Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
PW

I am writing as a citizen of Winnipeg to share my complete and total opposition to the proposed Safe Access to Vulnerable Infrastructure bylaw.

This proposed bylaw is wildly unacceptable and has no place in a free country.

Canadians have a right to protest under the Charter of Rights and Freedoms, and it is entirely unacceptable to limit this in such a sweeping manner with such a wide-reaching, vaguely-worded, poorly thought-out policy.

If some people who participate in protests are committing other crimes, such as for example harassment, then charge those individuals with the crimes they committed on a case by case basis. If people have actually done something wrong, it will not be difficult to charge them under another existing law. There is no justification for a draconian law that directly outlaws protesting where it is considered inconvenient. As a community we can do so much better than that.

Canada is currently not an authoritarian state. Do you wish it to remain that way? Then we must not pass such misguided legislation, or we will become an authoritarian state.

The proposed by-law infringes on charter rights and threatens to limit legitimate protest. The geographic designations in the proposed by-law cover much of the city. As a citizen, academic, and union leader, I am deeply concerned that this by-law stifles protest that is a part of a vibrant and healthy democracy.

I will be very honest in my comments and share that I think this proposed By-Law is the most disappointed that I have been with the City of Winnipeg.

Every year our city has been falling farther and farther behind on so many services, closing pools and infrastructure, going deeper into debt exclusively for automobile-users, and instead of trying to solve this crisis, THIS is what the Council has been working on?? Instead of pushing to make Winnipeg a safer and more accessible city for ALL CITIZENS, the City of Winnipeg is trying to REMOVE access to fighting for rights? Hard fought rights always come about by public protest, which yes, can be a nuisance for some privileged people.

It seems to me that the City Council wants to freeze the city in amber while letting our infrastructure crumble, and to cut services to citizens they don't agree with or that they plain dislike. Now with the introduction of this By-Law, it seems that Council no longer wants to even hear from these citizens and instead will potentially FINE people for using their Charter Rights? I think the City knows that this By-Law will not stand up in court, but instead is trying to drive a wedge between different groups in the city.

Lastly, there have been two events that I believe are tightly linked to the introduction of this By-Law. The ongoing anti-genocide protests in support of our Palestinian community and the soured relationship between the cycling community and Councillor Janice Lukes. Both groups are trying to fight for the very lives and safety of their communities. If Councillor Lukes and the Council do not want to hear people speaking passionately and from the heart about deaths of their loved ones and community members, then maybe it's time you re-evaluate your tenure in politics. If Councillors no longer want to hear from their constituents that they disagree with, then it is time to step down.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Quan Ngo.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw. It is inherently undemocratic and chilling especially with the BLOATED police budget. Do we really want to subscribe to this line of thinking when civilians are being executed in the streets south of the border? WPS is known to be trigger happy.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

I have concerns about the proposed bylaw banning “nuisance protests” within 100m of certain facilities.

Specifically, I’m concerned that this bylaw will effectively ban protest on post-secondary campuses. I’ve been a member of the University of Manitoba and University of Winnipeg communities since 2001. During that time, I’ve seen how post-secondary campuses have provided theatres for debate (including protest) on important issues of social justice. Banning protests on these campuses would weaken the role our post-secondary communities play in hosting these necessary conversations.

I understand limiting some types of protest around public facilities where vulnerable and targeted communities gather, such as hospitals, schools, and religious centres. However, I strongly feel post-secondary campuses are a poor fit for this bylaw.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter Rights and Freedoms and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Raia Bryan

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

Freedom of speech is a basic human right in a democracy. Protests are exercising that freedom of speech. I don't necessarily agree with what people have the impulse to protest about, or the things they personally stand for, but in a democratic country all voices should be heard. Protest is an expression of that freedom of speech. To muzzle the public opinion strays from the tenets of democracy.

Protesting is a critical part of democracy. Protesting MUST be inconvenient to make change happen. We all disagree with things, and that's OK. This is a slippery slope into removing rights from every day Winnipegers who want to use their voice, even peacefully and without blocking roads/buildings etc. With this current proposal it seems like City hall would be illegal to protest- what would protesting in "convenient" areas look like for freedom of expression? What about our charter rights? We should be hearing our population, just look at how bitterness to protesters are killing folks across the boarder. That female protester were murdered in cold blood, and that man was not even protesting and he was murdered for just being there. Councillor Duncan's comments on this by-law concerned me. Who are we really protecting with this potential change, because it's clear based on his comments he cares more for "easy" than "right". This Winnipeger says no thanks to this intentionally vaguely written legislation.

Disruptive, non-violent protest is part of a vibrant, functioning democracy.
In Canada, the right to protest is fundamentally protected under Sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms, which guarantee freedom of expression and peaceful assembly. These rights allow citizens to gather, demonstrate, and express dissent against government actions or policies.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This law would take away a part of our freedom of speech that would go into our youth. Taking away our right for this, you can create an unsafe environment for groups or individuals who even group together for something as simple as a walk, or bike ride. You would be inflicting fear when it isn't needed. If this law is passed you also take away many Canadians voices and rights. We would no longer be The Land of The Free. You take away our voice, and you take away rights of the very people who help keep Canada and the city of Winnipeg running.
The protests and rallies haven't ever been super destructive and have always been relatively peaceful. You can't let one bad apple ruin something for thousands of others who are bringing nothing but kindness and attention to things that needed to change.

This proposed law as drafted is too broad and could be interpreted subjectively and potentially abusively. Councillor Duncan, the author of the bylaw, said this on CJOB on February 10:

"I think that as things evolve globally we see a lot of change out there. The chaos that is unfolding south of us right now is a clear indicator that it’s coming our way and if we don’t put these things in place to stop that, it’s going to be your neighborhood next, it’s going to be your place of worship next. And we don’t want that to happen."

This is a massive red flag for what this bylaw really is. Duncan sees people in Minnesota protesting against ICE's authoritarian overreach and thinks "The protests are the problem." If this doesn't make it clear what the intentions behind this are, then I don't know what will.

The wording being used to pitch the bylaw has been carefully designed to sell it as reasonable and perhaps progressive - hence why people seem to think this is about protecting women getting abortions. But to me, it's pretty clear this is about controlling protests.

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

It is clear that suppression of the right to demonstrate peacefully would be an attack on our liberties, and much like the federal government's use of the Emergency Act to quell the Ottawa truckers' demonstration - which was deemed by the Courts to be government overreach, Winnipeg council's implementation of this proposal would not likely withstand a court challenge... And it would certainly lend itself to public ridicule and be fodder for prime-time comedic mirth (22 Minutes et al.)

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

I have chosen to write instead of attending for safety reasons.
I fully support this recommendation of protecting Jewish institutions from directly protesting in front of them. I urge the powers to be to pass this recommendation as there is no constitutional issue or argument to not pass this by law. It is a matter of safety for those targeted citizens of Winnipeg.
Respectfully submitted,

I do not think that this by-law will provide the safety it intends. Protesting and speaking up is a right that people have. If the city really cares about the safety of its people, laws like these are exactly the ones that make communities and people unsafe. Instead of putting money into enforcing laws like these, we could be putting it into resource centres and actually helping people.

"Nuisance Protest" is non-specific, meaning any and all actions could be subject, I don't like how broad that is. What constitutes as a nuisance? Holding signs? Occupying public spaces? Wearing certain clothing? Who decides what is 'appropriate' and what is a nuisance? Another thing is I could see someone targeting specific racial profiles, going after protests for indigenous rights, as well as non racial minorities like the lgbtqia+ or disabled communities.

I am writing to express my opposition to Safe Access to Vulnerable Infrastructure By-law.

The proposed by-law purports to protect infrastructure and uphold community safety but, instead of focusing on those commendable aims, instead attempts to criminalize a broad range of legitimate forms of dissent and protest. I urge council to consider the following:

- Post-secondary institutions have long been centres of debate, discussion, and protest. Their inclusion under the proposed by-law ignores their historical role and would suggest an attempt to stifle legitimate debate rather than protect community members.
- Many forms of harassment, obstruction, and threats are already illegal and, as such, police have tools at their disposal to address such situations when they arise. The proposed by-law is far broader than is required to address such concerns.
- Citizens who wish to protest often use sidewalks, roadways, and community gathering places to voice their concerns, places that are targeted under the proposed by-law. These locations are often the forms of protest used by those most vulnerbale in our society, who may not have the same access and connection to leaders as more well-off citizens.
- Similarly, locations around City Hall and the Manitoba Legislature - long places in which people gather to voice their concerns - are included. The proposed bylaw will restrict these legitimate places of protest.
- At 100 meters, the proposed buffer zones are excessive. Provincial buffer zones around certain health care facilities were set at half the size, 50 meters. If the Province has found a buffer of 50 meters acceptable, why is the City proposing 100 meters?
- Language that penalizes the impeding of pedestrians or vehicles is too broad and could be used to target pedestrians or cyclists who are protesting and not moving what some may deem to be fast enough.
- Language supporting the proposed by-law claims that it is protecting vulnerable

communities, such as those attending a place of worship, but by including such protections within wider restrictions on civil liberties, it subjects the entire bylaw including those protective elements to potential challenge under the charter. The effect is not just to pits concerned members of the community against one another, but it does a disservice to member of those vulnerable communities.

Upon review, it is clear the proposed bylaw has not been sufficiently thought through. In my opinion, it divides community members and attacks legitimate civil liberties and, as such, is short sighted. A better bylaw could be developed that would enact protections for vulnerable Winnipeggers without broadly curtailing civil liberties. I urge the committee to oppose these recommendations.

Dear Members of the Executive Policy Committee,

I am writing to express serious concern regarding the proposed Safe Access to Vulnerable Infrastructure By-Law. In its current form, I believe this bylaw would restrict Charter-protected rights to freedom of expression and peaceful assembly, and for that reason I cannot support it.

Public demonstrations, from vigils and rallies to round dances and marches, have long been part of Winnipeg's civic life. They have helped advance rights for workers and tenants, Indigenous and racialized communities, 2SLGBTQIA+ residents, and environmental protections. These freedoms are not abstract principles; they are tools communities use to participate meaningfully in democracy.

While I understand the desire to ensure safety and prevent harm, the actions this bylaw appears aimed at (property damage, hate crimes, and violence) are already illegal under existing laws. Expanding restrictions on peaceful assembly risks casting too wide a net, limiting lawful expression while doing little to address the criminal behaviour it seeks to prevent.

I am also concerned about unintended consequences. Broad restrictions of this kind can disproportionately impact marginalized communities, whose primary avenue for political participation often includes protest and public demonstration. The Canadian Civil Liberties Association has cautioned that measures of this nature may infringe on Charter-protected rights and undermine peaceful expression.

Winnipeg has been working toward recognition as a United Cities and Local Governments

“Human Rights City.” Protecting the right to peaceful protest is fundamental to that commitment. Any bylaw that narrows those rights should be approached with the utmost care.

I respectfully urge the Committee to reconsider and withdraw this proposal.

Sincerely,
Richard R.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Rielle Landry

I would like to state that all forms of non-violent protest should ALWAYS be legal, and unpunished by our government. The fact that this is even on the table is insane, especially in our current world political climate. This is just a straight message to anybody that the current mayoral city is aligned with what is happening in the states, and should never work in an office again. It is sick, and is straight anti democracy. It is control, and should NOT BE PASSED EVER.

Peaceful protests are one of people's only ways to let the government know how we feel. Protests are an expression of how we feel and only happens when we feel desperate and like the government won't listen to us. Silencing the community is not going to do any good, and will only make the divide between the government and the people greater. Please think before you take away peoples ability to go out in the street and build a community fighting for what they believe in. We DO NOT need to become USA 2.0. Let us have our freedom and expression of self. PLEASE.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Members of the Executive Policy Committee,

I am writing as a Winnipeg resident, parent, and university researcher to express serious concern regarding the proposed Safe Access to Vulnerable Infrastructure By Law. As it is currently framed, I cannot support it.

My work as an academic in Manitoba and research advocate is grounded in evidence, careful interpretation of precedent, and respect for institutional safeguards. From that perspective, this proposal raises red flags. The freedoms of expression and peaceful assembly are Charter-protected rights that have shaped Winnipeg's history and Canada's development. Public demonstrations, vigils, round dances, labour actions, environmental rallies, and civil rights movements have all relied on the ability to gather visibly and lawfully in public space. Many of the rights and protections we now consider foundational were secured through precisely these forms of collective expression.

It is also important to recognize that Manitoba has already demonstrated how to craft precise, targeted legislation when a genuine access concern exists. Bill 8, which has received royal assent, clearly and narrowly protects individuals seeking abortion services and the providers who deliver that care. It establishes a defined 50 metre buffer zone to prevent harassment at clinics and at providers' workplaces or homes. That legislation addresses a specific, evidence-based harm while remaining tightly scoped. It protects access to healthcare without broadly restricting peaceful assembly across the city.

By contrast, the proposed Safe Access by law appears far more expansive and less clearly delimited. Property damage, hate crimes, harassment, and violence are already criminal offences. Creating wide restrictions around broadly defined infrastructure does not

meaningfully strengthen existing criminal law. It risks limiting lawful protest while doing little to deter those already prepared to break the law.

There is also a serious concern about proportionality and unintended consequences. Broad discretionary enforcement tools often disproportionately affect marginalized communities that rely on protest to make their voices heard. The Canadian Civil Liberties Association has cautioned that measures of this kind can unduly restrict Charter protected expression. Winnipeg has expressed aspirations to be recognized as a Human Rights City. Adopting legislation that curtails peaceful assembly would sit uneasily with that commitment.

We are living through a moment in North America when democratic norms and civil liberties are under visible strain. That reality should make us more vigilant in defending constitutional protections, not more comfortable narrowing them. Municipal governments are not exempt from Charter obligations, and policy decisions at the local level still shape the democratic culture of a city.

I urge the Committee to reconsider and withdraw this proposed by law. Winnipeg's strength has always rested in its engaged, outspoken, and participatory civic life. That tradition deserves protection.

Sincerely,
Dr. Robert Beattie

Dear Executive Policy Committee,

I'm writing to you today to express my SHOCK and ALARM at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly! It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Robert

I am a resident and homeowner in Winnipeg.

In a time of growing authoritarianism, this proposed by-law erodes our constitutionally protected protest rights and our right to speak out against injustice. We are watching our brothers and sisters in the USA being shot by government agents at protests, and you would seek to grant greater power to our own police force to bring force to protests.

All voices belong in the public space, this by-law silences voices when they are deemed inappropriate. Sixteen percent (16%) of the city will be restricted from peaceful protest, including City Hall. This by-law allows for racist application and targeting of unpopular/controversial groups or issues when it is deemed expedient.

In suggesting set fines that are not tied to income you embolden demagogues and the wealthy, while at the same time disproportionately silencing the marginalized.

We say NO! to this By-law, because we must otherwise our rights are infringed and our voices are silenced.

We are your fellow citizens and your neighbours, we are not a nuisance. You are our elected representatives who are already supposed to listen to us, and discuss, and consult. Are you so afraid that you must use the power of the state to silence its citizens? How far down the road to authoritarianism will Winnipeg walk today?

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

As a safe street and biking advocate, our community has held multiple recent group rides, vigils and rallies that have necessitated the use of a loud speaker and, for participant safety, occasionally blocked traffic. If passed, our work and safety would be severely implicated by this bylaw.

My experience with the standard Winnipeg civic process has felt seemingly ineffective and frustrating, thus the need to take to more innovative methods to advocate and affect change. This has included vigils, rallies and protests at city hall and the legislative building,

which would be prohibitted in the proposed bylaw.

This bylaw would limit the fundamental freedoms all Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this over-broad bylaw could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for expression. Existing tools, such as the Manitoba Safe Access to Abortion Services Act, is specific enough that it can be applied without discrimination.

In other Canadian cities that have implemented similar bylaws, they have taken (9) months to thoroughly engage the public. This draft has not allowed proper time and discourse with the public.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. There is currently a charter litigation against the bylaw in Vaughn, Ont.

I hope the responses to this draft bylaw, written and via delegation, are weighed heavily when deciding next steps.

I'm writing to express my shock and severe disappointment at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

I am in opposition to the proposed bylaw, as it would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants; Indigenous, racialized and 2SLGBTQIA+ community members; as well as protections for the environment.

If passed, I am concerned that this by-law would not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place — acts that are already criminal. Instead, peaceful protests would be severely limited and criminalized.

This undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone

of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

The scope of this bylaw is too broad and the areas affected are the same. Traditionally Indigenous peoples have done peaceful activities in all of these spaces that may have been seen as “disruptive” but in reality it was uncomfortable for the people at the time. This is how Indigenous peoples have contributed to the Winnipeg's / Canada’s democratic process when they were legally shunned out in other ways. This can be attributed as recently as the Idle No More rallies. By imposing such a broad ban you risk limiting the ways oppressed / marginalized peoples can contribute to Canadian democracy moving forward.

There needs to be safety for people accessing certain resources but this bylaws approach risks to take more away from Canadians / Winnipegers than give.

This is a complete affront to a citizen's charter rights. We have so few options to peruse change in the current systems, and to remove the one democratizing option, that of protest, especially now in the time of the rapid onset of authoritarianism in neighboring countries, is completely unthinkable and sets us up for a far more dangerous future.

Any amount of "inconvenience" is not worth threatening this right. Please rethink and abandon this idea.

As a student at the university of Manitoba I find this proposal highly offensive. Student protests are historically some of the most significant drivers of change, and this proposal flies in the face of universities as places of intellectual debate, discussion and protest. Additionally it just so happens to include other important spaces of protest such as parts of the legislature and city hall which in a free and democratic society is fundamentally unacceptable.

This is ridiculous, I feel like I'm hearing news about a new US law. Meaning, you can lie to the people you are paid by and for to protect, but we're not going along with it. The wording of this by law is way too generic, thus it can be used to silence people from protesting in majority of places in the city.

The right to protest, is a fundamental right that is very important to a free and healthy society. You claim this by law is to protect people, but is it? Since when have people been forced to not enter a building while there is protesting? Even if that is the case, if you want to protect people and our right to protest, make it a fine to forceably stop someone from entering a building they are allowed to enter. But no, you are using this by law protecting people explanation as a thinly veiled lie, to stop people from protesting at any location that could cause a problem for you, especially at city hall. You're actually trying to punish the citizens for pushing back on things they disagree with, by not allowing them or financially attacking them if they protest in any place of somewhat importance.

Absolutely disgraceful. Why the hell did you even get into politics? Was it not to help the people and protect their rights? You are silencing the people from the ability to hold you accountable and are hiding it behind the lie of protecting women who are getting abortions or LGBTQ+ people who get harassed. Absolutely disgusting, you are disrespecting the actual people who get harassed by using them as a shield for your lie.

Why don't you just go and work for USA's big pharma, you could make SO much more money while hurting SO many more of the people you are paid to help. And, people care even less when you sell them out to help the rich.

Thankfully, water is clear, and its winter time now. So if you were to look at some ICE, you'd

see your own reflection.

After looking at social media this morning, I was frightened to see that a potential ban on protest was to occur. The terminology used was “nuisance,” it is in my understanding that any and all social demonstrations opposing anything, including harmful activity like facism, have the possibility of fine up to 5000$ dollars. As a resident of Winnipeg I fear for the inability to voice my social and political concerns publicly. By silencing protests you are silencing people who lack a majority voice in society. Before implementing this, imagine you face racism and bigotry on a day-to-day basis while idling by fearing economic consequence if you try to spread social awareness. If this is where you begin to draw the line I worry what comes next.

Sincerely,
Proud Winnipeg Resident.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Ryder Keeper

Dear Executive Policy Committee,

I’m writing because the City of Winnipeg’s consideration of the "Safe Access to Vulnerable Infrastructure" By-Law scares me and I'm opposed to it because it would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

I am particularly disturbed by this encroachment on Indigenous Peoples' ability to grieve the colonial violence that's been imposed, on the land that was stolen from them, by a system that claims to want Truth And Reconciliation. We can do better and I expect that we do as a resident of Winnipeg.

The City’s proposed “Safe Access” by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

Sincerely,
Rylee Cizik

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Ryyn A. Riou

To Whom It May Concern,

I am writing to formally express my opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law (#7), particularly the provisions that would prohibit protest activity within designated zones and impose fines on individuals engaging in demonstrations.

While I recognize and support the responsibility of government to ensure safe access to essential infrastructure and to protect vulnerable populations, this by-law raises serious concerns regarding the infringement of fundamental civil liberties protected under Canadian law.

Peaceful protest is not only a democratic tradition — it is a constitutionally protected right. Under the Canadian Charter of Rights and Freedoms, individuals are guaranteed:

Freedom of Expression (Section 2(b))

Freedom of Peaceful Assembly (Section 2(c))

Freedom of Association (Section 2(d))

These protections exist specifically to ensure that citizens can publicly voice dissent, advocate for change, and hold governments and institutions accountable without fear of punishment or financial penalty.

The proposed by-law, as written, risks overreach in several key ways:

Broad Protest Restrictions
Establishing wide exclusion zones around “vulnerable infrastructure” could effectively remove meaningful spaces for lawful protest, limiting visibility and impact — both of which are essential to democratic expression.

Financial Penalties as a Deterrent
Imposing fines on protesters creates a chilling effect on civic participation. The threat of financial punishment disproportionately affects lower-income individuals and marginalized communities, undermining equitable access to democratic engagement.

Precedent for Rights Limitation
Restricting peaceful assembly through municipal by-law sets a concerning precedent for the erosion of Charter-protected freedoms at the local level.

Under Canadian constitutional law, any limitation on Charter rights must meet the Oakes Test — meaning restrictions must be demonstrably justified, minimally impairing, and proportionate to the objective. In its current form, it is unclear whether this by-law meets that threshold.

Public safety and civil liberties are not mutually exclusive. It is entirely possible to ensure safe access to infrastructure while still protecting the lawful right to protest through:

Clearly defined, narrowly tailored buffer zones

Time, place, and manner regulations that do not ban protest outright

Dialogue and de-escalation strategies rather than punitive enforcement

Democracy depends on the ability of citizens to gather, speak, and be seen — especially in spaces connected to the issues they are protesting.

For these reasons, I strongly urge Council to:

Reconsider the scope and enforcement mechanisms of By-Law #7

Ensure alignment with Charter protections

Engage in further public consultation before adoption

Protecting vulnerable populations is vital — but so is protecting the democratic rights that allow communities to advocate for those very populations.

Thank you for the opportunity to provide this submission.

Sincerely,
Sabrina Lee

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Sam Glover

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. I am an educator who teaches the importance of this right, and I have am happy to have peaceful protests outside my workplace even if I disagree with the cause. These freedoms are what gives my students hope for their futures. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,

I am writing as a Winnipeg resident and Canadian citizen of immigrant background to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law.

Having come to Canada from a country where protests are often suppressed, I am deeply concerned to see my new home city considering a by-law that would, in practice, restrict Charter-protected rights to freedom of expression and peaceful assembly. This is exactly the kind of legal tool that can gradually normalize limits on dissent and public criticism.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for social and policy changes that benefit all of us as a community and as a country. From vigils and rallies to round dances, public demonstrations have helped win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, immigrants and refugees, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but also silence marginalized communities' voices, enable police overreach, and leave us with fewer tools to respond to hate. The City's proposed "Safe Access" by-law does not create new protections against property damage, hate crimes, or violence – those acts are already illegal. Instead, it mainly creates new ways to restrict peaceful protests around many key public places such as schools, libraries, healthcare facilities, community centres and places of worship.

As an immigrant, I know that communities like mine rely on the right to protest to draw

attention to injustice – whether in Canada or abroad. Broad and vague rules like this almost always fall hardest on racialized and marginalized groups.

This is fundamentally an issue of protecting freedom of expression and association, which are crucial cornerstones of a free and democratic society. At a time when we see growing restrictions on protests and civil liberties in other countries, I urge you to remember your obligations to uphold the Charter and to protect democratic space in Winnipeg.

For these reasons, I respectfully ask you to reject the proposed demonstration by-law.

Signed,
Saman Azizkhani
Winnipeg, Manitoba

I am a resident of Charleswood, and one of Councillor Duncan's neighbours and constituents. I strongly oppose this propose by-law against lawful protests.

Winnipeggers are not as checked out as you imagine on an issue like this. Many of us are aware that this by-law would geographically restrict protests, a right which is enshrined in our charter of rights and freedoms, far more insidiously than is being spun in the media--per this map: https://chromatin.ca/blog/nuisances/

I can think of an example in every case of a protest at a school, a hospital, or a place of worship in Winnipeg, in RECENT memory, that was necessary to show support and protection for marginalized groups, at baseline--many of which I've attended and were a peaceful demonstration of citizens exercising their right to dissent. But of course this proposed by-law would create zones where protests would essentially be restricted far beyond the locations being highlighted.

I think of the students protesting the atrocities in Palestine at the U of W, or the teachers' union striking at the U of M; I think of the parents, teachers, and community members coming together to support queer students being bullied at schools by lawmakers preventing gender and sexual education studies and banning books; I think of the nurses and supportive care workers striking for better working conditions at hospitals and care homes; I think of the right wing extremists booking churches and synagogues across

Canada as locations to spread their messages of hate. And I think of all the people who came together to oppose these things, through peaceful action, and the example it provided to our children that a better world is possible if we come together with empathy.

Do you truly believe these protests were a danger to society, and not an expression of our fundamental humanity?

I can't help but wonder, as far as political strategy goes, why you'd imagine Winnipeggers wouldn't be galled by this proposition, given what is happening to our neighbours in Minnesota and the broader USA. How lawful observers are being shot and killed for dissenting with no repercussions. Even speaking to many of my neighbours in Charleswood and Tuxedo, the common refrain is 'what would this by-law be good for?' It certainly doesn't seem good for the basic rights we are, daily, being shown in the news can be violated by police and lawmakers on a whim throughout North America.

And I certainly can't imagine it'd be something voters will forget when it comes time for the election in October.

I add my voice to those who oppose this by-law and ask you to reconsider it, as well as the reasons you're putting it forward. I don't feel protected or comforted by legislation like this. When it comes down to it, I'm just an author--but I've certainly seen this story writ large before across history, and to see a by-law like this put forward by this council makes me worried of the stories they'll tell in years to come about how citizens gave up their rights to dissent willingly.

Yours,
Samantha Beiko

We are not the USA, we value different opinions and there hasn't been any issues in the past. Freedom to protest is extremely important in Canada. There should be limits, but these should be very few. It should only be essential services and places predominantly for vulnerable people, like such as hospitals, schools for children (not universities, colleges, and other adult education places), and Halfway houses.

Dear Executive Policy Committee,
I am writing today to express my anxieties around Agenda Item 7. I believe the implementation of this by-law would only aid in the limitation of free speech for the city of Winnipeg. This by-law would limit our ability to effectively protest peacefully and have our voices heard. The vague wording of the by-law could be used to ban many peaceful types of protest, such as vigils, dances, and other public demonstrations from happening on majority of Winnipeg land. This by-law would also have the effect of silencing and harming our marginalized communities that require more protection. This by-law does nothing to institute actual protection from hate speech, vandalization, or property damage. It only serves to silence the strong voice of Winnipeg, in a time where there is so much to speak up about. Winnipeggers right to free speech and protest is protected by the Canadian Charter of Rights and Freedoms, and this by-law seeks to infringe on our Charter rights. As we see south of the border and around the world, free speech rights are being attacked. As a citizen of Winnipeg, I do not want to see our province follow suit. I hope you take our concerns into consideration, and cease further consideration of implementing this by-law

The right to protest is one of the most basic aspects of democracy and must not be removed. While I might support some limitations, the current proposal is too broad. Given the choice between this proposal and zero limitations on protests, I would have to choose the latter. For instance, while I personally find protesting abortion with the types of graphic imagery typically used by such groups outside hospitals, I would disagree that doing so on a university campus is inappropriate, even though I disagree with the stance and tactics in every possible way. I might support a more minimal distance limitation for young students at schools, but again, not this wide sweeping ban. Leaving variables up to police discretion leaves far too much space to exert political agenda over who gets to protest what topic and who does not, and this cannot be allowed.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our
Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason
that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community
members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but
silence marginalized communities' voices, lead to police overreach, and result in inadequate
options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.
This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and
Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate
for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of
a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Sincerely,
Sandra Miller

More and more, elected officials and certain members of the public use feeling uncomfortable or being inconvenienced to mean unsafe. This is a dangerous trend. Protests and demonstrations are the sign of a healthy democracy. Let's not forget, elected officials work for the public, and that includes the people who may disagree with proposed policy, legislations, or any number of things, and choose to protest about it. This is their right.

The language in this proposed by-law seems purposefully vague; "nuisance protests" is non-specific, and means potentially all public protests, marches, round dances, and other gatherings could be subjected to this by-law. For a government that talks about reconciliation, equity, and being a city for all, the thought that the MMIW march, a Round Dance, or some other form of public protest--one that uses amplified sound or blocks traffic--could cause individuals to be fined up to $5000 seems draconian, colonial, and antithetical. Thinking about who gets to decide who or what is a nuisance furthers this thought, as it is often marginalized groups and their supporters who are protesting things that will have a very real and very negative impact to their lives.

It was reported that this by-law's champion, Evan Duncan, referenced the "out of hand" protests down south. He cannot possibly be talking about Minneapolis's very justified and very inspiring (though thoroughly terrible because they have to) protest against fascist ICE agents kidnapping and murdering people. To think that an elected official would react to such horrific and terrifying actions with this proposed by-law is utterly confusing and disheartening.

In a democratic society, Government does not get to dictate how or when people choose to protest, and thinking that they can is a dangerous step towards authoritarianism.

* "Nuisance Protest" is non-specific, meaning any and all actions could be subject.
* Areas restricted by this by-law are public spaces and points of proximity to decision makers. Much of the city would be subject to the geographic restrictions of this bylaw including City Hall and University Campuses.
* Fines of up to $5000 could be issued to every person who shows up to Round Dances, rallies, group bike rides, marches, etc.
* Police will have new tools they will use to silence and punish protesters.
* We are very concerned this bylaw will be racist in its application, limiting protests and rallies promoting Indigenous rights, among others.

My primary concern with this bylaw is the nebulous definitions of "nuisance demonstration" and "intimidation" in this proposed bylaw. To give a specific example, the lack of clarity regarding "nuisance demonstration" could allow for so-called "pro-life" demonstrators to continue holding up images and signs that trigger and traumatize viewers on a post-secondary campus or outside a hospital-- depending on who is making the decisions this could be deemed as not a "nuisance" and not "intimidating." Whereas, a group of largely Indigenous peoples could be holding a peaceful round dance as protest and be deemed a "nuisance" and "intimidating" because of the systemic racism inherent to our society. In short, white people tend to be intimidated by Indigenous people and may say they fear for their safety because systemic racism, rampant stereotyping, and media portrayals promote the idea that Indigenous people are dangerous and violent. Whereas the young white people promoting hatred towards those who have had abortions are not "intimidating" because they are white. There is both a breadth and a lack of clarity to this proposed bylaw that may restrict Charter rights and freedoms, particularly for racialized individuals. For these reasons, I ask you to remove this bylaw from consideration.

The right to protest is fundamental! Public spaces are meant for gathering; whether that be informally as a community or in a formal assembly in connection to political activity. How else can the people's voices truly be not just heard but seen?

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Sarah Grieves

Dear Executive Policy Committee,

I am writing to (1) express my concern regarding the City of Winnipeg's consideration of the "Safe Access to Vulnerable Infrastructure By-Law" that would restrict our Charter-protected rights to freedom of expression and peaceful assembly and to (2) oppose the proposed bylaw.

The passing of this by-law would limit the fundamental freedoms Winnipeggers have and continue to use to advocate for social and policy changes that we currently enjoy as a community and a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law will not only infringe on constitutional rights, but also silence the voices of marginalized communities, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal; instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as this proposed by-law may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Comments
Dear Executive Policy Committee,

I am writing to you today to express my strong concern and opposition to the City of Winnipeg's consideration of the proposed Safe Access to Vulnerable Infrastructure By-Law. I am deeply concerned and appalled at such a proposal, as it directly restricts our fundamental rights as outlined in the Canadian Charter of Rights and Freedoms, namely the right to peaceful assembly and protest. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Canadian citizens of Winnipeg have used to advocate for many social and policy changes that we currently enjoy as a community, and as a nation at large. Vigils, rallies, round dances and public demonstrations have been used to help win rights for workers, tenants, Indigenous, people of colour, and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law would not only infringe on our constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to displays of hatred, or oppression. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead,

peaceful protests would be restricted, by an indescript and undefined term of “nuisance.” This lack of definition, allows for enforcement officers acting seemingly at their own discretion. This type of undemocratic curtailing of our charter-protected freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

Protecting freedom of expression, assembly and peaceful protest is a crucial cornerstone of a free and fair democracy. Given the abhorrent suppression of rights and freedoms currently happening south of the boarder and across the United States, I remind the council of their obligations to uphold the Charter and protect our democracy.

I beseech your dismissal, and condemn this proposal by Councillor Evan Duncan of this unconstitutional and undemocratic proposed by-law, in honour of protecting fundamental human rights of Canadians in Winnipeg.

Non violent protest is mandatory in a functioning society, especially given Canada's threats from the south. No protest has caused significant issue in Winnipeg (for the people).

I am strongly opposed to restricting protests in such a general fashion. It is our right as citizens of a democracy to protest and we should not risk erosion of those rights without extreme caution, care, and justification. Legislation for hospital and clinic buffer zones already exists, and places like schools and universities should absolutely be allowed to host protests without the participants incurring risk of legal or financial impact. It is critical for protests to be allowed to occur in places that are visible to society or they lose impact.

Dear Executive Policy Committee,

I'm writing to you to express opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law that will restrict my family's Charter-protected right to freedom of expression and peaceful assembly. Frankly, I'm alarmed that such a proposal is even up for discussion at council.

This bylaw would limit our fundamental freedoms to advocate for many social and policy changes that we currently enjoy as a community. Community led vigils, rallies, round dances, and public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter Rights and Freedoms and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Protest By-Law Opposition Letter Template
Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

Legislating against protests, while we see how important the right to protest is every day on the news? This is an extremely tone-deaf position to take today. I have been made uncomfortable and inconvenienced by protests that I didn't agree with. However, I fully support that people have the right to protest in public places. You're joining the ranks of Alberta and those who would use the "notwithstanding" clause to get around the charter rights of citizens to benefit yourselves. Shameful. Please strike down this overreach of government and show that you serve the people of Winnipeg and not just your own convenience.

This bylaw would enable Winnipeg police to behave similarly to ICE in the US. Is that what we want in Canada? If you support this bylaw you are similar to Trump and everyone else who supports ICE's brutality.

I am writing in staunch opposition to the proposal to set limits on our Charter rights to freedom of assembly and free expression in proximity to certain public and private spaces. This proposal is frankly an outrage that it has even come this far. Why do our councillors seek to erase a cornerstone of democracy? This smells of foreign influence, as some lobby groups (working with and for foreign nations) have used their influential and powerful lobby groups to forward similar anti-speech proposals on a federal level. This must stop now. Council must oppose and dispose of this recommendation.

This new proposal would negatively impact our charter rights, as it would harm people's ability to protest, which is important for our democracy. We already have a buffer zone of 50 meters which is already adequate so there is no reason to extend the buffer zone. I sincerely hope that you do not go forward with this proposal as you would be hurting the people of this city.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Seema Uddin

This by-law is unethical and dangerous. People have a right to protest and protests should be disruptive. Your unhindered commute is not more important than someone's missing daughter, clean water, or people's human rights. If this by-law gets passed I will be ashamed of our city. It is shameful enough this is even being proposed.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

This is a very scary and insane bylaw, if passed I am concern this by-law could infringe on constitutional rights and silence marginalized communities voices.

I'm all for protecting hospitals and schools but this law is not for that. This law has larger implications that will restrict peoples freedom of expression and the right for peaceful assembly. These are fundamental rights that must be upheld.

Why is this being considered now and not when the trucker protests were going up and down Broadway or when anti-vaxxers were protesting outside of hospitals during covid. The timing of this feels targeted towards the free Palestine and college/university campus protests. Isn't it also very convenient that city hall, the police HQ and other notable buildings are included in the drafted map this would cover.

Dear Executive Policy Committee,
I'm writing to you today to express my absolute disgust at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. This is step one on the way to a fascist police state, but you already know that.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change. The irony of taking away human rights in the same city that the human rights museum is located is so dystopian it's almost poetic. This irony would not be lost on potential visitors and surely it would spark a type of protest that business owners in this city should fear more, protesting traveling to or supporting the Winnipeg economy at all.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Council,

I am writing to you in opposition in regards to #7 Agenda Item Safe Access to Vulnerable Infrastructure ByLaw. Disruptive, non-violent protest is part and parcel of a vibrant functioning democracy. Councillor Duncan's proposal is in complete opposition of free speech. This council, and everyone on it, committed to serving the people and place of Winnipeg by campaigning for your leadership role. This proposed bylaw directly breaks any ethos and foundational priority to your role. How can you serve a city at the leadership level without listening to the people who live there? How can you make effective, insightful, and inclusive decisions without freedom to express opinions and concerns? This proposal, passed or declined, will be remembered by Winnipeggers for the upcoming election.

It seems these days there's a new political play at our doorstep, one that seeks to inhibit our freedoms and market them as wins for the public. While people are fooled by politician's empty statements everyday, do not underestimate us, the public. We see your bias, in obvious ways, such as when you call our right to express ourselves as "nuisance" demonstrations. It is because of corrupt politicians and big corporations who live in luxury that the public must protest, to make sure they are heard. To take away the decision of where to protest is to take away the symbolism of protesting itself.

At the U of M, where Arij a final year nursing student, was intimidated by university administrators, for expressing her solidarity with Palestine; pro Palestine encampments demonstrated solidarity with the students voice. According to your bylaw these demonstrations would not be allowed. I as a student, felt safer having these encampments at university, since to me it signalled the existence of a voice that reflected mine, and exposed what was happening in Gaza.

A person engaged in these discussions online mentioned that they would be unable to protest on their own front yard according to the legislation. This is ridiculous! You are effectively banning protesting! I am also highly suspicious how this new bylaw comes after multiple pro Palestine protest at the university and other spaces. What benefits did Evan

receive for making such a biased bylaw? Your definition of nuisance is entirely generic.

Who decides which demonstrations are nuisance? Where they should be held? You? the biased corrupt politician, who lives in comfort and in dissonance with the voice of the people. You will not make that decision for us.

Society will only grow in inequality and corruption should this bylaw go through, as I'm sure you know, which is why you created this bylaw. We see through your lies. The public not being able to protest near government buildings, sure makes it easy for corrupt officials to act like those who disagree with them, don't exist. Rid yourself of the paternalistic idea that you get to control every aspect of the public voice. You were elected by the people, you don't rule us.

The mental and physical labour that we the public have to do day in and day out, to stop pathetic politicians from essentially turning us all into slaves of the rich and powerful, is exhausting. Everyday it seems there's another stupid idea by another stupid politician, in an attempt to encroach on our freedoms.

Given everything happening in the terrible place called America, we should be wary of bylaws such as this. America is a warning, to Canada, it shows us all the ways we might become like them and how to prevent that.

Dear EPC,
I write to express my firm opposition to the so-called "Safe Access to Vulnerable Infrastructure Bylaw" now being considered by you (and not even by the entire elected City Council).
Winnipeggers, like all Canadians, expect to see their rights to peaceful protest, to assembly, and for freedom of expression protected and not attacked by their own law makers. Your attempt to spin public spaces as "vulnerable" is yet another example of the disturbing double-speak we hear all too often south of the border. It is not those with the power to make laws and direct policy who are vulnerable but members of marginalized groups and those who fight for them and it is their right to express their opinions in public spaces and to be heard by you as law-makers.
I ask that you please, come to your senses, protect the fundamental constitutional rights of Winnipeggers and vote "no" to this bylaw.

I doubt this would stand up to a Charter challenge, but let's not even go there. This is excessively vague and sweeping to the point of being undemocratic. We should not require your permission to protest as you see fit.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

With thanks,

Shauna Alcorn

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

It is entirely inappropriate to ban protests in such a broad way. Any restriction should be only in places where vulnerable populations are located such as hospitals, schools, or halfway houses. The government and religious institutions should never be excused from being protested. It's a slippery slope I don't want to be part of.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

Efforts to restrict protests near schools, hospitals, or places of worship can unintentionally suppress minority viewpoints and grassroots movements, which often depend on access to public spaces to share their perspectives. Historically, broad protest-exclusion zones have been applied unevenly, with marginalized groups or those expressing dissenting or less popular views—such as demonstrators raising awareness about humanitarian concerns in Gaza—facing closer scrutiny despite peaceful conduct. This raises concerns that the proposed by-law may disproportionately burden certain communities not because they pose a safety risk, but because their message challenges prevailing sentiment.

It is also important to consider past examples of protest activity in Winnipeg. During the 2022 trucker convoy, police warned of major traffic disruptions and impeded access around the Manitoba Legislature, advising the public that exiting or entering the area could become “impossible” due to the scale of the demonstration. The convoy also required significant public resources, with documents showing that it cost Winnipeg police nearly half a million dollars to manage the protest’s operational demands. Additionally, long “slow-roll” demonstrations caused city-wide delays as convoys moved through Winnipeg’s main routes, prompting police to warn motorists to avoid major corridors during hours-long disruptions.

Despite the scale, cost, and impact of these events—some of the most disruptive demonstrations the city has faced—no comparable by-law was proposed at that time. Yet now, protests focused on humanitarian and anti-war concerns are being characterized as a heightened threat requiring new restrictions. Given this contrast, it is reasonable to ask: What specific evidence demonstrates that such a by-law is needed today, when current protests have caused relatively few issues, and why were such measures not deemed

necessary during the far more disruptive 2022 convoy?

I am urging council to reconsider this by-law that infringes on Winnipeggers' right to free speech. This by-law would put in place a goal-post that is easily shifted by design, to criminalize people who are for the most part so moved by their commitment to a better city that they put themselves in harm's way to ask for change. Council's emphasis on protesting in the "right way" has equated this with protesting in a way that is ineffective, and easily ignored. Rather than considering protests as a nuisance, how might our city be improved if we consider protesting as the charter-protected act of civic engagement that it is. If your constituents are trying desperately to tell you something, rather than being annoyed by this, perhaps you could at least listen.

Dear Executive Policy Committee,
As we watch democracy disintegrate in the US, we have been so grateful our rights to voice our concerns peacefully are protected in the Canadian Charter. And now this proposed by-law pops up to threaten our own democracy and free speech.
We are writing to you today to express our shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that we are in opposition to the proposed bylaw.
We are deeply concerned about where this erosion of democracy could lead. Our history of public action in the form of protest has led to many positive changes in our country from rights and protections of a variety of marginalized groups to bringing action to address environmental issues. "Nuisance Protest" is a vague term subject to misinterpretation of the by-law to suit the intentions of those impeding freedom of speech or those using poor judgement in enforcement actions. The citizens of Minneapolis are currently experiencing the horror when their democratic rights are being trampled. We need to diligently guard against any attack on our own democratic rights.
We understand the need to protect vulnerable citizens from hate speech and violence directed at them and fully support protecting citizens subject to this. As a City, we already have ways to address these criminal actions. The proposed Safe Access bylaw is not required for this. Instead, the Safe Access bylaw targets citizens who are bringing important concerns and injustices to public and government awareness.
We urge you to remember your legal obligations to uphold the Charter and protect our democracy and drop further consideration of the proposed demonstrations bylaw.
Signed,
Shelley and Michael Malyk

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw. Shelley Bencharski

This bylaw is not safe for anybody. It strips us of our fundamental rights and freedoms and is extremely racist and classist. In plain terms: It will hurt us.

As an Indigenous woman, born and raised in Winnipeg, I am both ashamed and scared of this proposal that will only serve to further perpetuate harm to Indigenous and people of colour in Winnipeg. Our mere existence as Indigenous people is political, and as such we are constantly made to, and need to fight— peacefully protest, march in the streets, call out governments, etc. for basic human rights and equality (or, a shred of equality) and fair treatment.

This bylaw will not only infringe on that, but will further position us in a state of inequality and danger. We already face higher rates of violence, poverty, incarceration, murder... if you inact this bylaw you are contributing to this, and taking away our fundamental right to peacefully oppose this.

You will be harming us.

- Shelley A. Cook

The “Safe Access to Vulnerable Infrastructure By-Law” that the Executive Policy Committee is considering has no legitimacy. The reference to “nuisance protest” says it all. Protests should never be considered a nuisance. As you know, assembling to draw attention to legitimate concerns with government or indeed others’ actions is a right in this country that is guaranteed by the Charter. Public demonstrations are a means for marginalized communities and concerned citizens to indicate to government and the public that there are issues to be dealt with. The City of Winnipeg can deal with property and hate crimes or any sort of violence once it presents itself, but do not curtail dissension. The only way we can move forward as a society is to respect every person’s voice and not try to squash dissent through the means of this by-law. Thank you for your consideration. Free and legitimate expression of interest by all citizens through protest is vital to a healthy society.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Dear Executive Policy Committee,

I write to express my shock and alarm at the City of Winnipeg's proposed "Safe Access to Vulnerable Infrastructure" bylaw. I oppose it because it would restrict Charter-protected rights to freedom of expression and peaceful assembly.

Protecting access to hospitals, schools, and places of worship is a legitimate goal. Threats, harassment, and violence are already unlawful. This bylaw goes further by creating broad buffer zones and relying on undefined terms such as "nuisance" and "intimidation," granting wide discretion to enforcement while severely limiting peaceful protest.

Public demonstrations, from vigils and rallies to round dances, have helped secure rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ communities, and environmental protections. Measures like this risk silencing marginalized voices, enabling police overreach, and narrowing democratic space without addressing conduct that is already criminal.

The Canadian Civil Liberties Association has warned that broad restrictions of this kind may unfairly limit Charter-protected expression and disproportionately harm those who rely on protest to advocate for change. Such a bylaw sits uneasily with Winnipeg's stated commitment to human rights leadership.

This is about safeguarding both access and fundamental freedoms. I urge you to uphold your Charter obligations and abandon further consideration of this overbroad proposal.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Sky Dheere

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. It is absolutely unacceptable to warrant a ban on ‘disruptive’ protesting in the City of Winnipeg as it is a human right to express one’s opinions. The act of banning such disregards every position of containing a democracy, and this is incredibly shameful of the city to even consider.

I am writing to express my opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While safety is important, this by-law raises serious concerns about limiting the public's right to protest and restricting access to public spaces. The right to peaceful protest is fundamental in a democratic society which we are, and any policy that could limit this right must be carefully reconsidered.

I urge the Committee to reject or revise these recommendations to ensure public safety measures do not come at the expense of civil liberties and democratic freedoms.

Comments
The proposed Safe Access to Vulnerable Infrastructure by-law exemplifies another instance of government attempting to suppress inconvenient viewpoints. It threatens to undermine the freedom of expression guaranteed under the Canadian Constitution and sets a concerning precedent for restricting lawful protest.

Given the ongoing erosion of civil liberties globally, including reports of ICE protesters in the United States being detained and even killed, the timing of this legislation feels particularly unsettling. We should question whether it places Winnipeg on a path we might later regret. My elected representatives should utilize existing laws before creating new barriers for those exercising their constitutionally protected rights.

My concerns include:

- “Nuisance Protest” is a vague and flexible term lacking a clear definition. This invites broad interpretation, potentially suppressing lawful but uncomfortable dissent. Consider Rosa Parks and Mahatma Gandhi; both were considered nuisances.

- The scope is extensive. Independent analysis using City of Winnipeg mapping data suggests approximately 17% of the city would fall within restricted zones. This includes City Hall, university campuses, and other historically central venues for democratic expression.

- The $5,000 fine is excessive. For many residents, especially those already marginalized or excluded from mainstream political channels, this represents a significant penalty. Public protest is often the last available avenue for being heard.

Overall, this by-law seems poised to empower the government to sideline inconvenient voices rather than engage with them. This is not the direction a healthy democracy should take.

I urge City Council to carefully reconsider and ultimately vote against this by-law.

It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Stephanie Patrick

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

When I woke up this morning, I thought I lived in Canada. Did we become the 51st state overnight? There are no words to describe the depth of my concern over this proposal. Who decides what protests are a “nuisance”? Our esteemed leaders who want to control the narrative and masses? Come on council, take a deep and introspective look at why you are proposing this in the first place. I have one question. What’s next?

Yesterday Winnipeg set a new precedence that saw said to affect Canada for the next 100 years. The sentencing of 2 animals killers with 12 years jail time. We, the people of Winnipeg, choose to be at the courthouse and protest the crimes of these monsters during the most gruelling seasons Winnipeg offers. To rally with strangers, friends and family members that we reject these people from our communities. By stifling our ability to peaceful protest this iconic moment might not have happened.
Without the public this may not have the been the changing moment it's now become.

I oppose this proposal as the public became an important part of this trail and monumental result.
Silence only benefits the abuser.
Our community rejects animals abusers and this bill that silences us and all citizens.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal

Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Mayor Gillingham and members of Executive Policy Committee,

When I first heard about Councillor Duncan's proposed curtailing of the freedom of expression and assembly guaranteed by Canada's Charter of Rights and Freedoms, I had to double-check I hadn't woken up in authoritarian America.

Having read the Councillor's explanation sent to community members, I have no reassurance about his goal. I am completely opposed to a by-law whose parameters are vague enough to leave its powers open to interpretation and manipulation by those who would use force and intimidation to quell dissent against City policy-making.

Councillor Duncan's proposed by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

The proposed by-law is completely unnecessary. The City has numerous tools to address the worst-case elements Mr. Duncan fears. His proposal seeks a draconian and undemocratic removal of the freedom of expression and association. This has no place in Winnipeg, a city striving since 2018 toward the United Cities and Local Governments organization's status of "Human Rights City."

According to the Canadian Civil Liberties Association, the right to protest is not simply permitted in a democracy; it is essential. Peaceful protest is a primary way in which

residents can express dissent, hold governments accountable, and influence public policy. Broad 100-metre exclusion zones around an extensive list of facilities, including schools, community centres, and places of worship, would effectively prohibit legitimate, peaceful demonstrations across large portions of the city, creating "fortresses of exclusion."

If you proceed with this disastrous legislative instrument, you will not only infringe on constitutional rights, but you also will silence marginalized communities' voices, enable and embolden police overreach, and limit the adequacy of options for responding to hate. In addition, the fines suggested in the proposal will further marginalize the poor, a group for which this Council already does little to uplift. The by-law proposal's wording of "nuisance demonstrations" itself communicates disdain for those who would dare to speak against the actions of the powerful and privileged.

Should Council adopt this by-law, you can count on me being present to protest it, as is my constitutionally-entrenched liberty under the Charter of Rights and Freedoms.

The people who speak out against questionable policy directions and civic overreach are not "nuisances." They are your employers. It is your sworn duty to dispose of this ill-advised, regressive, heavy-handed and completely unnecessary legislative proposal.

I am heavily opposed to this by-law. It blatantly violates our right to peaceful assembly in the Canadian Charter of Rights and Freedoms, and could easily be employed to endanger the most vulnerable groups within our community. Annoyance around protests does not trump the right for them to occur or to police where they occur.

The proposed bylaw would fine people up to $5000 for participating in protests deemed a "nuisance" (vaguely and broadly defined in the bylaw). The enforcement of such a bylaw will almost certainly be racist and classist in how it is applied. If passed, this would substantially limit freedom of expression for the citizens in Winnipeg

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Stuart Matthews

I'm OK with the Intent of this By law but the timing is bad with what's going on in Minneapolis, and 100 meters is too long, and the fines are too high, Especially for poor people. I suggest table it for a future meeting so people can Register their concerns and make a better bylaw.

I am writing in support of Agenda Item #7 at the February 17, 2026 EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. This measure is a necessary step to protect essential community institutions such as schools, hospitals, places of worship, and government legislative buildings. This important policy ensures that Winnipeg remains a safe and welcoming city for all, free from radicalization and hatred to marginalized groups that sometimes rears its ugly head during nuisance protests. Some of these protests border on terrorism as defined in the Combatting Hate Act.
I have experienced first-hand being harassed and intimidated by a group of angry protesters as I entered the Asper Community Campus. This by-law protects all Winnipeggers, and I expect good governance from my city council to make the right decision on February 17, 2026.

My support is rooted in personal experience. While attending the Folklorama Festival—specifically the Israel Pavilion—I was confronted by a mob of protesters. Folklorama is intended to be a celebration of our city's diverse mosaic and a safe space for cultural exchange. Instead, the environment was transformed into one of intimidation and political conflict.
I urge the Committee to pass this measure to ensure that Winnipeg remains a city where culture can be celebrated without fear.

I am writing in support of Agenda Item #7 at the February 17th EPC meeting urging the passage of Safe and Vulnerable Infrastructure By-Law. The Canadian Charter of Rights and Freedoms protects our fundamental democratic rights, including free speech, the right to assemble, and freedom to worship. Inherent with these rights is each Canadian's RESPONSIBILTY to uphold the rights for ourselves and each other. This summer Jews were harassed by "protests" with placards calling for "Hitler to Finish the Job," and "Standing with Hamas," outside their home Folklarama Pavilion, Shalom Square, which is housed in a community center and school. Hate speech is contrary to the Charter, and protests to focus on government and those in power, not people coming to celebrate culture. Further, in October 2024, an educational workshop for teachers, on the topic of modern day antisemitism was cancelled because the threat of protests meant educators and presenters would not be safe. Because there was no protection in place, the threat to harass cancelled the opportunity to connect and educate. This is contrary to the values of education, and the Rights and Freedoms upheld in the Canada Charter. For the last two years, the Jewish community has experienced threats, harassment, and intimidation in spaces like schools, synagogues, and community centers, which are supposed to be safe. Not only does a Safe and Vulnerable Infrastructure By-law give the police a course of action to respond to hate speech and threats, it also protects the vulnerable, including children, the Jewish community, and all other marginalized groups targeted by protesters

My family belongs to a minority group that has been obstructed, harassed, and insulted regularly by masked protestors at schools, community centres, and places of worship for more than 2 years because of perceived links to actions of a foreign military of a country I've never even visited on the other side of the world. This "bubble bylaw" is needed and is long overdue.

