks, Vans and SUVs) with GVW between 4,500 kg and 9,000 kg.
- Construction Equipment with Original purchase cost between $30,000 and $100,000.

Heavy Duty

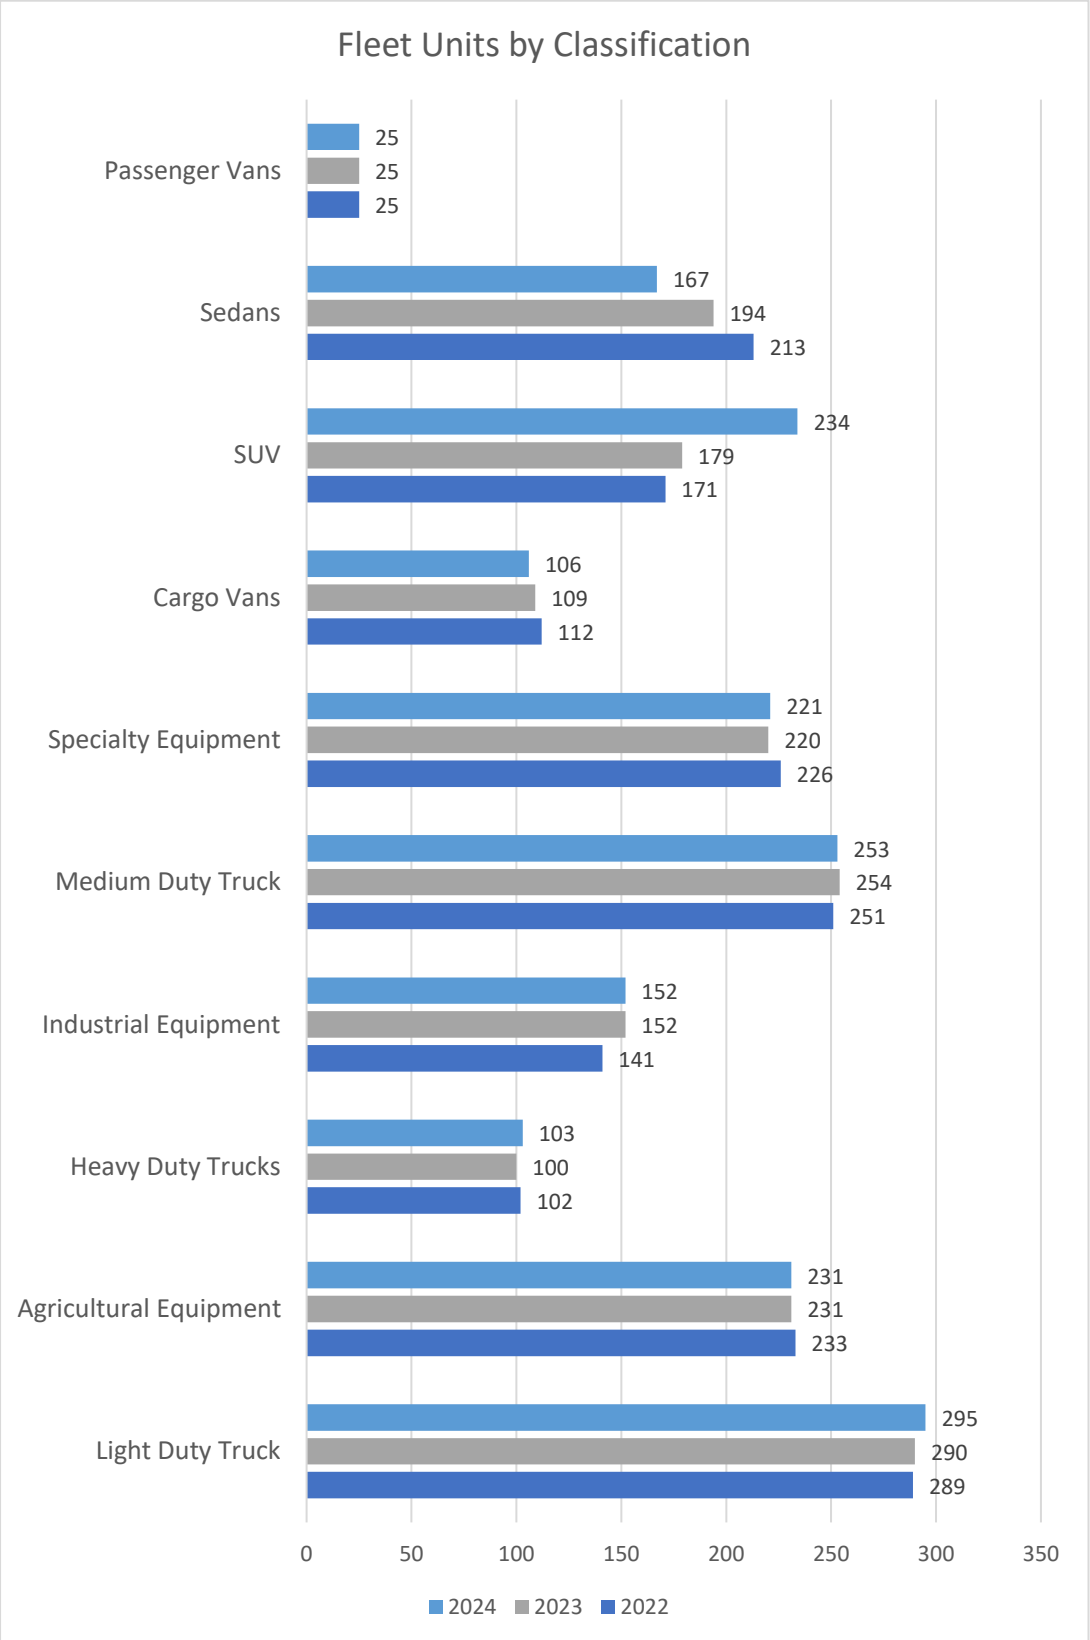

- Heavy Duty Trucks with GVW greater than 9,000 kg.
- Construction Equipment with Original purchase cost greater than $100,000.

Miscellaneous

- All other equipment.