I support the recommendations because my family and community has been harassed on multiple occasions by protesters. We deal with these when we attend our place of worship, the community centre, and on occasion, in our own driveway and neighbourhood as protesters leave the downtown or Legislature. Everyone deserves to be able to attend services and events at their place of worship without being harassed or confronted by someone with an enormous placard that calls for their erasure. This constant harassment of Jewish Canadians (look at the StatsCan statistics, this is the minority being harassed) has not gone away, it has worsened. In our city, Christians and Muslims are not being shouted at, placards raised, as they go to community centres or congregations or schools. The law should protect all of us. Bubble legislation is another legal tool to encourage people to stop harassing minorities in Canada.

Photo attached shows a protester using the Hamas inverted red triangle, targeting Jews and Israelis, outside of Shaarey Zedek synagogue. My Jewish children had to go by this man every day on their way home from school.

Safe Access to Infrastructure By-Law Proposal by Councillor Duncan

Support or oppose recommendations
I support the recommendations

Submit comments in writing

Comments
I am writing to express my support for the bylaw bill currently being introduced by Mr. Duncan. While I strongly value our right to publicly protest and rally, when these gatherings cross the line into hate and intimidation, they no longer serve a legitimate cause.

Last summer, at Folklorama, we witnessed this firsthand. Pro-Palestinian protestors not only rallied at the Asper Community Campus, but some began using slurs and hateful language directed at innocent bystanders who were there simply to enjoy the performances. Many of these performers and attendees are Jewish and have no connection to Israeli government policy.

Situations like this demonstrate the need for stronger protections to ensure that public events remain safe and inclusive for everyone. I hope you will support measures that balance the right to protest with the need to prevent harassment and intimidation in our community.

Thank you for your consideration.

I am writing in support of Agenda Item #7 at the February 17, 2026, EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. This measure is a necessary step to protect essential community institutions and ensure Winnipeg remains a safe and welcoming city for all.

When attending the Israel Pavilion at Folklorama with my 3 year old son, we were bombarded with sounds of rockets and people screaming. This is unacceptable for a community centre, where families are entering to celebrate culture and use the facilities. I'm not sure what protesters are trying to accomplish by harassing community members, who have nothing to do with the Israeli government. Community spaces need to be protected to ensure this does not continue to happen, or worse.

Dear Chair and Members of the Executive Policy Committee,

This submission is made on behalf of the Blue and White Coalition of Manitoba, a grassroots organization of more than 300 Winnipeg citizens, formed in response to escalating intimidation, threats, and calls to violence directed at those who support Jewish Manitobans and the right of the State of Israel to exist.

We strongly support the proposed Safe Access to Vulnerable Infrastructure Bylaw.

Our support is grounded in lived experience. Since October 7, 2023, our community has endured repeated escalating intimidation outside a synagogue, at the Asper Jewish Community Campus, and at a Jewish day school. These were not abstract policy debates; they were events that left children, seniors, and families feeling surrounded and unsafe at institutions meant to be places of learning, worship, and community. The impact does not fade with time. It goes to the core of whether our community has a secure future in Winnipeg.

If Council fails to pass this bylaw, it will send a message that vulnerable communities are on their own when targeted at their schools, houses of worship, and community centres. It will signal that intimidation at the very doorsteps of such institutions is a tolerable cost of public life, at least when it comes to certain communities.

This bylaw is not about silencing dissent. It is about time, place, and manner. It preserves lawful protest in appropriate public forums such as City Hall, the Legislature, and public squares, while protecting children, worshippers, seniors, and families from being made a captive audience at sites they cannot reasonably avoid.

The constitutional foundation for such measures is well established. In **R. v. Watson; R. v. Spratt**, the British Columbia Court of Appeal upheld “bubble zones” around abortion clinics, recognizing that individuals seeking essential services should not be **“held hostage to the message the protestors wish to send.”** (emphasis added)

The Court confirmed that buffer zones create distance and protection while preserving protest outside the zone. The Supreme Court of Canada declined to hear the appeal, leaving that framework intact. Manitoba itself

enacted similar legislation through The Safe Access to Abortion Services Act.

To be clear, the Charter does not guarantee a right to express anything, anywhere, without limit. Where conduct becomes targeted harassment, intimidation, glorification of violence, or the effective encirclement of a vulnerable minority, it ceases to be the kind of peaceful expression our Constitution was designed to protect.

We have already seen the consequences of inaction. On April 1, 2025, and again during Folklorama, demonstrators outside Jewish community institutions blasted simulated shooting sounds, mocked prayer, and issued calls for violence. Jewish children and families were not merely exposed to opposing views; they were besieged and confronted with conduct calculated to intimidate and unsettle them in their own communal spaces. That is not peaceful assembly. It was attempted coercion.

Nationally, antisemitic incidents have reached historic highs. According to Statistics Canada and B'nai B'rith, Jewish Canadians, approximately 1% of the population, are the victims of a majority of religiously motivated hate crimes (approximately 70% of religious hate crimes, and approximately 60% of all hate crimes). Since October 7, 2023, Canada has seen synagogues firebombed, schools attacked, businesses vandalized, and harassment surge. In that climate, dismissing targeted, intimidating demonstrations at Jewish schools and synagogues as harmless "speech" is not neutrality; it is acquiescence.

Some, including those in positions of power who could have acted, and who now criticize this bylaw have long been aware of escalating intimidation yet did nothing. Their present objections ring hollow. Winston Churchill cautioned against the timid and the bureaucratic who enable drift and inaction in the face of mounting danger. Leadership requires more than delay, and commentary after the fact; it requires timely, measured action when communities are under strain.

Others who have publicly opposed this bylaw have repeatedly spouted dogmatic hate targeting one community, the Jewish community. They invite Council to license their hate and intimidation by refusing to protect vulnerable populations and infrastructure. Council should refuse that invitation to hate.

The bylaw is neutral. It protects synagogues, mosques, churches, gurdwaras, schools, shelters, clinics, and community centres alike. It does not privilege one religion or community. Were it otherwise, we would not support it. It ensures that every vulnerable group can assemble, worship, learn, and receive services without running an intimidating gauntlet at the entrance.

When balancing harms, the conclusion is clear: this bylaw is a modest, carefully tailored limit on the location of protest. It is a proportionate prophylactic response to a real and growing threat. It safeguards not only physical security but also the equal participation of vulnerable communities in civic life.

Winnipeg now faces a choice. Council can allow the most aggressive factions to dictate which communities must endure intimidation at their own institutions. Or it can affirm that in this city, rights are balanced responsibly, and minorities, any minority, will not be held hostage at the threshold of their schools, houses of worship, and community centres.

We respectfully urge the Executive Policy Committee and Council to adopt the Safe Access to Vulnerable Infrastructure Bylaw and to send a clear message: in Winnipeg, all communities are entitled to live, learn, worship, and gather in peace and safety, free from intimidation.

In regards to this proposed bylaw it is extremely important that I voice my disgust with this proposed bylaw. While I will be the first to admit I dislike seeing people protesting the things I disagree with but it is a fundamental right of every person. Besides the clear breach of our rights another concern is the enforcement...who is to decide what constitutes a nuisance. Instead of adding a bylaw which infringes on our rights, maybe it would be better to start enforcing our livability bylaws the North end is riddled with garbage or maybe figure out a way to more effectively address slum lords who let their properties sit vacant and deteriorate. The city needs to do better at protecting our rights.

I am writing in support of Agenda Item #7 at the February 17, 2026, EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. This measure is a necessary step to protect essential community institutions and ensure Winnipeg remains a safe and welcoming city for all.

A year ago there was a group of protestors who set up outside of The Rady JCC during school hours. I was there for a class with my 1 year old daughter and we had to witness all of those people screaming and yelling at us about being "genocide supporters." They didn't even know who I was because I was just driving in my car. There were kids there at school during that time. It was about to be pickup time as well. It was a calculated decision for that group to be there. I'm a teacher and I don't believe that anyone, including people who would be on my side of an issue, should be allowed to show up and intimidate anyone, especially children during school hours. I went to Gray Academy. I had bomb threats directed towards the school and had to evacuate at times when I was very young. Those events stay with me. Anyone who is opposed to this bylaw is in favour of intimidation. Protest can be done in safe public spaces without intimidation. It's important to have laws in place to stop people from crossing the line. Protests are important, but need to be kept within guidelines that keep communities safe.

There was a protest in front of my child's school and community centre on a night that she was scheduled to perform in a musical. We were prevented from entering the nearby parking lots. We had to park far away and walk a distance to the building, which made us late and stressed. The protestors were saying horrible things about our community, like: we support genocide, Hamas terrorists are martyrs and heroes, and that we are racist. My family should not have to experience Antizionist Jew-hatred as we enter our community centre and my kids' place of learning. It was a very hostile and scary experience that left us shaken and insecure.
These so-called protests happened multiple times in front of our school and the community centre that we are part of. The protests are threatening and operate as racist harassment rather than actual protest. The protestors are there simply to intimidate and harass the community in an effort to make us feel excluded from the wider Winnipeg community.
The protests support terrorism by showing symbols such as the red triangle and using slogans such as "support the resistance," which is overt support for Hamas terrorism. These protests contradict the values and laws of our Province and Country and infringe on our rights as citizens. This is not a matter of free speech. If the protestors were concerned about making their concerns heard, they would go over to the Legislature and protest there. Protesting the Jewish Zionist existence in Winnipeg and our democratic right to participate in our community is an act of pure racism, hatred and intimidation. Support for terrorism has no place in our community and does not do anything to help Palestinians.

There have been many incidents that made me feel unsafe in Winnipeg, including intimidating demonstrations by a school and community center (Asper Campus) and Swastikas drawn on or near schools and public places (Dale public outdoor pool). Regardless or world politics, here in Winnipeg, all Winnipeggers must feel safe and welcomed in their communities, schools and public spaces. Political demonstrations and discussions belong in political spaces such as the Legislative Building, not community centers, schools, public parks, playgrounds and pools.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Taking away people's right to protest is a human rights violation. Yes a protest can be inconvenient and maybe you don't always agree with what's being protested but that doesn't make it wrong or something that shouldn't take place. It's our rights as people to speak up and take a stand when we want change. non violent protest allow for that and give people a safe place to share their voices and be supported by others.
You might argue it's to stop harmful protest but most people would take 500 Nazi protest if it meant they could still come together to demand respect and justice for a life taken or missing. We can't become the USA and start policing everything and taking our ability to protest away.
You make this happen and someone will die just like Rene Good or Alex Pretti

This proposed bylaw is extremely broad and has very serious implications that can and will limit our residents' right to protest.
Essential services such as hospitals, halfway houses, and elementary/high schools should retain their rightful buffer zones to ensure safe access to the services provided. The proposed buffer zones are so extreme - this bylaw will limit constitutionally allowed activities so severely. Another step backwards for the city.

This is a democracy, protesting is our right. How are we supposed to progress as a city, a country, a human race, if we cannot protest/share our ideas of how we see our future and how can we hold the people in power accountable for any potential abuses of power. Protects are a display of our humanity, we are better when we can work together.

I do not support criminalizing protests. As it is our right as citizens to use our voice in protest. You
Can not criminalize indigenous people by suggesting that a protest on MMIWG is a nuisance!! In a time when the public are being silenced all around the world, I am deeply disturbed by this proposal.

I am writing to voice my opposition of the proposed by-law that would restrict protests from taking place in certain areas. It makes absolutely no sense to restrict peaceful protest by limiting where protests take place.

A school, place of worship, or public service office should not be able to hide from justified criticism in the form of protests.

Furthermore it is not the role of Police to determine what is a valid protest and what is a nuisance protest.

This policy would end up being a gag order against anyone the council or police disagreed with and that is a very slippery slope.

I urge everyone voting on this motion to shut it down.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Tammy Kimmel

If this law were to be in place it should be in the following:

- Hospitals: (and Hospice/other facilities Urgent Care etc.)
Doctors and healthcare workers need not face the onslaught of the internet and all it's misinformation woes.

- Halfway House:
For the so called rehabilitation purposes of the justice system. Gradual, supervised releases are best kept "nuisance free" so as to facilitate a transition to the outside life. Time and the courts have played their course and there is no need interfere any further. In this case, people may speak online freely just fine, since at this point it is a matter of discussion with little need to ever assemble, barring extreme circumstances.

- Schools: K-9
Most may say all the way to K-12, however, at this age they should be allowed to make mistakes. High school is a place of development, and social development can come in the form of "nuisance enjoying." Sure, Greta Thunberg is too young to be taken seriously as the "rational idealist," throughout her childhood, but that doesn't necessarily apply to the High School where more and more late teens absolutely are thinking for themselves.

In any case, or in all reasonable superstitions, it is clear that only Hospitals and other Shared Health facilities make any sense for the overarching paranoia that embodies the proposal. During Covid-19 doctors, nurses were harassed moving in and out of their jobs, because conspirators pre-dominantly, or more accurately: historically inhabited the internet, exclusively.

The right to assemble necessarily means medics have unimpeded traversal to save lives, as time is of the essence, and indeed, a doctor or any medic will always attempt to save a live, even if deemed already political. So, you simply cannot allow "nuisance" (or in other words an inconvenience) actors to form any type of blockade around healthcare, because these workers have little interest in arguing with their patients. The apolitical-political dynamic and the propensity to save all lives exempt them from nuisance interference.

Now, the essence of assembly is so pristine in the proposal that there is no clear stop or start. First of all, the law is so enforceable such that so called "nuisance" tactics will simply go sparse, worse case scenario now you're handling all angles. See the pre-ordained dispersal effect is clearer to people, whom have the accessibility of the internet to organize. The slippery slope certainly must be painted inverted.

Best case scenario is a series of arrests based on none other than 100 metered desire forcefields that rigidly treat adults like children. Assembly, scatter! Running from the police is obstruction, and so is existence. The whims of this anti-social proposal is immaculate, and is primed to exaggerate the quandary this city is already in. Indeed, the so-called sought after landmarks whom sanctity is derived from the very same seemingly arbitrary people trying to convene, means the city has ceded all critical thinking ability, and a lack thereof savvy-ness towards any future scenario or refusal. Is it convenient to be a nuisance? Maybe true. Though assembly could take lots of effort, the sentiment of the law agrees and is terrified of it being so, such that the mirror on the wall is beckoning.

Further, then, it's also true that it's convenient to put these nuisance actors in jail for any reason, as long as they existed in and around a deemed "moral zone," one that pre-existed before any arbitrary or obligatory social assembly was ever pressed on it. The fact of the matter is that just because you believe that you deserve 100m extra space as "private property," or "morality property," as a designated City of Canada, doesn't mean you get to be furious when your drive home is slower than usual. A buffer is just that, it's a buffer to slow down or attempt to sanitize or silence people with no other reason than it's a so called "morality institute."

The rooted "think of the children," morality this framework is based off of only makes true sense is in our hospitals. It was no mistake that adults; anti-maskers, anti-vaxxers, encircled and harassed our healthcare workers, our medics saving lives, all because the congregated made up their minds forever ago to deliver poison of the American media cycle, is the exact poison we see here today in council assembly & desired policy.

This is the paranoia that our institutions are dying & the fear that Winnipeg will lose it's pristine already assembled sanctums, such that they ought to be immune to the same speech that keeps social checks and balances in our society, and if necessary, with force and subsequent normalization of said social immunity. Our institutions need work, but this isn't it.

The cherry on top: why enact policy you can't really enforce (or afford) without being messy, or possibly destructive. That's just vulnerability for 'ya. Is "serving the community," serving up pre-rendered morality for the masses? Roads aren't the end all be all infrastructure, nor is protecting the church from some guests with opinions, nor is casting a spell on Colleges to freeze them in time (they do that themselves).

I am writing to express my utter dismay and objection to the grievous attempt of city council to muzzle democratic expression and association in our city. The proposed Safe Access to Vulnerable Infrastructure By-Law to prohibit what is called "nuisance protest" is a serious indication that we are heading in a very dangerous direction. I'm writing to implore you to take a stand against this proposed bylaw and vote instead in the interest of democracy.

The choice of the word "nuisance" not only signals that ambiguity will serve as a tool for clamping down on public expression, but also shows an alarming contempt by elected public officials towards their constituents. Nuisance for whom? If a democratic protest is a "nuisance" – an annoyance, in other words – to those public officials and decision-makers, then we must ask more clearly what kinds of decisions these decision-makers are defending. What is annoying to those in power is a matter of dignity and liberty for the rest of us.

Public space is for the public, and the public has constitutional and democratic rights to express themselves, including in protest. This bylaw is the single most important vote that will reveal city councillors' political and ethical compasses: are our councillors on side with democracy, or on side with unaccountable power? Will our councillors defend the right of the public to free expression? Your constituents expect nothing short of total defeat of this egregious proposal.

It is difficult to express how troubled I am by the notion of a Winnipeg bylaw disabling charter rights with regards to peaceful protest and free speech. This proposed "bubble bylaw" would set a horrifying precedent for rights abuses and unconstitutional targeting across the population. The proposed "nuisance" bylaw is so unclear, broad and random it could impact literally anyone in over a quarter of the city! 100 meters from any "health facility" for example would restrict both freedom of speech and peaceful protest on public property near any pharmacy, mental health clinic, dentist, x-ray, blood work centres, to name a few. 100 metres from any school including Universities! People wouldn't even be able to rally outside of City Hall! To state that people would be fined $500-$5000 for "expressing objection or disapproval towards any idea, action, person or group"... this is inherently wrong, undemocratic and against all rights as we know them. This is Fascist-like authoritarianism and I am personally disgusted and ashamed that any councilor would put forth such a motion and that it has gotten to the point of being voted into being is a scar on local politics and politicians. This, in a city seemingly so proud to be home to a Human Rights Museum? You'll find yourselves in there soon! Evan Duncan is the councilor in my area and I find it deplorable that he has instigated this action. Saying that he doesn't want to see protests here, like we've seen south of the border, as if the walking, singing civilian protests were the problem, not the violence from federal agents. Clearly dictatorial! Imagine if this bylaw comes to pass that the Indigenous people of Winnipeg would not be able to stand and state their need for truth and reconciliation. Shame on all who entertain the idea of voting for this.

If you recognize the history of our city and the importance of protesting, then you'll understand that this is something that's inherently a part of who we are. Many folks gather to peacefully share their vision for a better world and we should be allowed to continue doing so without fear of financial penalization.

Dear Executive Policy Committee,

I'm writing to you to express my opposition to the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community and as a nation. From vigils and rallies to round dances, peaceful public demonstrations have long been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. While I have no interest in restricting safe access to vulnerable infrastructure, City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place. Indeed, these acts are already criminal and could be addressed through the Criminal Code. Instead, peaceful protests would be severely limited.

It is worth noting that public assembly is often meant to be disruptive. This disruption is the method by which citizens bring attention to serious issues. If the state removes the ability to disrupt public life, it effectively removes the right to be heard. This undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to post-secondary institutions, libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting "nuisance demonstrations" within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

Furthermore, the overly vague and broad nature of this by-law would permit the by-law to be interpreted and enforced inconsistently and arbitrarily, allowing certain groups and protests to be unfairly targeted. Should certain groups be permitted to protest peacefully while other peaceful protests are labelled "nuisance" protests according to arbitrary interpretation of the broad definitions in this by-law, this unequal treatment would go against the very nature of the proposed by-law itself, by objecting or disapproving an "idea, action, person or group based on or related to any specified characteristics". And when the state has the power to decide what qualifies as a public disturbance, it can silence any

group that it finds inconvenient. This creates a dangerous precedent where the definition of an acceptable protest changes based on the political climate.

Additionally, it makes no sense that labour groups be exempt from this by-law. There is no logical reason to grant special treatment to trade unions or worker organizations. If a picket line blocks access to a medical facility, the harm to the public is the same regardless of who is holding the signs. Exempting specific groups leads me to question the very justification for the law.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Freedom of expression and association should protect all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

Given the alarming suppression of rights and freedoms we are currently witnessing in the U.S., I ask you to remember your legal obligations to uphold the Charter and protect our democracy.

I strongly urge you to drop further consideration of the proposed demonstrations by-law.

Signed,

Tavia McKinnon

Not allowed to protest? What a joke. Might as well get rid of people's right to free speech while you're at it- THATS how ridiculous this is. To peaceful protest is the right of every Canadian citizen and to take that away should be criminal. You all should be ashamed for even suggesting it. Maybe instead of outlawing it you should listen to these protestors because I promise you, no one is out doing it for fun and giggles. They do it because it's something important to them and their families that they believe heavily in.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This bylaw would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter Rights and Freedoms and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Taylor B

I oppose the Safe Access to Vulnerable Infrastructure By-law and I urge the City Council to reject this recommendation. This by-law violates our Freedoms of Expression and Peaceful Assembly guaranteed under Section 2 of the Canadian Charter of Rights and Freedoms.

The definition of "nuisance demonstrations" and "intimidation" is subjective, vague, and dangerous. Using terms like "reasonably expected to cause fear" allows law enforcement to act as arbiters of what constitutes "acceptable" speech, targeting specific groups or political causes. This by-law creates a means to suppress speech or dissent that is seen as offensive or disruptive, rather than legitimately hateful or dangerous.

It is not lost on me that this motion was introduced shortly after an event held at the Asper Jewish Community Centre was met with protest. This was not an attack on faith, but a community action to oppose the platforming of IDF war criminals. This sets a dangerous precedent where any protest at a multipurpose facility can be banned if the host organization has a religious affiliation, regardless of whether the protest is actually targeting a faith group or specific political event.

This bylaw is not about public safety, but about silencing dissent.

So, pause for a moment. Breathe. Be honest with yourselves and vote against this. Your children, your grandchildren will thank you.

This proposal seems overly broad, there are already laws on the books regarding protesting, and may infringe on the right of people to publicly protest.

Dear Executive Policy Committee,

I am writing to you today to express my utter disbelief, shock and concerns regarding comments released by Councillor Evan Duncan and the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure by-law. This city has a long history of the excercising the right to protest and to imply that this freedom is something up for debate, and seeing concilor Duncans comments regarding this policy in relation to the ongoing events in Minnesota, it is shocking and alarming to say the least.

The available information regarding how this by-law would be enforced also causes concern as it states that current city resources, such as the Winnipeg Police and current By-Law officers, would be issuing tickets at events deemed disruptive. The city seems to struggle already with allocating resources to the proper channels without this new introduced strain on our current systems- for example, it currently takes upwards of 14 days for by-law officers to respond to by-law offences to commence the first step of investigating the by-law offence. Should this by-law be put in place, I fear how this would impact an already underfunded and slow-working department. Policing being involved in this by-law also begs to ask what the true intentions of this by-law are, as policing does not overlap with by-law cases in most offences, hence the need for a separate department for by-law enforcement. Policing is already a huge sink of funding every year, with nearly 50% of our annual city budgets allocated to police, it begs to ask how much more of public taxpayer dollars would be used to prop up this by-law with regards to police funding.

This policy would infringe on Charter rights, freedom of expression and the right to assembly. For these reasons, I am opposed to this proposed by-law. The by-law would infringe on constitutional rights, silence marginalized communities' voices, police

overreach and potential abuse of brutality and force,and leave little options for communities that need support responding to hate-related crimes.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Teresa Bowerman

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This bylaw would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

Protest is a vital part of democracy. Putting limitations on protest, especially those with vague definitions such as “nuisance”, limit the voice of individuals in democracy. Additionally, by-laws like these have the potential to disproportionately harm racial and minority groups fighting for their rights. I am deeply concerned that a by-law like this would further disenfranchise those who are already disadvantaged.
I firmly believe that this is not who we are as Canadians. We look out for one another. We respect each other’s differences. We are friendly Manitobans. Peaceful protest is how we look out for one another. Protest is how we ensure every Canadian is free to be themselves.

Dear Executive Policy Committee,
I'm writing to you today to express my alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
From what I understand of the proposed bylaw, it would not necessarily prevent property damage, hate crime, or violence from taking place. Instead, it has every possibility of severely limiting peaceful protests. As Winnipeggers and Canadians we have the fundamental freedoms of assembly and expression. If this by-law is passed, it will reveal who our municipal government is truly in alliance with — private property and the people that "protect" it. What about your alliance to the people of Winnipeg? If protests are too upsetting, maybe the issues people are protesting about should be addressed head on instead of using back-door by-laws that only seek to silence political dissent. This is the definition of an anti-democratic by-law, and it must be unilaterally opposed by city council. Winnipeg and Winnipeggers deserve better than this. And I am not the only one who is concerned. In fact, the Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and freedom of expression, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
I have written many letters to city council and the mayor; and I end each one the same way. Nothing will change until we have someone in office who is willing to make a different

choice. If this by-law is passed, we are simply following suit the draconian and fascistic route of our neighbours to the south. This is not the brave choice. If this by-law is to be passed, it will be the cowardly choice. We need a city council that is brave enough to stand up to undemocratic recommendations such as the Safe Access to Vulnerable Infrastructure By-Law — we need a city council that will make another choice. That is my call to action to each and every councillor and the Mayor, and especially to those serving on Executive Policy Committee. You serve the people of Winnipeg, and the people of Winnipeg deserve better than this. Therefore, I implore you to drop further consideration of the proposed demonstrations by-law.

I have also included the above comment as an attached document. That document includes my full name and Ward.

Section 5 of the proposed bylaw rightly recognizes that labour disputes are an appropriate occasion for disruptive protest. However, limiting disruptive protest to labour disputes is inappropriately narrow. The right to collective bargaining in Canada is derived from the Charter right to free association (Section 2), but that Charter right is not limited to labour organizing. This bylaw should be scrapped as-written due to its unequal treatment of Winnipeggers' Charter right to free association. Any possible rewrite of the by-law should ensure that the appropriately recognized rights of organized labour are shared by other groups, as well as avoiding redundancy with provincial and federal legislation (notably Bill C-9, the "Combatting Hate Act" currently being reviewed by Parliament, which contains similar right-to-access provisions).

7. Safe Access to Vulnerable Infrastructure By-Law

Support or oppose recommendations
I am opposed to the recommendations

Submit comments in writing checkbox
Submit comments in writing

Comments
To Members of Winnipeg City Council,

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law. While its stated intent is to ensure safety and maintain access to community facilities, the by-law—as drafted—poses a significant and unacceptable risk to the Charter-protected rights of freedom of expression, peaceful assembly, and democratic participation.

The Canadian Charter of Rights and Freedoms guarantees that every individual has the right to express dissent, assemble peacefully, and engage in political discourse. These rights are foundational to a healthy democratic society. The proposed by-law threatens to erode these rights by creating broad restrictions on where and how protests may occur, and by introducing vague and subjective definitions of “nuisance” demonstrations.

Under the draft text, a “nuisance demonstration” includes any form of objection or disapproval related to a wide range of topics—race, religion, gender identity, disability, age, ancestry, and more. While the intention may be to prevent hateful conduct, the language as written does not distinguish between hate-motivated harassment (which is already illegal) and legitimate political expression on issues that intersect with these characteristics. The by-law further expands “nuisance” to include the use of amplifiers, obstructing passage, “offensive statements,” or any expression deemed “harassing or

intimidating".

These definitions lack legal precision and create wide discretionary authority for enforcement officers, making uneven or prejudicial application not only possible but likely. Similar by-laws in Vaughan, Brampton, Calgary, Toronto, and Oakville—cited in the City's own jurisdictional scan—provide cautionary examples. In Vaughan and Brampton, "nuisance demonstrations" have been criticized for enabling municipal staff and police to subjectively determine which messages are acceptable near protected locations, disproportionately affecting marginalized voices and politically unpopular causes. Calgary's content-based restrictions—limiting protests objecting to protected characteristics—have raised concerns among civil liberties groups about unconstitutional viewpoint discrimination. Toronto's model, though somewhat more flexible due to its application-based zones, has been criticized for administrative inconsistency and the potential for politically motivated approvals or rejections.

By adopting a by-law that closely mirrors these problematic examples, Winnipeg risks replicating the same harms: unequal treatment of protests based on message, identity, or political climate, and a chilling effect on peaceful demonstration—especially on Indigenous, environmental, labour, and social justice movements that frequently rely on public protest to bring attention to systemic inequities.

Furthermore, the proposed 100-metre restriction around an extraordinarily broad range of institutions—including community centres, cultural sites, schools, and places of worship—creates bans so expansive that, in practice, they could make lawful protests nearly impossible in many neighbourhoods.

Winnipeg absolutely must ensure safe access to essential services. But this goal can and should be achieved without undermining constitutional freedoms that protect all residents—especially those who rely on protest as a tool for democratic participation and social change.

I urge Council to reject this by-law in its current form and instead pursue targeted, narrowly tailored measures that address harmful conduct directly without restricting the right to peaceful expression.

Respectfully,

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While safeguarding public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly protected under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would extend beyond hospitals and facilities serving vulnerable populations to include schools (including post-secondary institutions), libraries, cultural and community centres, cemeteries, and places of worship. These are precisely the locations where matters of public concern frequently arise. Prohibiting “nuisance demonstrations” within such expansive perimeters would significantly limit meaningful opportunities for lawful, peaceful protest related to decisions, events, or speakers at these sites.

The definition of “intimidation” is also troubling. Phrases such as conduct “reasonably expected” to cause fear, incite hatred, or deter access are inherently subjective and open to broad interpretation. Any law that restricts Charter-protected activity must be clearly defined, carefully tailored, and minimally impairing. This proposal does not meet that standard and instead relies heavily on enforcement discretion, which cannot substitute for precise legislative drafting.

Provincial legislation already establishes buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code

provisions and targeted bylaws addressing obstruction can and should be enforced. Expanding protest-free zones across wide areas of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of a democratic society. It protects all viewpoints, not only those that are popular or aligned with the government of the day. Municipal regulations must be proportionate, evidence-based, and Charter-compliant. As currently drafted, this by-law is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council determines that further action is necessary, it should adopt a narrowly tailored approach focused strictly on preventing obstruction and genuine intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

To be succinct, the alarmingly vague and sweeping language of this law speaks to a blatant dishonesty in its intention and application, if not an open malfeasance. I can only trust that notion is as concerning to you as it has been to anyone else writing to you today.

To be less succinct, in words I suspect may be familiar, this by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed, T. Nordien

I write to voice my strong opposition to the #7 Safe Access to Vulnerable Infrastructure by-law. By-laws impinging on the Charter Rights of Canadians must be minimally invasive and evidently necessary to be considered at all. This by-law would impinge on Canadian's Freedom of peaceful assembly.

Even taken in good faith, which I do not believe is the spirit with which this by-law was proposed, the problems it would on paper defend against are already covered by our criminal conduct laws. Furthermore, the by-law is vaguely worded and over-broad. Many reasonable and usual places of peaceful assembly and protest such as the Universities and community centers would fall under the zones proposed in this by-law. The proposed by-law fails on both accounts of being minimally invasive and necessary.

I urge the Committee to consider people who are more likely to be deemed “intimidating” than others, particularly by law enforcement officers, as well as those who are more likely to need to exercise their right to peaceful assembly for the purpose of protest. I would remind the Committee that 2SLGBTQIA+ Pride events are based in protest, and many of these events could be easily misconstrued under the proposed by-law to incur a 500-5000 dollar fine for each participant.

I urge the Committee to reject this proposed by-law in its current form.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal

Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

This bylaw would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter Rights and Freedoms and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Tiffany Skomro

I strongly believe issues around right to public protest should not be within the jurisdiction of Municipal government.

The city should make a formal request to the Manitoba Government to work with the city to address the need for such a law. Any such law should be specific and as limited as possible. (Similar to the Provincial Abortion Protest Law) It should be carefully written to avoid subjective interpretation. This proposed law as drafted is too broad and could be interpreted subjectively and potentially abusively.

As someone who requires regular access to healthcare service, I do believe the safe access to healthcare services is a critical issue. I don't believe this drafted by-law is the correct and balanced solution.

Please work with the province to solve this issue before pursuing such a law at the municipal level.

Kind regards,

Tim Fennell

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

Dear Members of Council,

I am a proud Winnipegger. Which is to say: you are supposed to represent me. And so, I must tell you, this proposed bylaw against so-called nuisance protests does NOT represent me. More than that, it rejects the very idea that elected officials are meant to represent people like me at all.

A fundamental part of being Canadian, Manitoban, and a Winnipegger is caring about whether others are heard. So, it ought to be obvious, peaceful protest is not a nuissance. It is one of the clearest signals that democracy is working - that citizens still believe their voices matter enough to use them. You may believe that location based restrictions do not disavow this principle, but they do. Places where people gather are precisely where protest serves its purpose. We have laws against threats, and we have laws against hate speech. Restrictions on peaceful protest suggest aims less towards safety than silence.

Anyone who seeks democratic office should never treat protest as an inconvenience to be managed away. The postions you asked voters for carry obligations - perhaps the most basic being a willingness to listen when the public insists on being heard. When residents take to the streets to reach their representatives, and are answered by being labeled a nuissance, it does not suggest leadership. It suggests a misunderstandding of the role.

If a protest is uncomfortable, disruptive, or impossible to ignore, that is often because it is doing exactly what it is supposed to do.

So I must ask you, reject this proposal. Reflect on what democratic representation requires, and on how fundamentally at odds this bylaw is with that responsibility. Choose

to stand on the side of the public’s voice rather than its silence.

Until then, you do not represent me.

Greetings,

I would like to voice my concerns regarding this potential bylaw.
I understand the intention of the bylaw to respect the rights of all Canadians when it comes to public protest demonstrations.
However, the way in which the bylaw currently dictates where individuals can express their right to protest is contrary to our Canadian charter of rights.
No legitimate protest demonstration would actively and intentionally intimidate individuals.
If this occurs, yes that individual or those individuals should be held responsible and fined or arrested depending on the severity and seriousness of the intimidation.

I know that other jurisdictions have enacted such bylaws and although it may work for them, it doesn't mean it would work for Winnipeg.
The city of Vaughan is an example of enacting a similar bylaw.
Additionally, the lack of definition of what constitutes a "nuisance demonstration" is concerning and misleading.
Here is the link to the article below.
https://www.vaughan.ca/residential/by-laws-and-enforcement/protecting-vulnerable-social-infrastructure-by-law

All this said, I think that the bylaw could be potentially beneficial to all Canadians and effective in protecting individuals rights and safety; if the current bylaw were reviewed and revised with participation and feedback from relevant stakeholders and stakeholder groups.
The way in which the bylaw is currently written is not respectful of all individuals rights and

freedoms and this degradation of democratic rights and freedoms is firstly concerning and secondly a dangerous precedent to set.

Thank you for your time.

Have a good day.

Dear Executive Policy Committee,

I'm strongly concerned and vehemently opposed to the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United

Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

As a citizen, and believer in democracy and the ability for our rights to have a voice, I request that the EPC drop further consideration of the proposed demonstrations bylaw.

Thank you,
Tracey Turner

I am opposed to these recommendations because I feel it would impede our right to peacefully protest, or attend rallies for causes we care about. The term “nuisance “ protests is very vague, & could be used to ban certain protests or rallies the government doesn’t agree with. I do not support blocking access to places, or violence of any kind , but we must be allowed to make our voices heard for causes that we care about.

This proposed bylaw is very concerning and seeks to restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is extremely vague and could be used to restrict or discourage all manner of protest activities. The term “nuisance protests” is totally ridiculous; protests are supposed to disrupt! They’re not supposed to be convenient or easy to ignore… otherwise what’s the point? This is nothing more than an attempt to neuter activists and curtail what little power we have to make positive change. This proposal is also extremely tone-deaf, given what’s going on south of the border.

I’m sick and tired of attempts by policymakers to restrict collective action under the guise of public safety. It’s never truly about public safety; it’s always about power and control on the part of those who enjoy and benefit from the status quo.

protesting is an incredibly important means of public discourse, expression, and democracy in todays society and the city of winnipeg. peaceful and disruptive protesting cannot and should not be punished in some of the most crucial public areas of our great city. myself, friends, family, and community all believe in protesting for hope and connection in issues which matter to us. please do not inhibit our ability to organize our community for political cause in some of the few ways that we know how. it is incredibly important to me, especially as I am a baker in winnipeg who cannot afford such fines while I believe disruptive, peaceful protest outside political institutions to be fundamental for myself and for our society. please consider my plea. thank you.

The ability to protest is extremely important. I refuse to allow any additional restrictions on protests, especially at a time when it is most important.

I am writing to express my concerns regarding the proposed by-law drafted to address "nuisance" demonstrations.

After reviewing the draft, I am troubled by the broad scope of the by-law, particularly the definition of a "nuisance" protest as the "objection or disapproval towards an idea, action, person or group based on or related to any specified characteristics." This definition appears to describe the very nature of a protest itself. Protests, by definition, are expressions of disapproval or dissent directed toward ideas, actions, or individuals. They are a means for citizens to peacefully demonstrate collective opinions and, at times, may involve temporary disruptions that draw public attention to an issue.
While disruptions can be inconvenient, they often serve a purpose: they encourage public awareness and reflection, prompting individuals to consider the subject being protested and form their own conclusions.

I recognize that protests must allow reasonable access to facilities and ensure public safety. However, the breadth of this proposed by-law, particularly the prohibition of demonstrations at post-secondary institutions, is concerning. Universities have historically been important spaces for civic engagement and protest. Restricting demonstrations in such settings represents a significant departure from longstanding democratic tradition.

A protest confined to an isolated or empty space risks losing its effectiveness. Public demonstration is inherently about visibility and engagement.

My concern is that this by-law may have the effect of silencing residents of Winnipeg and lowering the threshold for punitive action against lawful demonstrations. While I agree that

protests involving harassment, obstruction of access, or hate speech should not be tolerated, regulating those behaviors must be done carefully and precisely. Broad restrictions risk capturing legitimate, peaceful expressions of dissent.

Freedom of expression is a fundamental freedom protected under the Canadian Charter of Rights and Freedoms. Any municipal regulation that limits this right should be narrowly tailored and clearly justified. In its current form, I believe the proposed by-law warrants reconsideration.
Thank you for considering these concerns.

Comments
To the Executive Policy Committee,

I am writing to express my deep opposition to the proposed Safe Access to Vulnerable Infrastructure By-law. I am genuinely alarmed by this initiative, which threatens to undermine the Charter-protected rights of Winnipeggers to gather peacefully and express their views in public.

Public demonstrations—from vigils and rallies to round dances—have been essential to the social and political progress of our city and country. These actions have historically secured vital protections for workers, tenants, Indigenous peoples, the 2SLGBTQIA+ community, and our environment. By restricting these activities, the City risks silencing the very voices that drive necessary community change.

This by-law appears both unnecessary and dangerously broad. Acts of violence, hate, or property damage are already criminalised under existing laws; this new regulation simply adds a layer of draconian restriction on peaceful assembly. Furthermore, implementing such measures contradicts Winnipeg's stated goal of becoming a United Cities and Local Governments (UCLG) "Human Rights City".
The Canadian Civil Liberties Association (CCLA) has already flagged that these types of rules often disproportionately harm marginalised groups who rely on public protest as their primary tool for advocacy.

Protecting the freedom of expression and association is fundamental to a healthy democracy. I urge you to uphold your legal and ethical obligations to the Charter and stop further consideration of this by-law.

Sincerely,
Troy McDougal

I strongly oppose the proposed by-law "Safe Access to Infrastructure By-law". The language of this by-law is purposefully vague and approving it would be an incredible overreach by City Council and the Mayor, and would effectively eliminate our right to protest under the Canadian Charter of Rights and Freedoms. I strongly believe issues around the right to public protest should not be within the jurisdiction of Municipal government.

The City should make a formal request to the Manitoba Government to collaborate and address the need for such a law. Any such law should be specific and as limited as possible (similar to the Provincial Abortion Protest Law). It should be carefully written to avoid subjective interpretation.

Again, this proposed law as drafted is too broad and could be interpreted subjectively and potentially abusively. I believe in each person's right to receive education, attend worship and access health care safely. However, this law as drafted does not provide the protection it desires without infringing significantly on every Canadian's right to peaceful protest.

Please work with the province to solve this issue before pursuing such a law at the municipal level.

Winnipeg is a landmark in progressive Canadian history.
In 1919 Winnipeg revolutionized the standard of living for all working class. People came together and protested against workplace expropriation and some died from police violence. Many of our basic rights we take for granted from the blood of our past progressive protestors.
This by-law however is however a step back in history. No one wants to be on the wrong side of such a rich history. So today we must really analyze what this bill is and who it benefits? What will be gained and what will be lost?

A portion of this by-law discusses healthcare facilities. The Province of Manitoba already provides safe supports for women seeking abortion healthcare. This point in the by-law is moot as the province thankfully already solved this area of concern. Healthcare is a responsibility of the province and is not within scope of the municipality for these areas of concern.

Municipal governments do have authority over parks and pools within their jurisdiction. However this is limited up to laws that supersede these responsibilities. A municipal council cannot create a by-law that is in direct conflict with the federal Charter of Rights and Freedoms. People in Canada have Freedom of Expression. Hate speed is never permitted, which includes speech targeting individuals based on traits they cannot control such as age, sex, sexuality, gender, religion, disability. The freedom of thought, belief, opinion, and expression. And the right to protest through peaceful assembly is enshrined into our daily lives. If the City of Winnipeg attempts to push a law in violation to the Canadian Criminal Code. This legal battle will cost taxpayers massive debt in the form of addition taxation requirements, higher mill rates for properties, and for the result to ultimately undo the damages this by-law would generate. Furthermore this would erode

public trust with the current city council, right before an election.

The discussion to ban peoples Freedom of Expression outside churches can only be concluded with the recent protests against using a particular faith as a justification to commit genocide in Palestine. Everyone has to right to practice a faith or absence of faith so long as it does not cause harm towards others. It would be very poor optics for a council member to be aligned with a defense of genocide than a defense of life, liberty, and the security of person. It is not a municipalities place to fund or support theism as the business of theism is not under the association of government. One does not control or protect the other.

I implore each and every city council member to consider how an attack on Canadian rights and freedoms will help our historically progressive city?
Winnipeg must not slide into a regressive space for far-right hate speech.
Please see that the City of Winnipeg is a progressive and modern safe space to live.
Encourage new families and businesses to come thrive in Progressive Winnipeg!

Hello. As a former Winnipeg resident (and likely a return resident in the future), I am strongly opposed to the bylaw that will impose steep fines on people protesting. This is draconian and not becoming of a democratic society which the City of Winnipeg purports to be.

Protesting is, by nature, disruptive. It is also a practice that has deep roots in Winnipeg culture.

This bylaw should never come into effect.

Thank you.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This bylaw would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter Rights and Freedoms and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This proposed by-law infringes upon the freedom to peaceful assembly given in the charter of our nation.

Fundamentally it is a slippery slope to allow this to pass. Once a ratcheting measure is applied to restrict rights and freedoms, rarely are they reversed. More often than not they are increased.

The freedom of peaceful assembly is a privilege to have within a democracy and it should not be taken away because they are proving to be effective against a certain constituency.

It is absolutely unacceptable that the city would try to introduce legislation giving police extra powers to shut down legitimate protest. We are routinely told that we live in a 'free' society and that we should be proud of these freedoms. We offer sharp criticism to other countries that fail to uphold these freedoms - like Iran - and we watch in horror as those rights are taken away from people only a few miles away, on the other side of the border. If we are terrified by what Donald Trump's government is doing in Minnesota, and we should be, then we should not be mimicking these moves here. I stand with the thousands of Winnipeggers who oppose this by-law.

I am writing to state my firm opposition to the draft legislation regarding public assembly restrictions. The proposed measures represent a significant overreach that threatens essential liberties.

The Canadian Charter of Rights and Freedoms protects the right to gather and express dissent. These protections are the foundation of a democratic state. The government should only interfere with these rights in the most limited and specific cases. The current proposal uses vague definitions that allow for arbitrary enforcement. When the state has the power to decide what qualifies as a public disturbance, it can silence any group that it finds inconvenient. This creates a dangerous precedent where the definition of an acceptable protest changes based on the political climate.

Public assembly is often meant to be disruptive. This disruption is the method by which citizens bring attention to serious issues. If the state removes the ability to disrupt public life, it effectively removes the right to be heard.

Any limits on assembly must be narrow. These limits should only apply to critical infrastructure where safety is paramount. Medical facilities and primary education centers for minors are appropriate examples. Transitional housing for those in precarious positions also warrants protection. These rules should not apply to universities, colleges, or other centers for adult learners. Adults must be expected to encounter and process diverse viewpoints in public.

The law must also be applied without bias. There is no logical reason to grant special treatment to trade unions or worker organizations. If a picket line blocks access to a medical facility, the harm to the public is the same regardless of who is holding the signs.

Exempting specific groups from these safety requirements is unfair and contradicts the justification for the law.

The committee should abandon this draft. The city should rely on existing criminal laws to handle actual safety threats. Creating broad new powers to suppress assembly will result in costly legal battles and a loss of freedom.

Demonstrations are part of a healthy democracy. Manitoba has its own long history of fighting for workers' rights and the recognition of human rights for different groups. This by-law is unjust, doesn't align with the Canadian Charter of Rights and Freedoms, and will be most definitely targeting certain groups more than others. As a proud Manitoban, I do not stand for this and am not proud of this motion. I stand for building community and caring for my neighbours - even if I have to fight for their place at the table. Please choose compassion.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) (https://www.google.com/url?q=https://ccla.org/&sa=D&source=editors&ust=1770910149223837&usg=AOvVaw0sKZC2mzUUJJgXO-raavNu) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and

free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Vanessa

To Executive Policy Committee,
I am writing to express my disagreement and opposition for the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed by-law.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members throughout our city's history.
Our charter rights must be protected to demand accountability and to maintain a healthy democracy.

Public engagement (optional)

I consent to being contacted to participate in potential public engagement related to this matter.

Dear Executive Policy Committee,

I'm writing to express my concern regarding the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would seriously limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

Given what we are seeing south of our border, it is beyond my comprehension that our city would even contemplate restricting civic engagement.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. Winnipeg has a long history of vibrant activism, from vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Victoria Romero

I am deeply concerned about the proposed limitations to free speech and public participation through the limitation of the right to protest under this by-law. Protest and speaking truth to power are fundamental rights guaranteed under section 2 of the Canadian Charter of Rights and Freedoms, as well as in the Universal Declaration of Human Rights. The City of Winnipeg must not act in any way that directly or indirectly limits the rights and interests of its citizens, whether or not it agrees specifically with what they have to say.

If the Council is concerned about the potential for hate speech during protest, the members should rest assured that public incitement of hatred is already a criminal offence in Canada. Criminal harassment, uttering threats, and causing a disturbance are likewise already offences at law. If a person attending at or near a protest engages in conduct that threatens another person's safety, there are already mechanisms to stop that behaviour that are far more targeted and proportional than a blanket prohibition on vaguely-defined forms of protest. While buffer zones already exist around reproductive healthcare facilities, this by-law would double the size of the buffer zones (50m to 100m) and apply them broadly to pre-emptively restrict the expression of Charter-protected rights around significant portions of the city.

I am particularly concerned about the use of the language of "nuisance demonstrations" in discussions around protest and this by-law. Although the by-law does define the term nuisance, the definition leaves significant room for interpretation and can be made to apply to almost any kind of protest, including those about political disagreement. Freedom of assembly and freedom of expression are fundamental rights, and presumptively not a nuisance. Regardless of the intention behind the draft by-law, the language of nuisance is vague and allows itself to be applied to any protest that does not match one's own

opinions or meet subjective standards of merit.

I am deeply concerned about the likelihood of overreach with this by-law, and about the chilling effect it is likely to have on Winnipeggers' freedoms of assembly and expression. As we face increasingly challenging times as a city and as a society, we must work to hear each other rather than to silence each other.

I am extremely opposed to this unspecific and unintelligent motion. The burden of proof must lay with the civic government, not the people. The definition used is so vague that it allows for an authoritarian foothold to start. Chart Rights must come before entitlement and bad ideas that affect the ability of people to express them. The last idea I remember being floated by this councillor was to remove social services from the Centennial Library. His actions in the past and now show a fundamental misunderstanding of community rights and responsibilities. The entitlement and idea that protest shouldn't disrupt the daily functioning of "normal life" a lack of depth and frankly authoritarian overreach by Coun Evan, as seen in his record. Protest is disruptive by nature but also nonviolent.
The fact the Mayor and the council agreed to this shows a lack of intellectual, moral, humane intent. As a Winnipeger this is yet another sad regression in a long line of private right wing compromises.

This by-law is overly broad and I'm concerned could be used to restrict protests that the government doesn't agree with. This by-law needs to be much more specific in what it wants to achieve.

Dear Executive Policy Committee, I'm opposed to this "Safe Access to Vulnerable Infrastructure By-law" for a number of reasons, and basically I feel it is not democratic and actually erodes democracy in our ways to express ourselves. On many occasions I have gathered with others peacefully, to call attention to some very alarming issues such as Climate Change, support for Indigenous Rights, some are joyful events and some more serious. Never have we been violent or aggressive to others! Last year we had public events to let people and politicians know about the Lemay Forest Issue, including a walk from the Forks to MB Legislature, and had a group photo taken on steps below the Riel Sculpture. All very peaceful with many citizens including some individuals who may have heard about this Lemay Forest issue from other public events, covered by media. The whole movement to save Lemay Forest was a success due to many different kinds of pressure on Governments.
Coming together in public places, including City Hall outdoors, MB Legislature grounds, is part of our democratic process.
I am urging Council to ditch this ridiculous By-law. As a citizen I have better things to do than keep writing letters of opposition to City Hall, but always will take time to respond to this kind of backwards proposed By-law. AND if there are problems at a protest or gathering with violence or real "law breaking" they will be dealt with according to our current laws. Thank you.

Submission for a committee of council

It is my right to peacefully protest in any public space and this bylaw change will not allow that. This seems to be a huge over reach with no prior precedents to require this bylaw change?

This by-law would violate sections 2 of the Charter of Rights and Freedoms. Rather than trying to restrict freedoms in Winnipeg, representatives can avoid protests by properly representing their constituents. Restricting protesting does not reduce the issues that lead to protesting in the first place. On the contrary, I personally would protest exactly this kind of increase in authoritarian legislation.

This is a violation of the Canadian Charter of Rights which guarantees the democratic right to protest. The notion of this bill, as stated in the title, is misguided and seeks to curb the right to free speech. I work at a post-secondary institution which has long held sacrosanct the right to protest - this bill would limit and fine protest on our campus.

Dear Executive Policy Committee,

I am writing you today as a practicing lawyer who has been in good standing with the Law Society of Manitoba for over 25 years. I wish to express my strong opposition to the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law.

I kindly ask that we be honest with each other about the true purpose of the proposed By-Law and the effect it will have.

Make no mistake, the purpose of this proposed By-Law is to stifle any and all public criticism of the State of Israel, and that is the effect it will have.

As you are likely aware, over the past 2 years there have been widespread worldwide protests against the actions of Israel. The Trump administration has, without reservation, characterized these protests as "pro-terrorist" and "antisemitic".

For the past 2 years there have been regular protests in Winnipeg against the actions of Israel, and already these have been falsely labeled in a similar way. There is no question that any and all future protests against the actions of Israel would face allegations of being a nuisance demonstration.

These local protests against the actions of Israel have all proceeded peacefully and without incident, however it is likely that the proposed By-Law would make them unlawful.

One regular location for these protests was on Portage Avenue in front of Polo Park Shopping Centre. This location was chosen for its visibility to the public, however by

coincidence there is a cemetery across the street, and thus the location would be prohibited.

Another regular location for local protests was at confusion corner, again the location was chosen for visibility to the public. This location would be prohibited as being too close to a community centre.

Finally, there have been several protests in front of the CBC building located at Portage Avenue and Spence Street. This location would be prohibited as being too close to a post-secondary institution (University of Winnipeg) and a church across the street.

When one considers the exhaustive list of sites that are prohibited under the proposed By-Law, one would likely be hard pressed to find areas where protests critical of Israel could take place.

Thus, one can see that the effect of this legislation will be to stifle any and all public criticism of the State of Israel.

As the United Stated of America slides into authoritarianism there is a sense that we are at an inflection point in history.

It is incumbent on all of us to do what we can to preserve our freedoms. Authoritarianism is not one thing, but an accumulation of small things by many people over time.

It seems that almost every day now I see pictures of infants who have died of hypothermia in Gaza because Israel refuses to allow the necessities of life to a civilian population under its control.

As you consider the proposed By-Law I urge you to also consider what side of history you would ultimately want to find yourself.

I implore you to drop further consideration of the proposed demonstrations By-Law.

Signed,

William Barnstead LL.B.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This is anti-democratic and you should be ashamed of yourselves for suggesting to limit our rights to protest. This is a slippery slope to preventing strikes and using police to quell anyone's views that the mayors office doesn't agree with.

This is government overreach.

Am a member of law enforcement, I must speak out against this bylaw. I believe that this bylaw will put all law enforcement officers in a position where we may be required to infringe on someone's protected right to peacefully assemble
This bylaw sounds like nothing more than a way to infringe on those that want to make their voices heard in a safe and well organized way.
While you might think the way the bylaw is written does not infringe on these rights, please remember that those that come after you may have other thoughts and may want to push the boundaries of this bylaw because it was written so broadly.
With respect, I must implore you to vote no on this bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This is not simple a matter of making noises on the streets nor making disruptive intent to the people, especially in non-violent protest. It is the reaction of a problem that disrupt the people, weather it's against the union, against our workers, against political injustice, against a threat against humanity. This is not noises on the streets these are problems that needs to be address when our voices are not heard. There's a reason why protests exist, to be heard of our concerns and make sure the threat against humanity can be and should be resolved.

The subtle prejudice of intent and the discriminatory implication with this ban will not go lightly. Protest is very important because that's the creations of unions, better work safety implementations, better policies; work scheduling; demands of higher pay, demands for better education, demands of working in politics, demands for the benefits of humanity.

Dear Executive Policy Committee,

I'm writing to you today to express my concern regarding the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would allow for the limitation of fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we rely on to take part in and advocate for our communities. From vigils and rallies to round dances and peaceful, respectful protest, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in both inadequate options for responding to hate and supporting community members who have been harmed by it. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. The incredibly vague language of the bill would very much allow for reckless and authoritarian curtailing of the freedom of expression.

Witnessing the types of erosions of freedoms that you are propsing becoming a reality in the U.S. makes me even more certain that this bill will increase hostilities, not avoid them. This has no place in the City of Winnipeg. The only ethical options are to significantly alter the language of the bill to addres a specific and much narrower set of explicitly harmful

public acts, or to drop further consideration of the proposed demonstrations bylaw altogether.

Signed,
A concerned resident.