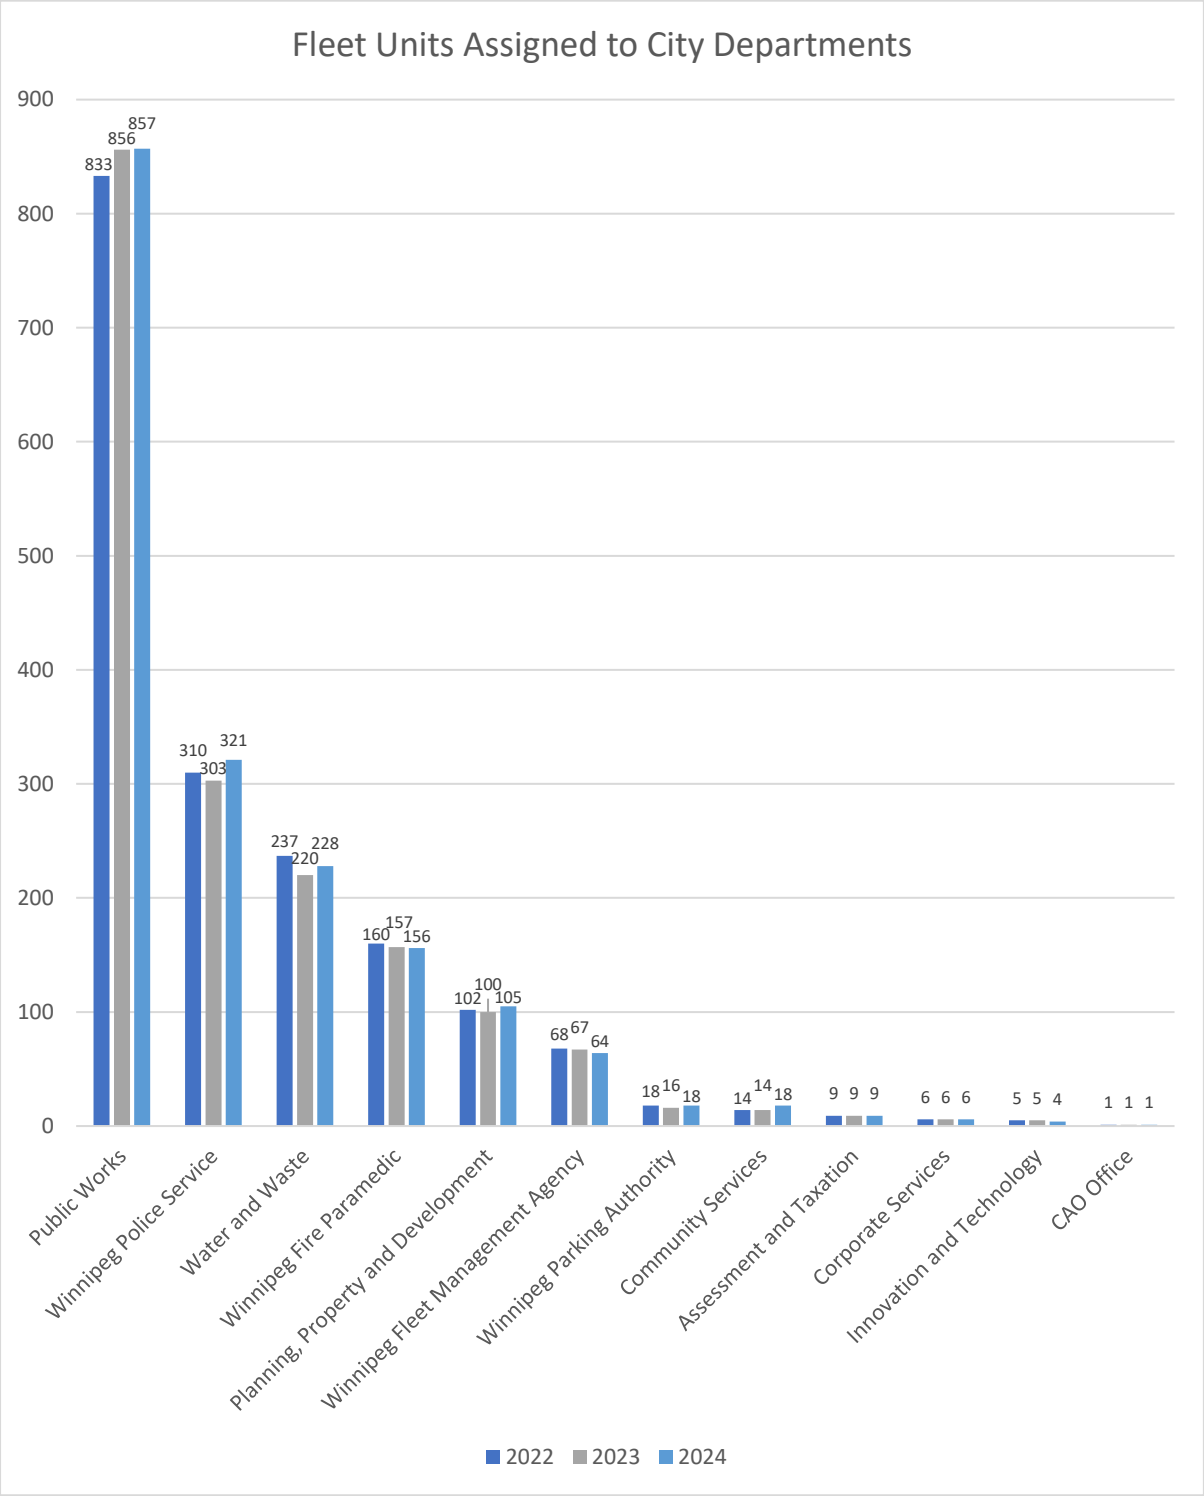

Fleet Units by Classification

The graph below shows the number of fleet units by classification for 2022-2024, chassis only.

Fleet Units Assigned to City Departments

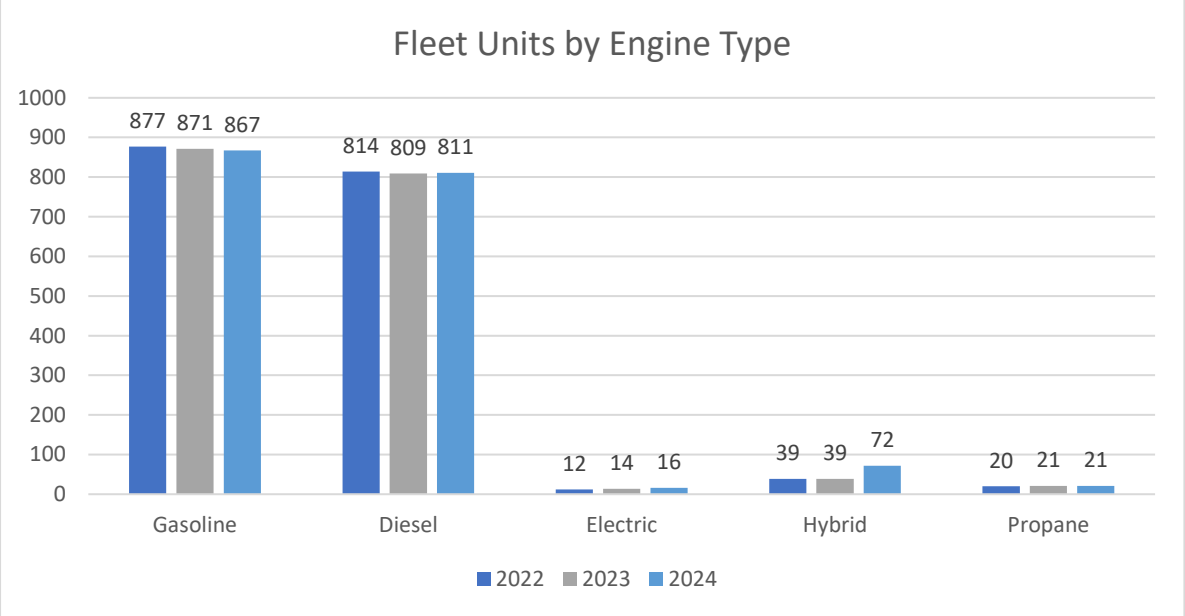

The graph below shows the number of fleet units by City of Winnipeg department for 2022-2024. These numbers include chassis only.