I'm writing to express my serious concern about the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. I was very surprised to learn about this proposal, as it would place significant restrictions on Charter-protected rights to freedom of expression and peaceful assembly. For these reasons, I strongly oppose the proposed by-law.
Public demonstrations—including vigils, rallies, and round dances—have long been an essential way for Winnipeggers to advocate for social and policy changes that benefit our community and the country as a whole. These actions have played a vital role in advancing rights for workers and tenants, Indigenous peoples, racialized communities, 2SLGBTQIA+ individuals, and in securing protections for the environment.
If passed, I am deeply concerned that this by-law could infringe on constitutional rights, silence marginalized voices, encourage police overreach, and reduce effective responses to hate. The proposed "Safe Access" by-law would not prevent property damage, hate crimes, or violence—acts that are already illegal. Instead, it would place severe limits on peaceful protest. This kind of undemocratic restriction on freedom of expression has no place in the City of Winnipeg, particularly as the city has been working toward recognition as a United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association has also raised concerns that broadly written laws like this one risk unfairly limiting Charter-protected speech and peaceful assembly, and that they often disproportionately harm marginalized groups who depend on protest to push for social change.
Freedom of expression and association are cornerstones of a healthy democracy. At a time when we are seeing troubling rollbacks of rights and freedoms elsewhere, I urge you to uphold your legal obligations under the Charter and protect these fundamental democratic values.
I strongly encourage you to discontinue further consideration of this proposed

demonstrations by-law.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Zainab Jabbar

A $500 to $5000 fine for protest is absolutely ridiculous. We have a right to protest and to give us a fine for a right we have should not be allowed and multiple people can agree with me on that. I am absolutely shocked that Winnipeg would even consider doing something like this! I love Winnipeg and I've been in multiple protests in Winnipeg, so this policy that has been proposed doesn't feel like Winnipeg and I hope you realize that.

Areas restricted by this by-law are public spaces and points of proximity to decision makers. By saying people can't use these spaces to express their constitutional rights, this proposal is just a cash grab from people whose views the city doesn't like. Harassment and discrimination are already covered by existing laws. Is it going to be pay-to-play to voice our opinion about Israel's genocide in occupied Palestine?

I object the Safe Access to Vulnerable Infrastructure By-Law for the reason that it would restrict freedom of expression and peaceful assembly, which are protected rights.

I understand that the bylaw would prohibiting protests within 100 metres of schools, hospitals, community centres and places of worship. This would mean that protestors gathered in front of universities, Wab Kinew's office, and even parts of the Leg would be fined.

An article from CBC about this proposed bylaw included a photo of protesters demonstrating against vaccine mandates outside Winnipeg's Health Sciences Centre. Of course, rallying crowds around hospitals could block access to the building and delay emergency vehicles, pedestrians in medical distress and the loved ones of patients. I agree that protests should NOT take place immediately outside of hospitals or places providing medical procedures, such as abortions.

The protests I support exist to be noticed and to demand justice while keeping those involved AND those passing by safe and free of harm. Such protests have fought for the rights of Indigenous, racialized and 2SLGBTQIA+ community members, workers and tenants, and for the protection of the environment. This by-law could silence these voices.

I believe that, if passed, this bylaw would further empower police forces to target people of colour, poor people, and people who use drugs.

If this bylaw wants to protect people from intimidation, it may ultimately protect people who are responsible for oppression and then silence the oppressed.

If this bylaw wants to ensure that Winnipeggers can safely commute around areas where protests are happening, a mission I support, then a buffer zone determined by a number of meters is not the way to go.

Ultimately, this is an issue of protecting freedom. Considering the suppression of rights and freedoms we are witnessing in the U.S., I urge you to act differently.

I am strongly opposed to this bylaw. As the Canadian Civil Liberties Association has pointed out: "the police already have broad powers to protect access to property and to intervene in the event of a threat to human physical safety, including during protests. Therefore, a new bylaw is simply unnecessary". I believe this bylaw is trying to prevent peaceful protest. In a democratic society, citizens should not be fined for protesting! A recent letter to the editor of the Winnipeg Free Press (Jan 15 2026) applauded the newspaper's coverage of the protests across Canada in support of the protesters in Tehran. Can you imagine if the Islamic Republic cracked down on protestors? Oh wait, they did. And now your by-law is the thin edge of the wedge looking to crackdown on protest here too. This by-law, and the proposed fines, is simply appalling. How can we have the Canadian Museum for Human Rights in our city and this kind of oppressive by-law? Have any of you been to the CMHR? It is filled with exhibits about citizens who protested to try to make the world a better place. I implore you to drop further consideration of this bylaw that endangers democracy.

As a person of color, I strongly oppose the bylaw proposed to ban protest in the city, by seeking to establish illegal zones that impedes on our right to free speech. This is an attempt to silent Winnipegers who opposes genocide, and should be opposed by all.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, Black, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Ana Ilagan

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. Vigils, rallies, Black Lives Matter (BLM) protests, and round dances are powerful public demonstrations that have been used as impactful tools to help win rights for workers and tenants, reinforce the rights of Indigenous, Black, racialized and 2SLGBTQIA+ community members, as well as create protections for the environment.

The loose definition of “nuisance” in this by-law must be dealt with, and I implore you to reconsider passing it in its current state.

As a physician, I oppose the motion by Councillor Evan Duncan that proposes widespread restrictions on public demonstrations in vulnerable locations. The appropriate, nonviolent expression of opinion through public presence in the form of gatherings, signs, slogans, speeches and song is a pillar of democracy. An open and pluralistic society will always have conflicting priorities; there needs to be a variety of legitimate and peaceful ways to express these opinions in the location of their choice. Municipal bylaws, and when necessary, police, already have ample power to regulate behaviours that are threatening or disproportionately disruptive. Police, in particular, are already guilty of overstepping their professional boundaries in some instances, and wilful neglect of duties in others. The institutions already in place need better oversight and leadership in order to adequately protect citizens and politicians alike.

It seems like the protest ban under consideration right now is over kill. I speculate the intent is to prevent " intimidation of individuals accessing or attempting to access" certain facilities. The "and similar spaces" at the end of the list of facilities is especially concerning. FYI, I have no knowledge of recent events that would cause us to introduce this ban at this time.

It seems to me you should be focused on banning intimidation not protests. I have a hard time understanding how peacefully holding a sign on a sidewalk expressing one's beliefs could be considered intimidation if you happen to be standing in the wrong spot.

I suspect intimidation may already be banned by existing laws and bi-laws. If it is, we should allow the courts to determine what is and isn't intimidation. If not, you should target the intimidating behavior with your by-laws not the protests.

We're living in challenging times. There should be protests happening.

Also, the provincial ban on protests near abortion clinics is very specific and was introduced after repeated intimidation was occurring. I have no problem with this legislation.

Dear Executive Policy Committee,

I’m writing as a concerned citizen and as a member of the Canadian Network on Cuba, a national solidarity network concerned with the deadly effects of US sanctions in Latin America and the Caribbean, in which capacity I've organized countless peaceful demonstrations in Winnipeg over many years.

I'm disturbed at the letter and intent of the proposed Safe Access to Vulnerable Infrastructure By-Law, which is not only legally dubious with respect to the Charter of Rights and Freedoms, but incoherent in its descriptions of restricted activity, and overzealous in its constriction of public space. Any version of this bylaw is a slippery slope, and I am contacting you in opposition to the proposal.

As concerns the bylaw's restrictions on demonstrations against 'specified characteristics' of persons, hate speech is already covered under extant law. As concerns the vagueness and overreach of the rest of the draft, this leaves far too much room for capricious and selective enforcement. There is simply no reason for this bylaw to exist. Not only does it clearly attack healthy civic engagement and limits the right to freedom of assembly -- it potentially criminalizes forms of popular advocacy that have appreciably improved the lives of people in Winnipeg and Canada, while hiding behind a deceiving language of 'accessibility' and protection of marginalized groups. Please listen to the chorus of those affected and scrap this provocatively timed, harmful bylaw.

I am writing to express my concern with City Councils intent to place unneeded restrictions on our rights to peacefully protest. We have laws in place to protect against hate speech and to protect sensitive areas, such as hospitals. The bylaw proposed is unnecessarily vague and overreaching. In this time of increasing policing of our right to disagree we need to ensure that government is not using a knee jerk reaction to address concerns.

I believe that the right to protest, and to some extent to be disruptive of normal operations, is important in our society. If it becomes a nuisance, then there needs to be a negotiation approach to deal with it, though we do have laws which allow us to deal with unruly or hate-filled protests. The current proposal is too broad and would eliminate some forms of protest which have been effective in the past. Protest has often improved our society: MMIWG2S, the general strike, women's vote and women's rights, etc.

Dear Members of the Executive Policy Committee,

I am writing as a community health physician with over 30 years of experience working alongside individuals and communities experiencing the greatest barriers to accessing health services, and as a concerned citizen of Winnipeg, to call on the Executive Policy Committee to vote against and withdraw the proposed Safe Access to Vulnerable Infrastructure By-Law. This proposal is misguided and unjust, and it is profoundly troubling that the City of Winnipeg would demonstrate a willingness to attempt to narrow the most fundamental freedoms that anchor a democratic society, including the ability to engage in peaceful demonstration in locations where expression carries its greatest meaning and impact, rather than being relegated at the behest of authorities to spaces designed to minimize disruption and, in doing so, diminish effectiveness. Such an initiative represents an attempt to erode the constitutionally protected space for peaceful expression and assembly at a time when those protections require vigilance, not contraction. It departs from the democratic norms and constitutional commitments that safeguard freedom of expression, peaceful assembly, and association in Canada. Existing criminal and civil laws already provide mechanisms to address violence, property damage, and genuine threats to safety. Introducing additional municipal restrictions aimed at curtailing peaceful assembly is unnecessary, constitutionally suspect, and likely to provoke significant Charter challenge. Advancing such a measure would expend public resources defending a legally vulnerable policy and further damage the City of Winnipeg's reputation in how it engages with those who experience the greatest and most consistent systemic injustice.

Public demonstration has long been a legitimate and vital tool for civic engagement in Winnipeg and across Canada. Vigils, rallies, round dances, labour actions, and public gatherings have helped advance workers' rights, tenant protections, Indigenous

sovereignty, racial justice, gender equity, 2SLGBTQIA+ rights, and environmental protections. These activities are not peripheral to democracy—they are central to it. Winnipeg's own history bears witness to this truth. The streetcar sculpture, Strike! 1919, installed on Main Street directly across from Winnipeg City Hall, commemorates the civil disruption of the 1919 Winnipeg General Strike—an event that contributed to important and necessary social and labour reforms. Positioned in daily view of those entrusted with municipal leadership, it stands as an intentional reminder of the importance and significance of that history. A by-law aimed at curtailing meaningful public demonstration stands in direct tension with that legacy and the lessons it represents.

In my work as a community health physician, I walk alongside patients who experience daily the ongoing health consequences of structural inequity. Canadian courts, commissions, and public institutions—including within health care—have formally recognized the existence of systemic racism and injustice within policing, legal, political, and health systems. These realities are reflected in disparities in housing stability, incarceration rates, child welfare involvement, income security, and health outcomes.

Community health work that prioritizes care for those experiencing the greatest barriers to health services necessarily means there is far greater representation among my patients of individuals who are Indigenous, racialized, newcomers, refugees, or people who have fled targeted injustice in other parts of the world. Many have come to Canada in part because of the protections afforded by the Canadian Charter of Rights and Freedoms, including the freedoms of expression, peaceful assembly, and association. Public protest and civic advocacy are expressions of dignity, identity, and the ongoing pursuit of justice. Restricting peaceful assembly risks disproportionately burdening those who already face systemic barriers and who rely on collective voice to advance equity.

From a public health perspective, democratic participation and the ability to advocate for structural change are protective determinants of health. When communities are able to organize safely and lawfully, they influence the policies that shape housing, income, environmental safety, and access to services. Conversely, policies that chill lawful expression or expand enforcement discretion—particularly in systems where bias has been acknowledged—may further erode trust in public institutions. Loss of trust is associated with reduced engagement and poorer outcomes across health and social systems.

As physicians are bound by legal and ethical obligations to promote health equity and address systemic factors that harm patients and communities, so too are elected officials entrusted with legal, ethical, and moral responsibilities to uphold constitutional protections and democratic principles. When legislation touches the most fundamental freedoms in a democratic society, the duty of restraint is heightened. In my view, advancing this by-law would not meet that responsibility.

At a time when democratic institutions globally are under attack, municipal governments

carry a heightened obligation to uphold constitutional protections and foster civic participation. Winnipeg has publicly committed itself to principles of human rights and inclusive governance. That commitment must be reflected not only in words but in action. This ill-conceived and dangerous by-law proposal stands in direct opposition to those principles and undermines the very foundations of justice it purports to protect.

For these reasons, I respectfully urge the Executive Policy Committee to vote against and withdraw the proposed by-law.

Sincerely,
Dr. David Willems, MD, CCFP, FCFP (CAC Addiction Medicine)

What is going on in this city? It wants to resort to scorched earth policies to "manage" wild animal neighbors with horrific poisons. It shamefully wants to impede bird conservation efforts by rolling back the requirement for bird friendly windows. It has made a mess of the transit system that negatively impacts my ability to enjoy the city's nightlife. And now it wants to restrict my free speech.
For the most part, those who engage in protests and rallies are supporters of social justice issues and working to try to make the world a better place. I am appalled that you would refer to those efforts as being a "nuisance." How contemptuous to put them into the same category one would a dripping faucet or that one mosquito who finds their way into your tent at night. We already have related by-laws on the books (not protesting on private property, not obstructing pedestrian traffic, etc.). Increase enforcement for those.
Sniff, sniff. Is that the slight scent of fascism I detect in the air? A l'il Iran Lite, perhaps? Winnipeg likes to fancy itself as being in the heart of the country. If it moves any further to the right . . . it's going to be an armpit

Dear Executive Policy Committee,

I am writing to you today to urge you to reconsider the Safe Access to Vulnerable Infrastructure By-Law.

On the surface, it seems rational especially when framed as a safety concern. However, there are underlying issues that in practice will cause serious harm if this by-law is passed.

Firstly, the proposal defines “nuisance” protests as involving the expression of “objection or disapproval towards an idea". This means even a silent protest with visual messages constitutes as a nuisance and our Charter-protected rights to freedom of expression and peaceful assembly are being extremely restricted.

Secondly, the language used in the proposed by-law is extremely vague. This means it can be misinterpreted, manipulated and weaponized against protesters. This vague language includes terms like nuisance, other facilities, and intimidation among other words and phrases. One can be intimidated by a group of people without them actively working to intimidate. Even the peacefulist of protests could be deemed intimidating to someone based on "say so". That does not mean they should be prohibited due to such a vague policy.

Thirdly, it is alarming that it is being proposed that protesting be limited and restricted on such a mass scale. If there are revisions to be made to our already existing rules around protesting then they should be explicitly and specifically refined as opposed to presenting a blanket solution that provides vague guidelines that are subject to misinterpretation, give way to much wiggle room if misused and hinder people's main mean to advocate for

themselves such as people I know.

For example, there are many students at the University of Manitoba and the University of Winnipeg that protest and gather on university grounds to be visible to the facility and people their message pertains to. Not only would they no longer be able to gather to protest against tuition hikes, discriminatory policies, etc., but peers and people would no longer be given the opportunity to be presented with a thouht provoking message they may want to join that would gain no coverage or media elsewhere and ultimately would equal silencing of real issues and erasure of meaningful protest.

In a nutshell the proposal is too vague and too broad and needs more revision and specification.

It is for these reasons that I am in opposition to the proposed bylaw.

This by-law would only harm peaceful protests as anyone(s) seeking to rally in violent or harmful ways would do so regardless of this by-law as crimes never consider laws in the first place. Ultimately it only infringe on those doing work they believe is good work in accordance with the law.

Hopeful regards,
Diamond Funk

Presentation to Executive Policy Committee of Winnipeg City Council

Tuesday, February 17, 2026

Re: Item # 7 on Agenda: Safe Access to Vulnerable Infrastructure By-Law

Good morning everyone,

My name is Diane Zack and I have been the co-ordinator of Manitoba-Cuba Solidarity Committee for the past 25 years. I have been a teacher in Winnipeg for close to 40 years, in the public schools as well as for Jewish Child and Family Service and the Adult EAL Newcomer programs at Winnipeg School Division, Red River Polytech and the University of Manitoba.

Like many in the social justice, activist community in Winnipeg, I wear more than one hat. I've also been involved in solidarity with Palestine for a long time. I made a presentation in this very room in front of City Council's Human Rights Committee in March 2023 when it was considering adopting the much-maligned International Holocaust Remembrance Association definition of anti-semitism, which I and others argued against. I was very proud of the Human Rights Committee of City Council that day for not going forward with adopting the problematic IHRA definition.

So now we are all here talking about this new proposed bylaw, quaintly referred to as an attempt to curtail 'nuisance' protests and keep them 100 metres away from a wide range of institutions, locations and sites around the city.

As someone who has been to hundreds of peaceful protests, demonstrations and rallies in Winnipeg going back to the 1960s, I strongly object to this by-law. Many others will point out the specifics of how and why this is a blatant, unwarranted overreach and violation of our civil rights. I would like to specifically address the issue of intimidation that is included in the proposed by-law. Apparently, if someone doesn't like the message being given by a particular protest, they may only have to say they are intimidated and the protest could be shut down by the police. This is a terrifying but real possibility if this by-law is adopted.

For several years now, Manitoba-Cuba Solidarity Committee has carried out peaceful rallies at the corner of River and Osborne on the last Sunday of the month against the U.S. blockade of Cuba, carrying signs like LET CUBA LIVE and TRUMP, HANDS OFF CANADA MEANS HANDS OFF CUBA. We have been well-received at this corner. There has been no

violence of any kind. Cars driving by show their support for our message by honking their horns.

However, we are about 100 metres from a church, and there is a seniors residence across the street from the church. So our usual corner would be off limits if this by-law is passed. It will become increasingly difficult to find an outdoor public place to gather, for ourselves and for so many other peaceful organizations who are simply acting on their civil rights to offer their views, to inform and to educate the public. Doing so has become a norm in Winnipeg for many, many decades. The groups who volunteer their time to do so are not a nuisance to the community; they are an integral part of it. This is a proud part of our social landscape in Winnipeg. If some people don't like what they hear and see, they walk on by for the most part, accepting the diversity of the community and the right of people to express their views.

For the past couple of years, the Palestinian community and its supporters organized weekly rallies opposing the Israeli bombing of Gaza. Yes, the rallies were loud. Many passersby and motorists showed support by waving and honking, but there were some who objected and swore at the protestors. However, the protests were not interrupted by violence. The Palestinians and their supporters did not overreact to these attempts to intimidate them; they took it in stride.

There were some organizations in Winnipeg and some politicians who support the Israeli war on Gaza and its population, and these same organizations and politicians have called for this by-law including a last-minute campaign to get people to submit written support for it by 5 pm today. They want a 'bubble' to keep Palestinians and their supporters off the streets. In my opinion, this is the impetus for this proposed by-law. The opposition to the by-law has grown exponentially, as witnessed by many organizations and journalists taking a public stand against it, and we are hoping that the growing opposition will have an effect on this meeting of EPC and that you will not move forward with it.

For my organization, Manitoba-Cuba Solidarity Committee, it is an extremely important time now and in the coming months to take a stand, including in public rallies, against the US attempts to destroy Cuba; we want to step up our work, not have it curtailed by such a by-law.

Please do not adopt this by-law. It will make things worse for the peace-abiding members of the community who want to gather to express their views on the issues of the day.

Thank you.

Diane Zack

Manitoba-Cuba Solidarity Committee

Dear Executive Policy Committee,

I'm writing today, to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. I am deeply concerned that it would significantly restrict our Charter-protected rights to freedom of expression and peaceful assembly. That is why I am opposed to the proposed bylaw.

It is ironic that I am writing on Louis Riel Day. Today we celebrate this hero who gave his life after leading the resistance advocating for freedom for the citizens of the Red River. Yet in Winnipeg today there is a proposal being debated seriously that would limit the freedoms for which Louis Riel died.

This by-law would limit the fundamental freedoms of Winnipeggers. We have used these freedoms for years to advocate for many social and policy changes that enable us as a community, and a nation, to practice democracy. In vigils and rallies to round dances, public demonstrations, in some of which I have been a participant, have helped to win rights for workers and tenants, Indigenous, Black, racialized and 2SLGBTQIA+ community members, and to protect the environment. Rather than being a 'nuisance' these citizen actions have helped to breath energy into democracy.

If passed, I am concerned that this by-law will infringe on constitutional rights, silence marginalized communities' voices, lead to police overreach especially when the concept of 'nuisance' is so vaguely defined, and result in inadequate options for responding to oppression and hate. The City's proposed "Safe Access" by-law would not prevent property damage, hate crimes, or violence from taking place. These acts already are criminalized. Instead, peaceful protests would be severely limited. This attempt of draconian and undemocratic legislation restricting freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech. Such laws often disproportionately harm marginalized groups who rely on protest to advocate for legitimate social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the United States of America and elsewhere, I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

Please drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,

As someone who favours public participation in politics and advocates for the rights of the marginalized, I am extremely concerned about the proposed Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, Black, racialized, and 2SLGBTQIA+ community members, as well as protections for the environment.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. If passed, this by-law would not only infringe on constitutional rights but also silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

As a doctor, you might expect me to be in favour of what effectively amounts to a ban on

protest at healthcare facilities. But provincial legislation already accomplishes this, and breathtakingly broad definition of healthcare facilities in this legislation, coupled with the 100 metre radius it requires, means that, for example, gatherings anywhere near Grant Park mall would appear to be prohibited, as it houses two pharmacies, a dental office, and radiology consultancy.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the United States, I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

The proposed bylaw is so fundamentally misguided that it must be rejected in its entirety.

Signed,
Dr. Gem Newman, MD

This by-law does far more than address harassment or obstruction. It creates broad 100-metre zones around a long list of public institutions where certain types of protest and expression would be prohibited outright. In a city like Winnipeg, that covers an enormous portion of civic space.

It also doesn't just target harmful conduct. It restricts expression based on what the protest is about. That's alarming. Once the City starts deciding which subjects can be protested and where, behaviour isn't being regulated, ideas are.

The by-law exempts labour-related activity but prohibits other kinds of protest within these zones. That makes some forms of protest acceptable and others not. A municipal government should never be in the position of choosing which viewpoints are allowed near which institutions.

Peaceful protest is foundational to a democratic society. It's how citizens hold institutions accountable. It's how marginalized voices are heard. It's how public policy is challenged and debated. Protests are often meant to be visible and close to the institutions they concern. Banning them near those spaces significantly impairs their effectiveness and sends a troubling message about how dissent is viewed. It also runs directly against our Charter rights.

We already have laws that address harassment, intimidation, threats, obstruction, and violence. Those laws should be enforced when necessary. Expanding municipal power to broadly define and restrict "nuisance" expression within large zones across the city is a serious and disturbing step. Protests are meant to draw attention and, at times, make

people uncomfortable. It’s also deeply concerning that enforcement and appeals, which require a large fee and would disproportionately impact marginalized groups, would be handled internally. A small group of unelected people can’t be the ones deciding whether lawful protest is acceptable.

I am extremely troubled and angry that our city officials are even considering a by-law that restricts protest and speech in this way. Intent doesn’t override impact. Government-imposed speech policing in public spaces is not even close to the direction Winnipeg should be moving toward.

As a Winnipeger and an advocate for peace and justice for all, I oppose this by-law because it will curtail the freedom to demonstrate in public spaces for the purpose of demanding freedom and justice—not only for Canadians, but for all fellow human beings. This by-law appears to mark the beginning of restrictions on individuals and groups who protest with humanitarian goals in mind.

The Canadian Civil Liberties Association (CCLA) is deeply concerned about the proposed Safe Access to Vulnerable Infrastructure Bylaw.
This bylaw would establish 100-meter zones around hundreds of community gathering spaces in Winnipeg. Within these zones, speech expressing “objection or disapproval” toward an idea, action, person, or group based on specified characteristics would be prohibited.
Winnipeg’s proposed anti-protest bylaw directly infringes on freedom of expression and freedom of peaceful assembly. These Charter-protected rights have little meaning without broad access to public spaces for expressing dissent and challenging the status quo.
As drafted, the bylaw wrongly presumes that disruptive or unpopular expression near certain community gathering spaces is a nuisance that the City should eliminate. We cease to live in a free and democratic society if bylaw enforcement officers or the police are given broad discretion to arbitrate what constitutes acceptable protest speech.
The right to physical safety is already extensively protected by existing laws and efforts should be directed to enforcing those. While the CCLA shares the goal of working towards a more inclusive and equal society, this should not be pursued through rights-infringing by-laws.
The CCLA urges City Council to abandon this deeply flawed proposed bylaw.

Respectfully,
The vulnerable infrastructure bylaw proposal is too vague and too broad. It will ultimately also be expensive as the city gets tied up in court with legal challenges.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, Black, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I am writing to express concern regarding the proposed recommendation referencing “safe access to vulnerable infrastructure.”
While I recognize the importance of protecting critical infrastructure, the phrase “safe access” is broad and open to interpretation. Without clear definitions and limits, it may unintentionally affect lawful, peaceful assembly in public spaces.
The rights to peaceful assembly and freedom of expression are protected under the Canadian Charter of Rights and Freedoms. I respectfully urge Council to ensure that any amendment is clearly defined, proportionate, and carefully limited to avoid unintended impacts on lawful civic activity.
Thank you for your consideration.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear members of the executive policy committee,

I am writing to express my fervent opposition to the proposed Safe Access to Vulnerable Infrastructure by-law. I am appalled that the City of Winnipeg's executive policy committee would consider passing a by-law that would infringe upon the charter rights of Winnipeggers. I find it difficult to see why Evan Duncan would propose a law that mimics the rise in authoritarianism that we're seeing in the United States currently - is the City of Winnipeg not invested in hearing the voices of the people they claim to represent?

Notably, acts such as property damage, hate speech, and violence are already illegal - they are rights and responsibilities which ensure the safety of all Canadians. This by-law purports to ensure safety for Winnipeggers - but it uses the language of safety to trample upon our rights instead.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

I encourage you to cease consideration of the proposed by-law for the sake of Winnipeg remaining a community of individuals with the rights and freedoms to express themselves freely.

Thank you.

Our ability to protest is key to maintaining our rights. A removal of our right to protest removes our ability to collectively gather in opposition of something. I am incredibly disappointed that the city would try to strip us of this right.

The proposed bylaw impinges on our Charter rights and shuts down the democratic space to exercise the rights of residents to engage with political issues.

Areas restricted by this by-law are public spaces and points of proximity to decision makers such as City Hall and University Campuses precisely where officials elected and otherwise need to hear from residents and be held accountable for the impact of their decisions on the public.

This is a dangerous and anti-democratic and I strongly oppose it and call on all councillors to reject it in its entirety.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law currently before the City of Winnipeg.

In recent days, there has been significant public concern regarding this proposal. Although Evan Duncan has announced his intention to recommend withdrawing the bylaw, it remains scheduled for discussion at your meeting on Tuesday, February 17. This ongoing consideration presents an important moment to reflect on the values we choose to uphold as a city.

As drafted, the bylaw would severely limit residents' ability to exercise their Charter-protected rights to freedom of expression and peaceful assembly. The proposed 100-metre buffer zones around a broad range of "vulnerable infrastructure" would effectively prohibit demonstrations across large portions of the city. By some estimates, nearly one-fifth of Winnipeg could have been rendered off-limits for protest activity, effectively choking off traditional demonstration routes in the downtown core.

While the stated purpose of the bylaw is to protect public safety, its scope goes far beyond what is necessary to achieve that objective. The breadth of the proposed restrictions would allow for substantial discretionary enforcement and risks disproportionately impacting marginalized communities—those who often rely most heavily on public protest as a means of being heard.

Protest is a cornerstone of democratic life. Throughout Winnipeg's history, public demonstrations have been instrumental in advancing Indigenous rights, labour protections, environmental stewardship, and broader social justice causes. Collective action has shaped our city's social and political landscape and strengthened our

democratic institutions. A bylaw of this magnitude would undermine that legacy and weaken one of the most important mechanisms residents have to hold institutions accountable.

Moreover, the proposal extends well beyond comparable measures in other Canadian municipalities. In cities such as Calgary and Toronto, similar regulations are more narrowly tailored, typically applying to specific facilities such as child-care centres or places of worship. The Winnipeg proposal, by contrast, casts an exceptionally wide net over both public and private spaces, creating sweeping restrictions that are neither proportionate nor consistent with democratic norms.

Although it is encouraging that Councillor Duncan has signalled his intention to withdraw the bylaw, I respectfully urge the Committee to formally reject it and ensure that no similarly overbroad measure proceeds. Our city can and must balance public safety with the protection of fundamental freedoms, but that balance must be carefully and narrowly struck.

I ask that you affirm Winnipeg's longstanding commitment to democratic participation and civil liberties by opposing this bylaw.

Thank you for your consideration

I am a physician that works at the Health Sciences Centre. My clinic was blocked by a protest during the pandemic near and on hospital grounds. Some of my patients that day missed their appointments as they could not park, be dropped off at, or even physically get into the hospital past the protestors. Many of my patients travel from Nunavut, fly in communities, or north western Ontario to attend. I remember a couple specific patients scheduled that day that I didn't see because of how ill they were and my own upset that they could not attend.

I share this experience because I am strongly in favour of NOT allowing protests near select essential services such as hospitals or health care facilities. Protests cannot impede access to such essential human right services and there should be a law for enforcement. It also cannot be based on discrimination or intimidation. Having said that, this needs to be balanced with the rights of the all of us for peaceful assembly and freedom of expression.

In my opinion the city's proposed 1B Vulnerable Social Infrastructure definition is too broad in including public meeting places like community centres, churches, cultural centres, libraries, and schools. Frankly these are public assembly areas. The city's proposed 1D Specific Nuances included but not limited to list is too broad and open to interpretation and potential abuse against peaceful non disruptive protest. A few examples come to mind: cyclists moving down a street as a group could be construed to obstructing passage, using a microphone to coordinate a crowd or chant a message.

Peaceful assembly puts pressure on government to engage with and media to cover the concerns of individuals so that it come to a resolution. Inconvenience is not a reason to impinge on rights. As such, please do NOT pass this by-law as is.

I am writing to oppose the *Safe Access to Vulnerable Infrastructure By-law* proposed as Item 7 on the City of Winnipeg's Executive Policy Committee Agenda for Feb. 17, 2026.

The *Safe Access to Vulnerable Infrastructure By-law,* labelling protests "nuisance demonstrations", seeks to punish people with hefty fines for exercising the rights of peaceful assembly and expression. The By-law appears to define a "nuisance demonstration" by its use of megaphones, its proximity to a lengthy list of apparently "vulnerable infrastructures" and its supposed negative impact or "intimidation" felt by the people associated with those institutions. The list of public or semi-public infrastructures deemed "vulnerable" effectively removes the right to have a peaceful demonstration in all but a few spaces in the city of Winnipeg.

What makes the itemized infrastructures "vulnerable" beyond that the people frequenting them are opposed to whatever is being protested, deeming them a "nuisance". Perhaps the issue is that certain people are made uncomfortable by the protests? The intent of this By-law is clearly **not** to protect people from actual, verifiable, concrete harm, but to authorize the police to punish people for protesting.

The legislation states: "No person shall engage in the intimidation of any person accessing or attempting to access a designated facility or the site of a designated facility" and includes in its definition of "intimidation" as conduct that may "cause a person to fear for their mental or physical safety". Since when does someone's perception of their "mental safety" trump the fundamental rights of Canadian citizens? How is it to be determined whether someone's "mental safety" is in jeopardy by a peaceful protest? Who is to decide? The police? Is the onus on the protesters to prove themselves peaceful after being hit with hefty fines or arrested? If so, the intent of the legislation is to muzzle dissent by disincentivizing protest.

It appears that one of the intents of this By-law is to snuff the protests mobilized around the campaign to stop the devastating genocide in Gaza. The sole purpose of the pro-Palestine protests has been to stop the genocide being perpetrated by the State of Israel. Anyone with a modicum of political awareness knows that Israel has laid waste to the Gaza strip with relentless bombing of homes, schools, hospitals and energy and water systems. Israel, assisted by the US, Canada and other Western nations is now engaged in a starvation campaign against the people who have survived the relentless bombings, drone attacks and extrajudicial shootings in the streets – not to mention the various forms of torture inflicted on Palestinian prisoners.

Is to oppose the genocide of the people of Palestine an "incitement of hatred" against Jews? To think so is absurd; to enshrine it in legislation as a "nuisance" is a travesty. One of

the fundamental reasons for protesting is to call power and wealth to account. Some people and institutions in the City of Winnipeg choose to support that genocide by collecting money on behalf of the Israeli Defense Forces committing genocide, or providing a forum for it. If so, it is not only our right, but our duty, to protest those actions. If the protests inconvenience a few people and make them feel bad about themselves, so be it. If the being genocided were Jews, protesters would be rallying against that.

The *Safe Access to Vulnerable Infrastructure By-law* takes a sledge hammer the fundamental rights of Canadian citizens living in Winnipeg. The By-law will suppress meaningful dissent and should not be allowed to pass.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, Black, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Madi Zaminskis

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, Black, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Along with the world, we Manitobans recognize the border-spanning leadership of Minnesota's civil society, as it has stood up strong, firm, and responsibly in public, in the streets, against the vicious anti-immigrant and anti-democratic tyranny of a lawless, criminal invasion. We can only contrast Minnesota's current civic heroism to the horrific genocide prepared by Israel's model, the antidemocratic 2020 Israeli law against public protest (https://www.lawfaremedia.org/article/protests-exceptional-times-israels-new-demonstration-prosecution-guidelines). We in Manitoba refuse law, however unctuously sold, that prepares more genocide. In an era beset with ghastly resource misallocation and profound elite disconnection (as exemplified in the grotesque abuses detailed throughout the Epstein files), we need law that capacitates democratic corrections to the high tide of tyranny. In this hour, we require more democracy, not less. The suppression of democracy is how we lose our capacities and our sovereignty. Democratic development is how we protect our children, our communities, and the future.

If passed, this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to prevent property damage, hate crimes, or violence—These are already criminal offenses, subject to policing, in our country. Instead, peaceful protests would be severely limited and semi-criminalized. This type of draconian and anti-democratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may violate Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. Winnipeggers do not want to pay taxes to defend a hand-me-down anti-democratic bylaw, or suffer the corrosive, disabling suppression it requires.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming and brutal suppression of rights and freedoms we are witnessing in the increasingly-isolated, anti-democratic US orbit, I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I am writing to oppose the proposed bylaw regarding protests and demonstrations. The proposed bylaw is a significant chill on the Charter rights we have in this country. I do not want to see this bylaw pass, even in an amended version.

If the concern is targeted harassment or violence, there are already legal tools to deal with this. A bylaw restricting protest is a terrifying overreach.

If the concern is police resources, it is worth looking at the unmet needs that protests express and looking at using city resources and relationships with other levels of government to help Winnipeggers address the injustice or unmet needs they are experiencing.

I am incredibly disturbed by Councillor Duncan's comments about not wanting to see the protests of the US come to Canada. We are a distinct nation with different concerns, both nationally and locally. Unless Councillor Duncan is aware of plans for violent and aggressive removal of immigrants and non-immigrant citizens, disregard for court rulings, and the gutting of regulatory agencies within Canada, he should not pretend that the same context for community defense and anti-authoritarian resistance exists here. Those violations of the democratic contract deserve to be resisted.

I am concerned about how this bylaw would inevitably disproportionately target minorities and people experiencing injustice. The rich and protected have little need to protest in the streets. People who are not protected from poverty, discrimination, violence, environmental damage, exploitation, and political marginalization are the people who protest, and who will be targeted by this law.

I do not want the city wasting resources defending this against the inevitable Charter challenges it would receive. I want us to put our efforts and resources into creating a city where there is less need to demonstrate against undeserved need. Protest is the price of freedom, but it is also the cost of injustice.

I strongly disagree with this proposed by-law. There are already laws in place to deal with any safety issues around public demonstrations. I believe if passed, this by-law will unfairly target citizens from marginalized communities. This is not the Winnipeg I want to live in.

The fact that council is considering such measures is deeply concerning. That any member of council can look at current events and think that this is a good idea is truly vulgar. This is repression of charter rights thinly veiled as a public safety issue, and must be halted immediately.

To the Members of the Executive Policy Committee,
I am writing as a resident of Winnipeg to express my serious concerns regarding the proposed Safe Access to Vulnerable Infrastructure By-law.
While I value the safety of our community and the right of all Winnipeggers to access services without harassment, I believe this bylaw as drafted constitutes a dramatic overreach for the following reasons:
Overly Broad Scope: By including sites like post-secondary institutions, libraries, and cemeteries, the 100-metre buffer zones effectively "blanket" large portions of our city, making it nearly impossible to hold a peaceful protest or march without violating the bylaw.
Vague Definitions: The term "nuisance demonstration" is poorly defined and gives enforcement officers too much discretion. This creates a "chilling effect" on lawful, non-violent dissent. The discretion also opens up the possibility of over-reaction to peaceful protest.
Redundancy: Police already have the authority to address intimidation, harassment, and the blocking of access under the Criminal Code. A municipal bylaw that duplicates these powers risks being used to suppress unpopular opinions rather than protecting public safety.
Charter Concerns: Similar bylaws in other Canadian cities (like Vaughan and Calgary) are already facing constitutional challenges. I urge the City to avoid costly legal battles and instead focus on enforcing existing laws.
I respectfully ask the Committee to reject this proposal in its current form and instead look for ways to protect access to essential services that do not infringe upon our fundamental rights to peaceful assembly.

It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, Black, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Rebekah Heinrichs

Dear Executive Policy Comittee,
The Safe Access to Vulnerable Infrastructure By-law would restrict our rights to freedom of expression and peaceful assembly, both protected by the Charter, and I am opposed to the proposed by-law. The freedom to advocate for rights and social change is essential to Canadian democracy and must be protected by our law-makers, not attacked and compromised. We have all seen the assault on freedom of expression in the United States and we know this is the path Canada must avoid, not creep towards with the proposed by-law that will be used to surpress this basic right of a free and fair society. Now more than ever is the time to protect our freedom of expression and association and I urge you to uphold these basic and essential rights by end any further consideration of the proposed by-law.

Hello, I am writing today to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

This by-law is far to vague and broad in scope to possibly function as intended, as likely infringes on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often where people WANT to protest, and what of employees or patrons of those locations? This by-law would deem students enacting a protest at their school as illegal, but where else should they protest? Prohibiting “nuisance demonstrations” within such such a broad selection of locations effectively makes peaceful protest illegal.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I insist the Committee rejects this proposal. Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

This bylaw is an absolute slap in the face to everything Winnipeg and Manitoba hold dear. We pride ourselves as Winnipeggers in the 1919 General Strike. We celebrate Louis Riel. We tell our kids, our students, to stand up for what they believe in, and that when something is wrong, you speak up.

What this is trying to do, what it will do, is shut down anything that is a "nuisance". Anything that goes against the grain of society. It shuts down voices that need to be heard if they're not in a convenient little box.

We already have protections in place for harassment, for hate speech, for inappropriate forms of protest. There is zero reason to do this, and frankly, it's a betrayal of the very history we claim to celebrate. A Winnipeg that silences its protesters is not the Winnipeg that learned its lessons of 1919, and it's not the Winnipeg I want to live in.

Winnipeg is better than this, we are better than this! Considering this city prides itself in the 1919 general strike, this by-law about "nuisance" protests is laughable at best. This is a fascist policy, and we will not tolerate such filth in our society.

Louis Riel Day is right around the corner for crying out loud! We have protections in place for hate speech and harassment already. This is nothing other than an attempt to push things in a more authoritarian direction. It is anti-freedom, anti-free speech, and anti-Canadian.

I am writing to express my strong support for Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, advocating for the passage of the Safe Access to Vulnerable Infrastructure By-law.

This by-law is a crucial step in safeguarding essential community institutions and ensuring that Winnipeg remains a safe, inclusive, and welcoming city for all.

As a parent, I was deeply disturbed when I had to walk from the parking lot to the Jewish Community Center with my 3-year-old daughter, passing a group of loud demonstrators gathered outside for the sole purpose of instilling fear and intimidation. The experience was scary for my young child and deeply troubling for me as a parent, concerned about the safety and well-being of my child.

No one should have to endure intimidation or threats in order to access a community center, school, or place of worship. I strongly urge you to support this vital by-law, which will help protect the safety and dignity of all individuals in our city.

establish protective buffer zones around community centres, places of worship, schools, and other vulnerable spaces. It is a measured and practical step to ensure that families, seniors, students, and community members can access these spaces without intimidation or harassment.

As a parent of children who attend Jewish schools and an employee at a Jewish organization it is shocking that protesters can stand outside of our house of worships, schools, and community space to intimidate and harass people going about their everyday lives. We want to feel safe sending our kids to school or youth programs. Last year outside of the Rady JCC there were protestors the night of Gray Academy's school musical and streets were blocked off and (thankfully) there was a large police presence due to protestors. We needed to park blocks away and walk past protesters who were trying to instill fear and promote hate. No child should have that outside of their school! Thank you to the Wpg police service for being there but it's awful that this location could be used as a place to protest. (Aka spew their violent hate of the Jewish people)

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

I am a strong believer in freedom of speech, freedom of assembly and the right to protest peacefully. The measures outlined in this proposed by-law pose no threat to any of the above. Rather, they draw a firm line between the right to protest and licence to harass members of a community, especially young children, seniors and other vulnerable constituents. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.

I was born and raised in Winnipeg. Our city should be a place where all residents have the right to express themselves. It must also be a place where the safety of all residents is the highest priority.

I am writing to express my strong support for Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting. I urge the Committee to pass the Safe Access to Vulnerable Infrastructure By-law.
This legislation is a vital step toward safeguarding our community's essential institutions. Schools, community centres, and places of worship should be spaces of safety, not sites of intimidation. By supporting this measure, you are ensuring Winnipeg remains a secure and inclusive city for everyone.

As a citizen of Winnipeg and speaking for countless others; we are exhausted of having to endure threats and insults in various public spaces such as community centres, schools and places of worship.
Our elected officials have a responsibility to pass laws that protect the citizens AND, not make it easy for those who would terrorize us.

It's clear to me that the current manner that the Winnipeg Police manage demonstrations does give me the confidence that I will not be physically harmed or intimidated.
However, it doesn't protect me, my children and grandchildren from verbal intimidation.
On my way to a cultural event at the JCC, Jewish community centre, I should not have to be verbally attacked by a group of demonstrators screaming baby killers, murderers and genocide supporters
followed by shame on you.
Without question, children walking to their school in the JCC should not be subjected to this intimidation.Children are frightened by this bullying behaviour.
The demonstrators are attempting to bring the war in Gaza to Winnipeg by holding the Jewish community here responsible for this war that was started by the terrorist organization Hamas on October 7, 2023, in a barbaric attack, raping women and killing babies and adults, almost entirely civilians.
Following the attack, Hamas promised the genocide of Jewish people, as is clearly stated in their charter.
Freedom of speech does not mean that you have the right to spread hatred of another group of people. Seeing demonstrations on TV or hearing them on radio spreading hate speech emboldens the antisemites, resulting in firebombing of a synagogue in Vancouver, bullets fired at Jewish schools in Montreal and at a home in Winnipeg.
At this point, I am requesting that the Hate laws that are already in effect, be enforced!
I also suggest that the word nuisance be removed from the bylaw as it diminishes its importance.
For Canada to live up to the charter rights that protect its citizens from hate, one group cannot be allowed to blame another for a war that is going on thousands of miles away.
Until recently, Winnipeg has always been a place where minority groups feel safe. As a Jewish person, I should not have to be made to feel unsafe. The current Hate Speech laws

must be enforced. The proposed bylaw will
go a long way to protecting minority groups from intimidation and serve to bolster the current hate laws.

Dear Chair and Members of the Executive Policy Committee,
This submission is made on behalf of the Blue and White Coalition of Manitoba, a grassroots organization of more than 300 Winnipeg citizens, formed in response to escalating intimidation, threats, and calls to violence directed at those who support Jewish Manitobans and the right of the State of Israel to exist.
We strongly support the proposed Safe Access to Vulnerable Infrastructure Bylaw.
Our support is grounded in lived experience. Since October 7, 2023, our community has endured repeated escalating intimidation outside a synagogue, at the Asper Jewish Community Campus, and at a Jewish day school. These were not abstract policy debates; they were events that left children, seniors, and families feeling surrounded and unsafe at institutions meant to be places of learning, worship, and community. The impact does not fade with time. It goes to the core of whether our community has a secure future in Winnipeg.
If Council fails to pass this bylaw, it will send a message that vulnerable communities are on their own when targeted at their schools, houses of worship, and community centres. It will signal that intimidation at the very doorsteps of such institutions is a tolerable cost of public life, at least when it comes to certain communities.
This bylaw is not about silencing dissent. It is about time, place, and manner. It preserves lawful protest in appropriate public forums such as City Hall, the Legislature, and public squares, while protecting children, worshippers, seniors, and families from being made a captive audience at sites they cannot reasonably avoid.
The constitutional foundation for such measures is well established. In R. v. Watson; R. v. Spratt, the British Columbia Court of Appeal upheld “bubble zones” around abortion clinics, recognizing that individuals seeking essential services should not be “held hostage to the message the protestors wish to send.” (emphasis added)
The Court confirmed that buffer zones create distance and protection while preserving

protest outside the zone. The Supreme Court of Canada declined to hear the appeal, leaving that framework intact. Manitoba

To be clear, the Charter does not guarantee a right to express anything, anywhere, without limit. Where conduct becomes targeted harassment, intimidation, glorification of violence, or the effective encirclement of a vulnerable minority, it ceases to be the kind of peaceful expression our Constitution was designed to protect.

We have already seen the consequences of inaction. On April 1, 2025, and again during Folklorama, demonstrators outside Jewish community institutions blasted simulated shooting sounds, mocked prayer, and issued calls for violence. Jewish children and families were not merely exposed to opposing views; they were besieged and confronted with conduct calculated to intimidate and unsettle them in their own communal spaces. That is not peaceful assembly. It was attempted coercion.

Nationally, antisemitic incidents have reached historic highs. According to Statistics Canada and B'nai B'rith, Jewish Canadians, approximately 1% of the population, are the victims of a majority of religiously motivated hate crimes (approximately 70% of religious hate crimes, and approximately 60% of all hate crimes). Since October 7, 2023, Canada has seen synagogues firebombed, schools attacked, businesses vandalized, and harassment surge. In that climate, dismissing targeted, intimidating demonstrations at Jewish schools and synagogues as harmless "speech" is not neutrality; it is acquiescence.

Some, including those in positions of power who could have acted, and who now criticize this bylaw have long been aware of escalating intimidation yet did nothing. Their present objections ring hollow. Winston Churchill cautioned against the timid and the bureaucratic who enable drift and inaction in the face of mounting danger. Leadership requires more than delay, and commentary after the fact; it requires timely, measured action when communities are under strain.

Others who have publicly opposed this bylaw have repeatedly spouted dogmatic hate targeting one community, the Jewish community. They invite Council to license their hate and intimidation by refusing to protect vulnerable populations and infrastructure. Council should refuse that invitation to hate.

The bylaw is neutral. It protects synagogues, mosques, churches, gurdwaras, schools, shelters, clinics, and community centres alike. It does not privilege one religion or community. Were it otherwise, we would not support it. It ensures that every vulnerable group can assemble, worship, learn, and receive services without running an intimidating gauntlet at the entrance.

When balancing harms, the conclusion is clear: this bylaw is a modest, carefully tailored limit on the location of protest. It is a proportionate prophylactic response to a real and growing threat. It safeguards not only physical security but also the equal participation of vulnerable communities in civic life.

Winnipeg now faces a choice. Council can allow the most aggressive factions to dictate which communities must endure intimidation at their own institutions. Or it can affirm that in this city, rights are balanced responsibly, and minorities, any minority, will not be held hostage at the threshold of their schools, houses of worship, and community centres.

We respectfully urge the Executive Policy Committee and Council to adopt the Safe Access to Vulnerable Infrastructure Bylaw and to send a clear message: in Winnipeg, all

communities are entitled to live, learn, worship, and gather in peace and safety, free from intimidation.

This by-law in no way infringes on the rights to safe protests. What it would do is protect Winnipeggers from hateful and intimidating demonstrations in front of vulnerable sites such as places of worship, community centres, and schools. The Jewish Heritage of Western Canada and the Manitoba Institute to Combat Antisemitism have researched antisemitism in our country; that history goes back well over a century. We believe that all Manitobans deserve to be safe in their places of worship, schools, and community centres. We deserve to practise our religion without fear of intimidation and threats. This by-law is there to protect. In municipalities such as Vaughan and Oakville, there have been no incidents of peaceful protests being prevented. If people wish to protest on a public street that is 100m away from these vulnerable sites, the bill in no way prevents that. The reference by Councilor Duncan to Bill C-9 is moot because the bill has been paused.

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

I am in support of everyone's right to peacefully protest, but not when it infringes on the rights of others' feeling of safety. Protests in front of hospitals, schools, and places of worship make me personally feel uneasy and unsafe in my own community, and are designed to intimidate and frighten. These are supposed to be safe places where kids, the sick, and those seeking religious / spiritual / general support is sought, and should be immune from ruthless intimidation and disruption. There are other ways of getting messages and promoting activism that do not need to put innocent civilians from such a setting in a stressful environment. I view this measure as parallel to "you can't shout 'fire' in a movie theatre" despite freedom of speech.

This by-law is an imperative step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure, and applaud the city for taking this seriously.

I am writing in support of Agenda Item #7 at the February 17, 2026 Executive Policy Committee meeting and the Safe Access to Vulnerable Infrastructure By-law.

I believe everyone deserves to enter a school, community centre, or place of worship without feeling intimidated or unsafe. I remember attending a community event with my family and feeling uneasy as we approached because of confrontational behavior at the entrance. What should have been a positive, welcoming experience instead felt stressful and unsettling. No parent or family should have to question their safety when accessing community spaces.

This by-law draws a clear and reasonable line between lawful protest and harassment at the doors of places where children, seniors, and families gather. I respectfully urge you to support this important measure.

Thank you for your consideration.

Members of Winnipeg City Council,

I write in strong support of Item #7 — the proposed Safe Access to Vulnerable Infrastructure By-law.

I had registered to attend today's meeting in person. Sadly, and unfortunately, I had to make the difficult decision to submit my words in writing instead. I simply could not stomach facing yet another virulent angry mob screaming at me triggering more generational trauma.

For many years — and exponentially more so since the horrific terrorist attacks and kidnappings of October 7, 2023, and the prolonged hostage crisis that followed — Jewish Winnipeggers and their allies have been subjected to virulent Jew hatred disguised as "peaceful protest." Large and aggressive demonstrations have taken place outside our community centres, schools, neighbourhood streets, and university campuses. These were not peaceful protests. Nor were they events that community members could simply avoid.

April 2025 – Asper Jewish Community Centre

At the beginning of April 2025, protesters harassed individuals attempting to enter the Asper Jewish Community Centre (AJCC). A Zionist university student group had chosen to host an event there because it was deemed too unsafe to hold it on a university campus. Tragically, it proved no safer at the AJCC.

Parents were forced to walk their preschool children through an angry and hostile crowd when leaving the facility and walking to their cars. Later that same evening, the Gray Academy school musical was being performed at the Centre. Some protestors yelled at and chased after students, their friends, and their families — including Holocaust survivors and their descendants – accusing them of supporting genocide. What should have been a celebratory school performance became an experience marked by fear and intimidation.

Folklorama – Shalom Square Israel Pavilion

During Folklorama last summer, unruly protesters harassed visitors and volunteers at the Shalom Square Israel Pavilion at the AJCC on nearly every evening of the festival.

These protesters blasted recorded war sounds — including women screaming, guns firing, bombs exploding, and babies crying — on a seemingly endless loop late into the evening at volumes far exceeding allowable noise limits, likely violating municipal by-laws.

Protesters incessantly screamed at pavilion volunteers and visitors — including sitting elected officials, among them former Manitoba Premier Kelvin Goertzen — accusing them of supporting

genocide and killing babies. They shouted that women and children were “whores.” One protester threatened a woman by saying words to the effect that “Hamas would be coming for her.”

Protesters stood beside the crosswalk, blocking vehicle sightlines and intimidating pedestrians to such an extent that many chose to cross the street at unsafe points rather than walk through the hostile crowd. Some protesters followed individuals who attempted to avoid them, demanding they look at graphic signs while continuing to scream at them. Signs were shoved within inches of people’s faces.

Volunteers attempted to create a warm and welcoming buffer so that families could enter safely. Many visitors told us they were frightened to attend but ultimately did so because volunteers were present to escort them in.

At one point, a protester repeatedly drove up and down the street screaming and swearing. The vehicle pulled up alongside attendees, and both the driver and passenger escalated what volunteers perceived as threats and verbal abuse.

These events unfolded during what was meant to be an evening of cultural celebration. To describe the atmosphere as terrifying would be an understatement — particularly in light of the absence of meaningful law enforcement intervention.

Hate Fests in Neighbourhoods

ProHamas rallies have taken place in the area of Winnipeg where many of the Jewish community members live. Chants of “we don’t want no Zionists here” and “Intifada Revolution” (which is a call for a violent uprising against Jews and western civilization) were blasted over loud speakers and echoed through the surrounding neighbourhoods, audible even kilometres away inside private homes during the Sabbath.

Freedom of Expression and Its Limits

Section 2 of the *Canadian Charter of Rights and Freedoms* guarantees freedom of expression. However, the Charter does not render that right absolute. Section 1 explicitly provides that Charter rights are subject to reasonable limits prescribed by law as can be demonstrably justified in a free and democratic society.

Jurisprudence from the British Columbia Court of Appeal confirms that freedom of expression does not include the right to impose one’s message upon a captive audience. Freedom to speak presupposes a corresponding right not to listen. The Charter does not guarantee an audience.

Individuals must be free to avoid messages they do not wish to receive. The Supreme Court of Canada denied leave to appeal that decision, leaving this principle intact.

What occurred outside Jewish community institutions was not expression directed at willing listeners. It was the deliberate imposition of hostility upon captive audiences — families entering school performances, festival attendees, worshippers, and neighbourhood residents in their own homes.

The Broader Context

Canada is experiencing an unprecedented surge in antisemitism. According to the 2024 Annual Audit published by B'nai Brith Canada, 6,219 antisemitic incidents were recorded — the highest number since tracking began in 1982. This represents a 7.4% increase over 2023 and more than double the number recorded in 2022. Although Jewish Canadians constitute approximately 1% of the national population, police-reported data consistently shows that Jews are the target of roughly 70% of religion-motivated hate crimes.

These statistics underscore the disproportionate vulnerability of the Jewish community.

While Criminal Code provisions addressing hate speech, intimidation, and mischief already exist — along with municipal noise by-laws — enforcement has too often been absent. A misplaced belief that inaction produces de-escalation appears to have guided decisions by law enforcement and prosecutorial authorities. The result has been the emboldening of increasingly aggressive crowds.

Why This By-law Is Necessary

The proposed by-law is a measured and constitutionally sound response. It is narrowly tailored to prohibit nuisance demonstrations and intimidation within 100 metres of vulnerable social infrastructure. It does not prohibit peaceful protest. It does not restrict lawful labour activity. It does not prevent individuals from demonstrating at City Hall, the Manitoba Legislature, or the Canadian Museum for Human Rights, for example.

It simply protects access to schools, community centres, places of worship, and similar vulnerable spaces.

Comparable 100-metre "bubble zone" by-laws exist in Canadian municipalities including Vaughan, Brampton, and Calgary. In fact, those cities impose significantly higher penalties than those proposed in Winnipeg, some with fines of up to $100,000 and the potential for incarceration.

This past week Winnipeg community members became emotional after being fed a pack of untruths and misrepresentations that rights would be restricted or that the bylaw is draconian in measure. In reality, Winnipeg's proposal is restrained.

A Call to Action

At a minimum, Council should commit to amending and reintroducing the by-law by April 30, 2026. We cannot allow a repeat of what occurred almost every evening outside the Israel Pavilion during Folklorama.

A public education campaign should accompany its reintroduction to ensure residents understand its limited scope and constitutional foundation.

There is no unfettered right to protest outside abortion clinics. There is likewise no unfettered right to harass Jews — or Christians, Muslims, Hindus, Sikhs, or any other community — outside schools, places of worship, or community centres.

Winnipeg prides itself on its social justice legacy, including the history of the 1919 General Strike. That legacy calls for principled action, not paralysis.

City Council now has the opportunity to demonstrate moral clarity and legal courage by enacting a necessary and defensible by-law to safeguard vulnerable communities in our city.

Respectfully submitted.

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.

This bylaw is a necessary step to protect essential community institutions. No child or adult, including the elderly and vulnerable need to feel u safe and harassed when walking into a place of worship, a space of higher education or an essential service. There are appropriate places for peaceful protests such as legislative grounds. A buffer zone is necessary for essential services and living and no one should feel unsafe or intimidated.

I've had several experiences where I felt threatened and unsafe from demonstrators here in Winnipeg: 1. This past summer at the entrance to the Folklorama Israeli Pavillion we were yelled at with hateful and vulgar language by members of a pro-Palestinian group. This has also happened on previous summers during Folklorama.
2. In December, while attempting to enter the Chapters Bookstore near Polo Park, I was yelled at by a group of people holding up a Palestinian flag, promoting a boycott of Indigo/Chapters. When I took out my phone to record what they were yelling as a precaution against my being assaulted, they started recording me with their phones and after I entered and then exited the store, one of the protestors started following me to my car, even when I asked them not to follow me. 3. My son, who is a medical specialist at Health Sciences Centre was attending a service of lighting a Hanukkah menorah within the hospital. At that time, a person walked by and yelled "baby killers" at this group of medical staff.
Although this was an individual, not a protest, I have seen that statement ("baby killers") written on the protest signs of the pro-Palestinian demonstrators that were regularly appearing in various locations across the city. Their protest chants and signs promote hate against the Jewish Community. They also use megaphones, including in areas close to personal homes, to loudly chant hate slogans like "All Zionists are racist" which is false and spreads hatred, not just within their group but also within the broader public. I realize that my last comment is not about buffer zones per se, but I'd like to state that I believe the true purpose of protests by CPAM (Canadian Palestinian Association Manitoba) and other pro-Palestinians groups are to spread antisemitism. If they were truly trying to protest the actions of Israel, their protest locations would be relevant government offices, not random locations along public streets.

I am writing to support the passing of the bylaw to provide safe access to infrastructure.

Over the last three years, we have seen our rights to assembly and free speech be hijacked and weaponized by special interest groups that have no regard for the public good of Manitobans in general.

Week after week, month after month, they deliberately disrupt our lives with their nuisance protests. On two occasions I have personally been delayed at Confusion Corner by their single-file parade of sign-wavers, using their pedestrian rights to block the left turn onto Osborne going north. It didn't matter to them that traffic down Pembina was blocked as far as the eye could see. Their only concern was that we would hear their chanting and air horns. This is not protest, this is intrusion.

I supported Camp Morgan, the protest encampment at the Brady land fill, calling for the return of our murdered Indigenous women. The endurance of this encampment, and the dedication of those that lived there, was a source of pride for all Canadians. Did we really need TWO permanent encampments, one at UWin and one at U of M, to protest a conflict on the other side of the world?

Those two encampments were not protests, they were demands, with threatening signs calling for violence. I worried every day for the safety of my daughter, a student at UWin. I watched on the news every day as these "protest" encampments broke into violent attacks against students and property at schools around the world. The concerns of a student should be classwork, exam prep, earning money for tuition, friendships – not if they need to detour around danger, day after day after day.

In Saturday's Winnipeg Free Press, I saw pundit after pundit call this bill an assault on our rights. I think it is the opposite – a protection of our rights. The right to free passage. The right to feel safe. The right to focus on our own problems.

Melissa Martin of the WFP complained that much of the city would be protected by the ban, singling out section of the MB Leg, and Portage Ave. Yes please! If you could stop blocking Portage Ave, that would be great. And most of the Legislative grounds would be available – just not the ones near the churches. Please protect our houses of worship from protesters who know that their presence and chanting intimidate those who attend. That is the point of protesting outside church or community centre: to intimidate and frighten the groups that use those facilities.

Let's take our streets back from the army of protestors who assault us collectively and call it their right. As I recall, your right to swing your fist ends where my nose begins.

Please strike a blow for our rights by passing this bill.

My daughter wanted to become a Gray Academy student. She was doing exploration visit in the school when Palestian protest start gathering. A lot of people were there; these people were yelling and screaming, and cursing Jewish students and their parents. We could feel the tension in the air, hate and violence. Because of that, we decided that Gray Academy is not a safe place to send our child, be afraid that these people harm them. Places like schools, cultures centeres, synagogues, churches, musk and other should be out of the limit for these people. Those who take advanatge from the system to promote their hate and violent ideas. These people are taking advantage of our country's democracy by saying it is freedom of speech and protest. I strongly disagree with this. This is not the right; it is a privilege, and thise privilage given as long it is not harm other people's feelings and rights. Unfortunatley All this organization which descise their intention hides behind freedom of speach this is wrong. The places that community felt safe not safe anymore.

I'm reaching out to share my support for Agenda Item #7 at the February 17, 2026 Executive Policy Committee meeting and to ask that you pass the Safe Access to Vulnerable Infrastructure By-law.
This proposal is a practical and meaningful way to safeguard important community spaces and reinforce Winnipeg's commitment to safety and respect for all residents. Everyone should be able to enter a school, community centre, or place of worship without feeling unsafe or harassed. I hope you will support this important step forward.

I am writing on behalf of Temple Shalom, Winnipeg's intimate Reform Jewish community, in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

As a congregation that welcomes all — including interfaith families, LGBTQ+ individuals, Jews by choice, and anyone seeking community — the safety and accessibility of our sacred spaces is foundational to our mission. Our members, including families with young children and older adults, deserve to enter our doors free from intimidation or threat.

This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. We urge you to support this important measure.

I support the proposed bylaws to protect schools, community centers and other institutions from harassment.
I attended the Folklorama Israeli pavilion last summer and had to endure horrible attacks from a mob stationed between the parking lot and the entrance of the Asper Jewish community center. Most protesters were fully masked, and interrumped the passage of people wishing to visit the pavilion. It was most inappropriate and I wondered why police did not ask them to move away. They had horrible signs, insulting insinuations such as Jewish people being murderers and were playing crying sounds through blasting speakers. This behavior must not be tolerated. Tolerance leads to escalation. Winnipeg residents and visitors should be protected from this hateful behavior.
Thank you

I am writing in support of Agenda Item #7 at the February 17, 2026 Executive Policy Committee meeting urging passage of the Safe Access to Vulnerable Infrastructure By-law. This by-law is necessary to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city . This by-law is not intended to limit free space or freedom of assembly. It is intended to draw a line that says no one has the right to intimidate or threaten others in public who are trying to enter a community centre, school, or place of worship. This is about safe access and drawing a line between lawful protest and unlawful harassment.
I urge you to support this important measure.

I would like to encourage the Executive Committee to pass the:
Safe Access to Vulnerable Infrastructure By-Law
It was intimidating for me to see a group of protesters shouting threats while I was entering the Rady Jewish Centre on my peaceful way to my work-out at the gym within the building.
I want to feel safe in our communities.

I am writing to express my profound concern regarding the aggressive protests targeting my children's school campus. During recent events, my children were subjected to shouting, intimidating signage, and recordings of gunfire and crying infants. These tactics are not peaceful protests; they are deliberate acts of psychological intimidation aimed at children. The presence of protesters and the resulting police response blocked our parking lot, making the safe dismissal of students to their families nearly impossible. No child should be exposed to such visceral displays of hatred. Our students, staff, and families have an absolute right to physical and emotional safety.
We call upon our local leaders to take immediate action to protect our school zone from these intimidation tactics. Education cannot happen in an environment of fear. We demand the protection of our children’s right to a safe, peaceful education.

At the core of good government is the principle “Save harmless those who are most vulnerable”. Based on the events of the last few years, particularly sine October7, 2023 one could only deduce that the Jewish community is “most vulnerable”. As such, good government would require the passage of the proposed By-Law, “Safe Access to Vulnerable Infrastructure”.

In April, a political protest related to overseas events took place directly in front of children's daycare facilities during pickup hours. While the right to peaceful protest is an important part of a democratic society, the location and timing of this demonstration raised concerns for many families.
Daycare centers serve very young children who may not understand the context of political demonstrations. Being exposed to loud, emotionally charged gatherings during their daily routine can cause confusion, fear, or a sense of insecurity. Childcare environments should remain safe, calm, and focused solely on the wellbeing of children.
Children are among the most vulnerable members of our community and should not feel caught in the middle of complex political issues. Moving forward, I respectfully encourage consideration of protest locations and times that do not directly impact daycare centers or other spaces dedicated to young children.

The right of individuals to express their views and protest peacefully needs to be balanced with the right of individuals to go to their place of worship, or cultural community centre, or school without fear of harassment. Given the increase in hateful language and activities around faith-based and cultural-related buildings, this proposed bylaw needs to be adopted.
I am proud of the multicultural nature of our City, and the sense of community and mutual support we share. Sadly, we cannot take this for granted.

I have personally been affected by protesters at an entrance area at a community centre. There were numerous megaphones that they were using to hurl hateful and threatening slogans and some were even using threatening gestures. I saw that many children and adults were forced to run a gauntlet to get by the protestors. I have witnessed other protests that provoked fear in children and adults. Winnipegers should not be fearful to attend events in our city. Peaceful protests are reasonable but not when hateful and aggressive behaviours are inducing fear into our community. This is not the Winnipeg we want to advance. Please show leadership in this situation.

Here is a more direct and grounded version, keeping the focus clear and policy-oriented:

I am writing in strong support of Agenda Item 7 at the February 17, 2026 Executive Policy Committee meeting and urge you to pass the Safe Access to Vulnerable Infrastructure By law.

For me, this issue is personal. Every time I go to my synagogue, I carry a real concern that something could happen. I feel the same way about the Rady Centre. I have not been there in several years because of those concerns. I also made the difficult decision to withdraw my daughter from school there because I felt anxious each time I dropped her off. I have avoided attending the Folklorama pavilion at the Rady Centre for similar reasons.

No one should feel unsafe entering a place of worship, a school, or a community centre. Parents should not have to weigh safety concerns before sending their children to school or attending cultural events.

This by law is about safe access. It draws a clear line between lawful protest and conduct that creates fear or intimidation at the entrances of spaces where children, seniors, and families gather. It does not prevent protest. It ensures that protest does not interfere with people's ability to enter essential community institutions safely.

I urge you to support this measure and encourage your colleagues to do the same. Thank you for your attention to this important matter.

Community Centres and places of worship are not the place to hold public protests of any kind against people attending services or events there. The public has a right to feel safe and free from intimidation or violence directed at them in these locations. My wife and I experienced aggressive behaviour and insults being hurled at us and other people leaving an event at the Rady Jewish Community Centre in 2024. The group protesting was no more than a few metres away from the front entrance. We were being singled out because we were Jewish, not because we had done anything to provoke the outrageous accusations and vitriol that were being agressively shouted. Imagine such a protest outside a church, a mosque, a private or public school, or a daycare. Would that be acceptable? There are other more appropriate places to stage such protests in our city. Please pass this measure to prevent further abuses and ensure our children and family members are free to worship and attend cultural events without fear of threats and intimidation.

I strongly support the proposed By-Law.
I have two young grandchildren in Gray Academy. The School requires full-time guard within the school because of the threatening and potentially violent behaviour of those who periodically demonstrate near the school. Similar security is needed near our places of worship. It is very upsetting that this is required to protect our kids and us from those in our community who have no hesitation when it comes to expressing hate and threats. They must not be allowed around this types of facilities. Please convey this to the Executive Policy Committee.

I fully support freedom of speech, peaceful protest, and the democratic right to express dissent—these are fundamental to a healthy society. However, protesting directly outside vulnerable infrastructure such as schools and religious institutions crosses an important line. When demonstrations are intentionally positioned at places where families gather and children are present, the effect is not dialogue but intimidation. These settings are meant to be safe, neutral spaces, and using them as pressure points undermines public safety and social cohesion. I therefore support the City of Winnipeg's proposed policy on safe access to vulnerable infrastructure. At the same time, it is important to distinguish between intimidation-based protests and legitimate expressions of collective voice, such as First Nations marches and demonstrations rooted in history, rights recognition, and peaceful assembly. These are fundamentally different in purpose and impact, and both freedom of expression and community safety can—and must—be upheld together.

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.

Walking out of Folklorama at the Rady JCC, people shouted vile jew-hating remarks at me and my children, accusing my 6 and 10 year old of being babykillers. The fact that anyone could endorse this activity shows that we have gone beyond the pale as a society accepting this behaviour.

This is sadly a necessary action to take as nobody should be intimidated or threatened as they enter a community centre, school or place of worship. There needs to be a line drawn between lawful protest , and verbal and physical harassment of individuals trying to enter a door of a community centre, school, or place of worship. Please support this important measure, to keep Winnipeg safe for all to enter any of the above types of places. Going to folklorama last year at Shalom Square was a horrible experience due to people shouting disgusting remarks and threats to children and seniors alike. Something like this must never happen again.

Peaceful demonstrations and gatherings, I support. Public violence (verbal and physical), hatred, aggression and intimidation, which will just get worse if left unchecked, I am opposed to. The message should be made clear that those behaviours are no acceptable and will not be tolerated in our community.

Places of worship, schools and cultural centres should be off limits as targets for political demonstrations. For example at last summer's Folklorama the Israel Shalom Square pavilion at the Rady Jewish Community Centre was the site of a noisy, disruptive demonstration whose purpose was to intimidate the volunteers and guests.

The protests against this bylaw seem to revolve around freedom of speech and the right to protest. This by-law does neither. What it does is protect our citizens. I witnessed and was the object of hatred and lies spewed and screamed at me. In the front of my son's school. In front of a Folklorama Pavilion that ironically supports beautiful diverse cultures. "Rapist" , "whore", "baby killer", "pedofile", " we are going to come after you and your son and your family" , "you will end up like this person" (pointing to a sign of a deceased Jewish person). This is not a peaceful protest. It is acts of aggression and threats. At the very least, it should not be where people gather to worship and celebrate.

I am writing to formally express my strong support for the proposed Safe Access to Vulnerable Infrastructure By-law. This legislation is a critical and necessary step to ensure the safety and freedom of Winnipeg's Jewish community.

In August, I made the difficult decision not to attend a Folklorama event because I have small children. I was concerned for their safety and did not want them hurt or exposed to the hateful and dangerous mob that was intimidating attendees. That concern remains with me; I now feel compelled to check every time I go to an event to ensure there is no mob present.

These mobs are targeting us because we refuse to renounce our connection to our indigenous land and culture. Such intimidation is the opposite of democracy—it is an attempt to rule by fear.

Furthermore, it is deeply troubling that Jewish synagogues and community centers currently require armed guards to function. No community should have to live under such threat. If these types of attacks were directed at any other indigenous group, they would be universally rejected.

Passing this by-law is the minimum the City can do to protect its residents and allow for the continuation of Jewish life in Winnipeg. We as Canadians should learn from the mistakes of dark times in our history and not repeat them. The protection of minorities and a safe, civil democratic process are the foundation of any democracy. I urge you to vote in favour of this protection.

To those I hope this will concern:

Prior to the city council's vote on the 'Bubble' By-law, I would like to voice my full and strong support of it, and ask that you do likewise.

I am a 71 year old 'Winnipeger' who grew up in this city, and whose parents and grandparents contributed to the city of Winnipeg's history, to the province of Manitoba and to Canada. As a citizen of Winnipeg and a member of the Jewish community here, I contest the assertion that placing limited restrictions on the proximity of loud, offensive disturbing and often hate-filled demonstrations to Vulnerable Infrastructure' will diminish the legitimate freedoms and rights of the broad general public to well intentioned protest.

It is evident to me that opponents of the 'Safe Access to Vulnerable Infrastructure' by-law have a political agenda, or that they themselves have not experienced the need for it, unable to relate or empathise with what it means to be part of a minority that, while only 1% of Canada's total population, faces 70% of faith related hate crimes.

If any of you have children or grandchildren, try to imagine the trauma of picking them up or dropping them off at their school, daycare, cultural events or swimming lessons, having to explain to them about the scary people outside calling them (their parents and grandparents) 'baby killers' and other harassing, bullying, disrespectful and disturbing names.

Please - vote yes for this important By-law; the 'Safe Access to Vulnerable Infrastructure' and move this city back in the direction of sanity and safety for all of it's citizenry and in particular, vulnerable minorities.

Dear Executive Policy Committee,

I am writing to you today as a resident of Winnipeg to express my firm support for the proposed Safe Access to Vulnerable Infrastructure By-law.

Over the past five years, our city has seen a marked increase in the intensity and frequency of demonstrations. While the right to peaceful assembly is a cornerstone of our democracy, what we have increasingly witnessed in Winnipeg are not merely "protests," but targeted actions designed to intimidate, violate, and spread hate.

It is deeply concerning that Winnipeggers currently face harassment when attempting to access essential spaces—whether they are taking their children to school or daycare, attending a place of worship, or seeking healthcare. When demonstrations transition from expressing an opinion to creating a climate of fear, they cease to be protected discourse and become a threat to public safety.

I believe the proposed 100-metre buffer zones and the fines for intimidation are necessary tools to ensure that:

Vulnerable Citizens are Protected: No one should have to run a gauntlet of hate or fear for their safety to access community infrastructure.

Hate is Not Given a Pass: We must acknowledge that hate is flourishing in these high-intensity demonstrations, and clear legal boundaries are required to curb its impact on our

community.

Public Spaces Remain Accessible: Our libraries, schools, and cultural centres must remain welcoming environments for all residents, regardless of their background or identity.

I urge the Executive Policy Committee and City Council to pass this by-law without delay. We need a clear signal from our city leadership that while we value free speech, we will not tolerate the use of intimidation as a political tool or the violation of our neighbours' right to move safely through our city.

Thank you for your time and for your work in keeping Winnipeggers safe.

I fully support the right to protest peacefully. The protests we have seen though in the last few years have included intimidation, hatred, and disrespect. Given this, protests should not occur in front of institutions means to keep people safe.

As a lifetime resident of Winnipeg, I want to express my strong support for the proposed Safe Access to Vulnerable Infrastructure By-law. I am a mother and grandmother now in my early 70s and live in Councillor Duncan's ward.

Winnipeg has changed dramatically, and sadly, not in a good way. Over the past number of years, "protests" and "demonstrations" have moved well past peaceful assembly into loud, ugly hatefests designed to intimidate, harass and create fear. Notably, these actions, which have been escalating, have taken place outside locations such as a synagogue and at the Jewish Community Campus that hosts many events and is the home of many Jewish institutions, including a Jewish day school and daycare. I have personally witnessed more than one supposed "protest" where the "protesters" were loudly spewing vile hatred and creating an ugly intimidating situation.

These actions have caused fear and safety concerns for children, seniors, families and community members who were just trying to live normal lives at places of worship, learning or community.

This should be deeply concerning for all Winnipeggers and must be addressed swiftly and decisively.

I believe the proposed 100-metre buffer zones and the fines for intimidation are necessary tools to ensure that:

- Vulnerable citizens are protected: No one should have to run a gauntlet of hate or to fear for their safety in order to access schools, daycare, places of worship, or community infrastructure.

- Hate is not given a pass: We must all acknowledge the hate on clear display in these high-intensity demonstrations. Clear legal boundaries are required to curb its impact on our community.

- Public spaces remain accessible: Our libraries, schools, daycares and cultural centres must remain welcoming environments for all residents, regardless of their background or identity.

I urge the Executive Policy Committee and City Council to pass this by-law without delay. We need a clear signal from our city leadership that while we value free speech, we will not tolerate the use of intimidation and harassment or the violation of the right of Winnipeg residents to move safely through our city.

Thank you for your time and your work.

I look forward to seeing this important bylaw being passed, implemented and enforced to keep Winnipeggers safe.

In August 2025, at The Israel pavilion, Shalom Square I was personally affected by the protesters as I attempted to walk from the parking lot to the pavilion. It was completely inappropriate for protesters to create such a hostile and negative atmosphere at a time when our city works so hard to celebrate different cultures. Such a shame that the protesters felt a need to be aggressive and loud and angry when families with young children as well as seniors came to have an evening out to celebrate music and dance. It was a deeply disturbing experience!!

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure. It is scary for small children and seniors to be threatened and harassed when coming to school, daycare or to attend programs at the community centre . This is about protecting Canadians and Manitoba residents . We want to feel safe in our communities and not feel intimidated, threatened and endangered by loud speakers yelling and threats of violence . This does not diminish their right to free speech. It only allows for safe access entry and exit to our school and community by our most vulnerable members .

Thank you ,

This by-law is important for many reasons - it provides safety in not only accessing vulnerable infrastructure, but it also provides safety for vulnerable humans who are acting within their right to access healthcare, schooling, or right to worship in their religious institution. It allows for an increase in anonymity for those who might be accessing healthcare for personal reasons, without fear of shame.
Those opposed are going to say it is infringing on their rights to protest. This is not the case - it is limiting the distance to the venue of said protest. Institutions such as schools or hospitals are not locations that can create change on the ground as a result of protest. This is about safe access, and about drawing a clear line between lawful protest and harassment at the doors of spaces where children, seniors, and families gather. The people who require these services should not feel intimidated/shame/fear while accessing these locations, such as schools, healthcare. Everyone should feel safe in our city!

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.
This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.
Personally, I've had frightening experiences for my children, walking with them to Synagogue. Besides for having our small children watch and walk by screams and chants, already more than not pleasant, a protestor using a bullhorn announced about myself and my 3 year old (no one else was with us) 'there goes the genocide supporters'. It goes without saying that I've never met that protestor before, and they don't know me from anywhere. At the very least, events where things like that are possible should not take place where children must go.

Everyone deserves to live their lives without having their access disrupted to religious buildings, child care centres, schools and universities. For over two years, protesters have been blocking traffic and building entrances, and shouting angry rhetoric to intimidate, harass, and threaten people going about their daily lives - including young children! People don't feel safe and there are no repercussions for the protestors. Keeping 100 metres away from key places does not interfere with people's right to protest, but it will make those who are targeted feel safer.

Last August (2025), when I attended the Israeli Pavilion at Folklorama with my daughter, we experienced a deeply upsetting incident. As we walked from the parking lot toward the pavilion, several people standing along the street shouted offensive slurs at us — "sharmuta" (an Arabic insult meaning "slut") and "bat zona" (a similar derogatory term in Hebrew).
Although police officers were present, they did not intervene because the harassment was verbal rather than physical. Nonetheless, this was extremely distressing for me and my daughter. It was painful to hear such hateful language, especially in a place as welcoming and diverse as Manitoba.
I respectfully ask that steps be taken to prevent incidents like this in the future and to ensure that all visitors feel safe and protected from harassment at Folklorama and similar community events.

Congregation Etz Chayim is an Egalitarian Conservative Synagogue in Winnipeg and as the COO of our beloved organization, I am strongly in support of the recommendations. On behalf of our organization, members, congregants, and the Winnipeg Jewish Community, I cannot begin to express in words alone the importance of this unquestionably necessary step in properly protecting religious freedoms and safe access to vulnerable infrastructure here at home and across Canada while also addressing the rise in division, intolerance, and hatred across our county. No one should fear attending religious services, seeking pastoral support, coming to a meeting regarding funeral planning, or taking part in cultural/community events in our most basic fundamental institutions because of a fear for safety, and it is a sad reflection of the state of our city, province, and country that these are the issues that we so desperately need to address at this time. Please do not let this opportunity for better tomorrows pass us all by as the physical, mental, and emotional health of so many people here in Winnipeg depend on your further assurances and ongoing support when it comes to the safety of everyone who feels threatened or in any danger while approaching and accessing the spaces referenced in the proposed by-law. Thank you.

The concerns expressed that this bylaw would curtail the right to public protest are misguided. The bylaw imposes reasonable limits on that right so that protests not interfere with other persons freedom of association. In any event if the terms of the bylaw exceed the authority of the city to impose them a remedy can be sought in court.

The law regarding protests should distinguish between getting a point of view out before the public, and, acting with the intent to harass and intimidate. I'm today supporting the Safe Access bylaw as written because it's the only one on the table, but what I really wish to see is political will to enforce a protocol where officers detain and charge persons that have gone well beyond making themselves seen and heard. Lawmakers should consider a $50 fine for a first offense, and for a second offense, both a $200 fine and - importantly - having their names and face (full legal name with aliases, full unencumbered headshot) posted to a scrollable and searchable public record; the offender's entry would be withdrawn perhaps one year after the most recent offense. Please give this your serious attention.

I'am writing in strong support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.
This by-law is a critical and urgent measure to safeguard our essential community institutions and uphold Winnipeg as a city that is safe, inclusive, and welcoming to all. No individual should ever be forced to face intimidation, harassment, or threats simply to access a community centre, attend school, or enter a place of worship. I strongly urge you to stand behind and support this vital and necessary action.
I found the conduct of these so-called protestors deeply disturbing and fundamentally inconsistent with the Canadian principles of safety, respect, and security for all citizens. Their actions—particularly the targeting of children—cross a serious line and amount to harassment. Such behaviour is unacceptable and undermines the sense of protection and dignity that every child and family deserves.
I sincerely hope the committee will take decisive action to protect our vibrant, multicultural city from intimidation and harassment carried out under the guise of so-called “free speech.” Freedom of expression must never be used as a shield to justify conduct that threatens the safety, dignity, and well-being of our communities.

This is critical to protect those vulnerable who attend community spaces, cultural events, places of worship. I have not attended any of these events in over 2 years because I am fearful to be targeted with a group of Jewish people. I have only attend 1-2 events where heavy police patrol was present. I have avoided my synagogue and the Asper Campus for all events including the Jewish high holy days. I never missed any events prior to Oct 2023.

No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.
Having been present at an anti-Israel rally last year outside the Rady JCC I noticed that protesters did not obey police and stay on their side of the street. Various protesters pushed closer to the other side of the street shouting anti-Semitic words. Police did not do anything to calm the situation nor to arrest or ticket those who violated the rule to stay on the sidewalk across the street by the parking lot. The police could not contain the protesters on their side of the street nor would they do anything when asked. I was worried that there would be violence between protesters and others trying to enter and leave the Rady Centre. It was a scary situation. A similar situation occurred when trying to enter the Israel Pavillion for Folklorama.
Parents trying to pick up their children from Day Care and School at the Rady JCC had to decide whether or not to wait until the protest was over or to walk through the protesters to their cars with young children. Our young children should not be subjected to this.
My grandchildren attend Brock-Corydon School. The doors are locked during the day to avoid anyone entering with malicious intentions. This does not occur at other public schools on a regular basis. One night, at about 10 pm. I noticed a police car guarding the school on Corydon Ave. after a particular flare-up of emotions about events in Israel. Although I was happy to see that the city was protecting the school, a calmer city would permit limited police funds to be used in other needed places.
Finally, I was disgusted and dismayed to see the ugly tagging of swastikas on the Shaarey

Zedek Synagogue. The Jewish community deserves to enter and leave their community institutions in safety and security. Please ensure a safe protection zone around these community institutions before a real tragedy occurs.

As a member of Jewish Organizations, we are vulnerabble to teh hatred and intimidation that has flourished in Canada since the Slaughter of 1200 Civilians on October 7, 2023.

I Winessed a pro-Palestinian march wich took place north-bound on Main Street toward Portage Avenue Chanting:
"From the River (Jordan) to the Sea (Mediterranean),Palestine will be Free (of Jews)' meaning all of Israel and "Kill the Jews" while police accompanied this protest. No arrests were made due for hatred and incitement of violence.

I am writing to provide my personal experience in support of the Safe Access to Vulnerable Infrastructure By-Law. I understand that the By-Law has been shelved for numerous reasons, however, I urge Council to revisit this issue as soon as possible with a redrafted policy to address these concerns.
I am a member of the Jewish community and I am a mother of 2 small children. I am a lawyer and I live in the Tuxedo neighbourhood close to the Rady Centre.
I have direct experience with the people who choose to spend their time targeting and harassing Jews (I will refer to these people as "Demonstrators" notwithstanding their conduct is not peaceful protest), and who have targeted the Rady Centre for a multitude of reasons over the years.
I have come face to face with these Demonstrators on numerous occasions (daily, during Folklorama in 2024 and 2025; and again last year when a speaker from Israel spoke at the centre).
Two examples of my many experiences, as follows:
1. Folklorama 2024, Israel Pavilion. Protestors remained present all week. I pick up my children every day and have to contend with Police parked outside and the messaging I deliver to my children in why police are present that week (I choose "they are keeping us safe" rather than
"these people hate you because you are Jewish"- they get to learn that lesson when they are older).

Our family attended the Israeli Pavilion for the early show on Friday. When we left, I observed Ramsay Zeid (the Demonstrator who plans and executes many of these "demonstrations") chatting and laughing with City Police. Music/Rap was being blasted on speakers including Antisemitic and provocative lyrics. The sidewalks were blocked by no fewer than 20 adults holding posters and waving Palestinian flags.

In walking to the parking lot, I held tightly to the hand of my (then) 4-year-old son. As we passed, I was accused by a screaming woman of "committing genocide" (here I thought I was just walking to my car in Winnipeg, having not murdered anyone that day). I kept telling my friendly, kind son to look at me and not to listen to the screaming.
The woman continued to attack me, telling me that I should "google the Nakba" (as if that would somehow justify her presence on a street outside my children's daycare/school and I would somehow then agree that she was a reasonable person with a full and enriched life and that harassing Canadian 4 year olds who want to dance to Hava Nagila is completely acceptable).
Police made no efforts to intervene, clear the sidewalk, or otherwise make any effort to shield my kid from the bigoted, racist attacks.
2. Last Spring there was a speaker scheduled to commence around 6 or 7 pm. Demonstrators began to appear early (ie- during school hours). I received an email from the school recommending children be picked up early for their safety.

I attended to the school, and had to pass more than 6 police to pick up my children from school/daycare (respectively).

The news coverage of this protest was shocking in its' normalization of rabid, masked, Antisemitic demonstrators amassing outside an elementary school, because (heaven forbid) an Israeli Jew was scheduled to speak 4 hours later.
For further context and information of Council, when police are called to the Rady Centre and a presence is maintained, urgent emails are sent to parents to avoid widespread panic. I am not alone in living in a state of heightened anxiety that it is only a matter of time until an attack occurs where are children are targeted or harmed by someone who hates them for being Jewish.
The actions of these Demonstrators has actively normalized antisemitism. They are efficient, organised and frequently weaponize information and police inaction to target my community, specifically.
There are no circumstances when assembly outside a Jewish children's school/daycare (without invitation) for the purpose of "a protest" is acceptable. None. If this were a private school for any other religion or ethnic group, there would be zero tolerance.
As a Canadian, born and raised in Winnipeg, who has been taught and believes Western values, three years ago I would have never believed that attending my Winnipeg community centre would take me back in time to Germany in 1933.
Repeated protests/biased news coverage/and lack of enforcement functions to shift the Overton Window (Political Theory that refers to the range of policy a public will accept. Viewpoints outside the Window are considered fringe/extreme and not acceptable to the general public) to include these forms of bigotry as acceptable and mainstream.
I ask that you deeply reflect upon and question the motivation of those opposing this By-Law. Why does a group feels so passionate and entitled to attend a children's school or synagogue to harass people going about their business? Why do these Demonstrators feel as though blasting through speakers Antisemitic trope, filled with profanity and invective, aimed at a kids' school in Winnipeg helps anyone in Gaza? Why do they feel the need to

submit 200 submissions to Council about their rights to "protest" in this manner? Why is there such a fear in enforcing existing laws, and having the Winnipeg Police simply tell them to cut it out?
While this By-Law has been placed on the shelf, I ask that Council redraft and reconsider to ensure that the Winnipeg Jewish community is not further marginalized by malignant Antisemitism dressed up as peaceful protest.
Please feel free to reach out should you require more information.

It was an unexplainable awful feeling at Folklorama when we are meant to explore and welcome all Winnipegers cultural diversity. And only at the Israeli pavilion people shouting at my children that they were genocidal murders and wished they were killed. They were cursed at and were made to feel ashamed of who they are, which are just Canadians born and raised here. Whilst there were no protestors at the Russian pavilion or any other pavilion, my community is continually targeted. It's despicable. My children are also used to having police protect their schools, bomb threats, protestors at our peaceful community events, hate speech, and avoiding conflict with aggressive protectors while leaving their school. This does not exist outside the Jewish community and it's absolutely unacceptable, even though it feels like our city, province and country is in acceptance with it.

Dear Council Members,

I strongly support a bylaw that prohibits organized protests within a buffer of community-centre entrances, religious facilities, and school properties.

Why this matters

Public safety: Demonstrations directly outside these sites increase the risk of intimidation, harassment, and violence. A clear distance gives police a concrete standard for timely intervention.

Uninterrupted access: Parents, students, seniors, and families rely on these spaces daily. Blocking entrances or creating a hostile atmosphere effectively denies them essential services.
Community cohesion: Winnipeg's diverse population thrives when everyone feels safe to attend worship, classes, and community programs. Buffer zones help preserve that inclusive atmosphere.

Legal footing: Canadian jurisprudence permits zones that protect vulnerable locations, provided they are reasonable and uniformly applied.

Adopting this bylaw will safeguard safety, ensure equal access to vital community resources, and reinforce the multicultural spirit of our beautiful city. I urge the council to enact the legislation promptly.

Respectfully,

Reed Cohen

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.

I observed incidents that developed during Folklorama, where families, children, and elders were subject of hate expresión and violence that were unacceptable. This has to stop.

This proposal protects families and communities. No parent should have to shield their children while returning to their vehicle from a community event or even a regular day at daycare. The security layer here is needed to properly protect vulnerable communities.

This is about safe access, and about drawing a clear line between lawful protest and harassment at the doors of spaces where children, seniors, and families gather.

People should be able to attend schools and religious organizations without being protested outside.

I volunteered for the Folklorama Shalom Square Pavilion at the Rady Jewish Community Centre (123 Doncaster in Winnipeg) for the past 3 years. It was disturbing and intimidating to walk past the street between the parking lot and the community centre. There were protestors carrying Palestinian flags, placards and signs, yelling to passersby calling them baby killers and even saying that 'Hamas is coming to get you.' Some were taking pictures and even video. There were songs accusing those walking by of supporting genocide. This was not a political event but a Folklorama event to promote multi-culturalism at various pavilions throughout our city. Allowing such protests in my opinion deters promotion of the city and tourism in Winnipeg. It was an attack on not only the Jewish community but on all who attended or volunteered at Folklorama, many of whom are tourists from outside our city, province or country. It seems we need to fo better than that to make Winnipeg a welcoming place to learn about every culture, including that of Israel and Jewish people.
I applaud your efforts to make our city a place where people attending events in community centres, schools and religious institutions feel safe in attending without a crowd of angry protestors confronting, insulting and even threatening harm via a recognized terrorist organization.

Let's leave the Middle East in the middle east and stay safe here. Kids and children institutions should not be bothered politically because of their religion, or under any circumstances. Free speech is important, but harassing children and families is crossing a line

‘Subject: Strong Support for the Safe Access to Vulnerable Infrastructure By-law

Dear Members of Executive Policy Committee,

Please note: I am not attending in person due to personal safety concerns.

As such, I am writing as a resident of Winnipeg to express my support for the proposed *Safe Access to Vulnerable Infrastructure By-law*, which would establish 100-metre buffer zones around key community sites—including schools, hospitals, health-care facilities, places of worship, libraries, community centres, cultural centres, cemeteries, and neighbourhood rehabilitation homes—to protect against nuisance demonstrations and intimidation.

In recent years, we have seen increasing instances where protests and demonstrations have crossed into harassment, obstruction, and intimidation of people simply trying to access essential services or participate in community life. The Jewish community has been a specific target of this harassment and intimidation causing significant fear. Families dropping children at school, patients attending medical appointments, worshippers entering places of faith, and vulnerable individuals seeking support in rehabilitation or community spaces including but not limited to the Folklorama Israel Pavilion - should never face fear, verbal abuse, blocking of entrances, or targeted attacks based on protected characteristics.

This by-law strikes a reasonable and necessary balance:

- It respects the Charter rights to freedom of expression and assembly—protesters remain free to demonstrate elsewhere, voice their views through other channels, or hold events outside the designated zones.
- It focuses narrowly on prohibiting harmful conduct (such as intimidation, obstruction, or nuisance protests tied to race, religion, gender identity, or other specified characteristics) in sensitive locations where people are most vulnerable.

Manitoba already has provincial buffer zones in place for abortion services (under the Safe Access to Abortion Services Act, effective February 2025), proving that such measures can protect access to health care without unduly restricting speech. Extending similar protections to schools, hospitals, places of worship, and other community hubs is a logical and compassionate next step to keep our city safe and inclusive for everyone.

As a Winnipegger, I value both free expression and the right to access public spaces without fear. This bylaw protects the latter without meaningfully impairing the former. I urge Council to approve the by-law promptly when it comes forward.

Thank you for considering this important measure to foster safer, more welcoming communities across our city.

Sincerely,
Ruth Laveman
Winnipeg, Manitoba

Unless you have experienced the malice and feelings of being unsafe and maligned by a group such as the various anti-Israel & anti-semitic hate groups when we try to enter our synagogues and community centres, you cannot understand our need for this to pass. They are hypocritical, as is evidenced by their lack of demonstrating for the folks under attack in Iran and in various countries in Africa, not to mention Ukraine. Their demonstrating is only when Jews are the target.

It is illogical for people to demonstrate against a foreign power that has no bearing on where they live. If it is considered ok to demonstrate against the government of another country, do it at the appropriate embassy/consulate where decisions might actually be made.

As a member of the Jewish Community, I fully support this by-law, as I have felt personally vulnerable when attending events at our Community Centre and our Synagogue. I have also experienced intimidation and threatening behavior from people outside of the Jewish community. Never before have I felt this fear. As such, I am fully in support of Item #7 as a step to protect essential community institutions.

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

As life long Winnipegers my family, including my young grandchildren, were afraid to enter Folklorama's Israeli Pavilion this summer because of the aggressive hate filled speech coming from protesters at the entrance. My grand children attend Gray academy and the fact that they need security and police cars in the parking lot to ensure their safety, is outrageous in our city and country. Only Jewish schools and synagogues have always had and do require armed security in Winnipeg. I fear for their safety daily. How is this allowed to go on in our beautiful city and all around our country? It's starting to feel like pre-war Nazi Germany.

This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.

Thank you for your support.

As a lifelong Winnipegger and active member of the Winnipeg Community, I am deeply concerned by the protest activities I have seen over the last few years in Winnipeg and throughout Canada. While I certainly understand and respect the right for people to assemble and protest (I have practiced law in the City for over 30 years and certainly understand the right to peacefully protest), this does not include the right to intimidate and harass others nor does it include the right to encourage and promote violence. Unfortunately, I have personally witnessed hateful rallies near Synagogues and outside the Rady Jewish Community Centre where the sole intention is to scare and intimidate members of the Jewish Community. While I respect the right for people to peacefully protest, this is clearly not what is transpiring. In fact, I have personally spoken to a number of police officers who have witnessed the same but have told me that there is nothing they can do as they are being instructed not to interfere even when the intimidation tactics are inciting violence. At a bare minimum, we need to establish and enforce buffer zones around community centres, schools, places of worship and other vulnerable places so that Winnipeggers can feel more safe. I do not see how establishing buffer zones does anything to stop or impede people's right to assemble and peacefully protest. Any argument to the contrary must be viewed very critically - why else would you reasonably object to a buffer zone?

Please do the right thing and and pass this by-law. The City needs to show support for all communities being targeted . Enforcing a buffer zone is a good first step.

Thank you for your consideration.

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.

It's easy for people who feel empowered to protest violently or aggressively wherever they wish, under the gaslit guise of free speech, to stand against this bylaw. This bylaw is meant to protect minorities who are in need of protection. Voting against this motion is a pretty clear statement by council - which presumably is meant to protect the citizens of Winnipeg - that it's more important that minorities be sworn at and harassed than it is to impose reasonable limits on free speech. Council should decide that it's better to move forward to protect minorities from hate, and then address any reasonable limitations that the legal system may impose, rather than negotiating with itself to not bring the bylaw forward out of fear of the crowd. The minorities also (literally) fear the crowd, which is why council needs to do its job and establish laws to protect minorities.

I don’t feel safe or comfortable with my children being exposed to demonstrations near their school. Holding protests in front of a school — especially when they have the potential to become violent — does more harm than good. Schools should be a safe and stable environment for children, not a setting for conflict or unrest.

As a parent of three young children, having to walk by protesters holding hateful signs and calling my children ‘baby killers’ on the way to attending synagogue, or dropping them off at school is intensely uncomfortable, and against Canadian values, and the values of this city as a multicultural and tolerant community. Later I have had to have many conversations to answer my children’s about ‘why’ those people were there, ‘why they were yelling at us’ in the course of a non political and routine act of going to school or practicing our religion in peace. Protests belong in front of government buildings - not in front of schools and places and worship. Protests should not be acts of intimidation and hate against a group of people.

As a long time supporter of community events, I was horrified at Folklaram in 2025 by the awful, disrespectful and frightening protestors outside the Israel pavilion. It was so scary having to walk past protestors harassing & screaming for the death of Israeli's and Zionists and watching NOTHING being done to protect people out for an enjoyable night.

Please act today and help keep ALL people of Winnipeg and Manitoba safe.

I am writing in support of Agenda Item #7 at the February 17, 2026, Executive Policy Committee meeting, urging passage of the Safe Access to Vulnerable Infrastructure By-law.

This by-law is a necessary step to protect essential community institutions and to ensure that Winnipeg remains a safe and welcoming city for all. No one should have to pass through intimidation or threats to enter a community centre, school, or place of worship. I urge you to support this important measure.

In the last couple of years I felt unsafe when attended community events, cultural events in a vicinity to elementary school. The city of Winnipeg is big enough to allow people including the ones who likes to behave not in a Canadian manner, to "protest" and spread their hate in 99% of its area. It shouldn't be tolerated in community centres, Kindergartens or schools surroundings.
Thank you.

I understand that the above recommendation will be withdrawn, but I would urge City Council to ensure that it is never renewed. The by-law is far too restrictive and would endanger people's right to peaceful protest, which is guaranteed in the Charter of Rights and Freedoms.

To the Executive Policy Committee,

When I was thirteen I remember walking several blocks in the heart of downtown for a Climate Action protest. There were easily over 1 000 people marching and chanting in unity, exercising their freedom of speech and right to protest. I then realized that if the Safe Access to Vulnerable Infrastructure By-law were to pass, that a protest like that would not be possible.

This proposed By-law is nothing but vague in its definitions and outline. It could easily be used by someone for their own agenda for what they deem a “violent” or “disruptive” protest to be. Of course, there is still time to tweak and define what “Safe Access to Vulnerable Infrastructure” really means to the council. I will agree that some places listed would benefit from this By-law, but again, with how vague this current draft is, it incites more questions than reassurance. For example:

• What protests would be considered “disruptive”?
• Why include hospitals when the Safe Action to Abortion Services Act exists?
• Since we already have laws around/against noise levels, violence, hate speech, barricades, etc. why create something that narrows the rules around protests on public property, if such acts have not already occurred?

To provide a further example, how would this By-law affect something like our annual pride festival, an organized protest that has been happening since 1987 in Winnipeg, with over 20 000 people flocking downtown every single year for it. It supports Winnipeg’s nightlife, and businesses in the area, but there are people that would consider it “disruptive” either because it gets busy downtown during that time, or because they are “intimidated” by

prides goal for equality.

When I analyzed where these buffer zones would take place, it was interesting to see that places like City Hall and much of its surrounding area (being in between Red River Collage and the Manitoba Museum) would not be accessible whatsoever in a protest. Across the street from City Hall, in front of the renowned Pantages Playhouse Theatre, sits a streetcar structure dedicated to the 1919 Winnipeg General strike that advocated for working class citizens and immigrants. That streetcar represents what is Canadas largest protest, and a significant portion of Winnipeg's history. Ironically, this streetcar sits within 100 meters of what this By-law deems "vulnerable" because of protests.

To deny space for people's voices to be heard is actively denying our freedom of speech, and our right to protest. So, I highly urge the council and committee to think about the effects that this By-law will have on its residents, and its insult to deep rooted Winnipeg history that continues to present itself on these very streets this By-law wishes to "protect".

Thank you.

Dear Executive Policy Committee,

I'm writing to you today to express my concern and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. As some of the counsellors have already expressed, I am also in opposition of the proposed by law. This would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, Black, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Tessa McDonald

Signed,
Abigail Deibert

I am opposed to the Safe Access to Vulnerable Infrastructure By-Law.

Why protests?

Protests are an essential tool for members of the public in a free and democratic society to raise awareness about specific issues, hold leaders accountable, and shift public opinion. They have been the driving force behind some of the most powerful social movements throughout history, exposing injustice and abuse, delivering us the rights and liberties we enjoy today, and inspiring people to keep hoping for a better future. Protests are effective when they are *visible* and in locations *where they are relevant to the issue at hand*.

THE PROPOSED BY-LAW IS CONCERNING BECAUSE:

Infringes Charter Rights
The by-law put forward here places an unjustifiable limit on the rights of citizens to freedom of expression, peaceful assembly and association that are enshrined in our Charter of Rights and Freedoms. This concern is shared by the Canadian Civil Liberties Association (CCLA), which also cited that such laws often harm marginalized groups who rely on protest to advocate for social change.

According to a map found at, https://chromatin.ca/blog/nuisances/
much of the city would be subject to the geographic restrictions of this by-law – 78.3km2 of Winnipeg or **16.9%** would be restricted.

Reverse Onus
Enacting the by-law will leave the City open to legal challenges, the costs of defending which will be borne by the taxpayers. If unsuccessful in defending a challenge, the City may also run the risk of costs being awarded against it – a further burden for taxpayers to absorb. Further, why should a citizen bear the burden of time and legal costs to challenge a fine to realize their already-enshrined constitutional rights?

Government Overreach
The by-law includes places of worship. Religious institutions should not be shielded by the state. Canada's history of abuses by religious institutions against Indigenous people, often supported by the Canadian government and the current resurgence of residential school denialism are clear examples of why people need to be able to protest religious and political institutions.

Subjective Interpretation
Councillor Evan Duncan (Charleswood-Tuxedo-Westwood) who initiated work on this by-law has said publicly (Winnipeg Free Press, Feb 13, 2026) that "if a protest is not intimidating anyone, it would not fall under the bylaw. How is fear or intimidation measured? In the past I have heard of instances of individuals reporting being afraid or intimidated by the mere presence of individuals standing peacefully holding signs. This becomes a dangerously subjective test.

He also calls into question the motivation of protesters suggesting an intent to target someone's race, religion, etc., clearly not appreciating the very real conflation of criticism of Israel with anti-semetism.

Racist Application
I am also deeply concerned that this by-law may be racist in its application, if not in its intention.

In a recent *Winnipeg Free Press* article referencing the city staff report that recommended council approve the by-law, it was noted that "while the report doesn't name specific events or groups, the by-law was proposed amid frequent demonstrations related to the Israel-Hamas war", and includes a photo from a 2024 protest of Israel's genocide in Gaza. The article goes on further to state public discussion around bubble or buffer zones escalated after a protest outside the Asper Jewish Community Campus in Tuxedo in April, 2025, when it hosted an event organized by the Jewish Federation of Winnipeg featuring two Israel Defence soldiers speaking about their actions in Gaza. Also noted was that The Jewish Federation of Winnipeg and Ottawa-based Centre for Israel and Jewish Affairs (CIJA) advocated for the proposed by-law.

I think most reasonable people would find that hosting soldiers from a state currently facing charges of genocide in the International Criminal Court is controversial and may invite some form of protest. Organizers could have chosen other space to host that event but selected a community centre that includes a school and day care, and under the proposed new by-law, they would be able to do so without concern of a protest taking place.

A September 2025 report by the Jewish Faculty Network entitled "The CIJA Report: A Pattern of Anti-Palestinian Racism and Genocide Denial at the Centre for Israel and Jewish Affairs" https://www.jewishfaculty.ca/cija-report lays bare CIJA's alignment with Israeli propaganda, false assertions and construction of a narrative in support of Israel's genocide through specific data coding and analysis.

Given this report and the advocacy in support of this by-law by both the Jewish Federation and CIJA, the fear of legitimate criticism being shut down and a marginalized community's voice silenced is very, very real.

On a similar vein, while not fully withdrawn, the Liberal government has put Bill C-9, the Combatting Hate Act (also highly promoted by CIJA) on hold following intense opposition by 23 civil society, faith-based and legal groups concerned about misuse and the restriction of Charter-protected free expression. The proposed Bill imposed severe consequences for protest activities, language and visual displays.

All this to say, both of these measures pose serious implications for freedom of expression, peaceful assembly and association enshrined in our Charter of Rights. I am grateful that the Government of Canada has seen fit to pause and reconsider before taking any further steps. Police already have the tools to address any harmful behaviours at protests. The proposed by-law most certainly is an overstep and given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge this committee to remember its legal obligations to uphold the Charter and protect our democracy.

Sincerely,
Andrea Janz

Safe Access to Vulnerable Infrastructure Bylaw

Greetings Mayor Gillingham and Council members,

On behalf of Green Action Centre, I am writing in regards to the safe access to vulnerable infrastructure bylaw. We oppose this motion as we support the right for the citizens of Winnipeg to engage in peaceful protest, and the proposed 100 metre buffer zones would outlaw this right across many areas within the city. This right is enshrined in The Canadian Charter of Rights and Freedoms. It also protects the right to demonstrate on public streets (Garbeau v. Montréal, 2015 QCCS 5246). The proposed buffer zones surrounding certain infrastructure would impede this. For example, a demonstration that took place in November for a child hit by a car at the intersections of Brandon and Osbourne would not have been able to take place due to its proximity to a place of worship.

Protests are an essential outlet for the public to have their voices heard. We urge the council not to approve this motion.

Ariel Desrochers
Lead Sustainable Transportation Coordinator
Green Action Centre

Dear Executive Policy Committee,

I am writing today to express my strong opposition to the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law.

While I, too, am deeply concerned for the safety and well-being of the people of this beloved city, limiting the ability of residents to peacefully protest risks further silencing and harming the voices of our most marginalized community members rather than protecting them. The right to protest is fundamental to holding those in power accountable, particularly for those with limited resources and influence.

For example, the rallies demanding a search of the landfill for the remains of Morgan Harris, Mercedes Myran, and Mashkode Bizhiki'ikwe were instrumental in compelling the government to finally act and confronting the multiple layers of systemic racism that had long been ignored. I think you would agree that any temporary disruptions that may have occurred were a small cost to pay in the broader pursuit of justice and an end to racial violence. Without the right to gather and raise our collective voices, that critical progress may never have occurred. I can think of countless other similar examples.

This proposed by-law poses a direct threat to our Charter rights, particularly our freedoms of peaceful assembly and expression. At a time when we are witnessing rising authoritarianism and an alarming disregard for fundamental human rights, as we're seeing take place in the United States, we must remain vigilant in protecting our own democratic institutions. Curtailing the right to peaceful protest undermines one of the very foundations of our democracy.

I love this city, and I know you do too. I urge you to reconsider this by-law and to uphold the constitutional rights that protect civic engagement, accountability, and justice in our city.

Sincerely,

Asha Nelson

Dear Members of City Council,

I am writing to express my concern regarding the proposed Safe Access to Vulnerable Infrastructure bylaw.

While I understand and respect the goal of protecting families and individuals from harassment or intimidation near schools, hospitals, community centres, and places of worship, the bylaw as currently written is far too broad in scope. Its language appears expansive enough that it could apply to nearly any form of protest on a significant amount of public property throughout Winnipeg.

If you examine a map of downtown Winnipeg and identify all buildings that would fall under this bylaw, then measure a 100-metre radius around each of them, it becomes clear how extensive these buffer zones would be. In practice, this could effectively eliminate the ability to hold protests in much of downtown Winnipeg, including near the Manitoba Legislature and on or around the University of Winnipeg campus. These are traditionally recognized spaces for civic engagement and peaceful demonstration.

The right to peaceful protest is a foundational element of a democratic society and is protected under the Charter of Rights and Freedoms. Any bylaw that significantly restricts where citizens can assemble and express themselves must be narrowly tailored and clearly defined to avoid overreach.

I am also concerned that expanding enforcement powers without clear safeguards and accountability mechanisms could lead to unintended consequences and further erode public trust. It is essential that any new regulation strike a careful balance between public safety and constitutional freedoms.