Fleet Units by Engine Type

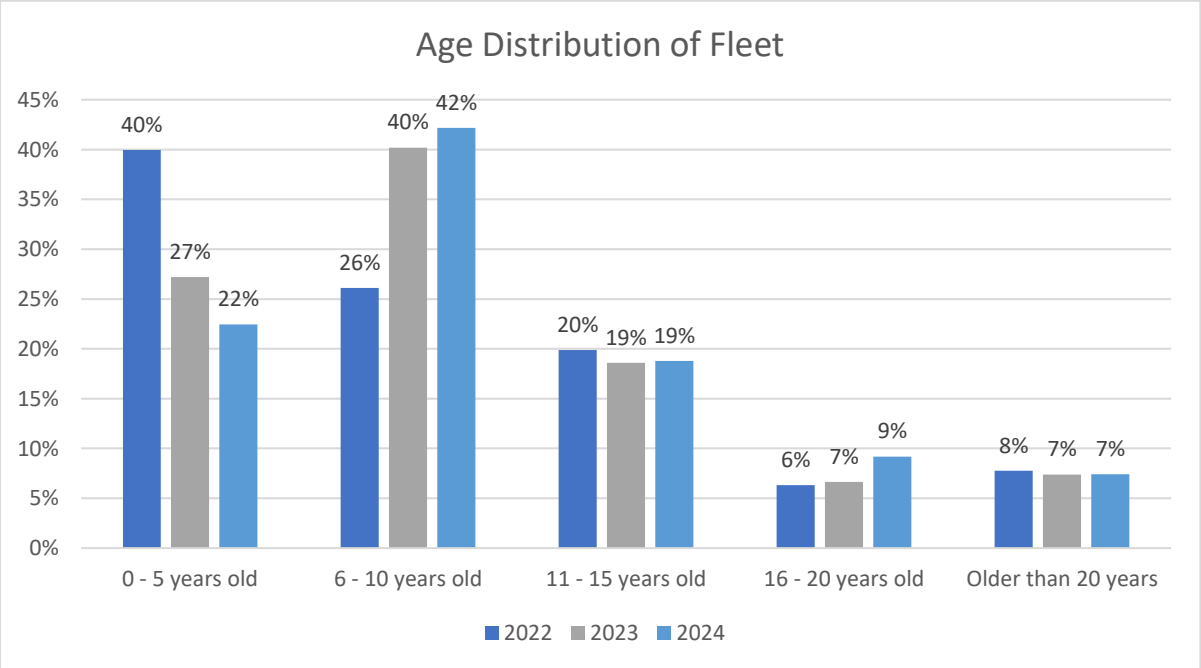

WFMA operates five fuel sites located throughout the City, providing fleet operators with access to fuel for vehicles and equipment. All sites offer both diesel and gasoline.

Specialty units, such as forklifts, scissor lifts, and Zambonis, require alternative fuel sources not available at these sites.

Age Distribution of Fleet

The graph below illustrates the age distribution of all active vehicles and equipment in the City's fleet over the past three years. The percentage of units aged 11 years or older has remained constant, while the proportion of units aged 0–5 years has decreased. The share of fleet aged 6–10 years continues to increase.