I urge Council to reconsider the breadth of this bylaw and ensure that it does not unintentionally suppress lawful, peaceful protest across large portions of our city.

Thank you for your time and consideration.

Dear Executive Policy Committee,

I'm writing to you today to express my concern at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.

This type of curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw, and reconsider the intended purpose behind the bylaw while recognizing the negative consequences and detrimental effects it could have.

Signed,
Aubry Bosc
Winnipeg Resident - Fort Rouge/East Fort Garry

Dear Executive Policy Committee Members,

I'm writing to you today to express my concern at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit fundamental freedoms of Winnipeggers that many of us, including myself, have used to advocate for social and policy changes in our City, some even that we currently enjoy today as a community. I have participated in vigils, rallies, round dances, and many other public demonstrations that have been directed towards protecting the rights for Indigenous, racialized, 2SLGBTQ+, and disabled people, as well as protections for the environment, workers rights, road safety, among others. Protests are an integral part of a free and democratic society. Protests are one of the many reasons I can celebrate my identity as a queer, disabled person today.

As a student of a university, this bylaw would severely inhibit demonstrations on campus grounds. Our campus community has gathered numerous times to oppose anti-trans rhetoric, Residential School denialism and racism, and other demonstrations. These protests are essential for our community and to show opposition to our University administration's decisions, especially when they are not aligned with their own policies and values. This by-law is pernicious.

If passed, I worry this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Brie Villeneuve

Dear Executive Policy Committee,

Signed,
Camren Von Riesen

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the **Safe Access to Vulnerable Infrastructure By-Law** that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Carlee Friesen

Submission to EPC re: Safe Access to Vulnerable Infrastructure By-law

I want to register my strong disagreement with the proposed bylaw, and further, to express my alarm and concern about the decision by members of Council to push for this bylaw.

In my view, this proposed bylaw has serious and unworkable problems that prevent it from deserving consideration. It grossly overreaches the role of the City, it appears to violate the principles in our Charter of Rights and Freedoms, and it appears to have been written so expansively that, if adopted, would be nearly impossible for Winnipeg residents to comply with in good faith without a shocking curtailment of our civil liberties.

Many other people have and will speak out against this bylaw, and I can only add my perspective as someone who has organised and participated in protests and demonstrations in this city, and as someone with a working familiarity with the *Manitoba Human Rights Code*.

100m boundary & designated facilities

The bylaw as proposed is so widely defined that huge swaths of the city would fall within the 100m boundaries around the 'designated facilities'. Not only is this an onerous restriction on freedom of expression in the city, it's difficult to comply with in good faith.

As an example: I live on Broadway between Osborne and Sherbrook; my stretch of Broadway is very often used for pedestrians and vehicles leaving the Manitoba Legislative grounds going westward. It is very common for groups of people leaving a demonstration at the Legislative grounds to keep the energy going from that demonstration - carrying signs on the sidewalk, displaying materials on their vehicles, etc. There are also numerous 'designated facilities' well within 100m of Broadway: clinics and other healthcare facilities, community centres, cultural centres, churches and other religious buildings, and so on, meaning that much (but crucially, not all) of Broadway is in a prohibited zone. Are demonstrators supposed to conceal their signs and move off the sidewalk and/or road as they travel through these forbidden zones? How is that remotely feasible to implement? The demonstration they were at may have had a permit, but that won't likely cover anyone leaving the demonstration as they travel home. This scenario would occur on Broadway due to its proximity to the Legislative grounds, but will be true at many, many other locations throughout the city.

Another unworkable example is the definition of designated facilities. Some are wildly broad, such as health care facilities. The definition of 'health services' used is so broad that I would argue it captures places such as pharmacies, mental health counsellors and therapists, dentists, and possibly even stores that sell medical supplies - do we really need to be restricting the right of residents to demonstrate outside Shoppers Drug Mart or Safeway? Do protest organizers need to confirm there are no therapists seeing clients, or dentist offices within 100m? Is every strip mall a potential 'No Charter Rights' zone?

Definition of 'nuisance demonstration'

The definition of a nuisance demonstration also overreaches. The definition of nuisance includes any 'objection or disapproval towards an idea, action, person or group based on or related to any specified characteristics', with a list of characteristics that are clearly based off s.9(2) of the Human Rights Code (although with some notable differences, namely the removal of age and political affiliation, likely because those would make this bylaw even more absurd).

Prohibiting actions objecting to 'ideas' or 'actions' of people is rife for misuse - as we've seen during the brutal assault on Gaza in recent years, and the many demonstrations that took place both in opposition to

and support for the actions of the Israeli government, it's very easy for bad faith actors to conflate 'disapproval of an idea' with a national origin or ethnic identity. For example, myself and many other critics of Israel - including Jewish friends - unfairly accused of anti-Semitism for criticising the actions of the Israeli government.

Prohibiting protests without permits from "obstructing passage" of cars or pedestrians is also suspect and likely unworkable. It sets up a situation where any congregation of people on a sidewalk, or collection of vehicles, could potentially run afoul of this rule if someone alleges they are doing so as part of a protest or demonstration. The prohibition on amplified audio is also prone to abuse, where the mere existence of a loudspeaker effectively requires police approval. Considering the financial penalties involved, the ambiguity of the bylaw text, and the high cost of submitting an appeal, the bylaw seems to be tailor made to incentivize vindictive allegations and complaints. Does the City really want to be handling constant allegations that someone waved a Palestinian or Israeli flag from their car within half a block of a library or cemetery?

Effect of Bylaw

The provisions within the bylaw are clearly ridiculous; the only workable outcome to reasonably avoid fines is for EVERY protest in Winnipeg to have a permit at all times. This is not what the protest permit system is designed for, and it is a gross overreach by the City to effectively create a system to force all forms of public protest within the permit system. There is a time and place for protest permits, but there must be alternate avenues for protest outside of that or we risk creating a system where the city and the police have an effective veto over political speech. This is unacceptable for a free and democratic society.

The bylaw, as written, is simply not viable. But attempting to amend it, as I imagine will occur at EPC or Council given the many problems with it and the intense criticism, will not be sufficient. EPC and City Council need to take a strong position against such a gratuitous example of overreach and reject the bylaw altogether. Any future attempt at introducing a bylaw with a similar intent needs to be handled in a much more transparent fashion in consultation with affected groups and civil liberty organizations to ensure we don't create a legal, political, and ethical disaster for the City, as this bylaw certainly would.

Christopher Rigaux
West Broadway resident

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place— acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,

I'm writing to you today to express my concern as a local over the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. This by-law would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed by-law.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations by-law.

Signed,

Erinn

As a labour and human rights advocate, I must stand against this bylaw in its entirety.

Council purports to be enacting it aimed at "nuisance demonstrations" near sensitive sites. In reality it proposes restricting demonstrations via per-person fines of $5,000, most forms of democratic expression in an incredibly broad area of the city.

Councillor Evan Duncan represents the by-law as restricting hateful protests near sensitive sites, but the plain language of the by-law's definition of "nuisance demonstrations" includes not only those which express "objection or disapproval towards an idea, action, person or group based on or related to any specified characteristics" (which itself raises Charter concerns), but also those which merely "obstruct... the passage of pedestrians or motor vehicles" or use "amplifiers or microphones" without an applicable permit. To incur a $5,000 fine per person, there is no requirement that such a demonstration target one of the long list of types of designated facilities, only that it is within 100m of one, at any time of day.

There is a small carve-out for labour action as long as it is otherwise "lawful", but there is no definition of acceptable labour action, and experts we have consulted have raised concerns that the by-law may expose union members to heavy fines for protected activities nonetheless, in the event that job action is judged in some way unlawful.

Additionally, the by-law lists it as a protected characteristic "source of income" which may have chilling effects on demonstrations against employers.

Thank you, I will be watching this vote carefully.

Dear Executive Policy Committee,

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law. I voice my opinion as a Winnipeg resident and lawyer. I am concerned about the proposed by-law's severe *Charter* infringements on people's freedom of expression and right to peaceful assembly. It seems apparent that the by-law does not meet the constitutional criteria required to justify its limitations on *Charter* rights and freedoms.

All people deserve access to support services, healthcare, education, and meaningful gathering spaces. Many of us are concerned that certain communities face greater barriers in accessing such spaces and facilities.

However, the rights to freedom of expression and peaceful assembly are crucial to any democracy. The protection of these rights upholds, rather than diminishes, safety and dignity for targeted communities. Rallies, round dances, and public demonstrations have helped win rights for Indigenous, racialized, and 2SLGBTQIA+ community members, gain safeguards for workers and tenants, and advance important protections for the environment.

The proposed by-law is problematically broad both in its prohibition of protest throughout the city and its allowance of extensive police overreach. The by-law would prohibit protest around almost every major civic institution in Winnipeg and impart a widespread chilling effect. The by-law's language further grants significant discretion to law enforcement when deciding which gatherings constitute a "nuisance." This discretion risks further silencing the very communities the by-law is meant to protect.

Given the alarming increase in the suppression of rights and freedoms in the United States, I urge you to remember your legal obligations to uphold the *Charter* and to protect our democracy. I implore you to reject the Safe Access to Vulnerable Infrastructure By-Law.

Signed,

Jade DeFehr

Feb 12, 2026

To the Executive Policy Committee,

I am writing regarding the proposed bylaw restricting what the City defines as “nuisance demonstrations” near sites designated as vulnerable social infrastructure.

I support protecting people from harassment, intimidation, and violence. No one should face threats of genuine harm while seeking medical care, attending school, or participating in religious life. At the same time, institutions themselves must remain open to public accountability, especially when their actions directly affect those communities. There are circumstances in which proximity to a site is essential to meaningful protest. A bylaw should distinguish clearly between protecting individuals from harm and shielding institutions from accountability.

My concern is not with the intent of protection but with the dangerous mechanism chosen to achieve it.

The proposed bylaw relies on broad terms such as “nuisance” and “intimidation” while simultaneously establishing buffer zones around institutions that are often the focal point of public accountability. Existing laws already address assault, threats, and obstruction with clear language that defines both the violations and the responses permitted. This proposal replaces that clarity with discretionary judgment about what authorities consider unacceptable, and enforcement will largely depend on interpretive decisions by police, an institution already facing public scrutiny and, at times, itself the subject of protest. This creates a foreseeable risk of uneven application even where no bias is intended.

I serve a faith community made up largely of people who regularly experience systemic inequality and exclusion. For many, public presence and protest are not abstract political tools but practical and essential ways of seeking recognition and redress. Rules that limit proximity to institutions therefore affect some communities more than others.

We cannot expect for the broad interpretive latitude to always be handled neutrally. Many of the institutions covered by the bylaw are precisely those historically challenged by public demonstration. Hospitals, schools, government-adjacent sites, and places of worship have all been locations where communities have gathered to confront exclusion, discrimination, or policy decisions affecting them directly. A rule that moves protest away from the site of concern changes the nature of protest itself. It reduces the ability of affected people to be heard by those responsible.

Public protest is necessarily visible, loud, and, at times, disruptive, especially for those being challenged. When discomfort is the point, how is it just that it alone could trigger removal? If a demonstration can be penalized where there is no obstruction, threats, or targeted harassment, enforcement ceases to be accountable to the very laws it claims to enforce. Groups with less political and social power often rely on being physically present at the site of concern to make their situation visible. A rule based on perceived disturbance risks being applied most readily to those groups, disproportionately reducing their voice and impact.

In a city where public space has been central to Indigenous-led action, labour organizing, disability advocacy, and other justice movements, expanding the power to define and penalize “nuisance” protest narrows democratic participation even if unintentionally.

If Council proceeds, I would urge a narrower approach focused specifically on conduct that obstructs access or threatens safety, with clear definitions and safeguards against viewpoint based enforcement. Without that clarity, the bylaw risks addressing hypothetical harms while producing concrete limits on lawful expression.

Respectfully,

Jamie Arpin-Ricci

Subject: Formal Objection – Safe Access to Vulnerable Infrastructure By-law

To: Mayor and Members of Winnipeg City Council
Re: Executive Policy Committee – February 17, 2026
Safe Access to Vulnerable Infrastructure By-law

Mayor and Councillors,

I write to formally oppose the proposed *Safe Access to Vulnerable Infrastructure By-law* on constitutional grounds.

The by-law, as drafted, infringes core freedoms protected under the **Canadian Charter of Rights and Freedoms**, including:

- **Section 2(b): Freedom of expression**
- **Section 2(c): Freedom of peaceful assembly**

A blanket prohibition on protests within 100 metres of broadly defined "Vulnerable Social Infrastructure"

— including schools, places of worship, community centres, and cemeteries — constitutes a sweeping geographic restriction on lawful political expression in public space.

Further, the definition of "nuisance demonstrations" captures expression involving "objection or disapproval" related to protected characteristics.

The Charter does not permit governments to suppress speech because it is controversial, unpopular, or critical.

Under Section 1 of the Charter, the City bears the burden of demonstrating that any rights infringement is minimally impairing and proportionate. This by-law fails that test:

- Existing Criminal Code and provincial provisions already prohibit harassment, intimidation, threats, and obstruction.
- The proposed by-law extends beyond those harms to regulate expressive content.
- The 100-metre buffer applies categorically, without evidence-based justification tied to specific sites.

The Supreme Court of Canada has consistently held that protest near the subject of protest lies at the heart of democratic expression. Restricting proximity dilutes the communicative impact of lawful dissent.

If enacted in its current form, this by-law is vulnerable to constitutional challenge. The overbreadth and content-based elements create significant legal risk and potential financial liability for the City.

Protecting access to services is a legitimate objective. However, it must be achieved through narrowly tailored, content-neutral measures that target actual misconduct — not expression itself.

I urge Council to reject or substantially amend this by-law to ensure compliance with the Charter.

Respectfully,
Jennifer MacRae, concerned citizen
[redacted]

Dear Members of the Executive Policy Committee

I wish to express my concerns regarding the proposed “Safe Access to Vulnerable Infrastructure By-law”.

I have difficulty with what authorities may consider “nuisance demonstrations” and “fear, intimidation, or obstruction” and with how citizens may interpret these terms and then file complaints.

Please indulge me in an extreme example of the problems with the vagueness of the term “nuisance demonstrations”. I live at an intersection along the route of the Manitoba Marathon. At about 7 a.m. on Father’s Day, people gather at that intersection to cheer on the runners. Sunday is one of my days off, and maybe I don’t want to listen to people cheering and using various noisemakers that early outside my bedroom window. As my home, is where I live not “vulnerable infrastructure”? Under this by-law, can I file a complaint and have the people making unwelcome noise removed and fined?

Please allow me to offer another example. In March, 2017, the Canadian Coalition of Concerned Citizens held a rally at Winnipeg’s City Hall to protest the federal government’s motion M-103, which condemned Islamophobia. A coalition called Fascist Free Treaty 1 held a counter-rally. One rally was white supremacist. The other was opposed to white supremacism. Under this proposed by-law, if a similar event happened outside City Hall, would both rallies be “nuisance demonstrations”? Would this by-law then have to dissolve into a kind of “both-sidesism” whereby both groups would be charged and fined?

White supremacists, and other supremacist groups that I could name, have a perfect right to demonstrate and voice their beliefs, just as their opponents have an equal right. However, there is certainly a difference in behaviour between various protest groups and demonstrators that I’m not sure this proposed by-law takes into account. I would urge that the Executive Policy Committee and City Council research and familiarize themselves with the different ways that groups of demonstrators in Winnipeg have behaved in the last few years.

I wish to now discuss the terms “fear, intimidation, or obstruction”.

If, as a hypothetical, a place of worship is part of the same building or site where a political or civil event is occurring, and that political or civil event is the target of a protest, where is the mechanism that allows municipal authorities to understand that the place of worship is *not* the target of the protest, nor is the protest against people’s religious or spiritual practices?

What if this hypothetical political or civil event is occurring *inside* the place of worship? How will municipal authorities understand that any hypothetical protest is not against

the place of worship or its use for worship, but against the particular political or civil event happening inside the place of worship?

Many religious and cultural centres in Winnipeg also house schools and daycares, which are included in the by-law's catchment of "vulnerable infrastructure". If I, as a parent or worshipper, arrive at one of these multi-use religious and cultural facilities to pick up my kids or to worship, and there is a group of protesters across the street, and I claim that I feel fear, intimidation or obstruction, is my feeling these sensations sufficient to bring charges and fines against the protesters? How will the by-law test for claims of fear, intimidation or obstruction?

What if, for example, the annual Pride Parade passes my place of worship, or where I pick up my kids, and I feel fear or intimidation because I don't want queer+ people parading themselves in front of my kids? Under this by-law, can I file a complaint against Pride Winnipeg?

What if I object to Sikhs celebrating Nagar Kirtan in public because I feel fear and intimidation upon seeing thousands of brown people in weird outfits, and I feel obstruction because I have to go past where they are meeting to get groceries? Under this by-law, can I file a complaint against the Sikh Society of Manitoba?

I use these absurd examples to underline how reactionary and archaic this proposed by-law is in a diverse, multicultural and multi-confessional city such as Winnipeg.

Thank you for your time and consideration of my opinions.

Kind regards,

Jeremy Bowkett

Public Hearings Before Committee of Human Rights

of

Winnipeg City Council

Should the IHRA working definition of antisemitism, designed to stimulate discussion, be converted into Policy?

What is the relevance to Manitoba and Canada Today - February 2026?

Respect to all delegates for their presentations;
to Committee Members;
to City Council for providing a democratic forum for citizen participation.

The IRHA - International Holocaust Remembrance Alliance Working Definition of antisemitism has been passed into policy by Federal and Provincial governments and organizations throughout Canada.
On March 27, 2023, the City of Winnipeg, Human Rights Committee held the only public hearings in Manitoba on this working definition conversion to policy, permitting citizens of opposing views to speak.

Five Jewish proponents, two of whom were full-time lobbyists, and a Federation Church representative, had been given time at the Human Rights Committee to ask that this working paper be converted into city of Winnipeg policy. Hearings had to be postponed. Word spread to the public. Thirteen citizens, seven Jewish, six of diverse backgrounds, submitted requests to speak in opposition. The larger numbers required Council Chambers. Deputy Mayor Markus Chambers, assisted by City Clerk Rebecca Ford, ensured a respectful and democratic process (YouTube https://www.youtube.com/watch?v=rtdvczD1J1I).

The conclusion of the hearings pointed to action. Neither the City nor any other body of government has taken up the call to action. This synopsis of the four hours of hearings comes from a belief that four years later, the recommendation is critical and can assist in clarification of a tangle of conflicting identifications, strengthening democratic values.
Synopsis of opposing different identifications p. 3-4;
synopsis of presentations p. 5-15;
glossary of organizational identifications of delegates p. 16-17.
Manitoba situation today p. 18

***1** *Kenneth Stern, o*riginator of the Working Paper on the IHRA, Director of the Bard Center for the Study of Hate and Human Rights project, Author, and Attorney**:** "Passing this document into policy by institutions and governments resulted in the misuse of a document created for academic discussion. The IHRA as a policy serves as a tool aimed at shielding Israel from resistance to its oppressive form of racial governance and, following its recent war on Gaza, from accusations of genocidal violence." *Antisemitism and Zionism: The Internal Operations of the IHRA Definition, 2024* Kenneth Stern identifies as a Progressive Zionist.

Different Identifications

Opponents: While the main definition is general and innocuous, the IRHA's focus on Israel is counterproductive in combating racism. We should be concerned about all discrimination and hate against all citizens. What does discrimination look like to different targeted groups? Working together is more successful to stop targeting of any group.

Proponents: Traditional anti-Semitism is the denial of the rights of Jews to live as equal members of society. The new mutation of anti-Semitism is a denial of the state of Israel as having the right to exist as an equal member of the nations. The IHRA was adopted as policy by the Federal government, the Provincial government, and dozens of organizations. It does not criminalize criticism of Israel or Jews. It stands against hate of all kinds. "From River to the Sea" is a code for the annihilation of the Jewish state.

Opponents: Israeli law states: "Only Jews have the right of self-determination." Palestinians, Indigenous to the land, do not have the same rights as Israelis. Segregation is based on race. Proponents of IRHA as policy state "claiming that the state of Israel is a racist state" is antisemitism. If I am aware of what is being done to Palestinians, and state that, I am considered antisemitic, as are Amnesty International and other human rights organizations. Calls for equality to all inhabitants between the River and the (Mediterranean) Sea is not antisemitic. It is a cry for freedom from military occupation.

Proponents IHRA is an educational tool; Criticisms of Israel are not anti-semitic. Words "context" and "may" are there. If people choose to think things are anti-semitic that is not what it says. It may be used to explore if the person has anti-Semitic intentions. It does the exact opposite of chilling free speech. Comparing the policies of modern-day Israel to the Nazi's is anti- semitic. This idea that it affects free speech is not true. It can be or may be anti-Semitism. It is up to the organization (that adopts it) to determine if it is antisemitism.

Opponents This is out of step with everything I know about racism. A good definition is clear. This IRHA definition states: "a certain perception of Jews that may be expressed as hatred of Jews". Imputing motives may be harmful. I may be nervous with a comparison of Israel to Nazi's but think it's okay to ask the question. The ambiguity of this sets up an impossible situation. IHRA is an open-ended policy for harassment and intimidation, a muzzle on necessary public discourse. For more than 50 years, we who spoke out for Palestinians were targeted, called "Self-hating Jews," "Traitors," and "So-called Jews". Anti-Palestinian racism is well documented.

Proponents You have to be a Jew to understand the pain of antisemitism. It is the most prominent form of religious hatred and bigotry. The greatest atrocity in the history of mankind is what was done to the Jews. If there is a perception of the Jewish community of antisemitism, it is antisemitism. We need court hearings, prosecutorial actions, hate crime statistics, and help in funding.

Opponent As a Palestinian witnessing our relatives and the trauma being committed I worry about my daughters. It would contribute to the ongoing oppression of Palestinian people. In school, my daughters' safety is at risk.

———————————————————————-

Proponents were asked, "How would you address the concern that a person who has criticism of Israel is not stigmatized and vilified? How can they be heard, recognized, and validated? Would you be willing to remove the seven clauses that the opponents find objectionable?"

The answer to these questions was a unanimous,**"No".**

1. Opposed: **1:56 - 13:00 Harold Shuster, Independent Jewish Voices (IJV)**
As a Jew, I object to a policy statement preventing political criticism of another country. This policy silences students and staff of educational institutions. The Jewish community cares about human rights for all citizens — including Palestinians. We cannot protect ourselves from anti-semitism without also condemning racist hatred against all people and religions. Israel is granted exceptional status and is protected from sanctions. IHRA is opposed by 40 human rights organizations, 600 academics, the BC Association of Indian Chiefs, and the United Nations.

2. Opposed: **16:33 Norman Rosenbaum, Civil Rights & Family Lawyer, United Jewish Peoples Order (UJPO)**
Manitoba has a Human Rights Code protecting political dissent. The IHRA definition of antisemitism is vague and contradicts the Charter of Rights and the European Union Charter. It is impossible in its ambiguity. It silences dissent, triggers punitive actions, and sets up the community for conflict and litigation. There is a chilling effect on public discussion in Manitoba.

3. **Proponent: 27 min Richard Marceau, Lawyer and Politician. former Member of Parliament/ Committee for Human Rights, Quebec Canadian Israeli & Jewish Affairs (CIJA) *2**
There is a criminal code defining hate speech and crimes. IHRA was adopted by the Canadian government in 2021. It can guide policy and cannot have criminal charges. It does not criminalize criticism of Israel or Jews. It stands against hate of all kinds.
The stated examples to the IHRA serve as illustrations of what is antisemitic. It is simply not true that the definition has been used to stifle critics.

---

*2 Canadian Israel Jewish Alliance (CIJA) is a registered lobby for the Jewish Federation. Full time staff use: "Strategic, based on research, and analysis" with "wide experience in conducting missions to Israel.

4. Proponent: 39-51 min Gustavo Zentner, President Jewish Federation of Winnipeg

"We are talking of human rights. There is consensus among the Jewish community, the vast majority. We must accept the views of the community that is targeted. If there is a perception of the Jewish community of antisemitism, it is antisemitism. You can't recognize things if you don't know what antisemitism is. These statements define it. These things hurt us and relegate us to second-class citizens. That is why our provincial government recognized us. It does not impede free speech. "

Winnipeg is a city of many cultures. There is consensus among the majority of the Jewish community. We must accept the views of the community that is targeted. If there is a perception of the Jewish community of antisemitism, it is antisemitism. You can't recognize things if you don't know what antisemitism is. These statements define it.

The Jewish community has a respectful and engaged communication with the Arab and Jewish communities. We celebrate and build the most vibrant and multicultural city. We stand up together against Islamaphobia. 349 universities have come together in 34 countries to debate this openly.

---

*2. The assertion that this view represents the majority is challenged by Jewish individuals and Jewish groups. JFW is not an elected body. The Canadian Jewish Congress, a voting body, is now defunct. When Shimon Fogel was appointed Director of the newly formed Canadian Israel Jewish Alliance, a registered lobby group for the Jewish Federation, he asserted, "The distinctions between domestic agenda and Israel have been blurred so much it is impossible to tell one from the other." This left out dissenting voices in the Jewish community who also embraced their Jewish heritage and values of their culture. Dissenting voices of Jews are sometimes referred to as "traitors," "so-called Jews," and "self-hating Jews" by the group who identifies Israel as their birthright. The group who views Israel as their birthright is sometimes referred to as "the Establishment" by those who do not accept Israel's treatment of Palestinian people.

5. **Proponent: 51-1:10: Belle Jarniewski, Jewish Heritage Centre of Western Canada.**
IHRA may be used to explore if the person has anti-semitic intention. It is an educational tool. No one has ever been accused of a crime because of the IHRA definition. It does the exact opposite of chilling free speech. It shows we can criticize Israel. City councils can consider whether things that are said are legitimate if they pass the policy.

Criticisms of Israel are not anti-semitic. Words "context" and "may" are there. If people choose to think things are anti-semitic that is not what it says. You cannot sue anybody over a policy. It is never meant to be turned into legislation. Comparing the policies of modern-day Israel to the Nazi's is anti- semitic. This idea that it affects free speech is simply not true. It can be or may be anti-semitism. ***3**

6. Opposed: 1:16 - 1:30 Dr. Joel Kettner, Professor Medical School University of Manitoba; Former Chief Public Health Officer, Province of Manitoba, Jews for Social Justice, Winnipeg Chapter, United Jewish Peoples Order

My focus is on how to stop racist attitudes in health care systems. This is so out of step with everything I know about racism. A good definition is clear. What people do, what they say, and what is the impact on people. This IRHA definition states: "a certain perception of Jews that may be expressed as hatred of Jews."

Laws exist; definitions exist. Please don't pass this definition. Imputing motives could be more harmful than helpful. Hatred is not a measure. I might be nervous that someone is drawing comparisons of Israel to the Nazis…but I think it is okay to ask the question. Let's do something to avoid racism. Maybe we can strengthen, not create distractions. Go back and get some other people involved to look at "can this be improved for the city of Winnipeg".

---

*3 Policy sets the Direction. Law is the enforcement.

7. **Proponent: 1:32-1:42 Adam Levy Public Relations Director for Jewish Federation of Winnipeg. Investigator of complaints of anti-semitism.**

Jews have a long and painful history of discrimination. You have to be a Jew to understand the pain of anti-Semitism. Anti-Semitism is the most prominent form of religious hatred and bigotry.
We need court hearings, prosecutor actions, hate crime statistics, and help in funding to civil society organizations and human rights organizations to counter anti-Semitism. Those are just a few examples of the way the IHRA definition could be used. ***4**

8. **Opposed: 1:42 - 1:52 Wendy Boyd, Canadians for Justice and Peace in the Middle East, Independent Jewish Voices; United Church, Multiple Human Rights Groups**

My personal experience has been a long history of Palestinians as a people facing difficulty. Academics or people anywhere in Canada declaring support for Palestinians also faced difficulty.

It's a horrible, terrible shame. Jews who criticize Israel face prejudice. IHRA sets a double standard. Israel compares to South Africa in its past behavior and policies. The media limit coverage of the Israeli government. I do not hear a voice of Palestinians. I believe people are afraid to state the situation of Palestinians.

9. **Proponent: 1:53 - 1:58 James Christie, Federation of Christian Churches, former Dean U of W faculty of theology, Ridd Institute for theology**

IHRA supports dialogue among religions to promote peace. The IHRA can be a working definition as a diagnostic tool intergovernmentally. IHRA identifies and exposes words and actions that can descend into antisemitism. It can be used as a template for confronting religious bigotry.

***4** Proponent Levy contradicts the statement of Proponent, Delegate 5 Jarniewski "never meant to be turned into legislation". He states conversion to policy would provide this. Policy guides law.

10. Opposed: 2:00-2:12 Dr.Mark Etkin, Psychiatrist, Independent Jewish Voices

I am a Jew since birth. Proponents of the IHRA do not speak for me. Palestinians are kept apart from Israelis and do not have the same rights as Israelis; segregation is based on race. Israel fits the definition of an apartheid state. The IHRA specifically states that "claiming that the state of Israel is a racist state" constitutes antisemitism. By this criterion, Human Rights Watch and Amnesty International are labeled as antisemitic, as are many other civil rights organizations, both inside and outside Israel.

The IHRA is a muzzle on necessary public discourse. Muzzling is its purpose, and the reason it is being pushed through. The IHRA is a travesty of truth and justice.

11. Opposed: 2:12 Diane Zack, Independent Jewish Voices, United Jewish Peoples Order

I opposed antisemitism all my life. It is ludicrous to have to defend my identity because I became aware of the Palestinian people. How could Israel have been built on the destruction of Palestinians' homes?

For more than 50 years, we who spoke out for Palestinians were targeted, called "self-hating Jews" and "traitors." In social circles, defenders of justice and equality on other fronts did not speak up. The mainstream Jewish community had blinders on. Jewish opposition to Israeli policies is growing in North America. An increasing number of Israelis are active in struggles for justice. This IHRA definition states that taking a just stand against Israel's policies is antisemitism. It stands against rights and justice for Palestinians.

12. Opposed. 2: 23 Allen Mills, Retired Professor of political science, University of Winnipeg

My experience proves the IHRA is, in practice, an open-ended policy for harassment and intimidation.

A debate held at the U of W five years ago between Palestinians and a rabbi was hard-hitting toward both sides. One of the proponents of

the IHRA, who is here today, then responded by holding a private meeting, lobbying the head of the U of W to declare the event anti-semitism. The University came out with a declaration that it was anti-semitic. I looked at the video of the event. I approached that proponent and asked if the person would sit down with me and show me what part of the debate (which was on video) was anti-semitic. The proponent would not. I asked the University head and asked the question. They did not reply.

Recently on global news, after the burning and pillaging of Huwara, a Palestinian village, an Israeli newspaper described the Israeli settler attack on the village as a violent pogrom against Palestinians as racist. A bloodied Israeli protester declared, "This is a dictatorship ." The IHRA definition tangles criticism of Israel with antisemitism.

13. Proponent: 2:32 Irwin Cotler, Ontario: former federal Justice Canadian Government.

IHRA is against anti-Semitic stereotypes. The new anti-Semitism is a denial of the state of Israel as having the right to exist as an equal member of the nations. In my experience a Jewish student on campus who considered himself leftist felt he was seen as representing Israel and felt marginalized. The IHRA working definition is intended to be protective of free speech, including harsh criticism of Israeli policy.

14. Opposed 2:50 Jane Karpa, long term citizen of Winnipeg

The charter of rights allows me to respectfully criticize. My partner is a Jew. I oppose antisemitism. I was a believer in the good of Israel. Over time, I learned about Palestinians living under occupation and policies that have turned Israel into an apartheid state.
IHRA manipulates and gaslights us into believing criticism of Israel is antisemitic. Israel can be omnipotent without accountability. I am critical of the treatment of Palestinians living in Israel under occupation.

15. Opposed 2:53 Rubin Kantorovich, United Jewish Peoples Order

The Jewish ethnic community has a diversity of views, as do all ethnic groups and religions. My father was a Holocaust survivor in Poland. His family was sheltered by a Catholic Polish family, who would have been executed had they been discovered.

Hate laws exist. We should be concerned about all racism and hate against all citizens. In 2017, Israel passed a nation-state law: "Only Jews have the right of self-determination". Seven out of ten articles in the IHRA are about defending Israel from criticism. Yet, the Israeli defense minister declared, "The village of Huwara should be wiped out." Just as Hitler called for the extermination of Jews, this Israeli minister called for the extermination of Palestinians. If I condemn this, I am declared anti-Semitic.

IRHA is not in the interests of citizens. It is used to suppress the rights of Palestinians in the occupied territories. At the outset of COVID, Israel announced it would not be distributing vaccines to the Palestinians. MP Leah Gazan, a Jew and Indigenous woman by birth, and MP Charlie Angus criticized this. Bnai Brith smeared these two MP as antisemites. Imagine if the Canadian government announced it would not distribute vaccines to all Indigenous peoples!

UJPO rejects IHRA, the deception of Bnai Brith, and the violation of international laws. We do not need the Israeli lobby to educate us.

16. Opposed 3:03 David Weller, former Special Needs Teacher, Independent Jewish Voices

I advocate for Palestinians and all other people's human rights. Jews and other citizens believe in human rights for all people. We are not a minority of the Jewish community.
IRHA is biased and silences criticism, especially mentioning Israel. Antisemitism is discrimination, prejudice, hostility, and violence against Jews, as stated in the Jerusalem Declaration.
Supporting equality for all inhabitants between the river and the Mediterranean Sea is not antisemitic. This calls for the self-

determination of Palestinians, whether in two states, a democratic state, or any other form. It is not, as Mr. Cotler said, a God-given right for the state of Israel to exist as only a Jewish state. ***5**

Since the University of Michigan adopted the IRHA as policy this past month, a booth was closed down because it contained literature critical of Israel. The representatives of CIJA said, "Not my problem." If you adopt it, it becomes your problem to decide, not theirs.

17. Opposed 3:11 Susan White, International development for 40 years, Anti-racist educator, Lecturer of Religious Studies at University of Winnipeg, Independent Jewish Voices, CUSO International

I have been an international anti-racist activist for 40 years, including 15 years in South Africa during their liberation movement. I've worked with African and Caribbean groups fighting for independence from colonialism. I was imprisoned for being a delegate to Grenada after the US invasion. My partner is from the Black community and has been an activist for 40 years. This shows my deep understanding of racism, including anti-semitism. Racist rhetoric and actions target many people. Working together is more successful than as separate interest groups**.**

While the main definition is general and innocuous, the IRHA's focus on Israel, exemplified by 70% of its examples, is counterproductive in combating racism against all groups experiencing attacks. Anti-Palestinian racism is well documented. You might be wondering, "If I do not pass this proposal, will I be considered anti-semitic. It is hard to have the courage. Please do not adopt this as policy."

---

*5. Observer, Indigenous filmmaker Darryl Nepanik, noted a quiet incident during Delegate #16 Weller. One of the four male proponents seated behind Delegate #2 Rosenbaum, said to another, "That so-called Jew!" Mr. Rosenbaum turned, quietly stated, "That person is just as much a Jew as you are." One responded quietly, "I didn't say that."

18. Proponent: 3:22 Shimon Fogel, CEO of Canadian Israel Jewish Affairs

Anti-Semitism is on the rise exponentially. The IHRA definition has been adopted by many governments, the Province of Manitoba, and the Federal Canadian government. Assaults on the Jewish state are unending. "From River to the Sea" is a code for the annihilation of the Jewish state.

The IHRA definition has been adopted by dozens of nation-states, including the Province of Manitoba and the Federal Canadian government. No one gets to define anti-semitism other than the Jewish population themselves.

Hate will not be legislated away. Education is the answer. Do the right thing and adopt the policy of the IHRA.

19. Opposed: 3:27 Bassam Hozaima, Canadian Palestinian Association of Manitoba,

I was born in a refugee camp in Gaza. I am very troubled and urge the committee to defeat this motion.

My grandparents were driven out of their homes in 1948 and forced into the Gaza Strip. We lived in inhumane conditions in the open-air prison of Gaza. Over the years, assaults have continued…this is only a glimpse into my story. The oppression, injustice, and trauma are my story. Atrocities are committed on a daily basis.

IRHA would defeat the idea of safety and inclusion. I would feel threatened, marginalized, and criminalized if this were to be passed, not included. I hope and pray the Committee will not pass it.

This definition would be used in the services in Winnipeg, police services would be policing Palestinians. I graduated from University of Manitoba.

I wish I could tell my story without criticism of Israel. IHRA is soft peddled as an educational mechanism. It is a wolf in sheep's clothing.

City of Winnipeg is already leading the way to combat hate. IHRA can not be separated from the examples of protection of Israel from criticism.

As a Palestinian witnessing our relatives and the trauma being committed to them, I worry about my daughters. In school, their safety is at risk. Under this definition, many Canadians would be labelled anti-semites. It would contribute to the ongoing oppression of Palestinian people.

20. 3:38 Opposed Judith Morrow, BSW, MSW, RSW, former Inner City Community Worker, School Clinician, Filmmaker, United Jewish Peoples Order, Canadians for Justice and Peace in the Middle East (CJPME), Amnesty International

I am a Goy, a not nice word for a non-Jewish person. Racist comments about Palestinians are common. Some who stand for human rights in other areas but continue to describe in terms "Us" against "them": Israel is a "beacon of light surrounded by darkness", or refer to Palestinians as 'Terrorists'.

I travelled to Israel more than 50 years ago, stayed in the "New City" of Jerusalem with an Israeli family. I explored the "Old City," met a Palestinian Christian. A folkloric dancer who created a folkloric dance group of Israelis and Palestinians. He and his Muslim friends guided me through sacred spaces and beautiful architecture. His family, eight people in one large room, slept on benches at night, their living space in the day quiet and beautiful. His uncle lived in a room the size of a large closet. I didn't understand the problem. He walked outside of Jaffa Gate. Four Israeli youth walked by, said something insulting to me. He walked over and spoke to them. They knocked him to the sidewalk, with a swelling black eye. In Canada, now a grandfather, he and his Lebanese wife founded a church to help refugees. Fifty years later, they still encounter harsh suppression of their human rights in Ontario. Incidents such as: wiretapping of their phone, witnessing a youth waving a Palestinian flag on a highway in front of their church being immediately surrounded by police cars persist.

We're only learning the history of Canadian Indigenous peoples. Outside these doors, the effects are visible. People die on our streets. You, the human rights committee, understand racism. You feel its demeaning impacts. Culture focused only on our own view of the world leads to racist, bad things, ethnocentric thinking. "Us" vs "Them".

Ethno-culturalism is crucial to Winnipeg. You, as community leaders, are crucial. I believe in you and your ability to succeed. Soon, I hope to see Indigenous people represented here.

Question from the Chair to Proponents:

"How would you address the concern that a person who has criticism of Israel is not stigmatized and vilified? How can they be heard, recognized, and validated? Would you be willing to remove the seven clauses that the opponents find objectionable?"

Response to the questions, **"No."**

3: 54 Deputy Mayor Markus Chambers

I was highly influenced by Swiss (Catholic priest and poet), Hans Kung: *"No peace among the nations without peace among religions, no peace among religions without dialogue between religions, and no dialogue between religions without investigation of the foundations of religions."*

More discussion needs to happen between all parties. I move that we accept the motion as information with the instruction that this committee is to work with all the groups that have attended here today for more meaningful work to continue. To strengthen its policies around racism, which includes antisemitism, Islamophobia, xenophobia, hate, Indigenous racism, anti-black racism, as well as any racism against the LGBTQ two-spirited community.

Accepting the motion as information will allow work to continue working in collaboration, with all the groups that have attended here today, for more meaningful work to continue. To a greater understanding and education of what this definition represents, and how it can be useful in all or in part in addressing the rising of antisemitism, so we can continue working in collaboration, with all the groups that have attended here today, for more meaningful work.

Glossary: Identifications of Delegates from Jewish Organizations and Others Website tour May, 2025

Opponent Independent Jewish Voices (IJV), condemns antisemitism and racism in all forms, condemns the ongoing genocide of Palestinian people and advocates for justice and peace for Israelis and Palestinians. Published handbook on the detrimental impact of the IHRA (International Holocaust Remembrance Alliance conversion to Policy) on both Jewish and Palestinian communities.

Opponent United Jewish Peoples Order (UJPO), entering its 100th year, identifies with Jewish history and culture and organizes for the protection of human rights and social justice for all. It opposes racism, oppression, and Israel's military occupation. It supports Palestinians to achieve justice.

Opponent Jews for Social Justice, a network of 63 organizations pursuing social justice from a Jewish perspective.

Opponent Canadian Palestinian Association of Manitoba ensures that Palestinian stories, voices, memories, and truths are acknowledged within the broader human rights narrative. It serves as an advocate for Palestinians in Manitoba, promoting intellectual freedom and cultural events of the Palestinian people. All are welcome to attend.

Organizations named by Opponent Delegates as informing their view: Amnesty International, United Church, Canadian University Services Overseas, Canadians for Justice and Peace in the Middle East

Proponent Winnipeg Jewish Federation supports Israel 'in every way we know' and 'all things Jewish'. Partners include the American Jewish Joint Distribution Committee and Birthright Israel Canada. Founded in 1929, the Jewish Federation of Winnipeg played a key role in the establishment of Israel. As part of its charity work, JFW funds programs that give free first-time trips to Israel to Jews and influencers. All political

parties have had members take advantage of these free trips. JFW donates to selected others and has charitable tax status.

Proponent Canadian Israel Jewish Affairs (CIJA), a registered lobby for the Jewish Federation. Full-time staff use "strategic, advocacy-based research, polling, and analysis" with "wide experience in conducting missions to Israel for Canadian influencers and decision-makers." The Quebec branch focuses on fighting antisemitism, strengthening Canada-Israel ties, and lobbying groups like Quebec's National Assembly, promoting education (e.g. IHRA adoption), and fostering business/ academic links.

Proponent Western Canadian Jewish Heritage Centre houses a research library preserving, documenting, and interpreting Jewish history; including the 'mutated' version defined by Delegate #13 Cotler, teaches groups and schools about antisemitism. Initially supported by volunteers and donors from the United Jewish People's Order (UJPO), there is no room in the schedule for speakers who show empathy to Palestinians, so identities diverge.

Proponent Federation of Christian Churches: Believes in the deity of Jesus Christ; his miraculous conception by the Holy Spirit; his sinless life; his ascension to the right hand of the Father; and his personal imminent return.

Proponent Bnai Brith Referred to by Delegate #15 Kantorovich, supports Jewish nationalism and patrols social media and mobilizes actions to protect against anything critical of Israel and supportive of Palestinians. Identifies the land of Israel as the birthright of all Jews. Does not recognize the Palestinians as a people so believes they have no the right of return.

Honest Reporting active in Manitoba, is an Israeli media advocacy group monitoring anti-Israeli news, such as support for Palestinian people or their culture. Manitoba chapter assists the above organizations by also searching online accounts to detect expressions of empathy for Palestinians or postings critical of Israel. They post news and visit individuals and heads of organizations seen as guilty of anti-Israel postings.

Current relevance in Manitoba and Canada

The Fragile Line Between Protecting Communities and Criminalizing Dissent

Prosecutorial independence is one of the quiet pillars of Canada's constitutional democracy. When prosecutors are influenced—directly or indirectly—by political actors or advocacy groups, public trust in the justice system begins to erode. Manitoba's recent announcement of partnership with the Centre for Israel and Jewish Affairs (CIJA) to train the provincial Prosecutions Branch on hate crimes puts that principle at risk. It opens the door to political advocacy, shaping decisions about who is charged and for what.

At the center of this concern is the IHRA Working Definition of Antisemitism. Created which was envisioned as a tool to promote discussion by open ended questions. References to Israel were added, and, this has been adopted by governments and institutions as if it were a legal standard. Several of its examples link criticism of Israel to antisemitism, depending on "context." Civil liberties groups, academic associations, and many Jewish organizations have warned that this ambiguity can be used to mix political dissent with hate.

CIJA is a registered political advocacy organization with clear positions on Israel-Palestine and strong support for the IHRA definition. When such an organization helps shape prosecutorial training, the line between advocacy and state power blurs. Even if prosecutors remain impartial, the appearance of influence alone undermines confidence in the justice system.

This risk becomes sharper when viewed alongside international developments. The International Criminal Court has issued arrest warrants for leaders of both Hamas and the Israeli government. Canada has pledged support for the ICC's processes, regardless of the outcomes. Yet under an expansive reading of the IHRA definition, public discussion of these same legal findings could be framed as antisemitic. A democracy cannot champion international justice abroad while chilling debate about it at home.

Proposed expansions of "bubble zone" legislation add another layer of concern. While intended to protect community institutions from harassment, these laws can unintentionally restrict peaceful political protest—especially when political events are hosted in community centers. When an event celebrates military action in Gaza, complete with promotional imagery of armed soldiers, citizens must be free to protest without fear of criminal sanction. The location of a political event should not determine whether dissent is legal.

Meanwhile, Manitobans who expressed empathy for Palestinians—sometimes through nothing more than a social media post—have faced online vilification, professional consequences, vandalism, and threats. When government policy begins to mirror the social pressure to silence certain viewpoints, democratic debate suffers.

Winnipeg's Human Rights Committee recommended broader dialogue on discrimination affecting many communities. That conversation never occurred. Instead, Manitoba moved toward a narrower, more punitive approach to speech—one that risks deepening division rather than fostering safety.

Democratic backsliding rarely arrives all at once. It comes through incremental shifts: vague definitions, expanded enforcement powers, and partnerships that place advocacy groups close to prosecutorial authority. It comes when governments decide that protecting the public requires restricting the public's voice. It comes when dissent becomes suspect.

Manitoba faces urgent challenges—homelessness, inequality, and the unfinished work of truth and reconciliation. Meeting them requires a democratic culture capable of disagreement, empathy, and open debate. It requires institutions trusted to act impartially. And it requires vigilance whenever the state's power to prosecute intersects with political advocacy.

Protecting communities from hate is essential. But it must never come at the cost of criminalizing political expression. The line between the two is thin, and it is ours to defend.

Dear Executive Policy Committee,

I am writing today to share my dismay about the proposed Safe Access to Vulnerable Infrastructure By-Law. This By-Law would restrict Charter-protected rights to freedom of expression and peaceful assembly and is in my opinion an unnecessary addition to the laws already in place to protect "vulnerable infrastructure" by the province and the federal government. I am strongly in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

While I support ensuring safety and access to public services, this by-law significantly overreaches and threatens rights guaranteed under the *Canadian Charter of Rights and Freedoms*, including the fundamental freedom of peaceful assembly (s.2(c)) and freedom of expression (s.2(b)). These freedoms cannot be restricted without clear, necessary, and proportionate justification—standards this by-law does not meet.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

I often lead group cycling rides as a volunteer with Bike Winnipeg. As currently drafted, this by-law could have a significant impact on these rides. The draft by-law states that "nuisance demonstrations include, but are not limited to: harassing or intimidating another person(s), **obstructing the passage of pedestrians or motor vehicles thereby rendering passage impassable or difficult**, **using amplifiers or microphones**, or the use of offensive and/or hateful statements". When we ride as a group, could law enforcement officers consider our slow riding speed or intersection corking as rendering difficult passage of motor vehicles? Could our use of megaphones when providing our pre-ride safety briefing be considered a "nuisance demonstration"? A by-law that leaves this to the interpretation of enforcement officers is incredibly concerning to me.

According to the Canadian Civil Liberties Association, the right to protest is not simply permitted in a democracy – it is essential. Peaceful protest is a primary way in which residents can express dissent, hold governments accountable, and influence public policy. Broad 100-metre exclusion zones around an extensive list of facilities – including schools, community centres, and places of worship – would effectively prohibit legitimate, peaceful demonstrations across large portions of the city. Additionally, laws like this by-law often harm marginalized groups who rely on protest to advocate for social change.

The City's own administrative report confirms this by-law would create wide "no-protest zones" around nearly every major civic institution in Winnipeg. Such sweeping restrictions go well beyond addressing harassment or obstruction (which existing laws already cover) and instead create generalized bans that would chill democratic participation.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to reconsider the unintended consequences of this by-law and determine whether there are better mechanisms to address the problems they're trying to solve. Please do not pass the Safe Access to Vulnerable Infrastructure By-Law today.

Signed,
Julia Schroeder

13 February 2026

[redacted]
Winnipeg, R3L0H6

Dear EPC Members:

I am writing to express my strong disagreement with the proposed "Nuisance Protest" legislation you are considering today.

I write as a social historian who has devoted my academic career to studying legitimate protest and the state's suppression of dissent in Canadian history.

In my extensive research, I have yet to see significant evidence of protest that is mere nuisance. On the contrary, public expressions of dissent are almost invariably earnest, collective acts of people engaged in responsible acts as concerned citizens and other residents attempting to address a wrong that they seek to help right.

An active citizenry is essential to a functioning democracy. A robust democracy requires more from its citizens than a periodic participation in elections. It requires us to be active in maintaining that democratic polity, not just by writing letters to an elected official, but by acting collectively and as individuals to uphold fragile rights.

The right to free political speech is clearly one such fragile right. Moreover, it has not been won easily. Canada's laws did not protect political or other public speech until well into the twentieth century. People and groups with dissenting views, who organized to call for labour rights, women's rights, and the rights of other marginalized groups, or to express dissenting political views engaged in free speech struggles over many decades. Many of them faced persecution and even incarceration for expressing their views. It took the horrifying example of the Second World War and the rise of fascism to persuade our governments to enact legislation to protect free speech.

The right to free speech deserves to remain protected. It is a cornerstone of democracy.

The City of Winnipeg's proposed legislation represents an enormous backward step in our progress as a democratic polity. If enacted, this law would supress legitimate free speech, in which its participants engage as a civic duty, on vague and poorly defined grounds of public safety and fear of intimidation.

I speak from academic evidence and extensive experience on this matter. There is nothing unsafe about peaceful demonstrations. Unsafe behaviour is already addressed by existing criminal legislation. Indeed, I suspect this is a frivolous claim. I have participated in peaceful demonstrations for many decades, and rarely have I seen more than a few instances of people yelling (usually back and forth with opponents) or even

more rarely, physical confrontations. In those cases, the group's own marshals and the police were on hand to separate the bad actors and nothing more ensued.

If the law is actually intended to protect some people from feeling intimidated, this is a nebulous goal. A feeling is not indicative of an actual threat or risk. It seems quite outside the capacity of any law to protect people's feelings, nor should that be the role of legislation. Laws exist to protect people from real, definable, threats. The City should not be attempting to contort the law in an attempt to protect some people's feelings, especially if that protection is won at the cost of others' civil and constitutional rights.

When governments act in ways that undermine the rights we have struggled for over many decades, we undermine the democracy we value so much. I urge you, as elected representatives who act on behalf of all members of the community, to defeat this motion.

Sincerely,

Julie Guard, Professor of History and Labour Studies
University of Manitoba

THE UNIVERSITY OF WINNIPEG

Department of Urban and Inner-City Studies

February 11th, 2026

To the members of the Executive Policy Committee for the City of Winnipeg,

My name is Dr. Kaitlyn Duthie-Kannikkatt. I teach in the department of Urban and Inner-City Studies at the University of Winnipeg.

I am writing to express my outrage and concern over the proposed Safe Access to Vulnerable Infrastructure By-Law. This by-law, as proposed, represents one of the harshest assaults on Charter rights that any Canadian municipality has considered to date.

Requiring a 100m buffer around this extensive list of public and community spaces would make it very difficult for Winnipeggers to use tools like public demonstrations at key locations to advocate effectively for social and policy changes. For instance, Premier Wab Kinew's constituency office would fall within the 100m restricted zone, effectively criminalizing protests in front of an elected official's place of work.

Such a move would represent a major attack on our democracy in Canada. We already have laws in Canada protecting against hate speech and physical violence. Enforcing a by-law like this will only lead to police overreach and the criminalization of peaceful protest. Threatening individual protesters with fines upwards of $5000 for multiple "offences" will create a climate of fear in this city that is most likely to silence the voices of our city's most marginalized communities, especially Indigenous and other racialized people.

Many of us are proud to live in a city with such a rich history of public protest achieving critical social changes. Just seven years ago, we celebrated the 100th anniversary of the Winnipeg General Strike which led to significant labour wins that continue to enhance the lives of workers in our province and across the country. Advocating for social change requires that we protect the right to peaceful assembly and ensure that the citizens of Winnipeg can continue to use every tool at our disposal to fight for the causes we believe in.

I implore you to decline any further consideration of this draconian by-law proposal and continue to safeguard the democratic rights of all Winnipeggers.

Sincerely,

Dr. Kaitlyn Duthie-Kannikkatt (she/her)
Instructor III
Department of Urban and Inner-City Studies

Dear Executive Policy Committee,

I'm writing to you today to express my profound disappointment and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Karin McSherry

February 11, 2026

To the Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

For this reason, I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. **This is an issue of protecting freedom of expression and association**, a crucial cornerstone of a free and fair democracy. **Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.**

I implore you to drop further consideration of the proposed demonstrations bylaw.

Thank you,

Katy Haynes

Dear Executive Policy Committee,

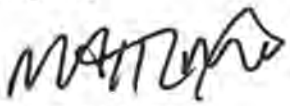
I'm writing to you to reflect my concern and displeasure at the City of Winnipeg's consideration of the "Safe Access to Vulnerable Infrastructure By-Law" that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. I am staunchly in opposition to the proposed bylaw.

There are a few key reasons that cause me concern:

- "Nuisance Protest" is non-specific, meaning any and all actions could be subject to enforcement.
- Areas restricted by this by-law are public spaces and points of proximity to decision makers, including City Hall, university campuses, the Manitoba legislature, etc.
- Fines of up to $5,000 could be issued to every person who shows up to peaceful demonstrations, rallies, group bike rides, marches, etc.
- The language of the by-law extends to any protests in these exclusion zones that use amplified sound or that block traffic, a hallmark of many peaceful, organized demonstrations.



This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community and as a nation. Public demonstrations have been used to help win rights for workers, tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law would infringe on constitutional rights, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy by dropping further consideration of the proposed demonstrations bylaw.

Signed,

Matthew Litke

The intended benefits of the proposed by-law (Safe Access to Vulnerable Infrastructure) appear contrary to the actual content of the by-law. Nuisance demonstrations, as they are referred to in the by-law, have been key to the development of Winnipeg's political and social movements for the betterment of all people living in Canada, especially marginalized groups that this by-law intends to protect. However this by-law, in its current state, could create much greater harm than the harm it means to prevent.