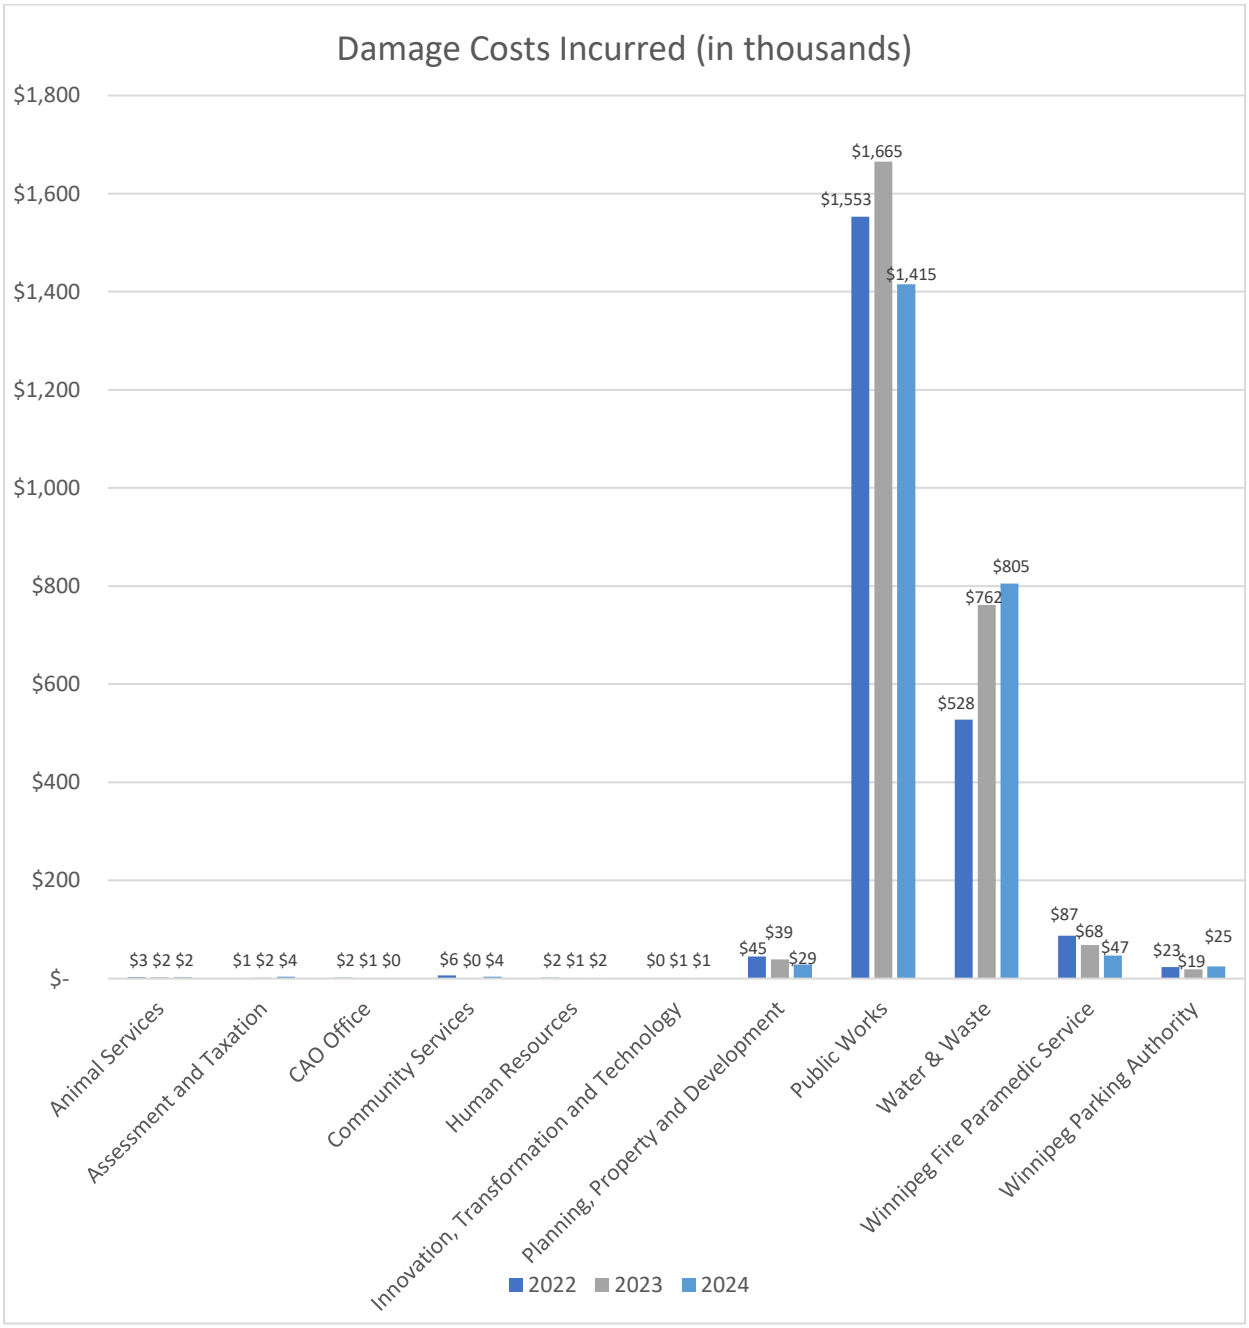

Damage Costs

Damage costs for 2022, 2023, and 2024 amounted to $2.25 million, $2.56 million, and $2.33 million, respectively.

The total damage costs over the three-year period amount to $7.15 million, reflecting a modest increase compared to the previous three-year total of $6.9 million.

Public Works and Water & Waste departments represent the largest proportion of the fleet at 61% and account for over 93% of total damage costs. Damage trends in 2024 show a decline for Public Works and an increase for Water & Waste.

This chart includes departments where vehicles are serviced by FMA.

Fuel Usage

In 2024, City departments used 6.13 million litres of fuel, marking a slight increase from 6.05 million litres used in 2023. This modest increase in usage still falls short of the 6.65 million litres documented in 2022.

The graph below demonstrates the quantity of fuel used by city departments (excluding external customers) from 2022-2024. The data is displayed in thousands of liters.