A core aspect of Winnipeg's history and identity is that of the Winnipeg General Strike. The success of that strike is a valuable part of our history and it is important for us to recall that when discussing the weight that protesting has in our city. This is especially pressing based on the fact that many died fighting for that strike. That, among other reasons, is why the Canadian Museum of Human Rights stands here in Winnipeg.

Activism is dependent on the freedom to demonstrate, and labelling protests and demonstrations as a nuisance and imposing fines on those who protest near a designated facility (as defined in the by-law) does not properly respect the gravity of activism and the fact that activism needs to be done to protect and maintain the rights and freedoms of all denizens of Canada. These fines being enforced in the way this by-law intends could have far-reaching implications beyond the scope of the protections promised by this by-law. Limiting where protests and demonstrations can legally occur based on proximity to a designated facility means that university students cannot engage in protesting on campus. It also means that if a peaceful protest includes moving it may automatically become illegal if the people participating in the protest happen to step within 100 meters of a designated facility. If they are moving, what if they unknowingly step within 100 meters of multiple designated facilities? A group of people could be fined $500 each per building, which could pile up extremely quickly. The by-law does thankfully protect strikes and collective bargaining, but protests need to occur in order for the rights of marginalized people to be respected. For example, Pride did not come from nowhere, it required Stonewall in order to evolve into greater rights for queer people across Canada.

Of course, the beliefs behind the intent of the by-law have merit: members of marginalized communities should be protected from intimidation and harassment, but we already have protections for such cases. The right to peaceful assembly includes protests having to be *peaceful*: intimidation and harassment are already covered by the Charter of Rights and Freedoms. Litigation can already be used to protect marginalized communities, and the fines included in the by-law would restrict protests and demonstration as a whole rather than simply unlawful, non-peaceful protest. However, it is also notable that because of the exact wording of the by-law, being "the expression by any means, including graphic, written or oral, of objection or disapproval towards an idea, action, person or group **based on or related to any specified characteristics**" (emphasis mine) means that a protest trying to defend a person based on their specified characteristics or the rights of people with certain specified characteristics would provoke a fine. Any public disapproval of anything related to specified characteristics in any way would cause a $500 dollar fine.

Do we, as a city, want to push to limit our rights to protest? Is that the right direction for Winnipeg? After our history, including such cases as the Winnipeg General Strike, the Brady Road & Prairie Green landfills, the pro-Palestine encampment at the University of Winnipeg, would the enforcement of this by-law, if passed, truly benefit the people of Winnipeg?

February 12, 2026

Dear Executive Policy Committee,

I'm writing to you today to express my alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

DELIVERED

Attention: Chief Clerk

Dear Madam :

Re City of Winnipeg Bylaw 2026 "Safe Access to Vulnerable Infrastructure By - Law (Draft)

Attached please find written submission for distribution to Council for the Upcoming Hearings . Please be advised that I wish to make oral submissions so I would ask that you kindly confirm my registration for same.

Yours truly ,

S. Norman Rosenbaum
nr encl.

IN Re:

THE CITY OF WINNIPEG
BY-LAW NO. /2026
A By-law of THE CITY OF WINNIPEG to prohibit nuisance demonstrations and intimidation of persons at or in respect of vulnerable social infrastructure.
THE CITY OF WINNIPEG, in Council assembled, enacts as follows:
Short title This By-law may be cited as the "Safe Access to Vulnerable Infrastructure By-law".

For presentation to public hearings and in anticipate of oral submissions

S. Norman Rosenbaum.

THE CITY OF WINNIPEG
BY-LAW NO. /2026
A By-law of THE CITY OF WINNIPEG to prohibit nuisance demonstrations and intimidation of persons at or in respect of vulnerable social infrastructure.
THE CITY OF WINNIPEG, in Council assembled, enacts as follows:
Short title This By-law may be cited as the "Safe Access to Vulnerable Infrastructure By-law".

The writer notes by way of preliminary remarks that he is a citizen of the City of Winnipeg and a practicing lawyer for over 42 years .

As well I note the extraordinarily short time period for submitting written submissions , i.e. by February 13, 2026.

I will make specific comments on the draft proposed By Law later in this paper. In the meantime I note that there are important issues of protected rights under the *Charter of Rights and Freedoms,* which is a part of the fundamental law of Canada and which Council must abide by .

I specifically refer to Section 2(c)of the Charter , the protected right of freedom of association, which has specifically been recognized as including the right of public demonstration (See *Hillier v Ontario , 2025 ONCA 259 (Can Lii)* . A full copy of *Hillier* is attached at Tab 2).

Take aways from *Hillier*:

Is the legislative goal of the measure imposing limits pressing and substantial.
Is there proportionality between the objective ad the means chosen to achieve
Is there minimal impairment to accomplish a valid government objective ?
Is there proportionality between the deleterious effects of the ban on peaceful assembly "and the salutary effects of the law imposing the ban?"
Is there a rational connection between means and ends ? does the impugned measure show care in design and lack of arbitrariness .
Does it further " an important government aim in a general way ?

These are, collectively, the *Oakes* tests of the constitutionality , and reasonable limits of any state enactment , including Council By- laws.

Specific comments in *Hillier* :

Page 9 , paragraph 22 freedom of peaceful assembly is a fundamental freedom and protected under Section 2(c)of the Charter (2c) Everyone has the following fundamental freedoms:

(a) freedom of conscience and religion;

(b) freedom of thought, belief, opinion and expression, including freedom of the press and other media of communication;

(c) freedom of peaceful assembly; and

(d) freedom of association.

An assembly " is necessarily collective in nature " (paragraph 35).

Peaceful assembly can advance the democratic goals of "self government , truth seeking and self realization. Moreover , the 'capacity to empower unheard, marginalized voices is at the core of s.2c)[of the Charter] (paragraph 36 (1) pages 15-16.

A public assembly can "leverage a message of protest or dissent, forcing the community to pay attention and become involved in relationship grievances. (paragraph 5, page 17).

The core in determining whether the government limits s.2c) is assessed by analyzing whether the government discouraged the collective pursuit of a common purpose by restricting or prohibiting a public gathering or assembly (paragraph 6 , page 17)..

Blanket bans that exclude or restrict an assembly because of its message or purpose are especially problematic. They are 'presumptively disproportionate' for that reason.' In particular , assemblies with a political message should receive a ' heightened level of accommodation and protection'. (paragraph7 , page 17)

Under Public Protests

Freedom of expression must be protected " because it contributes to the public's recognition of truth or to the growth of public knowledge". (paragraph 37 , page 18)

The primary objective of public assemblies is to ' confront others or to gain attention by disrupting ordinary life , or the ordinary use of public spaces ' (page 19 , paragraph 40).

At page 27 , the basic question as to proportionality : whether the negative impact of a law on the rights of individuals is proportionate to pressing and substantial goal of the law in furthering the public interest".

While there will be further discussion later in this paper about "bubble zones" as a proportionate response, the following comment:

A "bubble zone around a women's reproductive rights clinic protects women's rights to bodily integrity and security of the person in accessing medical treatment. So the balance favours such "bubble zone "as protecting women's Charter rights to security of the person.

This is not analogous to ban on political demonstrations against political activities in locations of whatever description . Political speech does not carry with it immunity from political criticism.

At page 29 : The core problem with the determination of proportionality is that detriments suffered by individuals and groups and the benefits to the common good are usually incommensurable.

The By law at hand: Defining the "common good " in a politically diverse community may be impossible. The question may become " who defines the public good "? . Respectfully , unelected bodies may claim to represent communities . This assumes that communities are monolithic . They are not.

So, is the objective pressing and substantial? Council must be alive to the possibility that views of the "public good " are subjective and contested. What is the potential then for unintended consequences.

An historical example : in the period running up to the entry of the United States into the Second World War , American fascists held a rally in Madison Square Gardens in New York City . There were demonstrations outside protesting the rally.

Would a similar bubble zone to that proposed banned those demonstrations outside such community centre , which patently Madison Square Gardens was.

The Draft By Law

i) Preamble :
a) There is no mention whatsoever of the *Charter of Rights and Freedoms* , notwithstanding the By- Law deals with what is a protected Charter Right of Freedom of Assembly;

b) Venue does not grant immunity from political dissent. So , an explicitly political event in a cultural centre , publicly advertising itself as explicitly political , is protected from Charter protected political criticism.

The difficulty lies in definition of " nuisance demonstration " , specifically " expression of objection or disapproval towards an idea , action based on or related to "any specified characteristics". Then under "specified characteristics": " "a person's nationality or national origin."

On this conflation a demonstration seen as insulting a person's sense of national honour traceable to politics of that country of origin, becomes a "nuisance demonstration. "

So if an event promotes the national honour of a country at war , political demonstration is effectively banned.

Supposing the demonstrators at the Madison Square Garden example above , were caught within the idea , action based on or related to "nationality or national origins". An historically important demonstration of revulsion to genocidal actions of a nation state would be caught under " nuisance demonstration.

So the question , which is national origin /nationality inserted ?

Intimidation

a) incite hatred ... intolerance and discrimination

By this measure a pro- Israeli demonstration outside City Council Chambers , supporting "Israeli Self- Defence" , would invite prosecution under the by-law, as a form of intimidation.

b) cause a person to fear for their mental or physical safety: this definition requires a measuring of the subjective state of the complainant by demonstrators.
Again if a Palestinian citizen was caused fear by the example of the pro-Israel demonstration , the demonstration would be banned , and participants subject to fine or potential incarceration (see comments under sentencing).

c)deter any person from accessing a designated facility: as an employee , ,may administer the Act (section 6) that individual is given authority to designate a facility . It is unclear whether limited to the specific examples in the Bylaw , but since Council means municipal council, a Palestinian deterred from entry to Council building , the pro Israeli demonstration is subject to ban.

Enforcement Authority : section 6

This gives the designated employee authority to "administer and enforce the By-Law " . Which of course requires a great deal of interpretation (eg. what is an " idea or act " related to " a person's nationality or national origins").

The very definition of employee means a person under the control of an employer , and therefore not in a position to make independent decisions. By definition employees have no security of tenure in order to make politically difficult decisions.

There is a reference to By-law officers. Unlike by- law officers involved in inspections of restaurants, the enforcement officers contemplated will make political banning decisions.

Powers of Arrest

By law enforcement officers have arrest powers under Provincial Offence Act , which is incorporated in the By-law . That Act also provides for sentences of potential incarceration or house arrest. It is unclear what if any authority Council has to effectively incorporate arrest and incarceration jurisdiction in a By- law.

Conclusion

The By - law does limit freedom of association and lawful demonstration in a disproportionate fashion as to " ideas and acts ".It is entirely unclear what constitutional advice was obtained in its drafting. It provides inordinate discretion to a designated employee to fundamentally limit constitutionally protected right of public demonstration . The larger issue is what is the impetus of this By-law when the public good is contentious in a diverse community.

Dated at Winnipeg, Manitoba this 11th day of February , 2026

S.Norman Rosenbaum

COURT OF APPEAL FOR ONTARIO

CITATION: Hillier v. Ontario, 2025 ONCA 259
DATE: 20250407
DOCKET: COA-23-CV-1377

2025 ONCA 259 (CanLII)

Lauwers, Zarnett and Pomerance JJ.A.

BETWEEN

Randy Hillier

Applicant (Appellant)

and

His Majesty the King in Right of the Province of Ontario

Respondent (Respondent)

Christopher Fleury and Hatim Kheir, for the appellant

Ryan Cookson and Padraic Ryan, for the respondent

Heard: September 19, 2024

On appeal from the judgment of Justice John Callaghan of the Superior Court of Justice, dated November 22, 2023, with reasons reported at 2023 ONSC 6611.

Lauwers J.A.:

A. OVERVIEW

[1] Ontario imposed limits on gatherings during the COVID-19 pandemic. In defiance of these limits, the appellant, Randy Hillier, attended several protests

between April and May 2021.[1] As a result of two specific gatherings, Mr. Hillier was charged with provincial offences for acting as a host or organizer under s. 10.1(1) of the *Reopening Ontario (A Flexible Response to COVID-19) Act.*[2] The application judge noted Mr. Hillier's jeopardy at para. 33 of his reasons: "If found guilty, he faces a fine of $10,000 to $100,000 plus possible imprisonment of up to a year."

[2] Mr. Hillier challenged the constitutionality of the regulations imposing the gathering limits on the basis that they limited his right to peaceful assembly under s. 2(c) of the *Canadian Charter of Rights and Freedoms* and could not be justified under s. 1. Mr. Hillier asked that the challenged regulations be declared of no force or effect under s. 52(1) of the *Constitution Act, 1982*.

[3] The application judge held, as Ontario conceded, that the gathering limits restricted Mr. Hillier's right to peaceful assembly under s. 2(c) of the *Charter*. However, he found that the gathering limits were demonstrably justified under s. 1 and upheld their constitutionality, considering himself bound to do so by this court's decision in *Ontario (Attorney General) v. Trinity Bible Chapel.*[3] Mr. Hillier appeals from the application judge's decision.

---

[1] For clarity, I use the terms "assembly" and "protest" interchangeably throughout these reasons.
[2] 2020, S.O. 2020, c. 17 ("*ROA*").
[3] 2023 ONCA 134, 478 D.L.R. (4th) 535, leave to appeal refused, [2023] S.C.C.A. No. 168. The application judge also noted, at para. 6, that there have been many cases that examined whether legislated COVID-19 restrictions violated *Charter* rights and whether such restrictions were justified under s. 1: see e.g. *Harjee v. Ontario*, 2023 ONCA 716; *Gateway Bible Baptist Church et al. v. Manitoba et al.*, 2023 MBCA 56, leave to appeal refused, [2023] S.C.C.A. No. 369; *Beaudoin v. British Columbia (Attorney General)*, 2022 BCCA 427, leave to appeal refused, [2023] S.C.C.A. No. 78; *Grandel v. Government of Saskatchewan*,

2025 ONCA 259 (CanLII)

[4] There has been much debate over the merits of governmental responses to the COVID-19 pandemic. This case is not about the merits of those responses. Nor is it about the merits of the limited exemption in the relevant restrictions on outdoor religious gatherings, which was addressed in *Trinity Bible Chapel*. The focus in this appeal is narrower. It is on the effect of the gathering limits as they pertain to the right to peacefully assemble, which was not similarly accommodated.

[5] Section 2(c) offers protection that is related to, but fundamentally distinct from, its companion subsections. The right of peaceful assembly, including political protest, is (in concert with other s. 2 rights) integral to a functioning democracy. The effect of the ban in this case was to stifle assembly aimed at expressing collective opposition to the ban itself.

[6] *Trinity Bible Chapel* affirms that a measure of deference is owed to government decisions that seek to balance competing interests during a fluid public health crisis, based on the precautionary principle. Ontario should not be held to a standard of perfection. Nor is hindsight the proper lens to view the necessity of the imposed gathering limits. A reviewing court should contextually consider what was known and considered by Ontario at the time it imposed the limits.

2024 SKCA 53, leave to appeal refused, [2024] S.C.C.A. No. 317. The application judge concluded, at para. 48, that while all these decisions were helpful, this court's decision in *Trinity Bible Chapel* governs.

2025 ONCA 259 (CanLII)

[7] Despite these cautions, I conclude that the gathering limits at issue in this case were not demonstrably justified under s. 1 of the *Charter.* This case is materially different from *Trinity Bible Chapel.* First, this case concerns an absolute, rather than partial ban. Second, while Ontario tailored restrictions on religious gatherings to facilitate freedom of religion, no such tailoring was performed to facilitate the right to peacefully assemble. The evidence discloses that Ontario failed to consider the impact of the gathering limits on s. 2(c) of the *Charter.* The pandemic posed significant challenges for Ontario, but the Constitution does not fade from view in times of crisis.

[8] I set the issue on appeal, next set out the factual background, and then the legal analysis leading to the disposition.

[9] For the reasons that follow, I would allow the appeal.

B. THE ISSUE

[10] There is one issue in this appeal: is the absence of an exception to the COVID-19 gathering limits to accommodate the fundamental freedom of peaceful assembly protected by s. 2(c) of the *Charter* demonstrably justified under s. 1?

2025 ONCA 259 (CanLII)

C. FACTUAL BACKGROUND

(1) The Ontario Government's Response to the COVID-19 Pandemic

[11] In brief, the appellant challenges two regulations on appeal.[4] The first led to the "*Shutdown Order*" and the second to the "*Stay-at-Home Order*". The impugned provisions of the *Shutdown Order* prohibited people from attending certain gatherings with express carveouts. However, there were no carveouts for peaceful assemblies. The *Shutdown Order* worked in tandem with the *Stay-at-Home Order* and included the same limited carveouts.[5]

[12] The carveouts permitted gatherings for weddings, funerals, and religious services subject to certain restrictions, such as a limit of ten people. The application judge noted, at para. 97, that the "ban was absolute as it related to activities engaged in by Mr. Hillier". As the application judge and this court in *Trinity Bible Chapel* mentioned, Ontario was entitled to weigh the objective of reducing the risk of COVID-19 transmission with wider societal interests and to carve out exceptions for small religious gatherings and shopping. However, there is no evidence that the Ontario government gave any thought to permitting a parallel exception for outdoor peaceful assemblies, despite the *Charter*'s protection of the

2025 ONCA 259 (CanLII)

---

[4] See *Rules for Areas in Stage 1*, O. Reg. 82/20, Sch. 4, s. 1(1)(c) ("*Shutdown Order*"); *Stay-at-Home Order*, O. Reg. 265/21, Sch. 1, s. 1(1).

[5] For convenience, the text of the impugned orders is reproduced in Appendix A. The excerpt from the *Shutdown Order* was active from April 23, 2021 to May 19, 2021 and the excerpt from the *Stay-at-Home Order* was active from April 7, 2021 to June 1, 2021.

right to freedom of peaceful assembly as a fundamental freedom enumerated in s. 2(c).

[13] On April 3, 2021, in response to a surge of COVID-19 cases that threatened the collapse of the healthcare system, Ontario placed the province into a "Shutdown Zone" through an order under the *ROA*.[6] At the time, this prohibited outdoor gatherings of more than five people province-wide.

[14] On April 7, 2021, Ontario declared a state of emergency under s. 7.0.1(1) of the *Emergency Management and Civil Protection Act*,[7] and issued an emergency order requiring everyone to stay at home, except for certain kinds of gatherings, including, but not limited to, weddings, funerals, religious services, and permitting an individual living alone to gather with the members of another household.[8] The *Stay-at-Home Order* did not permit individuals to leave their homes to attend peaceful assemblies.

[15] Effective April 17, 2021, Ontario amended the *Shutdown Order* to prohibit all outdoor gatherings except for weddings, funerals, religious services, and for individuals living alone to gather outdoors with the members of another household. Again, the prohibition did not contain an exception for peaceful assemblies.

2025 ONCA 259 (CanLII)

---

[6] See *Shutdown Order*, Sch. 4, s. 1.
[7] R.S.O. 1990, c. E.9.
[8] See *Stay-At-Home Order*.

[16] On May 22, 2021, Ontario amended the *Shutdown Order* to increase the outdoor gathering limit from none to five people. Again, no exception was made explicitly for peaceful assemblies.

[17] The *Stay-at-Home Order* remained in force until its expiry on June 2, 2021. The *Shutdown Order* was extended until its expiry on March 16, 2022. For clarity, Mr. Hillier challenges both the *Shutdown Order* and the *Stay-at-Home Order*. Specifically, he challenges the *Shutdown Order* between April 17, 2021 and May 22, 2021, in which an absolute ban on outdoor assembly was in force, and the *Stay-at-Home Order* generally.[9]

(2) Mr. Hillier and the Protests at Issue

[18] Mr. Hillier has been a politician and an advocate. He was a member of the Legislative Assembly for the riding of Lanark-Frontenac-Kingston.

[19] At the outset of the COVID-19 emergency in March 2020, Mr. Hillier abided by the relevant government rules. However, as time progressed, he became frustrated with Ontario's response to the pandemic. He attended protests to express his discontent because the pandemic created fewer opportunities for him to voice his concerns in the Legislature. These were unquestionably political protests.

---

[9] A chart showing the gathering limits during the relevant time period is attached as Appendix B.

2025 ONCA 259 (CanLII)

[20] Mr. Hillier faced charges as a host or organizer of the outdoor political protests that occurred in Kemptville, Ontario on April 8, 2021 and in Cornwall, Ontario on May 1, 2021. He also faced other charges for attending protests in Smiths Falls, Belleville, Peterborough, Stratford, Kitchener, and Chatham throughout April and May 2021.

[21] Mr. Hillier encouraged his supporters not to wear masks or get vaccinated against COVID-19. In all, the purpose of the protests was to amplify a collective voice to express discontent with Ontario's policies and restrictions in responding to the COVID-19 pandemic.

D. ANALYSIS

[22] To reiterate the issue on appeal, is the absence of an exception to the gathering limits to accommodate the fundamental freedom of peaceful assembly protected by s. 2(c) of the *Charter* demonstrably justified under s. 1? The analysis proceeds in two parts, the first addressing s. 2(c) and the second addressing s. 1.

[23] Despite Ontario's concession that the gathering limits did limit Mr. Hillier's fundamental freedom of peaceful assembly, I spend time developing the principled basis for determining that Mr. Hillier's s. 2(c) rights were limited. Doing so is a necessary precondition to an informed s. 1 analysis, which ultimately requires the court to determine whether the negative impact of the gathering limits on Mr. Hillier was proportionate to the goal of limiting the spread of COVID-19.

2025 ONCA 259 (CanLII)

2025 ONCA 259 (CanLII)

(1) Standard of Review

[24] Interpreting the *Charter* is a question of law that is subject to a standard of correctness.[10] Nonetheless, "the application of those constitutional standards may involve questions of fact or mixed fact and law which attract deference on appeal".[11]

(2) The Interpretation and Application of s. 2(c) of the *Charter*

[25] I set out the governing principles for the interpretation of s. 2(c) of the *Charter*, which protects the fundamental freedom of peaceful assembly, and then consider the application of those principles to the gathering limits.

(a) Introduction

[26] The task of interpretation requires the court to consider the text of the *Charter*, the context within which s. 2(c) is found and operates, and its purpose.[12]

[27] Section 2(c) takes its place in a list of fundamental freedoms in s. 2 of the *Charter*, which provides:

> 2. Everyone has the following fundamental freedoms:
>
> a) freedom of conscience and religion;

---

[10] *Canada (Minister of Citizenship and Immigration) v. Vavilov*, 2019 SCC 65, [2019] 4 S.C.R. 653, at para. 55.
[11] *Trinity Bible Chapel*, at para. 37, citing *Housen v. Nikolaisen*, 2002 SCC 33, [2002] 2 S.C.R. 235, at paras. 8, 10, 36.
[12] *Vavilov*, at para. 118.

b) freedom of thought, belief, opinion and expression, including freedom of the press and other media of communication;

c) freedom of peaceful assembly; and

d) freedom of association.

2025 ONCA 259 (CanLII)

[28] The text of s. 2(c) should be interpreted in context with its inclusion among all of the fundamental freedoms listed in s. 2. Each of the fundamental freedoms are distinct and must be given independent meaning. However, as this court noted in *Toronto (City) v. Ontario (Attorney General)*: "rights protections often overlap in protecting a single activity, because persons, even in carrying out a single act, can simultaneously participate in multiple human goods."[13] In other words, the fundamental freedoms listed in s. 2 are not mutually exclusive. For example, one's right to freedom of religion (s. 2(a)) includes one's right to worship collectively in association with others (s. 2(d)). The case-specific context determines which freedom, or freedoms, are engaged and the weight or emphasis each might attract. Given the overlap among the fundamental freedoms listed under s. 2, it is likely, if not common, that a given fact situation will engage more than one. As will be discussed in more detail below, this is especially so with respect to freedom of peaceful assembly under s. 2(c).

[29] Where more than one subsection in s. 2 is invoked, it may well be that only one constitutional analysis is required. The question of whether a particular

---

[13] 2019 ONCA 732, 146 O.R. (3d) 705, at para. 75, aff'd 2021 SCC 34, [2021] 2 S.C.R. 845.

subsection merits an independent analysis will invariably depend upon the factual and legal matrix of the case before the court.[14] For example, in *Trinity Bible Chapel*, the claims under the various subsections were reasonably subsumed by the s. 2(a) analysis addressing freedom of religion. Because the factual and legal bases for the claims were identical, there was no practical reason to duplicate the analysis under each subsection. Nor is it accurate to say that there were four separate violations, one for each subsection. There was one violation that straddled the various subsections. What marks this case and distinguishes it from *Trinity Bible Chapel* is that there is only one claim. It is advanced under s. 2(c) only, and the right of peaceful assembly is at the crux of the constitutional analysis.

[30] The exercise of freedom of peaceful assembly through these protests was free of objectionable acts that sometimes attend such protests. There is no claim that they were not peaceful or were disruptive or violent. There were no counter-protests. Nor did Mr. Hillier's participation draw charges under s. 63(1)(a) of the *Criminal Code*, as causing "persons in the neighbourhood" to fear on reasonable grounds that the assembly "will disturb the peace tumultuously".[15] Police action to disperse the protests was not necessary. In short, these were plain vanilla outdoor political protests.

2025 ONCA 259 (CanLII)

(b) Section 2(c) Governing Principles

[31] Section 2(c) of the *Charter* is jurisprudentially underdeveloped. In Professor Jamie Cameron's background paper entitled "Freedom of Peaceful Assembly and Section 2(c) of the *Charter*", written for the Public Order Emergency Commission, also known as the Rouleau Commission, she notes: "Though it is one of the *Charter*'s fundamental freedoms, s.2(c)'s freedom of peaceful assembly received

2025 ONCA 259 (CanLII)

little or no attention in the first 40 years of *Charter* interpretation and jurisprudence."[16] Her aim was to fill the jurisprudential "gap".[17]

[32] Professor Cameron argues, and in my view, convincingly establishes, this explanatory thesis:

> Though freedom of expression and freedom of assembly are not the same, it has been assumed that questions about expressive activity in public space should be addressed under s.2(b). In that way, the *Charter*'s guarantee of expressive freedom evolved without

2025 ONCA 259 (CanLII)

---

[16] Jamie Cameron, "Freedom of Peaceful Assembly and Section 2(c) of the *Charter*" (September 2022) (Ottawa: Public Order Emergency Commission, 2023), at 2, 48. I depart from Professor Cameron's illuminating analysis in one respect: whereas Professor Cameron writes of "violations" or "infringements" of rights at the first stage of a *Charter* rights analysis before the limit has been found to be demonstrably justified under the s. 1 analysis, it is more accurate and faithful to the language of s. 1 itself to speak of "limits". I adopt the clarification of the appropriate terminology in *R. v. Sharma*, 2020 ONCA 478, 152 O.R. (3d) 209, at para. 264, *per* Miller J.A. (dissenting):

> It is only possible to determine that a claimant's *Charter* rights have been violated after considering whether the limit placed on the exercise of a *Charter* right is justified: *McKitty (Litigation guardian of) v. Hayani*, [2019] O.J. No. 5134, 2019 ONCA 805, 439 D.L.R. (4th) 504, at para. 81. Although the Supreme Court uses the language of "infringement" (and "violation"), it has explained that it does not use these terms in their ordinary, pejorative sense, but intends them to be understood as synonymous with [page281] "limit": *Frank v. Canada (Attorney General)*, [2019] 1 S.C.R. 3, [2019] S.C.J. No. 1, 2019 SCC 1, at para. 40. The use of this artificial vocabulary is not necessarily fatal to sound reasoning, provided that it is understood that – whatever vocabulary one adopts – the conclusion of the first-stage analysis is *not* a determination that anyone's *Charter* rights have been violated. However, I agree with Côté and Brown JJ., dissenting in *Frank*, that the use of the language of "infringement" and "violation" in this context is a serious impediment to clear *Charter* reasoning and for that reason ought to be avoided: *Frank*, at para. 122. As they noted, "[i]t distorts our constitutional discourse, and our understanding of rights and of the legitimate boundaries of state action, to speak of individuals having rights which may be justifiably violated by the state": *Frank*, at para. 122.

I observe that in *R. v. Sharma*, 2022 SCC 39, 165 O.R. (3d) 398, the majority used the terminology of "limit", while the minority used terms such as "violate". In this decision, I use the term "limit", which is the language of s. 1.

[17] Cameron, at 7. See Dwight Newman, Derek Ross, and Brian Bird, (eds.), *The Forgotten Fundamental Freedoms: An Introduction* (Toronto: LexisNexis, 2020), also published as (2020), 98 S.C.L.R. (2d).

> aligning with s.2(c) and its concept of assembly. Meanwhile, an affinity between peaceful assembly and freedom of association was dampened by s.2(d)'s selective focus on labour relations issues.[18]

[33] Professor Cameron regrets s. 2(c)'s lack of separate development: "Accepting that an assembly or gathering in public space may be engaged in expressive or associational activity, the point in setting the right of assembly apart from ss.2(b) and (d) 'is the assembly itself'. Put another way, the assembly is, in its own right, 'the constitutional event'."[19]

[34] Section 2(c) has been insufficiently differentiated from other s. 2 freedoms and has been overshadowed, if not subsumed, under s. 2(d), freedom of association, and under s. 2(b), freedom of expression.[20] I find Professor Cameron's contextual approach to be persuasively inclusive and legally correct:

> In principle, freedom of assembly works in concert with s.2's other fundamental freedoms, forming part of an interrelated system that serves core democratic functions. As such, it depends for its protection on overlapping rights, such as freedom of expression and association. Assemblies invariably form in pursuit of a religious, expressive, or associational purposes, and will often be a "conduit" for the exercise of the *Charter*'s other fundamental freedoms.[21]

---

[18] Cameron, at 15-16 [footnotes omitted].
[19] Cameron, at 16 [footnotes omitted].
[20] Cameron, at 15-16.
[21] Cameron, at 21.

2025 ONCA 259 (CanLII)

[35] Under s. 2(c), "an assembly is necessarily collective in nature", like an "association" contemplated by s. 2(d).[22] In *Dunmore v. Ontario (Attorney General)*, Bastarache J. stated: "the purpose of s. 2(*d*) commands a single inquiry: has the state precluded activity because of its associational nature, thereby discouraging the collective pursuit of common goals?"[23] I accept Professor Cameron's argument: "By analogy to s.2(d), the key issue under s.2(c) is whether the government discouraged the collective pursuit of a common purpose by restricting or prohibiting a public gathering or assembly."[24] She explains that ss. 2(c) and 2(d) protect collective entitlements, and that "under s.2(c) the right attaches to the collective entity, or assembly itself, as well as to individuals who participate as members of the assembly."[25]

[36] I pick out, adapt, and adopt the following propositions as correct statements of the law in building out the contours of s. 2(c):

1. "[T]he act of assembling is the relevant constitutional event, and the value of it inheres in and attaches to the assembly, *qua* assembly."[26] As the "collective enactment or embodiment of individual expressive activity," a s. 2(c) peaceful assembly can advance the democratic goals of "self-

[25] Cameron, at 16, fn. 38.
[26] Cameron, at 26 [footnotes omitted].

2025 ONCA 259 (CanLII)

5. A public assembly can "leverage a message of protest or dissent, forcing the community to pay attention and become involved in redressing grievances."[35]
6. The core issue in determining whether the government limited s. 2(c) is assessed by analyzing whether "the government discouraged the collective pursuit of a common purpose by restricting or prohibiting a public gathering or assembly."[36]
7. "[B]lanket bans that exclude or restrict an assembly because of its message or purpose are especially problematic."[37] They are "an 'excessive restriction' and 'presumptively disproportionate' for that reason.[38] "In particular, assemblies with a political message should receive a 'heightened level of accommodation and protection'."[39]

2025 ONCA 259 (CanLII)

(c) Public Protests

[37] To understand the scope of s. 2(c)'s protection, it is necessary to account for the goods it is meant to serve. As noted, although there has been comparatively little scholarship and even less jurisprudence on s. 2(c), freedom of expression

---

[35] Cameron, at 23, citing Thomas Emerson, *The System of Freedom of Expression* (USA: Random House, 1970), at p. 287.

CPCR/C/GC/37, at paras. 32, 38 ("General Comment No. 37"); Council of Europe, European Commission for Democracy Through Law (Venice Commission), Guidelines on Freedom of Peaceful Assembly, CDL-AD(2019)017rev (2020), at para. 133.
[39] Cameron, at 41, citing General Comment No. 37, at para. 32.

government, truth seeking, and self [illegible]ation".[27] Moreover, the "capacity to empower unheard, marginalized voices is at the core of s.2(c)".[28]

2. An assembly is a "form of collective, not individual, action,"[29] and "[t]he right of peaceful assembly is, by definition, a group activity incapable of individual performance".[30]
3. "[A]n assembly is a concerted bodily enactment", or "a plural form of performativity". It need not accompany "verbalization" to be a form of expressive political action.[31]
4. An assembly includes a physical gathering of individuals in a physical space.[32] There are two corollaries applicable to physical assemblies. First, freedom of assembly "includes activities that are 'integral' to the assembly, such as mobilizing resources, planning, preparing, and publicizing a gathering, and travelling to and from the assembly."[33] Second, "digital connectivity facilitates" but neither displaces nor replaces collective forms of expression; it "complements traditional means of participating in public assemblies."[34]

scholarship can assist. In another paper for the Rouleau Commission, entitled "Freedom of Expression" Professor Richard Moon picks out the public goods that freedom of expression seeks to protect:

> It is said that freedom of expression must be protected because it contributes to the public's recognition of truth or to the growth of public knowledge; or because it is necessary to the operation of a democratic form of government; or because it is important to individual self-realization or personal autonomy.[40]

[38] In my view, these public goods also attach to other s. 2 fundamental freedoms, particularly peaceful assembly.

[39] Though freedom of expression and freedom of peaceful assembly are distinct rights, the human goods that animate the former are instructive in analyzing the latter. I agree with the proposition that "[c]onflating freedom of peaceful assembly with other freedoms like expression and association gives the erroneous impression that the former is a derivative of the latter (and that they are based on the same justifications)."[41] In other words, ss. 2(b) and (c) tend to converge because assemblies are necessarily expressive. But this is not to say that questions engaging s. 2(c) should engage only the s. 2(b) analysis. Peaceful

2025 ONCA 259 (CanLII)

assembly is listed as a separate, independent freedom.[42] Continuing to treat s. 2(c) as the forgotten sibling of the other fundamental freedoms unduly limits protection for people living in a constitutional democracy. Although the instances in which s. 2(c) does not overlap with other fundamental freedoms under s. 2 are rare, it is "nonetheless misguided to assume that the freedom exists solely to facilitate the exercise of other freedoms."[43]

2025 ONCA 259 (CanLII)

[40] Professor Moon describes protests "as action rather than speech – a physical display rather than a discursive engagement".[44] Moreover, the primary objective of public assemblies is to "confront others or to gain attention by disrupting ordinary life, or the ordinary use of public spaces."[45] Because such activity usually concentrates in public areas, "its message can (appear to) reach a general audience."[46] Thus, a "demonstration is an act of solidarity, a coming together of similarly minded individuals, but also collective act of expression."[47]

[41] Although there are now alternative forums, Professor Moon posits three reasons why public protests have a continued, if not enhanced, appeal. First, protests reflect "a desire to create a common space in which public engagement

[47] Moon, at 25.

(politics) is possible," and help overcome the fragmentation of public discourse.[48] Second, "a demonstration in public space bridges physical and emotional distance, by bringing individuals together, and giving them a sense of presence, and connection with others, that is lacking in mediated forms of communication."[49] Third, protests "can make visible the extent and depth of support for a position."[50]

2025 ONCA 259 (CanLII)

(d) The Principles Applied

[42] As a form of peaceful assembly, political protests are given constitutional protection. This is because s. 2(c)'s role in a constitutional democracy is to "validate the legitimacy and value of experiential, collective and public democracy" and political participation.[51] In this case, the ban on assemblies for political protest imposed by the gathering limits was absolute. Peaceful assemblies were not permitted even in the small numbers allowed for gatherings for religious and similar purposes. No opportunity was provided, to restate the goods this fundamental freedom protects, for dissenters to attract attention, in a visible act of solidarity, to their opposition to the law by disrupting ordinary life in the hope that the protest would lead to a change in public policy; this freedom is surely elemental in a democracy. The presence of alternative forums for protest, such as social media

[49] Moon, at 25 [citations omitted].
[50] Moon, at 25.
[51] Cameron, at 49.

or virtual gatherings, was not sufficient to render the absolute prohibition on gatherings constitutionally compliant.

[43] The prohibition on peaceful assembly imposed by the gathering limits therefore requires justification under s. 1 of the *Charter*.

2025 ONCA 259 (CanLII)

(3) The Interpretation and Application of s. 1 of the *Charter*

[44] Section 1 states that the *Charter* "guarantees the rights and freedoms set out in it subject only to such reasonable limits prescribed by law as can be demonstrably justified in a free and democratic society." As the application judge noted, at para. 71, the impugned gathering limits in this case were implemented by regulation, which satisfies the requirement that they were prescribed by law.[52]

(a) Section 1 Governing Principles

[45] The method for assessing whether a limit on a fundamental freedom is demonstrably justified under s. 1 was prescribed by the Supreme Court in *R. v. Oakes*.[53] It was developed to structure the inquiry into whether a limit on the exercise of a *Charter* right is demonstrably justified in a free and democratic society. Not only does the *Oakes* test shape this legal analysis, but it also constrains and disciplines courts in order to render the final balancing step intelligible and transparent. A flexible, contextual approach has won out over a rigid

[52] *Alberta v. Hutterian Brethren of Wilson Colony*, 2009 SCC 37, [2009] 2 S.C.R. 567, at para. 46.
[53] [1986] 1 S.C.R. 103.

application of *Oakes*, especially in the wake of *Hutterian Brethren*, *Canada (Attorney General) v. Bedford*,[54] and *Carter v. Canada (Attorney General)*.[55] In La Forest J.'s view, the *Oakes* test is not a set of rigid rules, but "a checklist, guidelines for the performance" of judicial duties.[56]

2025 ONCA 259 (CanLII)

[46] The first step of the *Oakes* test is to determine whether the legislative goal of the measure imposing the gathering limits was pressing and substantial. As the application judge noted, at para. 72: "Mr. Hillier concedes that the Gathering Restrictions were enacted to address a pressing and substantial concern, namely COVID-19." Mr. Hillier did not retreat from this concession in this court. The pressing and substantial concern was to reduce the spread of COVID-19. Ontario therefore meets the first step of the *Oakes* test.

[47] The second *Oakes* step is to determine whether there is proportionality between the objective of the legislation and the means chosen to achieve it. This step engages three inquiries:

1. Rational connection: is there a causal link between the gathering limits and the pressing and substantial objective of preventing the spread of COVID-19?
2. Minimal impairment: does the ban on peaceful assembly impair the exercise of that fundamental

[56] La Forest, at 148.

freedom more than is reasonably necessary to accomplish the objective?

3. Proportionate effects: is there proportionality between the deleterious effects of the ban on peaceful assembly and the salutary effects of the law imposing the limit?[57]

[48] In *Ontario (Attorney General) v. G*, Karakatsanis J. noted that the *Oakes* test has evolved; it "now focuses on justifying the infringing measure rather than the law as a whole".[58]

[49] I address each of theses three inquiries in turn.

(b) Were the Gathering Limits Rationally Connected?

[50] The evidentiary burden in this first inquiry "is not particularly onerous."[59] In fact, "the requirement of a rational connection has very little work to do."[60] A rational connection need not be proven on a rigorous scientific basis – and indeed to require proof to a scientific standard might hold the Crown to a higher standard of demonstration than is possible for the subject matter. A causal connection based on reason or logic may suffice.[61] Provided that the impugned measure shows care in design and a lack of arbitrariness, and provided that it furthers an important

[61] *RJR-MacDonald Inc. v. Canada (Attorney General)*, [1995] 3 S.C.R. 199, at paras. 137, 153; *Carter*, at para. 99.

2025 ONCA 259 (CanLII)

government aim in a general way, it will pass the rational connection branch of the analysis.[62]

[51] Ontario need only demonstrate a reasonable prospect that the gathering limits as they relate to peaceful assembly will further the legislative objective of preventing the spread of COVID-19 to some extent, notthat it will certainly do so.[63] In the absence of dispositive social science evidence, Ontario need only establish a "reasoned apprehension" of the harm it aims to prevent.[64]

[52] Before the application judge, Mr. Hillier argued that Ontario had not established a rational connection between the gathering limits and the threat of the outdoor spread of COVID-19. The application judge held, at para. 80, that "Restricting the gathering of people, even outdoors, was a rational means of reducing the transmission of COVID-19." Mr. Hillier does not challenge this finding, which seems rather obvious. Ontario therefore meets the first step of the proportionality assessment under s. 1 of the *Charter*.

(c) Were the Gathering Limits Minimally Impairing?

[53] The Supreme Court explained in *Carter* that "the analysis at this stage is meant to ensure that the deprivation of *Charter* rights is confined to what is

2025 ONCA 259 (CanLII)

reasonably necessary to achieve the state's object."[65] The minimal impairment inquiry, therefore, is whether "the limit on the right is reasonably tailored to the objective,"[66] in particular, "whether there are less harmful means of achieving the legislative goal".[67] As such, the government bears the burden of demonstrating that "less drastic means"[68] were unavailable to achieve the objective "in a real and substantial manner".[69]

2025 ONCA 259 (CanLII)

[54] Judicial deference to the Legislature at the minimal impairment step is to be sensitive to the context of the law in issue. The Legislature is not to be held to a standard of perfection: "If the law falls within a range of reasonable alternatives, the courts will not find it overbroad merely because they can conceive of an alternative which might better tailor objective to infringement".[70] Rather, the court will consider whether the government has established that "it has tailored the limit to the exigencies of the problem in a reasonable way".[71]

[55] The application judge recognized that the government was entitled to act out of an abundance of caution in imposing the impugned gathering limits in a public healthcare emergency, and to be duly deferential to the government's methods for

[70] *RJR-MacDonald*, at p. 342.
[71] *Montréal (City) v. 2952-1366 Québec Inc.*, 2005 SCC 62, [2005] 3 S.C.R. 141, at para. 94.

doing so. While the application judge recognized that the gathering limits were absolute with respect to peaceful assemblies, he drew on *Trinity Bible Chapel* as an example of a tailored government response to the pandemic. In doing so, he took the gathering limits at a macro-level and did not analyze the specific *Charter* issue before him. This was an error that coloured his minimal impairment analysis.

[56] Mr. Hillier argues that an outright ban on peaceful assembly cannot meet the minimal impairment test in this case. I agree. An outright ban is different than, and leaves no room for, less onerous restrictions of the type considered in *Trinity Bible Chapel*. As the Supreme Court explained in *Ford v. Quebec (Attorney General)*, "the distinction between a limit that permits no exercise of a guaranteed right or freedom in a limited area of its potential exercise and one that permits a qualified exercise of it may be relevant to the application of the test of proportionality under s. 1."[72] A total ban on the exercise of a fundamental freedom cannot readily meet the second step of the proportionality assessment under s. 1 of the *Charter*, and it does not in this case.[73] The next section sets out additional reasons for the conclusion that the ban was not justified in this case.

---

[72] [1988] 2 S.C.R. 712, at p. 773.

[73] It is a longstanding principle that blanket prohibitions are generally not minimally impairing under s. 1. See e.g., *U.F.C.W., Local 1518 v. KMart Canada*, [1999] 2 S.C.R. 1083, at para. 77; *RJR-MacDonald*, at para. 163.

2025 ONCA 259 (CanLII)

[57] This conclusion means that the gathering limits were unconstitutional. In the event that this conclusion is mistaken, I proceed to the next step in the *Oakes* analysis, and thereafter to the remedy.

2025 ONCA 259 (CanLII)

(d) Are the Deleterious Effects of the Gathering Limits Proportionate to its Salutary Effects?

[58] The basic question in the third and last proportionality inquiry is this: "is the limit on the right proportionate in effect to the public benefit conferred by the limit?"[74] Or, as it was put in *Bedford*: "whether the negative impact of a law on the rights of individuals is proportionate to the pressing and substantial goal of the law in furthering the public interest."[75] This analysis "takes full account of the 'severity of the deleterious effects of a measure on individuals or groups'."[76] It entails a "broader assessment of whether the benefits of the impugned law are worth the cost of the rights limitation", or, putting it the other way, whether "the deleterious effects are out of proportion to the public good achieved" by the limits.[77]

[59] This form of analysis assists in determining whether it is just for the legislation to require some individuals to bear the burden of the negative effects in

---

[74] *Hutterian Brethren*, at para. 73.
[75] At para. 125. See also *Carter*, at para. 95.
[76] *Hutterian Brethren*, at para. 76.
[77] *Hutterian Brethren*, at paras. 77-78.

order to secure the benefits of the positive effects for the common good – a good that benefits the appellant as well.[78]

[60] The application judge found, at para. 103, that "[t]he imposition of the Gathering Restrictions for approximately two months was not disproportionate to the threat facing Ontario in the spring of 2021." He added, at para. 105:

> In the extraordinary circumstances existing in the spring of 2021, the Gathering Restrictions were both necessary and a proportionate response to the most significant health crisis of our time. The challenged restrictions were justified under s. 1 of the *Charter*.

[61] The application judge made a basic error in his approach to this question. He did not pay due regard to the limit – the absolute prohibition – imposed by the gathering limits on the fundamental freedom of peaceful assembly. He did not assess peaceful assembly separately as a fundamental freedom protected by s. 2(c) of the *Charter*. To repeat the instruction in *G*, the court must now focus on justifying the specific infringing measure rather than on the law as a whole. The application judge failed to do so.

[62] The gathering limit to be assessed under the third inquiry of the s. 1 proportionality analysis is the complete ban on peaceful assemblies, particularly

---

[78] See *Oakes*, p. 139; *K.R.J.*, at para. 58; *Frank*, at para. 38.

2025 ONCA 259 (CanLII)

outdoor political protests. I consider the deleterious effects, next the beneficial effects, and then whether Ontario struck a demonstrably justified balance.

(i) The Deleterious Effects of the Gathering Limits on Peaceful Assembly

[63] The question is whether the negative impact of the gathering limits on the right to peacefully assemble is proportionate to the law's pressing and substantial goal of preventing the spread of COVID-19.[79]

[64] The deleterious effects include the following. The fundamental freedom of peaceful assembly was eliminated entirely for two months. Some gatherings were permitted in certain circumstances, such as "a wedding, a funeral or a religious service, rite or ceremony".[80] However, individuals or groups who wanted to publicly assemble to protest COVID-19 control measures were prevented by law from doing so either indoors or outdoors. As noted, outdoor protests are especially effective at amplifying minority voices and expressing political dissent. People who wished to participate in outdoor protests were denied the opportunity to influence public policy by this time-honoured method. The core problem with the determination of proportionality is that the detriments to be suffered by individuals and groups in any case under consideration, on the one hand, and the benefits that accrue to the common good, on the other hand, are usually incommensurable.

---

[79] See *Bedford*, at para. 125.
[80] *Shutdown Order*, Sch. 4, s. 1(1)(d); *Stay-at-Home Order*, Sch. 1, s.1(1).

2025 ONCA 259 (CanLII)

There is no common basis, common denominator or common measure for evaluating and balancing the competing claims of the individuals and groups negatively affected by a law or decision, against any benefits to the common good. Nonetheless, subject to judicial forbearance, often the court must declare an outcome.[81]

2025 ONCA 259 (CanLII)

(ii) The Beneficial Effects of the Gathering Limits on Peaceful Assembly

[65] The public good sought by the gathering limits was preventing the spread of COVID-19. This is unquestionably a legitimate state goal in pursuit of the common good. The question is whether the societal benefits of the gathering limits were proportionate to the detrimental effects of the ban on peaceful assemblies on Mr. Hillier.[82]

[66] This assessment cannot only be abstract; it must be concrete if the state's actions are to be constrained by the fundamental freedoms protected by the *Charter*. Abstractly, and intuitively, a complete ban on all gatherings would be maximally effective in preventing the spread of COVID-19, but in human terms, such a ban was neither possible nor desirable. The logical corollary is that

---

[81] Timothy Endicott, "Proportionality and Incommensurability" in Grant Huscroft, Bradley W. Miller, and Grégoire Webber, eds., *Proportionality and the Rule of Law* (Cambridge: Cambridge University Press, 2014) 317.
[82] See *Hutterian Brethren*, at para. 78.

permitting any more gatherings than the limits permitted would increase the risk of spreading COVID-19.

[67] But, proportional balancing sets a much more demanding standard in comparing costs and benefits.[83] The assessment is concrete, rather than abstract. How much, practically speaking, did the ban on peaceful assembly mitigate the risk of COVID-19 spread? There is no evidence as to the increase in risk that would have been posed by an exemption for outdoor peaceful assembly or protests that matched the exemption for permitted gatherings.[84]

[68] More particularly, there is no evidence as to the increase in risk posed by the outdoor protests in which Mr. Hillier participated.

[69] Perhaps most importantly, there is no evidence that Ontario ever considered an exemption for peaceful assembly for outdoor political protests. Can the court, in assessing the state's justification, countenance an outcome in which the state eliminates the free exercise of a fundamental freedom without giving that elimination any actual thought? Such an outcome would be entirely contrary to the purpose of the *Charter* in protecting the free exercise of fundamental freedoms against the limiting actions of government.

---

[83] See generally *G*, at para. 108.
[84] I note, parenthetically, that there was unlikely to be as many protests as there are places of worship and funeral facilities.

2025 ONCA 259 (CanLII)

(iii) Has Ontario Struck a Demonstrably Justified Balance?

[70] The application judge considered himself, on the facts and on the reasoning, to be unable to deviate from *Trinity Bible Chapel*. He erred in so doing. *Trinity Bible Chapel* is distinguishable. The cases would be analogous if the issue before the court in *Trinity Bible Chapel* had been an outright ban on religious gatherings. But that was not the case. The issue was whether the actual numerical limits were demonstrably justified taking into account the rights of the appellants under s. 2(a) of the *Charter*. The motion judge and this court concluded that the limits were justified.

[71] Ontario conceded in the *Trinity Bible Chapel* appeal that the restrictions on religious gatherings limited the fundamental freedom of religion protected by s. 2(a) of the *Charter*.[85] This court found that, in applying the *Oakes* test, the limit was justified under s. 1. First, the limits were directed at a pressing and substantial objective.[86] Second, the gathering limits were rationally connected to the objective because restricting contact "logically reduces the risk of transmission, particularly in congregate settings such as religious gatherings."[87] Third, the gathering limits were minimally impairing as a "tailored and balanced response to an urgent public health crisis."[88] Fourth, in balancing the salutary and deleterious effects of the

---

[85] At para. 17.

[87] *Trinity Bible Chapel*, at paras. 95-96.
[88] *Trinity Bible Chapel*, at para. 125.

2025 ONCA 259 (CanLII)

gathering limit on religious freedoms, this court accepted the motion judge's conclusion that "[r]eligious institutions were affected, but no more than was reasonably necessary and for no longer than was reasonably required."[89] None of these conclusions are at issue in this case. The limits on religious gatherings were fully justified.

[72] The implication for this appeal is that the court must focus on the limit, or "the infringing measure", not on the law as a whole.[90] This approach prevents the limit from being crushed under the weight of the law's benefit.

[73] The application judge's analysis in this case did not reach the actual limit at issue here – the gathering limits on the fundamental freedom of peaceful assembly under s. 2(c) of the *Charter*. To repeat, *G* required the application judge to focus on whether the specific limiting measure was justified, rather than on the law as a whole, but he did not. Instead, he focused on the law's overwhelming social good in preventing the spread of COVID-19, not on ways in which the fundamental freedom of peaceful assembly might still be accommodated in the delicate task of balancing. This was his error.[91]

---

[89] *Trinity Bible Chapel*, at para. 133.
[90] *G*, at para. 108.
[91] I note in passing that Mr. Hillier raised what might be a new argument on appeal, that in his analysis, the application judge "erred in upholding government action that created a constitutionally impermissible hierarchy of rights." Any time a choice is made between rights, as is sometimes required by *Oakes*, a hierarchy is created, but that is the result of an immediate context-specific choice, and does not establish a functional hierarchy going forward.

2025 ONCA 259 (CanLII)

[74] Mindful of the problem of incommensurability mentioned above, I conclude that the deleterious effects of the absolute ban on peaceful assembly, particularly outdoor political protests, during the period of April 17, 2021 to May 22, 2021, exceeded the benefits of these particular gathering limits on the spread of COVID-19. Ontario has failed to demonstrably justify these limits on the peaceful assembly rights of Mr. Hillier under s. 2(c) of the *Charter*, as required by s. 1.

2025 ONCA 259 (CanLII)

E. REMEDY

[75] I would allow the appeal. The parties asked the court for the opportunity to address the remedy if the appeal were allowed. I would give Mr. Hillier ten days from the release of these reasons to provide written submissions no more than five pages in length, Ontario shall provide submissions no more than five pages in length ten days later, and Mr. Hillier's reply no more than two pages in length is to be submitted within an additional week.

[76] I would ask the parties to keep in mind some principles. The remedy must be consistent with the principles in *Schachter v. Canada*,[92] as clarified by *G*. In *G*, the Supreme Court noted that in tailoring remedies under s. 52(1) of the *Constitution Act, 1982*, courts must balance the public's interest in constitutional

---

[92] [1992] 2 S.C.R. 679.

compliance and the protection of *Charter* rights, on the one hand, with the benefit of laws passed by the legislature, on the other hand.[93]

[77] In determining the form a remedy should take, the court should avoid full declarations of invalidity when "the nature of the violation and the intention of the legislature allows for them."[94] The court in *G* added that: "To ensure the public has the benefit of enacted legislation, remedies of reading down, reading in, and severance, tailored to the breadth of the violation, should be employed when possible so that the constitutional aspects of legislation are preserved".[95] The court added that such a declaration "cures the law's unconstitutionality."[96]

[78] The court in *G* echoed *Schachter*'s caution that tailored remedies should only be used "where it can be fairly assumed that 'the legislature would have passed the constitutionally sound part of the scheme without the unsound part' and where it is possible to precisely define the unconstitutional aspect of the law.[97] Accordingly, the importance of the remaining legislation should be considered to avoid interfering with the legislative objective of the law.[98]

2025 ONCA 259 (CanLII)

---

[93] At paras. 109-11.
[94] *G*, at para. 112.
[95] At para. 112, citing *Schachter*, at p. 700; *Vriend v. Alberta*, [1998] 1 S.C.R. 493, at paras. 149-50.
[96] *G*, at para. 112.
[97] *G*, at para. 114, citing *Schachter*, at p. 697; *Attorney-General for Alberta v. Attorney-General for Canada*, [1947] A.C. 503 (P.C.), at p. 518.
[98] *G*, at para. 114, citing *Schachter*, at pp. 705-15.

[79] In a similar vein, albeit a different context, L'Heureux-Dubé J. made a trenchant comment in *R. v. O'Connor* that applies equally to the tailoring of remedies:

> It is important to recognize that the *Charter* has now put into judges' hands a scalpel instead of an axe – a tool that may fashion, more carefully than ever, solutions taking into account the sometimes complementary and sometimes opposing concerns of fairness to the individual, societal interests, and the integrity of the judicial system.[99]

F. DISPOSITION

[80] I would find that the challenged gathering limits, in effect from April 17, 2021 to May 22, 2021, violated s. 2(c) of the *Charter* in a manner that cannot be justified under s. 1. Accordingly, I would allow the appeal.

[81] The parties do not seek costs.

Reopening Ontario (A Flexible Response to COVID-19) Act, 2020

ONTARIO REGULATION 82/20

FORMERLY UNDER EMERGENCY MANAGEMENT AND CIVIL PROTECTION ACT

RULES FOR AREAS IN STAGE 1

...

SCHEDULE 4

ORGANIZED PUBLIC EVENTS, CERTAIN GATHERINGS IN SHUTDOWN ZONE

Gatherings, Stage 1 areas

1. (1) Subject to sections 2 to 4, no person shall attend,

(a) an organized public event that is held indoors;

(b) a social gathering that is held indoors, including a social gathering associated with a gathering described in clause (d);

(c) an organized public event or social gathering that is held outdoors, including a social gathering associated with a gathering described in clause (d); or

(d) a gathering, whether indoors or outdoors, for the purposes of a wedding, a funeral or a religious service, rite or ceremony of more than 10 people.

(2) A person attending an organized public event, social gathering or a gathering for the purposes of a wedding, a funeral or a religious service, rite or ceremony shall comply with public health guidance on physical distancing.

(3) For greater certainty, subsections (1) and (2) apply with respect to an organized public event, social gathering or a gathering for the purposes of a wedding, a funeral or a religious service, rite or ceremony, even if it is held at a private dwelling.

2025 ONCA 259 (CanLII)

EMERGENCY MANAGEMENT AND CIVIL PROTECTION ACT

ONTARIO REGULATION 265/21

STAY-AT-HOME ORDER

...

SCHEDULE 1

Requirement to remain in residence

1. (1) Every individual shall remain at the residence at which they are currently residing at all times unless leaving their residence is necessary for one or more of the following purposes:

Work, school and child care

1. Working or volunteering where the nature of the work or volunteering requires the individual to leave their residence, including when the individual's employer has determined that the nature of the individual's work requires attendance at the workplace.

2. Attending school or a post-secondary institution.

3. Attending, obtaining or providing child care.

4. Receiving or providing training or educational services.

Obtaining goods and services

5. Obtaining food, beverages and personal care items.

6. Obtaining goods or services that are necessary for the health or safety of an individual, including vaccinations, other health care services and medications.

7. Obtaining goods, obtaining services, or performing such activities as are necessary for landscaping, gardening and the safe operation, maintenance and sanitation of households, businesses, means of transportation or other places.

8. Purchasing or picking up goods through an alternative method of sale, such as curbside pickup, from a business or place that is permitted to provide the alternative method of sale.

2025 ONCA 259 (CanLII)

9. Attending an appointment at a business or place that is permitted to be open by appointment only.

10. Obtaining services from a financial institution or cheque cashing service.

11. Obtaining government services, social services and supports, mental health support services or addictions support services.

Assisting others

12. Delivering goods or providing care or other support or assistance to an individual who requires support or assistance, or receiving such support or assistance, including,

i. providing care for an individual in a congregate care setting, and

ii. accompanying an individual who requires assistance leaving their residence for any purpose permitted under this Order.

13. Taking a child to the child's parent or guardian or to the parent or guardian's residence.

14. Taking a member of the individual's household to any place the member of the household is permitted to go under this Order.

Health, safety and legal purposes

15. Doing anything that is necessary to respond to or avoid an imminent risk to the health or safety of an individual, including,

i. protecting oneself or others from domestic violence,

ii. leaving or assisting someone in leaving unsafe living conditions, and

iii. seeking emergency assistance.

16. Exercising, including,

i. walking or moving around outdoors using an assistive mobility device, or

ii. using an outdoor recreational amenity that is permitted to be open.

17. Attending a place as required by law or in relation to the administration of justice.

2025 ONCA 259 (CanLII)

18. Exercising an Aboriginal or treaty right as recognized and affirmed by section 35 of the *Constitution Act, 1982*.

Multiple residences and moving

19. Travelling to another residence of the individual if,

i. the individual intends to be at the residence for less than 24 hours and is attending for one of the purposes set out in this Order, or

ii. the individual intends to reside at the residence for at least 14 days.

20. Travelling between the homes of parents, guardians or caregivers, if the individual is under their care.

21. Making arrangements to purchase or sell a residence or to begin or end a residential lease.

22. Moving residences.

Travel

23. Travelling to an airport, bus station or train station for the purpose of travelling to a destination that is outside of the Province.

Gatherings

24. Attending a gathering for the purpose of a wedding, a funeral or a religious service, rite or ceremony that is permitted by law or making necessary arrangements for the purpose of such a gathering.

25. If the individual lives alone, gathering with the members of a single household.

Animals

26. Obtaining goods or services that are necessary for the health or safety of an animal, including obtaining veterinary services.

27. Obtaining animal food or supplies.

28. Doing anything that is necessary to respond to or avoid an imminent risk to the health or safety of an animal, including protecting an animal from suffering abuse.

2025 ONCA 259 (CanLII)

29. Walking or otherwise exercising an animal.

(2) Despite subsection (1), no person shall attend a business or place that is required by law to be closed, except to the extent that temporary access to the closed business or place is permitted by law.

(3) This Order does not apply to individuals who are homeless.

(4) If this Order allows an individual to leave their residence to go to a place, it also authorizes them to return to their residence from that place.

(5) The requirement in subsection (1) to remain at an individual's residence does not prevent the individual from accessing outdoor parts of their residence, such as a backyard, or accessing indoor or outdoor common areas of the communal residences in which they reside that are open, including lobbies.

(6) For greater certainty, nothing in this Order permits a business or place to be open if it is required by law to be closed.

(7) For greater certainty, nothing in this Order permits an individual to gather with other individuals if the gathering is not permitted by law.

(8) For greater certainty, individuals may only attend an outdoor organized public event or social gathering for a purpose set out in subsection (1) if the event or gathering is permitted by law.

2025 ONCA 259 (CanLII)

Re: Proposed Safe Access to Vulnerable Infrastructure By-Law (limiting so-called “nuisance demonstrations”)

To Members of Council,

This proposed by-law would severely restrict where people can peacefully assemble and express dissent. If enacted, the City would criminalize core democratic actions and chill fundamental rights protected under the Charter of Rights and Freedoms.

Protests become “nuisance demonstrations” not when they are unsafe or harmful, but simply because they are unwelcome to those in power. That is not a legitimate basis for limiting speech. Experience shows that peaceful protest is a necessary mechanism for accountability and change, not a threat to the public order.

I oppose this by-law in the strongest possible terms. It is a disproportionate and unnecessary restriction on freedom of expression, assembly, and association.

Sincerely,
Patrick Krawec

13 February 2026

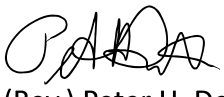
Executive Policy Committee
Winnipeg City Council

Re: Opposition to Safe Access to Vulnerable Infrastructure By-Law

I am entirely opposed to this by-law recommendation, that the Executive Policy Committee is slated to discuss on Tuesday, February 17, 2026.

It is an example of legislative over-reach, poorly crafted, and a threat to rights and freedom guaranteed under the Canadian Charter that will not likely survive a constitutional challenge.

It opens the door to the abuse of power by both police and legislative bodies, and would make illegal any public response to everything from ecological crisis to political tyranny. As for making society safer, EPC should consider it will have an opposite effect: this by-law targets people who have financial means to pay the fines, not the elements of society that have no money, and thus may act out their anger in the streets, undiluted by reason, because they have no other option.



We already have legislation in place to deal with real threats to public safety and access to infrastructure. I taught at both UWinnipeg and UManitoba during both "encampments," and never once was bothered or disturbed by them. Trying to think up an umbrella by-law is not helpful in dealing with specific situations, and only risks being applied in the future to citizens exercising their democratic rights to protest the misjudgments of their political, social and commercial leadership.

It is an expression, not of concern and support for democracy, but of the slide into an authoritarian, anti-democratic future that we see elsewhere in our crisis-plagued world.

To be clear, I think the council members who have brought this forward are misguided, not fascists in the making. But they should be concerned that it will be fascists, not democrats, who celebrate the passage of this kind of legislation. Whatever good intentions might have initiated this by-law, it cannot be amended, massaged or repackaged into anything less than the threat to Canadian democracy that such legislation entails.

I wish to record my complete opposition to this by-law, and urge the EPC and City Council to discard it entirely.

Sincerely,

(Rev.) Peter H. Denton, B.A. (Hons.), M.A., M.A., M.Div., Ph.D.
Contract Academic Staff at UWinnipeg and UManitoba
Adjunct Associate Professor of History, Royal Military College of Canada

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Rachel Stark

NATIONAL COUNCIL OF CANADIAN MUSLIMS

Your Voice. Your Future

Good afternoon Mayor and Members of Council,

Thank you for the opportunity to speak today.

Let me begin by stating clearly that we fully support the protection of religious communities and other vulnerable institutions. Individuals must be able to attend places of worship, schools, and hospitals free from harassment, intimidation, or violence. That objective is both legitimate and important.

Our primary concern, however, is the process by which this bylaw has been developed. When a municipality proposes legislation that directly engages Charter-protected freedoms, particularly freedom of expression and peaceful assembly, robust and inclusive consultation is essential.

Consultation is the mechanism through which municipalities can identify potential issues before they crystallize into significant problems. It allows governments to recognize where definitions are unclear and where enforcement may be inconsistent. Consultation ensures that protective measures are effective and aligned with constitutional requirements.

Several aspects of the current draft illustrate why consultation is urgently required. The definition of a nuisance demonstration includes the expression of objection or disapproval toward an idea, action, person, or group based on specified characteristics. But that formulation directly engages expressive content and risks capturing lawful protest and political advocacy. The bylaw also defines intimidation in terms that rely on perceived effects and potential outcomes. While the objective of preventing intimidation is entirely legitimate, standards framed in this manner create uncertainty about what conduct is prohibited.

The proposed 100-metre buffer zones around a broad range of sites, including places of worship and schools, further demonstrate the potential breadth of this legislation. In many urban areas, these zones encompass sidewalks, parks, and public streets that function as legitimate forums for lawful assembly. Bubble zone legislation of this nature can significantly restrict lawful public assembly and peaceful expression, effectively limiting the ability of individuals and groups to participate in public discourse. Without thorough consultation, there is a risk that bubble zones will be applied in a

manner that inadvertently suppresses Charter-protected rights and creates uncertainty for our enforcement authorities and the public alike.

These factors collectively indicate that the bylaw is at risk of being vague and overbroad, as well as difficult to enforce. But these are precisely the foreseeable consequences of advancing legislation without consultation with all impacted groups.

Consultation should include religious communities, civil liberties organizations, legal experts, and protest groups. Engaging these stakeholders will allow Council to clarify definitions, identify overlaps with existing regulations, and ensure that enforcement is consistent and proportionate.

The risks of proceeding without consultation have already been observed elsewhere. The City of Vaughan enacted a similar bylaw and is now subject to a Charter challenge supported by civil liberties organizations including ours, the National Council of Canadian Muslims. Winnipeg has the opportunity to take a different path, and craft legislation that is protective but also enforceable and constitutionally sound.

Our shared objective is clear: we all want to protect vulnerable communities. But the path to achieving that objective with legitimacy and durability requires requisite consultation with all impacted groups. That step must come first. Without it, the City risks enacting legislation that is vulnerable to challenge, difficult to enforce, ultimately undermines the protection it seeks to provide.

We respectfully urge Council to undertake broad consultation and return with a revised bylaw that is precise, narrowly targeted, and constitutionally defensible. Consultation at this stage will not weaken this initiative but rather will strengthen it, ensuring that Winnipeg protects its communities while respecting the rights and freedoms central to our democracy.

Thank you.

Sadaf Ahmed, PhD
Manitoba Advocacy Officer, Department of Government Affairs and Public Policy
National Council of Canadian Muslims

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Selina Kelly

Opposition to the 'Safe Access to Vulnerable Infrastructure Bylaw'

I am truly disturbed that once again Winnipeg City Council is playing fast and loose with human rights in Winnipeg. In this case, the 'Safe Access to Vulnerable Infrastructure Bylaw' is a direct attack on our charter rights that protect our freedom of expression and right to peaceful assembly.

This city council seems to be in the habit of attempting to push through a consistent message of complete disregard for human rights and civil liberties. I am seeing more and more similarities between this council and the fascism that is creeping across this continent.

I have always prided myself on the history of labour strikes in Winnipeg, of the dissenting voices that have shaped this

city and province from the very beginning. Dissent and protest that have created art, culture, music, amazing organizers, water and land protectors that are known nation wide. The true creative problem solving that arises when people are able to speak freely and have open dialogue cannot exist without protest and assembly and freedom of expression.

The idea that this Bylaw will keep people safe is ridiculous when we already have laws against illegal activities, harassment and hate speech. There is nothing in this proposed bylaw that adds any measure of safety. What it does add, is an attempt to muzzle any one council does not agree with.

We see through this plan, and there is no way the citizens of Winnipeg will allow such a hostile bylaw to be passed. Knowing it would never stand up in any

court of law in Canada, I am also shocked by the incompetence and disrespect of such a bylaw being put forward in the first place.
Why does this Council insist again and again in proposing bylaws that attempt to control and coerce the population of this city? Who do you think you represent, if not us, the citizens?
We demand you immediately remove this proposal for review. It is a direct violation of our charter rights.

Thank you for your time,
Sharon Johnson
Community member and Organizer

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Shelley Kelly

Dear Executive Policy Committee,

I'm writing today in complete and utter shock over the proposed legislation to be discussed on Tuesday, February 17th, that is the Safe Access to Vulnerable Infrastructure By-Law. This law would undermine the charter rights of Winnipeg's public to freedom of peaceful assembly and expression, and would harm minority groups in the city disproportionately. For these reasons I urge you to reconsider and drop this legislation.

1. Charter Rights and Freedoms

This piece of legislation as written is general enough to warrant use against nearly any protest that exists on the properties described. These include some of the historically most relevant places of protest; city buildings, university campuses, public libraries, and more. I believe this risks damaging the democratic institutions and nature of our culture, and should not be allowed to go forward.

The purpose of a protest is to be disruptive; to annoy people enough that they pay some attention to the cause. In prohibiting “nuisance” protests in some of the ways described in the by-law, activism in our city will be significantly impacted in its ability to get the public's attention. All of the hate speech oriented aspects of the bylaw are already prohibited under Canadian freedom of expression laws, and should be better policed. But if enacted, this bylaw could and would be used against all kinds of protests, not just those spewing hate.

2. Disproportionate effects of this bylaw

Not only would this legislation infringe upon the people of Winnipeg’s charter rights as stated above, but I believe it would be further weaponized against already marginalized groups (Indigenous, racialized and 2SLGBTQIA+ community members, etc.) to fine them into silence.

The reality is that a fine of a few hundred to a few thousand dollars is something that a large organization or private citizens with deep pockets might accept as the ‘cost of doing business’, while poorer citizens will be priced out. What this will do is limit effective protest in Winnipeg to only those who can *afford* it, which is simply undemocratic and against the spirit of our country and province.

Given the extremism taking root in the United States, I think it's more important than ever that the public's voice be heard in Winnipeg, and this by-law would restrict that right exactly when it is most important.
I implore you to reconsider the potential effects of this legislation, and who it might affect disproportionately if enacted.

Please do not silence the voice of the public you serve.

Signed,
Spencer Cook

Good Morning EPC,

Re: Safe Access to Vulnerable Infrastructure Bylaw

I am writing to express my full support for the proposed bylaw restricting the locations of certain types of protests.

I could provide a long list of examples where intimidation has been used by some groups in front of hospitals, community centres, and even schools, but the drafters of this bylaw clearly understand these issues. Instead, I will share a few personal experiences—my own and those of friends—that illustrate why this bylaw is necessary.

It is my opinion, based on what I have witnessed, that these rallies are not held in front of community centres or schools to inspire meaningful change. In the instances I have observed, the protests had nothing to do with the buildings, the people inside them, or even the stated reasons for the demonstrations.

Two of the clearest examples come from the area near the Asper JCC.

On April 1, 2025, a group chose to scream and shout in front of the building because veterans of the IDF were scheduled to speak to a small group inside. This occurred precisely as hundreds of children were leaving school and daycare. Even if these protesters were upset about retired soldiers speaking, their actions in Winnipeg could not possibly influence anything happening an ocean away. These soldiers were neither officers nor politicians.

Instead, the protesters hurled insults at children, calling them “baby killers” and “murderers.” They frightened and intimidated kids under the claim that such behaviour would bring about positive change.

What follows is written not as an official representative of Folklorama, but as a concerned citizen. I have volunteered with the festival for over 40 years in many roles and have spoken with countless volunteers and pavilion patrons. That is where this comes from, not from Folklorama itself.

For more than a decade, I have observed protests—similar to the ones of the past two years—outside the Israel Pavilion. Like every pavilion, it exists to celebrate culture, not

politics, and it has no official connection to any government. Year after year, usually on Tuesday nights, protesters would arrive making the same claims they made recently.

Many times, guests on the tour buses I guided asked why this was allowed and expressed that they felt it was inappropriate. With busloads of about 50 people, it is fair to say that hundreds with no connection to the Jewish community told me their opinion that the these protests were wrong.

Fast-forward to the last two years: a non-Jewish friend and his teenage daughters were called “baby killers” in 2024 when simply trying to attend a cultural show. If that is not inappropriate and intimidating, what is?

This past year, I witnessed attendees being called the same and worse. Some were called “whores” in front of a peaceful cultural celebration. A friend of mine was told “Hamas is coming to get you.” Another friend’s 12-year-old daughter was called a “whore” in the parking lot as she walked in to see the show.

I have spoken with Holocaust survivors who say these incidents bring back memories of intimidation they experienced as children.

This pattern is not new. In the 1980s, similar tactics were used outside abortion clinics, where young girls seeking answers were screamed at and threatened.

When I was a leader of the Jewish Student Association in the 1980s, I was told I would be shot if I attended a pro-Israel event. My daughter, at age 15, serving as a youth ambassador for our pavilion, had vile words yelled at her during public appearances—something that has since happened to most of our ambassadors.

Last year, while I was guiding a bus tour, someone shouted hate at me in front of a pavilion (not the Israel Pavilion) simply because they recognized me. Over the past two years, I avoided wearing anything at Folklorama that identified me with the Israel Pavilion—including my usual small Israeli flag pin—because I did not want anyone to assume I was being political. My guests were not impressed, but of course I did not respond.

Coordinators from other pavilions have told me they believe protests should not be allowed outside any pavilion. Ambassadors from the Israel Pavilion also told me about a VIP guest at another pavilion who shouted hateful things at them in 2024. I know the situation was handled by that pavilion. Even so when I attended that pavilion the next night, and not as a member of our community, the coordinator pulled me aside, apologizing again to our ambassadors. While incidents do happen at other pavilions, they happen every single year to ours and to people from my community.

The Jewish community is accustomed to intimidation and scare tactics—but we should not have to be. And based on my interactions with the wider public, most people agree.

Although these issues have recently affected my community more directly, they can impact anyone. This bylaw will protect Muslims, people from countries some may object to, LGBTQ2S+ communities, and many others who have been targeted by protests in front of sensitive locations.

The bylaw is fair and reasonable. It allows protests in most public spaces. If people want to yell hateful things, they can do so on Portage Avenue, or in front of the Legislature or City Hall. If someone opposes vaccines, they should protest at the Health Minister's office or an MP's office—not outside hospitals. If someone objects to the existence or actions of LGBTQ2S+ people, they should direct their anger at legislators—not at churches or community centres. If someone dislikes Jews but wants to frame it as being "about Israel," they should not scream outside buildings with "Jewish" or "synagogue" in their name. They should speak to government.

I will close with two more points in support. The Government of Canada has indicated it may pass similar legislation. This does not mean you should not act. Rather, it shows that the federal government recognizes the same problem. Your own research notes at least five other cities that have passed similar laws, demonstrating that this approach is reasonable, balanced, and legal.

Please pass this bylaw and protect our citizens. Protecting the public is one of the most important responsibilities of government.

Thank you,

Avrom Charach

Executive Policy Committee, City of Winnipeg
Cc: Councillor Markus Chambers, St Norbert-Seine River.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of a "Safe Access to Vulnerable Infrastructure" By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

Peaceful dissent is a fundamental and essential part of the political process.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I believe that this by-law would not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely restricted. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

In particular, the proposed ByLaw targets traditional sites of political protest: City Hall; the Legislature grounds; University campuses. If we cannot mount protests there, where can we make a meaningful protest?

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Thomas Kucera,
Fort Richmond

Dr. Yaser Al Mtawa
Faculty Member at the University of Winnipeg

Re: Item. 7. ‘Safe Access to Vulnerable Infrastructure’ bylaw

Dear Executive Policy Committee,

I’m writing today as a resident of Winnipeg and constituent in River Heights to ask you not to approve the Safe Access to Vulnerable Infrastructure By-Law. This bylaw is overbroad and would restrict every Winnipeggers’ rights to freedom of expression and assembly, as guaranteed by the Charter of Rights and Freedoms.

I have lectured on human rights at the University of Winnipeg, University of Manitoba, York University, and George Brown College in Toronto and one thing I emphasize to students is that many of the positive social programs or policies that we take for granted in Canada, such as the right of women to vote, the right not to be fired for your sexuality, the right to be free from discrimination in housing because of your race, were not always the case. Those rights were won through the active participation of people in advocating for their rights, including through protests and rallies, protests that were often ‘not permitted’ or even viewed as ‘nuisances’ by those in power at the time. If in place in the 1910s, or 1940s, or 1960s, this bylaw would enable police and bylaw officers to fine the brave women and men who stood up for their rights against injustice and prevent them from expressing their objection and disapproval to the ideas and actions of those who would deny them rights.

Laws to prevent intimidation and violence, or discriminatory or hate-motivated speech and acts already exist. It is not clear why this bylaw would be entertained by the City except to lower the bar for enforcement, and by doing so, unfairly and unjustly curtail Charter-protected democratic expression and assembly. The Canadian Civil Liberties Association is challenging a similar bylaw in Vaughn, and the court process is ongoing. Approving the bylaw opens up the City to the potential of legal challenges, and the distinct possibility that the bylaw will be ruled unconstitutional when the Court decides the issues in the Vaughn case.

Recent events in our sister city of Minneapolis show the terrible consequences of government restrictions on freedoms. In Canada, we pride ourselves on our freedoms, even as we must recognize that we have not always lived up to the ideals in the Charter. Passing this bylaw would be a clear step backward for the City and I urge you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Yutaka Dirks

Dear Executive Policy Committee,

I am writing today to express my opposition to the proposed “Safe Access to Vulnerable Infrastructure By-Law.”

This is an anti-democratic policy. Protest, public debate and gathering are essential for a healthy functioning society.

While I understand this proposal does not ban protests outright, it essentially bans them in most of the locations where protests are most often held. Location is paramount to the entire concept of the right to protest. Cultural, religious, educational, healthcare and community institutions are very often the site of political activity and therefore people should be free to express their opposition or support at these locations. While it is important that harassment and intimidation are curtailed, there are already laws in place to address those problems. And while peoples access to these institutions should be maintained, the restriction of access during protests has not historically been an issue in Winnipeg.

This proposed bylaw is also discriminatory toward low income and marginalized communities as it is often on behalf of these groups that protests are held. In addition the punishment of a fine impacts low income people more harshly than others, including the proposed administration fee needed in order to appeal convictions.

Policies like this contribute to the ongoing polarization and isolation of people and groups in our society. Shutting down public spaces to debate and conversations and limiting people’s ability to gather as a community will lead to a less engaged and less empathetic public discourse as people further retreat to online spaces where nuance and compromise do not thrive. If we as a community want to resist hatred and chaos as some claim this policy is designed to combat, then we need to foster a healthier society where people are free to express themselves as well as listen to others without fear of suppression.

The last point I would like to make is to highlight the absurdity of the fact that under this bylaw people would not be able to protest next to the “Bloody Saturday” sculpture in front of the Pantages Theatre. Winnipeg prides itself on the courage of the general strike. Our identity as Winnipeggers is derived from the protest and actions of 1919, which would have been outlawed under this policy. This cannot be allowed to pass. Please reject this bylaw.

Thank you for your time.

Signed,
Arthur Antony

February 13, 2026

To the Executive Policy Committee of Winnipeg,

Re: Safe and Vulnerable Infrastructure By-law

I am writing in support of Agenda Item #7 at the February 17, 2026 EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. A culture of permissiveness has grown around the expression of hate towards identifiable groups over the past two years. Locally, anti-Israel protesters have routinely positioned themselves outside of a Winnipeg Jewish community centre, daycare and school complex. As I have personally witnessed and as covered widely by local media, these people customarily carry signs and shout dehumanizing slogans depicting Jewish Israelis as garbage, diseased, and deliberate killers of children.

The location of these protests alone highlights their true intent. A Jewish community centre is not the Israeli or Canadian embassy, nor is it the office of any Canadian Members of Parliament. A Jewish community centre, school or daycare is, of course, not in a position to influence Canadian foreign policy. Protests outside locations such as this—particularly where the slogans act to dehumanize an identified group of people, have one obvious purpose: to intimidate the individuals and families who attend this centre. The location of these protests also underscores a popular pretense where “anti-Zionism” is often used as a dishonest placeholder for antisemitism. It would be inconceivable for a local Jewish group to protest against the terrorist entity Hamas outside of a Muslim community centre or to imply that all Muslims are responsible for the horrors perpetrated by Hamas and, if that ever happened, I would hope that the authorities would put a prompt end to it.

As a forensic psychologist and academic in the field of violence prediction and prevention, I would also highlight more than 50 years of research indicating a causal link between dehumanizing a group of people and the commission of violence towards that identified group. Targeted violence does not happen out of nowhere. It occurs through a process of building grievances and hate and this process is facilitated by making human beings appear to be less than human and, perversely, responsible for the hatred directed against them. When cultures develop that make the expression of hate permissible and local authorities are unable or unwilling to address this, violence becomes predictable. Historical examples include the Nazi Holocaust and the Rwandan genocide. Recent examples include numerous acts of violence in Canada, the United States, Europe and Australia against Blacks, Indigenous peoples, LGBTQ individuals, Latinos, Asians, Muslims and Jews. The Bondi Beach mass murder of fifteen Jewish individuals is a particularly salient recent example with personal resonance for me. It highlights that, even in Western societies we like to consider modern and civil, these events are possible and our families are not as safe as we might have previously assumed.

The Safe and Vulnerable Infrastructure By-law is an important measure, not just for protecting the rights of diverse individuals to live in a civil society free from intimidation based on their identity. It is also important for preventing a culture of intolerance and targeted violence against citizens of this community.

DR

THE UNIVERSITY OF WINNIPEG

Dr. Erin Millions
Department of History
University of Winnipeg
515 Portage Avenue
Winnipeg, MB R3B 2E9
[redacted]

13 February 2026

Dear Executive Policy Committee:

I am writing in response to Agenda Item: #7 Safe Access to Vulnerable Infrastructure By-law. As an historian of Canadian and Winnipeg histories, I am deeply concerned about the impact of the proposed bylaw on Winnipeg's long history of and on-going engagement with civil protest. Winnipeggers are leaders in forging and protecting the rights of Canadians. Winnipeg's histories of protest include the 1914 Mock Parliament in support of the women's vote, led by Nellie McClung and others, and labour action including the establishment of the first Black labour union in North America in 1917 (Order of Sleeping Car Porters) and the 1919 Winnipeg General Strike.

Protest and civil action are fundamental to what defines Winnipeg as a city. Portage and Main is not just a key intersection in Winnipeg, but a space whose histories represent Winnipeggers' fierce advocacy on behalf of the rights of all Canadians. Winnipeg was a key site of the Idle No More Movement in 2012 and, in more recent years, Winnipeggers have gathered to show support for Black Lives Matter, Trans Rights, and families impacted by the epidemic of Missing and Murdered Indigenous Women and Girls. Every year, thousands of Indigenous and non-Indigenous Winnipeggers gather on September 30th to walk in commemoration of the National Day for Truth and Reconciliation.

Winnipeg is also a Human Rights City, reflected in the institutions, committees, and educational initiatives in this city that center human rights. This includes the City of

THE UNIVERSITY OF WINNIPEG

Winnipeg's own Human Rights Committee of Council (HRCC). The 2023-2026 HRCC Strategic Plan identifies "the establishment of Winnipeg as a Human Rights City" as one of its four core mandates.[1] The right to protest is a fundamental human right, protected in Canada by the *Charter of Rights and Freedoms*. Amnesty International contends that:

> [redacted]**bility to protest safely is an issue that intersects with the right to be free** [redacted]**ion. People who face inequality and discrimination, based on their age, race, gender identity and many other factors, face even more dangers to their right to protest. It is crucial that everyone can protest safely and without discrimination**.[2]

Others are better positioned to speak to the legality of the proposed bylaw and the existing laws that already allow police to address unlawful measures. As a historian and regular participant in civil action in Winnipeg, however, **I argue that the overly-broad nature of the proposed bylaw contravenes the long histories of civil action that are fundamental to who we are as Winnipeggers. Moreover, the proposed bylaw transgresses the City of Winnipeg's stated goal of establishing and promoting Winnipeg as a Human Rights City**.

Sincerely,

Dr. Erin Millions

Submission to the Executive Policy Committee
Re: Safe Access to Vulnerable Infrastructure By-law

Dear Members of the Executive Policy Committee:

I am writing today not only as the President & CEO of the Jewish Federation of Winnipeg, the representative body of Winnipeg's Jewish community, but as a concerned citizen, to voice my strong support of the proposed Safe Access to Vulnerable Infrastructure By-law.

This legislation is necessary and, frankly, long overdue. It reflects values most Winnipeggers, and by extension Canadians, share: that people should be able to gather in community spaces without being threatened, harassed, or intimidated.

What happened at Folklorama last year made that reality impossible to deny.

At the Israel Pavilion, hosted at the Asper Jewish Community Campus, families arrived expecting music, food, and celebration. Instead, they were met with a screaming mob outside the entrance. Guests, including children and seniors, were confronted with chants glorifying violence, young female Israeli dancers were threatened with rape, sexualized slurs were shouted at women and girls, and crowds repeatedly yelled "Hamas is coming for you" at people entering the building.

Amplified sounds of gunfire and screaming were blasted into the evening air. This occurred at the doors of a community centre that houses a fitness facility, early childhood programs, cultural programming, and serves as the beating heart of Jewish life in Winnipeg.

This was not an abstract debate, nor was it peaceful dissent. It was intimidation directed at people as they entered a community space – and this is just the tip of the iceberg.

For years, when the Campus has hosted politically charged speakers or cultural programming connected to Israel, such as the Israel Pavilion, it has attracted

protests. And, in that time, demonstrations have escalated into rhetoric and behaviour designed to unsettle and make people feel unsafe.

The Campus is home not only to Jewish communal organizations, but also to a daycare serving toddlers, Gray Academy, a Jewish day school educating students from Junior Kindergarten through Grade 12 (approximately four to eighteen years old), and the Rady Centre fitness facility, whose patrons represent Winnipeg's diverse communities.

On any given day, toddlers are arriving for childcare, four-year-olds are beginning school, teenagers are in class, seniors are attending fitness programs, and families are gathering for cultural and recreational activities. Jewish and non-Jewish patrons alike have had to navigate shouting crowds at the doors of a building that is meant for childcare, learning, and community.

Our community's relationship with the Winnipeg Police Service is very positive. They have been there to protect our community spaces and synagogues, thereby ensuring the safety and security of our community members and the most vulnerable populations. But their presence, while appreciated, cannot be the only answer. Officers can separate groups and monitor, and respond when lines are crossed. But families should not have to run a gauntlet of threats and antisemitism to enter a building. Children should not have to ask their parents why strangers are yelling threats at them. Seniors should not feel their safety is in question while walking into a fitness class.

That is why clear, enforceable boundaries are of great importance.

This by-law does not silence protest, nor does it outlaw disagreement. It does not prevent individuals from expressing their political views. What it does is establish distance and draw a line between expression and intimidation at the doors of community spaces.

Other jurisdictions in Canada have already recognized the need for protective buffer zones around places of worship, schools, and community facilities. Winnipeg should not lag behind in taking this important action. Manitobans deserve the same basic protections.

Opposition to this by-law will likely frame it as an "attack on free expression". It is not. The right to protest does not include the right to harass families at the entrance of a community centre. It does not include the right to threaten children. When intimidation is allowed to take root at its doors, the harm is not limited to one community. It undermines confidence in the basic promise that we can gather safely in our own community spaces.

This by-law is a measured and logical response to a documented pattern. It reflects careful consideration of similar measures adopted elsewhere. It provides clarity for law enforcement and reassurance for families. Most importantly, it signals that Winnipeg will not accept intimidation as the price of participation in community life.

Members of this Committee have an opportunity to make a powerful statement: that hate has no place at the entrances of our community spaces.

We urge you to support this by-law as a practical step toward protecting safe access, dignity, and shared Canadian values in our city.

Respectfully submitted,

Jeff Lieberman, President & CEO
Jewish Federation of Winnipeg

13 February 2026

Dear Mayor Gillingham and Members of the Executive Policy Committee of the City of Winnipeg:

We are writing to you in regard to the "Safe Access to Vulnerable Infrastructure By-law" proposal to be discussed at the February 17th meeting of EPC. We write as professors, instructors, and academic librarians who work in Winnipeg's post-secondary institutions and as members of the Winnipeg community.

The proposed by-law conflicts with the mission of post-secondary educational institutions. It threatens to chill political speech beyond the University and violate Charter-protected rights to free expression and peaceful assembly.

The proposed by-law bans any obstruction of traffic or use of sound amplification without a permit from the city, and includes post-secondary institutions as sites governed by the ban. Moreover, it authorizes substantial fines for non-compliance (up to $5000 for repeat offenders). As a result, the ban would effectively block many members of our University communities from engaging in common forms of speech on our campuses, including teach-ins or other types of rallies.

Freedom of expression is essential for the mission of post-secondary educational institutions. Free debate and discussion—including peaceful acts of protest—allow for the exchange of ideas that is required for the discovery, preservation, and dissemination of knowledge. Restrictions on protest also limit the University's ability to prepare students to engage in public debate and respond to intellectual challenges. The proposed by-law would undermine this freedom of expression in a way that would compromise these core missions of the University.

The proposed by-law also threatens to substitute the judgments of city officials considering whether to permit activities that involve amplified sound or traffic disruption for those of University authorities. Campus communities have had long, ongoing, and vibrant debates around what free expression looks like on our campuses, and are best placed to continue those discussions and decisions under collegial governance processes. And the University's ability to effectively pursue and share knowledge requires maintaining distance from government interference, which is threatened by the proposed ban's imposition of political interference on University matters.

We are especially concerned about the proposed by-law's application to post-secondary institutions. But we also have serious concerns beyond our campuses. We believe the by-law will chill public expression, and penalize people for exercising their Charter rights to free expression and peaceful assembly. We also fear that the by-law may be unevenly applied to limit speech and assembly that government officials or enforcement agents disfavour.

Finally, this proposed by-law goes well beyond what has been enacted (and legally challenged) in other jurisdictions. For example, by-laws in Calgary and Toronto, to which it has been

compared, apply to far fewer spaces (childcare centres, places of worship, or schools, in Toronto; libraries and community centres in Calgary). Neither jurisdiction imposes restrictions on post-secondary educational institutions. Nor do they limit amplified speech or disruption of traffic. Instead, they simply restrict conduct that limits people's access to public space, discourages or intimidates people from accessing those spaces, or targets people on the basis of Charter protected characteristics. The restrictions proposed in the by-law before the EPC significantly exceed these restrictions.

As academic faculty, we call on the Executive Policy Committee to vote against the proposed by-law.

Sincerely,

Professors, Librarians, and Instructors from University of Manitoba, Université de Saint-Boniface, University of Winnipeg

Public Hearings Before Committee of Human Rights

of

Winnipeg City Council

Should the IHRA working definition of antisemitism, designed to stimulate discussion, be converted into Policy?

What is the relevance to Manitoba and Canada Today - February 2026?

Respect to all delegates for their presentations;
to Committee Members;
to City Council for providing a democratic forum for citizen participation.

The IRHA - International Holocaust Remembrance Alliance Working Definition of antisemitism has been passed into policy by Federal and Provincial governments and organizations throughout Canada.
On March 27, 2023, the City of Winnipeg, Human Rights Committee held the only public hearings in Manitoba on this working definition conversion to policy, permitting citizens of opposing views to speak.

Five Jewish proponents, two of whom were full-time lobbyists, and a Federation Church representative, had been given time at the Human Rights Committee to ask that this working paper be converted into city of Winnipeg policy. Hearings had to be postponed. Word spread to the public. Thirteen citizens, seven Jewish, six of diverse backgrounds, submitted requests to speak in opposition. The larger numbers required Council Chambers. Deputy Mayor Markus Chambers, assisted by City Clerk Rebecca Ford, ensured a respectful and democratic process (YouTube https://www.youtube.com/watch?v=rtdvczD1J1I).

The conclusion of the hearings pointed to action. Neither the City nor any other body of government has taken up the call to action. This synopsis of the four hours of hearings comes from a belief that four years later, the recommendation is critical and can assist in clarification of a tangle of conflicting identifications, strengthening democratic values.
Synopsis of opposing different identifications p. 3-4;
synopsis of presentations p. 5-15;
glossary of organizational identifications of delegates p. 16-17.
Manitoba situation today p. 18

***1** *Kenneth Stern, o*riginator of the Working Paper on the IHRA, Director of the Bard Center for the Study of Hate and Human Rights project, Author, and Attorney**:** "Passing this document into policy by institutions and governments resulted in the misuse of a document created for academic discussion. The IHRA as a policy serves as a tool aimed at shielding Israel from resistance to its oppressive form of racial governance and, following its recent war on Gaza, from accusations of genocidal violence." *Antisemitism and Zionism: The Internal Operations of the IHRA Definition, 2024* Kenneth Stern identifies as a Progressive Zionist.

Different Identifications

Opponents: While the main definition is general and innocuous, the IRHA's focus on Israel is counterproductive in combating racism. We should be concerned about all discrimination and hate against all citizens. What does discrimination look like to different targeted groups? Working together is more successful to stop targeting of any group.

Proponents: Traditional anti-Semitism is the denial of the rights of Jews to live as equal members of society. The new mutation of anti-Semitism is a denial of the state of Israel as having the right to exist as an equal member of the nations. The IHRA was adopted as policy by the Federal government, the Provincial government, and dozens of organizations. It does not criminalize criticism of Israel or Jews. It stands against hate of all kinds. "From River to the Sea" is a code for the annihilation of the Jewish state.

Opponents: Israeli law states: "Only Jews have the right of self-determination." Palestinians, Indigenous to the land, do not have the same rights as Israelis. Segregation is based on race. Proponents of IRHA as policy state "claiming that the state of Israel is a racist state" is antisemitism. If I am aware of what is being done to Palestinians, and state that, I am considered antisemitic, as are Amnesty International and other human rights organizations. Calls for equality to all inhabitants between the River and the (Mediterranean) Sea is not antisemitic. It is a cry for freedom from military occupation.

Proponents IHRA is an educational tool; Criticisms of Israel are not anti-semitic. Words "context" and "may" are there. If people choose to think things are anti-semitic that is not what it says. It may be used to explore if the person has anti-Semitic intentions. It does the exact opposite of chilling free speech. Comparing the policies of modern-day Israel to the Nazi's is anti- semitic. This idea that it affects free speech is not true. It can be or may be anti-Semitism. It is up to the organization (that adopts it) to determine if it is antisemitism.

Opponents This is out of step with everything I know about racism. A good definition is clear. This IRHA definition states: "a certain perception of Jews that may be expressed as hatred of Jews". Imputing motives may be harmful. I may be nervous with a comparison of Israel to Nazi's but think it's okay to ask the question. The ambiguity of this sets up an impossible situation. IHRA is an open-ended policy for harassment and intimidation, a muzzle on necessary public discourse. For more than 50 years, we who spoke out for Palestinians were targeted, called "Self-hating Jews," "Traitors," and "So-called Jews". Anti-Palestinian racism is well documented.

Proponents You have to be a Jew to understand the pain of antisemitism. It is the most prominent form of religious hatred and bigotry. The greatest atrocity in the history of mankind is what was done to the Jews. If there is a perception of the Jewish community of antisemitism, it is antisemitism. We need court hearings, prosecutorial actions, hate crime statistics, and help in funding.

Opponent As a Palestinian witnessing our relatives and the trauma being committed I worry about my daughters. It would contribute to the ongoing oppression of Palestinian people. In school, my daughters' safety is at risk.

———————————————————————-

Proponents were asked, "How would you address the concern that a person who has criticism of Israel is not stigmatized and vilified? How can they be heard, recognized, and validated? Would you be willing to remove the seven clauses that the opponents find objectionable?"

The answer to these questions was a unanimous,**"No".**

1. Opposed: **1:56 - 13:00 Harold Shuster, Independent Jewish Voices (IJV)**
As a Jew, I object to a policy statement preventing political criticism of another country. This policy silences students and staff of educational institutions. The Jewish community cares about human rights for all citizens — including Palestinians. We cannot protect ourselves from anti-semitism without also condemning racist hatred against all people and religions. Israel is granted exceptional status and is protected from sanctions. IHRA is opposed by 40 human rights organizations, 600 academics, the BC Association of Indian Chiefs, and the United Nations.

2. Opposed: **16:33 Norman Rosenbaum, Civil Rights & Family Lawyer, United Jewish Peoples Order (UJPO)**
Manitoba has a Human Rights Code protecting political dissent. The IHRA definition of antisemitism is vague and contradicts the Charter of Rights and the European Union Charter. It is impossible in its ambiguity. It silences dissent, triggers punitive actions, and sets up the community for conflict and litigation. There is a chilling effect on public discussion in Manitoba.

3. **Proponent: 27 min Richard Marceau, Lawyer and Politician. former Member of Parliament/ Committee for Human Rights, Quebec Canadian Israeli & Jewish Affairs (CIJA) *2**
There is a criminal code defining hate speech and crimes. IHRA was adopted by the Canadian government in 2021. It can guide policy and cannot have criminal charges. It does not criminalize criticism of Israel or Jews. It stands against hate of all kinds.
The stated examples to the IHRA serve as illustrations of what is antisemitic. It is simply not true that the definition has been used to stifle critics.

---

*2 Canadian Israel Jewish Alliance (CIJA) is a registered lobby for the Jewish Federation. Full time staff use: "Strategic, based on research, and analysis" with "wide experience in conducting missions to Israel.

4. Proponent: 39-51 min Gustavo Zentner, President Jewish Federation of Winnipeg

"We are talking of human rights. There is consensus among the Jewish community, the vast majority. We must accept the views of the community that is targeted. If there is a perception of the Jewish community of antisemitism, it is antisemitism. You can't recognize things if you don't know what antisemitism is. These statements define it. These things hurt us and relegate us to second-class citizens. That is why our provincial government recognized us. It does not impede free speech. "

Winnipeg is a city of many cultures. There is consensus among the majority of the Jewish community. We must accept the views of the community that is targeted. If there is a perception of the Jewish community of antisemitism, it is antisemitism. You can't recognize things if you don't know what antisemitism is. These statements define it.

The Jewish community has a respectful and engaged communication with the Arab and Jewish communities. We celebrate and build the most vibrant and multicultural city. We stand up together against Islamaphobia. 349 universities have come together in 34 countries to debate this openly.

---

*2. The assertion that this view represents the majority is challenged by Jewish individuals and Jewish groups. JFW is not an elected body. The Canadian Jewish Congress, a voting body, is now defunct. When Shimon Fogel was appointed Director of the newly formed Canadian Israel Jewish Alliance, a registered lobby group for the Jewish Federation, he asserted, "The distinctions between domestic agenda and Israel have been blurred so much it is impossible to tell one from the other." This left out dissenting voices in the Jewish community who also embraced their Jewish heritage and values of their culture. Dissenting voices of Jews are sometimes referred to as "traitors," "so-called Jews," and "self-hating Jews" by the group who identifies Israel as their birthright. The group who views Israel as their birthright is sometimes referred to as "the Establishment" by those who do not accept Israel's treatment of Palestinian people.

5. **Proponent: 51-1:10: Belle Jarniewski, Jewish Heritage Centre of Western Canada.**
IHRA may be used to explore if the person has anti-semitic intention. It is an educational tool. No one has ever been accused of a crime because of the IHRA definition. It does the exact opposite of chilling free speech. It shows we can criticize Israel. City councils can consider whether things that are said are legitimate if they pass the policy.

Criticisms of Israel are not anti-semitic. Words "context" and "may" are there. If people choose to think things are anti-semitic that is not what it says. You cannot sue anybody over a policy. It is never meant to be turned into legislation. Comparing the policies of modern-day Israel to the Nazi's is anti- semitic. This idea that it affects free speech is simply not true. It can be or may be anti-semitism. ***3**

6. Opposed: 1:16 - 1:30 Dr. Joel Kettner, Professor Medical School University of Manitoba; Former Chief Public Health Officer, Province of Manitoba, Jews for Social Justice, Winnipeg Chapter, United Jewish Peoples Order

My focus is on how to stop racist attitudes in health care systems. This is so out of step with everything I know about racism. A good definition is clear. What people do, what they say, and what is the impact on people. This IRHA definition states: "a certain perception of Jews that may be expressed as hatred of Jews."

Laws exist; definitions exist. Please don't pass this definition. Imputing motives could be more harmful than helpful. Hatred is not a measure. I might be nervous that someone is drawing comparisons of Israel to the Nazis…but I think it is okay to ask the question. Let's do something to avoid racism. Maybe we can strengthen, not create distractions. Go back and get some other people involved to look at "can this be improved for the city of Winnipeg".

---

*3 Policy sets the Direction. Law is the enforcement.

7. **Proponent: 1:32-1:42 Adam Levy Public Relations Director for Jewish Federation of Winnipeg. Investigator of complaints of anti-semitism.**

Jews have a long and painful history of discrimination. You have to be a Jew to understand the pain of anti-Semitism. Anti-Semitism is the most prominent form of religious hatred and bigotry.
We need court hearings, prosecutor actions, hate crime statistics, and help in funding to civil society organizations and human rights organizations to counter anti-Semitism. Those are just a few examples of the way the IHRA definition could be used. ***4**

8. **Opposed: 1:42 - 1:52 Wendy Boyd, Canadians for Justice and Peace in the Middle East, Independent Jewish Voices; United Church, Multiple Human Rights Groups**

My personal experience has been a long history of Palestinians as a people facing difficulty. Academics or people anywhere in Canada declaring support for Palestinians also faced difficulty.

It's a horrible, terrible shame. Jews who criticize Israel face prejudice. IHRA sets a double standard. Israel compares to South Africa in its past behavior and policies. The media limit coverage of the Israeli government. I do not hear a voice of Palestinians. I believe people are afraid to state the situation of Palestinians.

9. **Proponent: 1:53 - 1:58 James Christie, Federation of Christian Churches, former Dean U of W faculty of theology, Ridd Institute for theology**

IHRA supports dialogue among religions to promote peace. The IHRA can be a working definition as a diagnostic tool intergovernmentally. IHRA identifies and exposes words and actions that can descend into antisemitism. It can be used as a template for confronting religious bigotry.

***4** Proponent Levy contradicts the statement of Proponent, Delegate 5 Jarniewski "never meant to be turned into legislation". He states conversion to policy would provide this. Policy guides law.

10. Opposed: 2:00-2:12 Dr.Mark Etkin, Psychiatrist, Independent Jewish Voices

I am a Jew since birth. Proponents of the IHRA do not speak for me. Palestinians are kept apart from Israelis and do not have the same rights as Israelis; segregation is based on race. Israel fits the definition of an apartheid state. The IHRA specifically states that "claiming that the state of Israel is a racist state" constitutes antisemitism. By this criterion, Human Rights Watch and Amnesty International are labeled as antisemitic, as are many other civil rights organizations, both inside and outside Israel.

The IHRA is a muzzle on necessary public discourse. Muzzling is its purpose, and the reason it is being pushed through. The IHRA is a travesty of truth and justice.

11. Opposed: 2:12 Diane Zack, Independent Jewish Voices, United Jewish Peoples Order

I opposed antisemitism all my life. It is ludicrous to have to defend my identity because I became aware of the Palestinian people. How could Israel have been built on the destruction of Palestinians' homes?

For more than 50 years, we who spoke out for Palestinians were targeted, called "self-hating Jews" and "traitors." In social circles, defenders of justice and equality on other fronts did not speak up. The mainstream Jewish community had blinders on. Jewish opposition to Israeli policies is growing in North America. An increasing number of Israelis are active in struggles for justice. This IHRA definition states that taking a just stand against Israel's policies is antisemitism. It stands against rights and justice for Palestinians.

12. Opposed. 2: 23 Allen Mills, Retired Professor of political science, University of Winnipeg

My experience proves the IHRA is, in practice, an open-ended policy for harassment and intimidation.

A debate held at the U of W five years ago between Palestinians and a rabbi was hard-hitting toward both sides. One of the proponents of

the IHRA, who is here today, then responded by holding a private meeting, lobbying the head of the U of W to declare the event anti-semitism. The University came out with a declaration that it was anti-semitic. I looked at the video of the event. I approached that proponent and asked if the person would sit down with me and show me what part of the debate (which was on video) was anti-semitic. The proponent would not. I asked the University head and asked the question. They did not reply.

Recently on global news, after the burning and pillaging of Huwara, a Palestinian village, an Israeli newspaper described the Israeli settler attack on the village as a violent pogrom against Palestinians as racist. A bloodied Israeli protester declared, "This is a dictatorship ." The IHRA definition tangles criticism of Israel with antisemitism.

13. Proponent: 2:32 Irwin Cotler, Ontario: former federal Justice Canadian Government.

IHRA is against anti-Semitic stereotypes. The new anti-Semitism is a denial of the state of Israel as having the right to exist as an equal member of the nations. In my experience a Jewish student on campus who considered himself leftist felt he was seen as representing Israel and felt marginalized. The IHRA working definition is intended to be protective of free speech, including harsh criticism of Israeli policy.

14. Opposed 2:50 Jane Karpa, long term citizen of Winnipeg

The charter of rights allows me to respectfully criticize. My partner is a Jew. I oppose antisemitism. I was a believer in the good of Israel. Over time, I learned about Palestinians living under occupation and policies that have turned Israel into an apartheid state.
IHRA manipulates and gaslights us into believing criticism of Israel is antisemitic. Israel can be omnipotent without accountability. I am critical of the treatment of Palestinians living in Israel under occupation.

15. Opposed 2:53 Rubin Kantorovich, United Jewish Peoples Order

The Jewish ethnic community has a diversity of views, as do all ethnic groups and religions. My father was a Holocaust survivor in Poland. His family was sheltered by a Catholic Polish family, who would have been executed had they been discovered.

Hate laws exist. We should be concerned about all racism and hate against all citizens. In 2017, Israel passed a nation-state law: "Only Jews have the right of self-determination". Seven out of ten articles in the IHRA are about defending Israel from criticism. Yet, the Israeli defense minister declared, "The village of Huwara should be wiped out." Just as Hitler called for the extermination of Jews, this Israeli minister called for the extermination of Palestinians. If I condemn this, I am declared anti-Semitic.

IRHA is not in the interests of citizens. It is used to suppress the rights of Palestinians in the occupied territories. At the outset of COVID, Israel announced it would not be distributing vaccines to the Palestinians. MP Leah Gazan, a Jew and Indigenous woman by birth, and MP Charlie Angus criticized this. Bnai Brith smeared these two MP as antisemites. Imagine if the Canadian government announced it would not distribute vaccines to all Indigenous peoples!

UJPO rejects IHRA, the deception of Bnai Brith, and the violation of international laws. We do not need the Israeli lobby to educate us.

16. Opposed 3:03 David Weller, former Special Needs Teacher, Independent Jewish Voices

I advocate for Palestinians and all other people's human rights. Jews and other citizens believe in human rights for all people. We are not a minority of the Jewish community.
IRHA is biased and silences criticism, especially mentioning Israel. Antisemitism is discrimination, prejudice, hostility, and violence against Jews, as stated in the Jerusalem Declaration.
Supporting equality for all inhabitants between the river and the Mediterranean Sea is not antisemitic. This calls for the self-

determination of Palestinians, whether in two states, a democratic state, or any other form. It is not, as Mr. Cotler said, a God-given right for the state of Israel to exist as only a Jewish state. ***5**

Since the University of Michigan adopted the IRHA as policy this past month, a booth was closed down because it contained literature critical of Israel. The representatives of CIJA said, "Not my problem." If you adopt it, it becomes your problem to decide, not theirs.

17. Opposed 3:11 Susan White, International development for 40 years, Anti-racist educator, Lecturer of Religious Studies at University of Winnipeg, Independent Jewish Voices, CUSO International

I have been an international anti-racist activist for 40 years, including 15 years in South Africa during their liberation movement. I've worked with African and Caribbean groups fighting for independence from colonialism. I was imprisoned for being a delegate to Grenada after the US invasion. My partner is from the Black community and has been an activist for 40 years. This shows my deep understanding of racism, including anti-semitism. Racist rhetoric and actions target many people. Working together is more successful than as separate interest groups**.**

While the main definition is general and innocuous, the IRHA's focus on Israel, exemplified by 70% of its examples, is counterproductive in combating racism against all groups experiencing attacks. Anti-Palestinian racism is well documented. You might be wondering, "If I do not pass this proposal, will I be considered anti-semitic. It is hard to have the courage. Please do not adopt this as policy."

---

*5. Observer, Indigenous filmmaker Darryl Nepanik, noted a quiet incident during Delegate #16 Weller. One of the four male proponents seated behind Delegate #2 Rosenbaum, said to another, "That so-called Jew!" Mr. Rosenbaum turned, quietly stated, "That person is just as much a Jew as you are." One responded quietly, "I didn't say that."

18. Proponent: 3:22 Shimon Fogel, CEO of Canadian Israel Jewish Affairs

Anti-Semitism is on the rise exponentially. The IHRA definition has been adopted by many governments, the Province of Manitoba, and the Federal Canadian government. Assaults on the Jewish state are unending. "From River to the Sea" is a code for the annihilation of the Jewish state.

The IHRA definition has been adopted by dozens of nation-states, including the Province of Manitoba and the Federal Canadian government. No one gets to define anti-semitism other than the Jewish population themselves.

Hate will not be legislated away. Education is the answer. Do the right thing and adopt the policy of the IHRA.

19. Opposed: 3:27 Bassam Hozaima, Canadian Palestinian Association of Manitoba,

I was born in a refugee camp in Gaza. I am very troubled and urge the committee to defeat this motion.

My grandparents were driven out of their homes in 1948 and forced into the Gaza Strip. We lived in inhumane conditions in the open-air prison of Gaza. Over the years, assaults have continued…this is only a glimpse into my story. The oppression, injustice, and trauma are my story. Atrocities are committed on a daily basis.

IRHA would defeat the idea of safety and inclusion. I would feel threatened, marginalized, and criminalized if this were to be passed, not included. I hope and pray the Committee will not pass it.

This definition would be used in the services in Winnipeg, police services would be policing Palestinians. I graduated from University of Manitoba.

I wish I could tell my story without criticism of Israel. IHRA is soft peddled as an educational mechanism. It is a wolf in sheep's clothing.

City of Winnipeg is already leading the way to combat hate. IHRA can not be separated from the examples of protection of Israel from criticism.

As a Palestinian witnessing our relatives and the trauma being committed to them, I worry about my daughters. In school, their safety is at risk. Under this definition, many Canadians would be labelled anti-semites. It would contribute to the ongoing oppression of Palestinian people.

20. 3:38 Opposed Judith Morrow, BSW, MSW, RSW, former Inner City Community Worker, School Clinician, Filmmaker, United Jewish Peoples Order, Canadians for Justice and Peace in the Middle East (CJPME), Amnesty International

I am a Goy, a not nice word for a non-Jewish person. Racist comments about Palestinians are common. Some who stand for human rights in other areas but continue to describe in terms "Us" against "them": Israel is a "beacon of light surrounded by darkness", or refer to Palestinians as 'Terrorists'.

I travelled to Israel more than 50 years ago, stayed in the "New City" of Jerusalem with an Israeli family. I explored the "Old City," met a Palestinian Christian. A folkloric dancer who created a folkloric dance group of Israelis and Palestinians. He and his Muslim friends guided me through sacred spaces and beautiful architecture. His family, eight people in one large room, slept on benches at night, their living space in the day quiet and beautiful. His uncle lived in a room the size of a large closet. I didn't understand the problem. He walked outside of Jaffa Gate. Four Israeli youth walked by, said something insulting to me. He walked over and spoke to them. They knocked him to the sidewalk, with a swelling black eye. In Canada, now a grandfather, he and his Lebanese wife founded a church to help refugees. Fifty years later, they still encounter harsh suppression of their human rights in Ontario. Incidents such as: wiretapping of their phone, witnessing a youth waving a Palestinian flag on a highway in front of their church being immediately surrounded by police cars persist.

We're only learning the history of Canadian Indigenous peoples. Outside these doors, the effects are visible. People die on our streets. You, the human rights committee, understand racism. You feel its demeaning impacts. Culture focused only on our own view of the world leads to racist, bad things, ethnocentric thinking. "Us" vs "Them".

Ethno-culturalism is crucial to Winnipeg. You, as community leaders, are crucial. I believe in you and your ability to succeed. Soon, I hope to see Indigenous people represented here.

Question from the Chair to Proponents:

"How would you address the concern that a person who has criticism of Israel is not stigmatized and vilified? How can they be heard, recognized, and validated? Would you be willing to remove the seven clauses that the opponents find objectionable?"

Response to the questions, **"No."**

3: 54 Deputy Mayor Markus Chambers

I was highly influenced by Swiss (Catholic priest and poet), Hans Kung: *"No peace among the nations without peace among religions, no peace among religions without dialogue between religions, and no dialogue between religions without investigation of the foundations of religions."*

More discussion needs to happen between all parties. I move that we accept the motion as information with the instruction that this committee is to work with all the groups that have attended here today for more meaningful work to continue. To strengthen its policies around racism, which includes antisemitism, Islamophobia, xenophobia, hate, Indigenous racism, anti-black racism, as well as any racism against the LGBTQ two-spirited community.

Accepting the motion as information will allow work to continue working in collaboration, with all the groups that have attended here today, for more meaningful work to continue. To a greater understanding and education of what this definition represents, and how it can be useful in all or in part in addressing the rising of antisemitism, so we can continue working in collaboration, with all the groups that have attended here today, for more meaningful work.

Glossary: Identifications of Delegates from Jewish Organizations and Others Website tour May, 2025

Opponent Independent Jewish Voices (IJV), condemns antisemitism and racism in all forms, condemns the ongoing genocide of Palestinian people and advocates for justice and peace for Israelis and Palestinians. Published handbook on the detrimental impact of the IHRA (International Holocaust Remembrance Alliance conversion to Policy) on both Jewish and Palestinian communities.

Opponent United Jewish Peoples Order (UJPO), entering its 100th year, identifies with Jewish history and culture and organizes for the protection of human rights and social justice for all. It opposes racism, oppression, and Israel's military occupation. It supports Palestinians to achieve justice.

Opponent Jews for Social Justice, a network of 63 organizations pursuing social justice from a Jewish perspective.

Opponent Canadian Palestinian Association of Manitoba ensures that Palestinian stories, voices, memories, and truths are acknowledged within the broader human rights narrative. It serves as an advocate for Palestinians in Manitoba, promoting intellectual freedom and cultural events of the Palestinian people. All are welcome to attend.

Organizations named by Opponent Delegates as informing their view: Amnesty International, United Church, Canadian University Services Overseas, Canadians for Justice and Peace in the Middle East

Proponent Winnipeg Jewish Federation supports Israel 'in every way we know' and 'all things Jewish'. Partners include the American Jewish Joint Distribution Committee and Birthright Israel Canada. Founded in 1929, the Jewish Federation of Winnipeg played a key role in the establishment of Israel. As part of its charity work, JFW funds programs that give free first-time trips to Israel to Jews and influencers. All political

parties have had members take advantage of these free trips. JFW donates to selected others and has charitable tax status.

Proponent Canadian Israel Jewish Affairs (CIJA), a registered lobby for the Jewish Federation. Full-time staff use "strategic, advocacy-based research, polling, and analysis" with "wide experience in conducting missions to Israel for Canadian influencers and decision-makers." The Quebec branch focuses on fighting antisemitism, strengthening Canada-Israel ties, and lobbying groups like Quebec's National Assembly, promoting education (e.g. IHRA adoption), and fostering business/ academic links.

Proponent Western Canadian Jewish Heritage Centre houses a research library preserving, documenting, and interpreting Jewish history; including the 'mutated' version defined by Delegate #13 Cotler, teaches groups and schools about antisemitism. Initially supported by volunteers and donors from the United Jewish People's Order (UJPO), there is no room in the schedule for speakers who show empathy to Palestinians, so identities diverge.

Proponent Federation of Christian Churches: Believes in the deity of Jesus Christ; his miraculous conception by the Holy Spirit; his sinless life; his ascension to the right hand of the Father; and his personal imminent return.

Proponent Bnai Brith Referred to by Delegate #15 Kantorovich, supports Jewish nationalism and patrols social media and mobilizes actions to protect against anything critical of Israel and supportive of Palestinians. Identifies the land of Israel as the birthright of all Jews. Does not recognize the Palestinians as a people so believes they have no the right of return.

Honest Reporting active in Manitoba, is an Israeli media advocacy group monitoring anti-Israeli news, such as support for Palestinian people or their culture. Manitoba chapter assists the above organizations by also searching online accounts to detect expressions of empathy for Palestinians or postings critical of Israel. They post news and visit individuals and heads of organizations seen as guilty of anti-Israel postings.

Current relevance in Manitoba and Canada

The Fragile Line Between Protecting Communities and Criminalizing Dissent

Prosecutorial independence is one of the quiet pillars of Canada's constitutional democracy. When prosecutors are influenced—directly or indirectly—by political actors or advocacy groups, public trust in the justice system begins to erode. Manitoba's recent announcement of partnership with the Centre for Israel and Jewish Affairs (CIJA) to train the provincial Prosecutions Branch on hate crimes puts that principle at risk. It opens the door to political advocacy, shaping decisions about who is charged and for what.

At the center of this concern is the IHRA Working Definition of Antisemitism. Created which was envisioned as a tool to promote discussion by open ended questions. References to Israel were added, and, this has been adopted by governments and institutions as if it were a legal standard. Several of its examples link criticism of Israel to antisemitism, depending on "context." Civil liberties groups, academic associations, and many Jewish organizations have warned that this ambiguity can be used to mix political dissent with hate.

CIJA is a registered political advocacy organization with clear positions on Israel-Palestine and strong support for the IHRA definition. When such an organization helps shape prosecutorial training, the line between advocacy and state power blurs. Even if prosecutors remain impartial, the appearance of influence alone undermines confidence in the justice system.

This risk becomes sharper when viewed alongside international developments. The International Criminal Court has issued arrest warrants for leaders of both Hamas and the Israeli government. Canada has pledged support for the ICC's processes, regardless of the outcomes. Yet under an expansive reading of the IHRA definition, public discussion of these same legal findings could be framed as antisemitic. A democracy cannot champion international justice abroad while chilling debate about it at home.

Proposed expansions of "bubble zone" legislation add another layer of concern. While intended to protect community institutions from harassment, these laws can unintentionally restrict peaceful political protest—especially when political events are hosted in community centers. When an event celebrates military action in Gaza, complete with promotional imagery of armed soldiers, citizens must be free to protest without fear of criminal sanction. The location of a political event should not determine whether dissent is legal.

Meanwhile, Manitobans who expressed empathy for Palestinians—sometimes through nothing more than a social media post—have faced online vilification, professional consequences, vandalism, and threats. When government policy begins to mirror the social pressure to silence certain viewpoints, democratic debate suffers.

Winnipeg's Human Rights Committee recommended broader dialogue on discrimination affecting many communities. That conversation never occurred. Instead, Manitoba moved toward a narrower, more punitive approach to speech—one that risks deepening division rather than fostering safety.

Democratic backsliding rarely arrives all at once. It comes through incremental shifts: vague definitions, expanded enforcement powers, and partnerships that place advocacy groups close to prosecutorial authority. It comes when governments decide that protecting the public requires restricting the public's voice. It comes when dissent becomes suspect.

Manitoba faces urgent challenges—homelessness, inequality, and the unfinished work of truth and reconciliation. Meeting them requires a democratic culture capable of disagreement, empathy, and open debate. It requires institutions trusted to act impartially. And it requires vigilance whenever the state's power to prosecute intersects with political advocacy.

Protecting communities from hate is essential. But it must never come at the cost of criminalizing political expression. The line between the two is thin, and it is ours to defend.

Dear Executive Policy Committee,

On behalf of the Manitoba Association for Rights and Liberties (MARL), I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that we are in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Since 1978 MARL has continued to support the rights of the marginalized in our province through education and advocacy. It is unfortunate that the present malaise of denying the weakest in our society their legal right to peacefully protest is now being proposed in our province - a province once known for its progressive stance and civil rights and liberties.

If passed, we are concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

Since 1978 MARL has continued to support the rights of the marginalized in our province through education and advocacy. It is unfortunate that the present malaise of denying the weakest in our society their legal right to peacefully protest is now being proposed in our province - a province once known for its progressive stance and civil rights and liberties. This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy.

We implore you to drop further consideration of the proposed demonstrations bylaw.

[illegible]

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Madrin Macgillivray

Letter: Safe Access to Vulnerable Infrastructure By-law

Dear Executive Policy Committee,

I am writing in opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law.

I was been born and raised here in Winnipeg. I have fondly participated in local cultural and political events since I was a child. Many of our events (Pride Parade, Folklorama, Critical Mass, etc.) are are ultimately driven by the desire to raise-up and celebrate marginalised groups. Events like these are one of the reasons I am proud to be part of the city.

However, I am deeply concerned that this proposed by-law will have far-reaching consequences that ultimately suppress and silence the voices which we claim to protect. Peaceful demonstrations are one of the few impactful avenues that less-privelaged people can pursue to make their voices heard in a democratic manner. If passed, this by-law would not only greatly stifle the effectiveness of said demonstrations, but would also select for those who can afford to lose hundreds or thousands in fees.

Blatant violations of our rights and freedoms like this by-law are merely the top of a slippery slope. After all, the current situation in the United States (abuse, intimidation, detention, deportation, and murder of coloured people) didn't happen overnight: it began gradually. I urge the Executive Policy Committee: please, do not give this by-law another thought if you wish protect our marginalised groups and our democracy.

"Rights which are only grated conditionally are no rights at all".

Signed,

Michael McMahon

Dear Executive Policy Committee, February 13, 2026

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. These are events that allow communities to grieve, gather together, connect with others and take action for their lives and the lives of the people they love.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in

the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy. People are afraid. We need the government to honour our dignity and our lives.

I implore you to drop further consideration of the proposed demonstrations bylaw.

RE: Safe Access to Vulnerable Infrastructure By-Law

Greetings!

I am writing to compliment you all on your most recent move to promote our fair city - this by-law to suppress protests in the community the Canadian Museum for Human Rights calls home will definitely put us ALL on the map!

Sure, it will be for being one of the most hypocritical cities north of the U.S. - Canada border. So what! As long as they get the name right, eh?

Smart remarks aside, this is one of the dumber ideas I've seen the City of Winnipeg look at. Stop embarrassing our community and drop further consideration of the proposed demonstrations bylaw.

Regards,

Rob Kristjansson

NATIONAL COUNCIL OF CANADIAN MUSLIMS

Your Voice. Your Future

Good afternoon Mayor and Members of Council,

Thank you for the opportunity to speak today.

Let me begin by stating clearly that we fully support the protection of religious communities and other vulnerable institutions. Individuals must be able to attend places of worship, schools, and hospitals free from harassment, intimidation, or violence. That objective is both legitimate and important.

Our primary concern, however, is the process by which this bylaw has been developed. When a municipality proposes legislation that directly engages Charter-protected freedoms, particularly freedom of expression and peaceful assembly, robust and inclusive consultation is essential.

Consultation is the mechanism through which municipalities can identify potential issues before they crystallize into significant problems. It allows governments to recognize where definitions are unclear and where enforcement may be inconsistent. Consultation ensures that protective measures are effective and aligned with constitutional requirements.

Several aspects of the current draft illustrate why consultation is urgently required. The definition of a nuisance demonstration includes the expression of objection or disapproval toward an idea, action, person, or group based on specified characteristics. But that formulation directly engages expressive content and risks capturing lawful protest and political advocacy. The bylaw also defines intimidation in terms that rely on perceived effects and potential outcomes. While the objective of preventing intimidation is entirely legitimate, standards framed in this manner create uncertainty about what conduct is prohibited.

The proposed 100-metre buffer zones around a broad range of sites, including places of worship and schools, further demonstrate the potential breadth of this legislation. In many urban areas, these zones encompass sidewalks, parks, and public streets that function as legitimate forums for lawful assembly. Bubble zone legislation of this nature can significantly restrict lawful public assembly and peaceful expression, effectively limiting the ability of individuals and groups to participate in public discourse. Without thorough consultation, there is a risk that bubble zones will be applied in a

manner that inadvertently suppresses Charter-protected rights and creates uncertainty for our enforcement authorities and the public alike.

These factors collectively indicate that the bylaw is at risk of being vague and overbroad, as well as difficult to enforce. But these are precisely the foreseeable consequences of advancing legislation without consultation with all impacted groups.

Consultation should include religious communities, civil liberties organizations, legal experts, and protest groups. Engaging these stakeholders will allow Council to clarify definitions, identify overlaps with existing regulations, and ensure that enforcement is consistent and proportionate.

The risks of proceeding without consultation have already been observed elsewhere. The City of Vaughan enacted a similar bylaw and is now subject to a Charter challenge supported by civil liberties organizations including ours, the National Council of Canadian Muslims. Winnipeg has the opportunity to take a different path, and craft legislation that is protective but also enforceable and constitutionally sound.

Our shared objective is clear: we all want to protect vulnerable communities. But the path to achieving that objective with legitimacy and durability requires requisite consultation with all impacted groups. That step must come first. Without it, the City risks enacting legislation that is vulnerable to challenge, difficult to enforce, ultimately undermines the protection it seeks to provide.

We respectfully urge Council to undertake broad consultation and return with a revised bylaw that is precise, narrowly targeted, and constitutionally defensible. Consultation at this stage will not weaken this initiative but rather will strengthen it, ensuring that Winnipeg protects its communities while respecting the rights and freedoms central to our democracy.

Thank you.

Sadaf Ahmed, PhD
Manitoba Advocacy Officer, Department of Government Affairs and Public Policy

“Safe Access to Vulnerable Infrastructure By-law”

Correcting the Record

Andrew Kohan — February 17th, 2026

Nuisance demonstrations prohibited

3 No person shall engage in any nuisance demonstration within 100 metres of the site of a designated facility at any time.

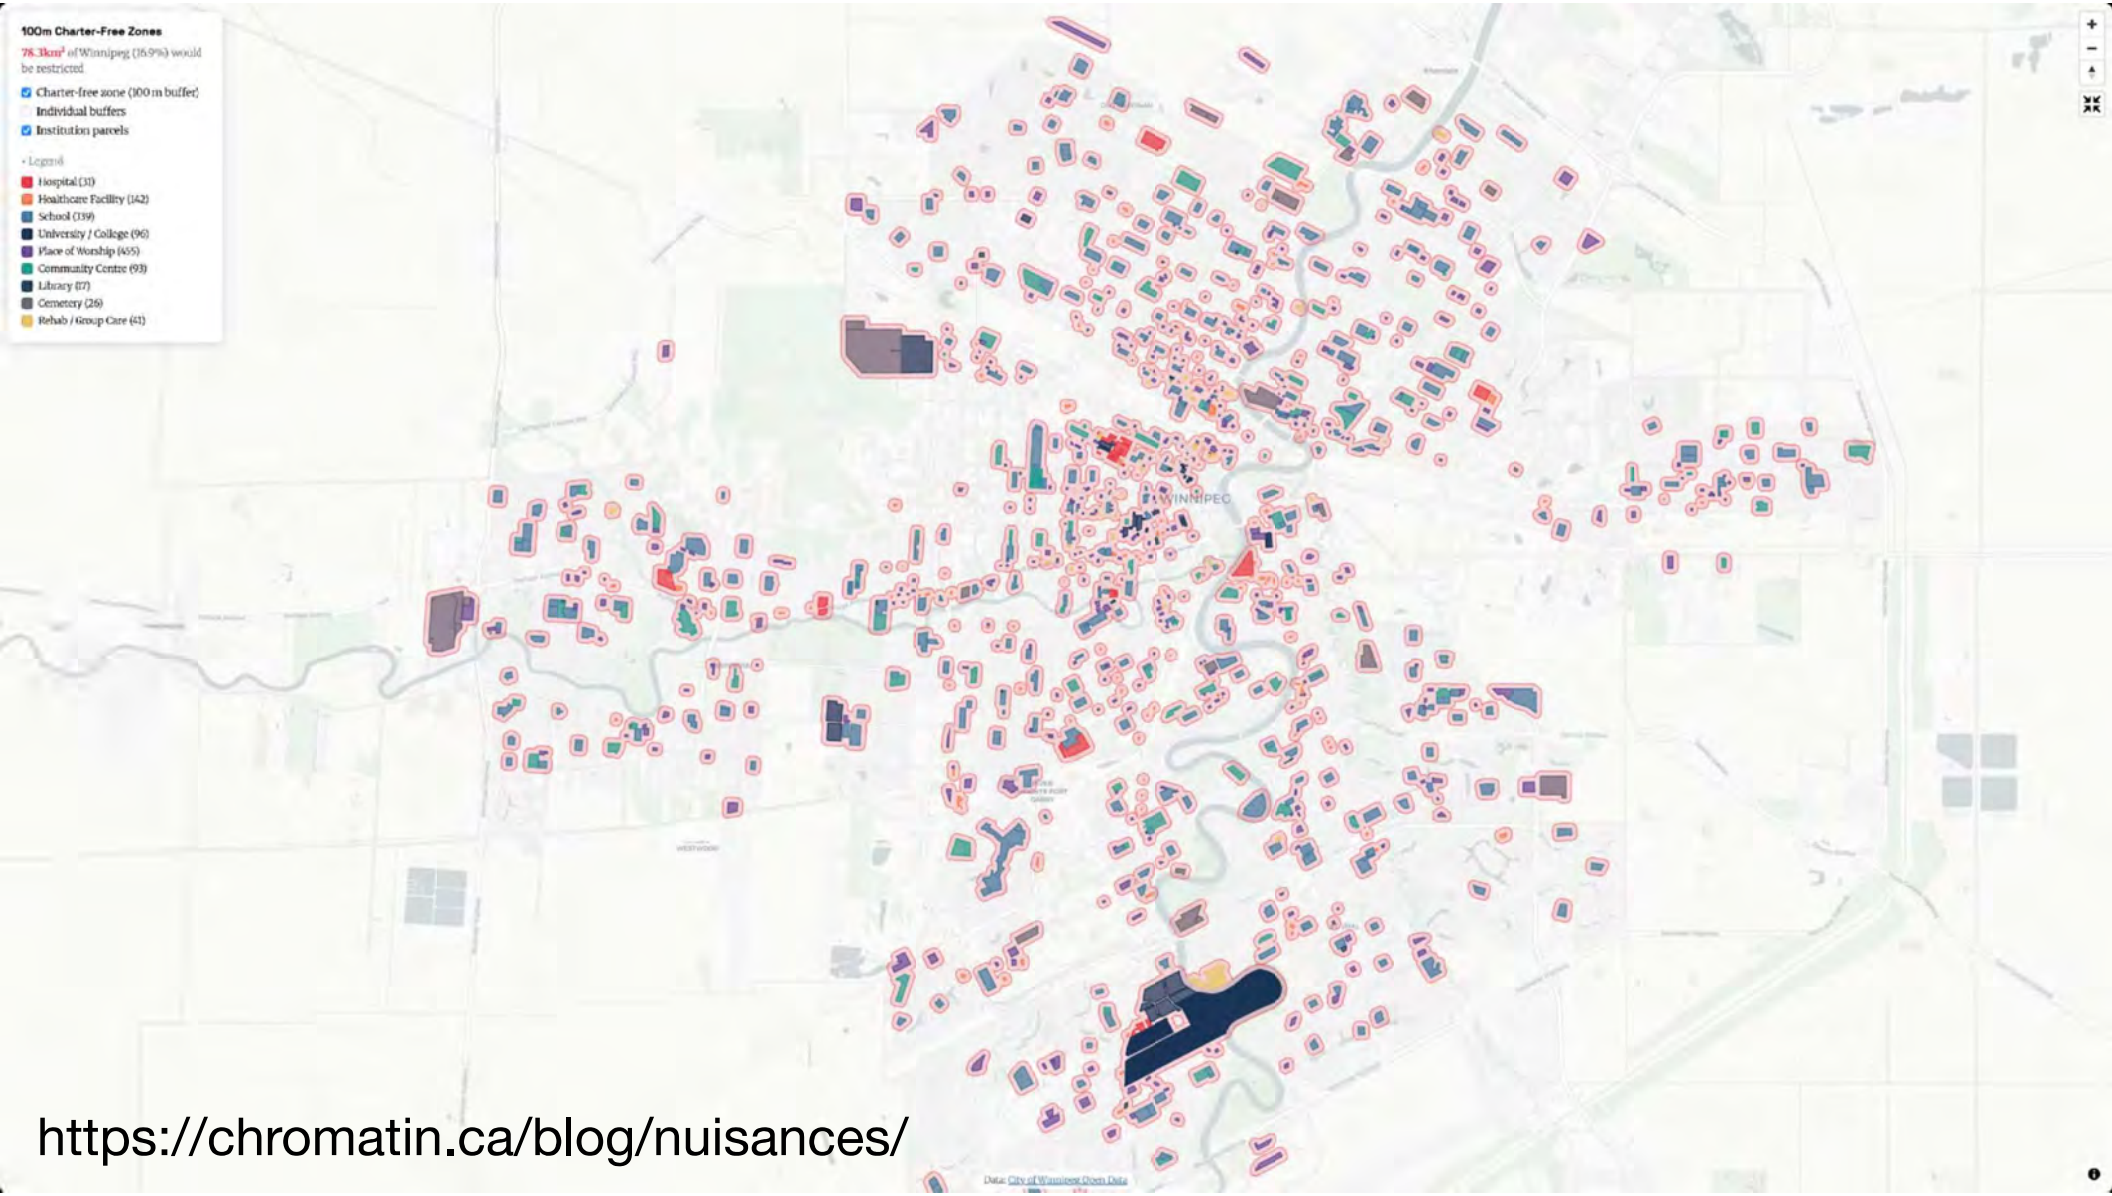
Nuisance demonstration

“nuisance demonstration” means any in-person protest or demonstration occurring in view of the public or in a location ordinarily used or frequented by members of the public that involves

(a) the expression by any means, including graphic, written or oral, of objection or disapproval towards an idea, action, person or group based on or related to any specified characteristics;
(b) obstructing the passage of pedestrians or motor vehicles without an applicable permit issued by the City; **or**
(c) the use of amplifiers or microphones without an applicable permit issued by the City;

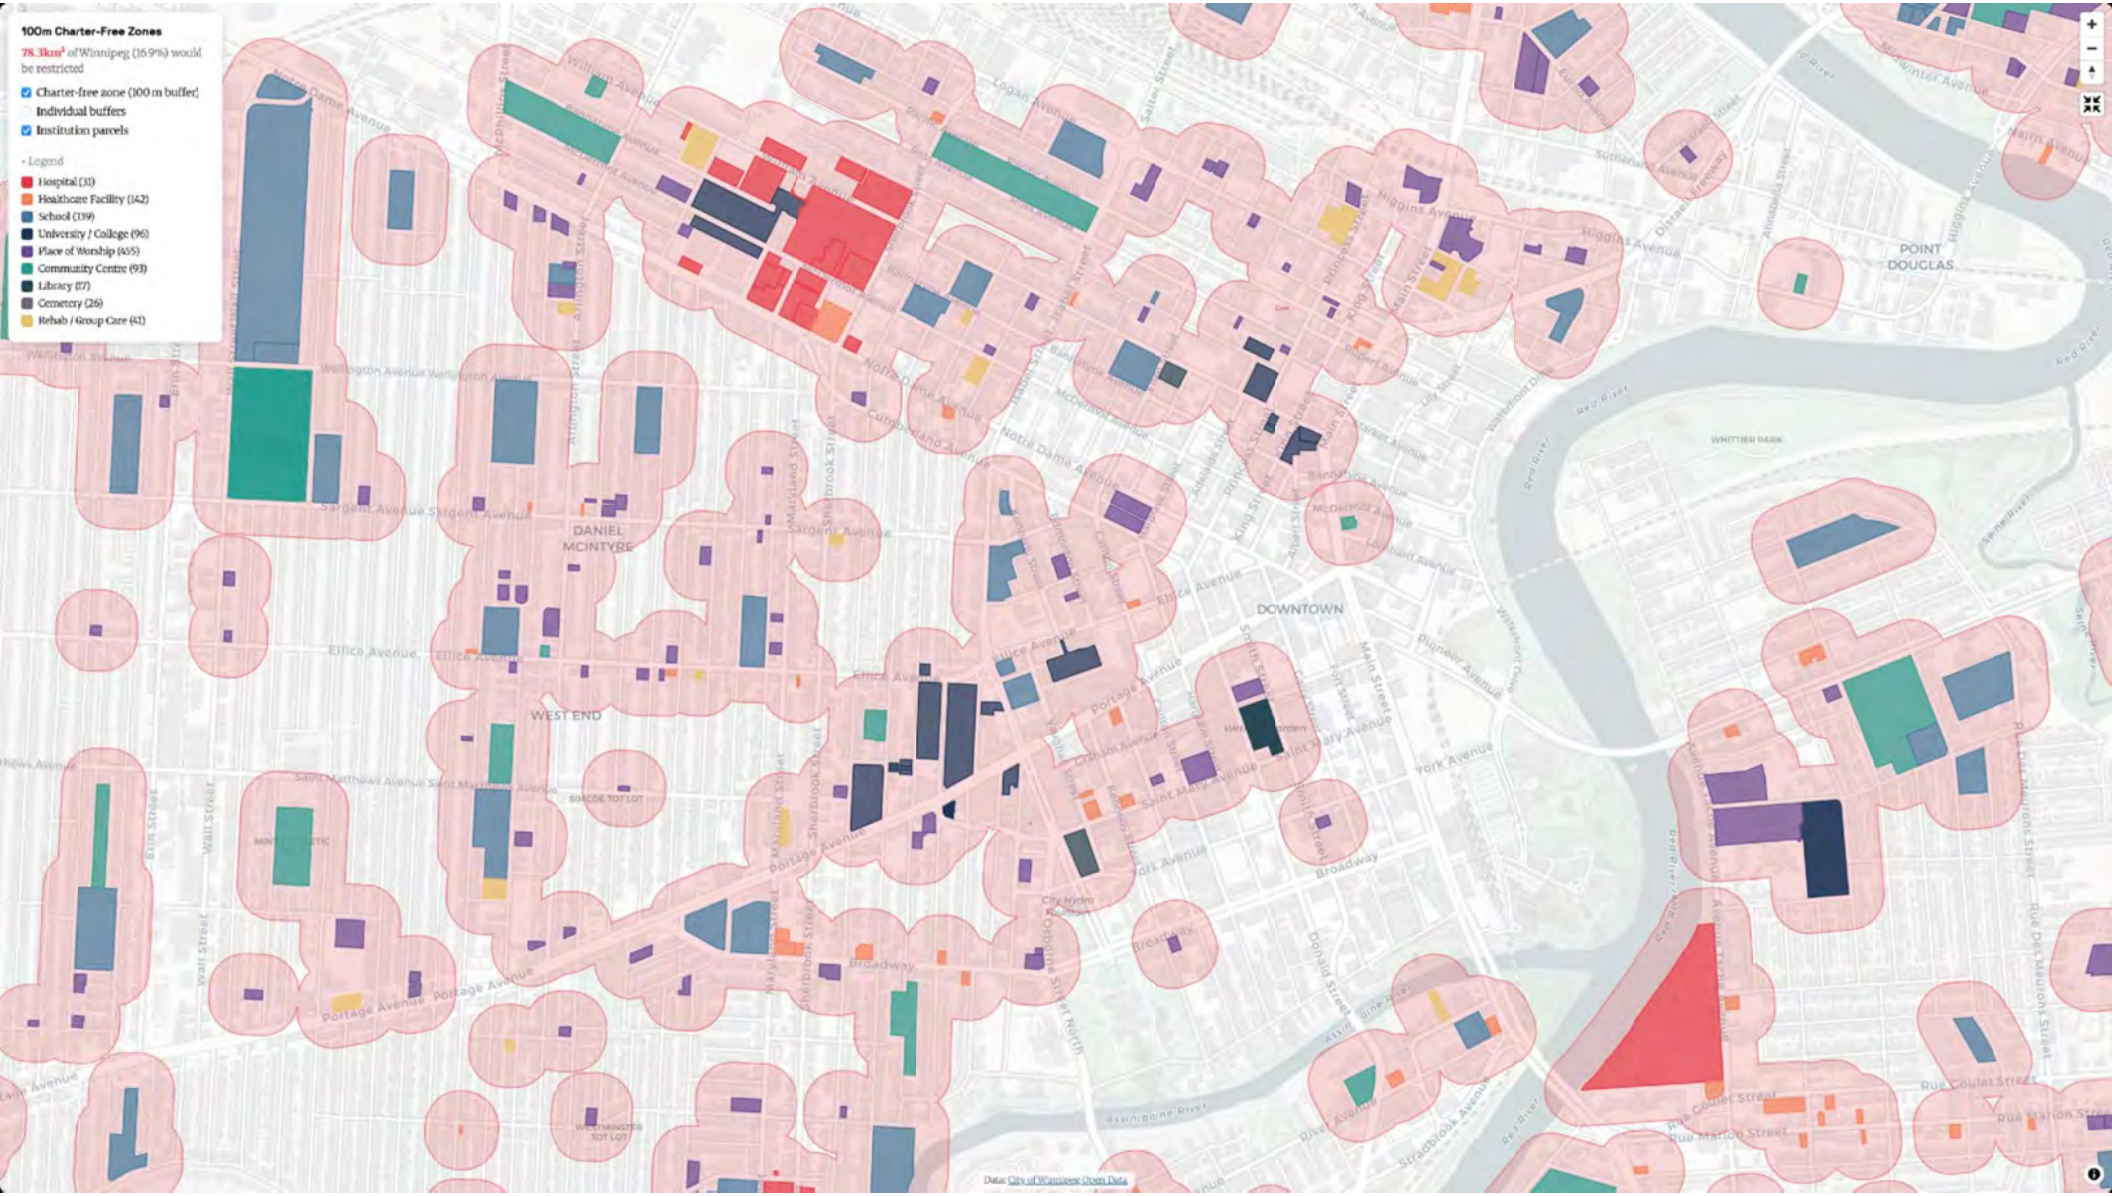
I’m not a lawyer but the person who said this is

“The definition of a "nuisance demonstration" is incredibly broad/vague and the choice to use a list with "or" means that you don't need all the parts of the definition present - effectively meaning that the protest/demonstration doesn't have to actually be obstructive or intimidating to get caught up here. If the bylaw passes, something like quietly holding a protest sign on public property within 100m of a wide array of buildings is now going to be [prohibited] at all times and subject to escalating fines.”



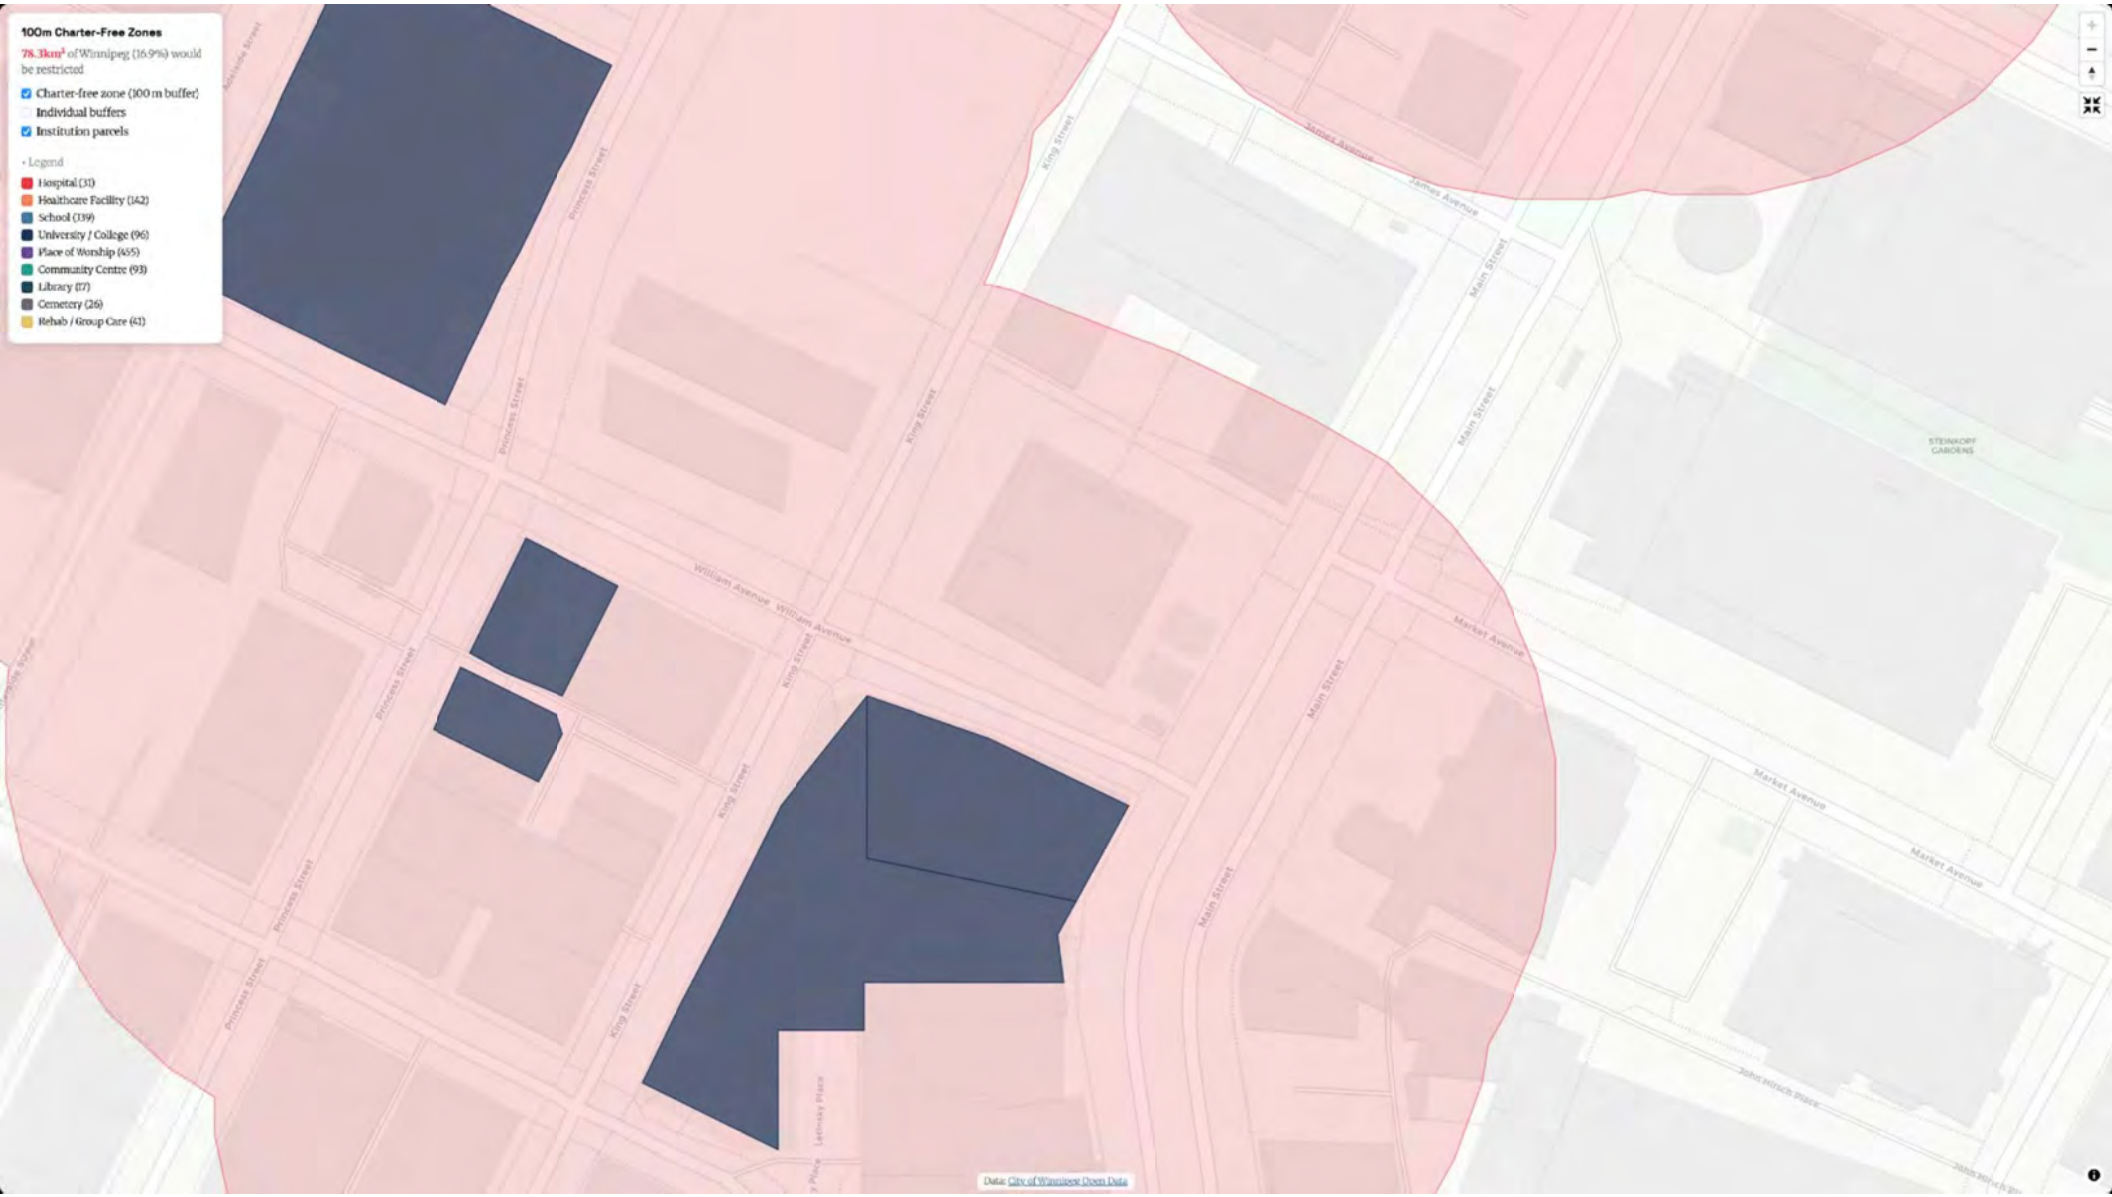
Designated Facility

"**designated facility**" means any



(a) cemetery, where the City is the registered owner;
(b) community centre;
(c) commercial school;
(d) cultural centre;
(e) healthcare facility;
(f) hospital;
(g) independent school;
(h) library;
(i) neighbourhood rehabilitation home;
(j) place of worship;
(k) post-secondary institution; or
(l) public school;

I’m not a lawyer but the person who said this is



“100 m combined with this list of facilities - would love to know what public property isn't within 100 m of something on this list. Private property is already protected/eliminated from use without permission of the owner under trespass law.”

I’m not a lawyer but the person who said this is

“There are some fairly clear and significant concerns in terms of compliance with the constitutional protections afforded in the Charter. Section 2 is directly implicated in terms of its protection of freedom of expression and peaceful assembly.”

I’m not a lawyer but the person who said this is

“If a bylaw like this one is going to be seen as justifiable, in terms of the legal test for justification, it's got to have a pressing and substantial legislative goal and there has to be proportionality (a rational connection, minimally impairing, and a balance re the harms of the law) between the objective and the means used to achieve it.”

I’m not a lawyer but the person who said this is

“Is it even necessary given the broad range of protections and police powers available to address actual threats to physical safety? It's arguably an attack on peaceful protests that might be considered disruptive or offensive to some. There's a huge difference between feeling or being uncomfortable and feeling or being unsafe - this seems to land in the tension between the two.”

Submission to the Executive Policy Committee

Re: Safe Access to Vulnerable Infrastructure By-Law

Meeting Date: Tuesday, February 17, 2026

Submitted by: Amanda Mondaca, resident of Daniel McIntyre Ward, R3G 1X4

Introduction

Dear Executive Policy Committee,

I am writing as a resident of the Daniel McIntyre ward to express my serious concerns regarding the proposed Safe Access to Vulnerable Infrastructure By-Law, which would restrict Charter-protected freedoms of expression and peaceful assembly. I urge the Committee to carefully consider the legal, social, and practical implications before advancing this by-law.

Constitutional and Legal Concerns

Peaceful assembly and freedom of expression are protected under section 2 of the Canadian Charter of Rights and Freedoms. Any municipal by-law limiting these rights must be demonstrably justified, proportionate, and minimally impairing.

- Broad restrictions on civic participation risk infringing Charter rights and could expose the City to costly legal challenges.
- Existing criminal laws already address violence, harassment, intimidation, property damage, and hate-motivated offenses. Clear evidence is required to justify additional restrictions.

Existing Protections and Redundancy

- Winnipeg already has robust criminal and municipal protections against harassment, intimidation, and violence, including hospital buffer zones and anti-harassment bylaws.
- Peaceful protests are already regulated to prevent interference with patients, staff, and vulnerable spaces.
- The proposed by-law duplicates these protections without clear justification, creating unnecessary restrictions on lawful civic engagement.

- Past experience shows that peaceful demonstrations in Winnipeg, including near hospitals and public spaces, have occurred with virtually no incidents, demonstrating that existing protections are effective.

Impact on Civic Engagement and Local Residents

This by-law would limit freedoms Winnipeggers have historically used to advocate for social and policy changes — from vigils and rallies to round dances. Public demonstrations have helped secure rights for workers and tenants, Indigenous, Black, racialized, and 2SLGBTQIA+ communities, and protections for the environment.

- Large portions of Winnipeg, including areas within Daniel McIntyre, could fall within 100-metre exclusion zones, significantly limiting where residents may gather.

- Community events, cultural gatherings, and awareness campaigns could be unintentionally restricted, affecting small organizations and local businesses that rely on public spaces.

- Residents without access to private venues, including marginalized and Indigenous communities, may be disproportionately affected.

- Campus and youth-led protests could also be restricted, limiting student engagement in social and political issues, which are essential for teaching civic responsibility and fostering democratic participation.

Operational and Procedural Concerns

- The by-law's vague definitions, including terms like "nuisance demonstration," raise questions about enforceability, consistency, and officer training.

- Broad powers could set a precedent for future councils, potentially extending restrictions to lawful civic participation beyond the current intent.

- It is unclear what consultations were undertaken with civil liberties organizations, Indigenous leadership, community groups, or residents before advancing this proposal.

Civic, Cultural, and Democratic Importance

- Peaceful protest is a cornerstone of democracy and a tool for public accountability.

- Public demonstrations educate and engage residents, including youth, in civic life. Maintaining open public spaces for lawful, peaceful assembly strengthens civic literacy, democratic engagement, and community cohesion, all of which are essential for a healthy city.

- Limiting access to public spaces would disproportionately impact cultural traditions, Indigenous ceremonies, and civic advocacy.

- Cities that have adopted similar restrictions elsewhere have faced public backlash and legal challenges, demonstrating the risks of proceeding without careful justification.

Recommendation

For these reasons, I respectfully request that the Executive Policy Committee:

1. Recognize the serious constitutional, procedural, operational, and social concerns associated with this by-law.

2. Drop further consideration of the proposed Safe Access to Vulnerable Infrastructure By-Law.

Thank you for considering this submission. I would appreciate confirmation that it has been received and included in the EPC agenda.

Sincerely,

Amanda Mondaca

R3G 1X4

February 14th, 2026

Dear Executive Policy Committee Member,

I'm writing to you today to express my alarm and great disappointment at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure by-law that would greatly restrict our Charter-protected rights to freedom of expression and peaceful assembly. I

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, for over 100 years public demonstrations in Winnipeg have been used to help win rights for workers and tenants, Indigenous, Black, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.

This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has also expressed concerns that broad rules such as these proposed in the Safe Access bylaw may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such legislation often harms groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy. I implore you to drop further consideration of the proposed demonstrations bylaw.

Respectfully,

Candice Bodnaruk

Re: Agenda Item #7 safe Access to Vulnerable Infrastructure By-Law

Dear Executive Policy Committee,

Righting Relations is writing to you today to express our concern, alarm, and oppostion at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

It is for this reason that we, Righting Relations Inc. are opposed to the proposed bylaw.

Righting Relations carries an Oath to Turtle Island and it states "That we bear true covenant to the First Peoples of this Land." This proposed by-law directly infringes on the the Truth and Reconciliation's 94 Calls to Action and the Missing and Murdered Indigenous Women, Girls, and 2 Spirit People's 231 Calls to Justice by reinforcing harmful stereotypes that are often placed upon Indigenous people who assert their rights to demonstrate and their freedom of expression through peaceful assembly, this also could cause excessive harm to our relatives who are unhoused here, on the streets of Winnipeg.

It is very concerning that this proposed by-law is going to be discussed during a time when our relatives from the south are experiencing brutal violence and murder at the hands of decision makers, the act of prohibiting "nuisance" demonstrations is an echo of what is happening in the United States of America with I.C.E. destructively using the power of authority, law and policy to carry out their genocidal mission. You will be silencing voices, removing community members, stripping autonomy and encouraging prejudice and discrimination.

In short this proposed by law is a step towards dictatorship and goes against every value the City of Winnipeg holds. As well, this being framed as a public safety issue is absurd as its enforcement will inevitably cause more escalation and violence. The proposed by-law may also restrict how we can respond to acts of hate and discrimination in public schools, in the health care system, and at work. It will only ensure a specific demographic of people will be served and marginalized people will continue to experience excessive harm, violence and be murdered.

Righting Relations is committed to uprooting systems of oppression in all forms, within ourselves, within our networks, and within our society.

RE: Agenda Item #7 Safe and Vulnerable Infrastructure By-law

To Whom It May Concern:

I am writing *in support* of Agenda Item #7 at the February 17, 2026, EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. This measure is a necessary step to protect essential community institutions and ensure Winnipeg remains a safe and welcoming city for all.

This is not a merely abstract plea. My own experiences as a Jewish Winnipegger facing harassment at my community safehavens show me that risks of rising Jew-hatred in the city make this By-law necessary.

My children attend Gray Academy of Jewish Education, and my family regularly attends events at the Rady JCC. On a couple of occasions over the past two years, when visiting the campus, anti-Israel protestors stood at the building, chanting slogans at passersby. One of these incidents was during Folklorama, an event where Winnipeggers enjoy celebrating the diversity of the city's communities; the other was during the evening when my daughter was performing in a school play at the Rady. At the latter event, I, myself, was called a "genocider" and a "baby killer" as I walked into the building by the anti-Israel protestors.

The Asper/Rady campus is a space for Jewish Winnipeggers to feel safe as Jews. The building is also welcoming to non-Jews, but serves as a safehaven for members of the community.

While it was clear to me that the protesters aimed mainly to intimidate Jews and others going to the community centre, the police present did not do anything to enforce existing harassment laws.

I believe that protest is a right enshrined in the Charter of Rights and Freedoms, and I agree with this very much. As a scholar and academic, I believe strongly in the values of free speech, academic freedom, and the reasonable debate of ideas that are part of living in a democratic society.

THE UNIVERSITY OF WINNIPEG | Rhetoric, Writing, and Communications

Graham Hall
3G14, 3rd Floor

F 204.774.4134
rhetoric.uwinnipeg.ca

However, community safehavens need protection when freedom to protest is being misused to harass a minority community. This is *not* fair and legitimate democratic protest. This is *not* an instance of expressing political speech to a government agency capable of responding adequately and politically to the demands of the protestors. The experiences I faced were instances of intimidation, harassment, bullying, and persecution of Jewish Winnipeggers.

These are the reasons why I support the passage of the By-law.

Thank you for taking the time to read this letter and for undersanding my experiences.

Sincerely,

Matthew Flisfeder, Ph.D.
Professor

RE: Submission Opposing Agenda Item #7 – Safe Access to Vulnerable Infrastructure By-law

Executive Policy Committee, City of Winnipeg

Dear Members of the Executive Policy Committee,

On behalf of the John Humphrey Centre for Peace and Human Rights, I am writing to express our opposition to Agenda Item #7: the proposed "Safe Access to Vulnerable Infrastructure By-law."

For more than three decades, the John Humphrey Centre has worked alongside community partners across the Prairies to advance human rights, strengthen inclusive public dialogue, and support community-led responses to systemic inequities. We have engaged extensively with frontline workers, grassroots advocates, and people with lived experience of poverty, homelessness, racism, and criminalization in public spaces.

We write today to vouch for the credibility and integrity of the frontline workers and community advocates raising concerns about this proposed by-law. These individuals and organizations bring evidence-informed knowledge rooted in daily work with those most affected by exclusionary policies. Their perspectives are grounded in lived reality, not abstraction, and deserve serious and respectful consideration.

Public space is a cornerstone of democratic life. The ability to gather, assemble, speak, and protest peacefully is protected under the Canadian Charter of Rights and Freedoms and is fundamental to a healthy civic culture. The proposed by-law's broad and undefined language—particularly terms such as "nuisance demonstrations"—creates significant risk of overreach. Its geographic scope and associated financial penalties may have a chilling effect on lawful protest and civic participation.

Public space bylaws and enforcement-driven responses often disproportionately impact those who are already marginalized—particularly Indigenous peoples, people living in poverty, and individuals experiencing homelessness. Policies framed as neutral can produce inequitable outcomes in practice, reinforcing patterns of surveillance, displacement, and exclusion.

Race, gender, disability, and socioeconomic status intersect in ways that shape who is most likely to experience police contact and punitive enforcement. Expanding discretionary enforcement powers without clear safeguards risks deepening systemic inequities.

Dignity, voice, and meaningful participation must be at the centre of policy development—especially when policies affect public presence and civic expression. When individuals and communities feel unheard, further restrictions on assembly and protest can compound mistrust and erode relationships between residents and municipal leadership.

We recognize the importance of ensuring safe access to health and social infrastructure. However, responses must be proportionate, narrowly tailored, and developed in meaningful consultation with those most affected. Approaches that rely primarily on fines and expanded police powers—particularly penalties of up to $5,000—risk criminalizing participation in civic life and disproportionately impacting individuals and communities with fewer resources.

We respectfully urge the Executive Policy Committee to:

1. Pause the advancement of this by-law to allow for broader community consultation, particularly with Indigenous leadership, civil liberties organizations, frontline service providers, and people with lived experience.
2. Clarify and narrow language that could unintentionally restrict constitutionally protected peaceful assembly.
3. Conduct a human rights and equity impact assessment prior to enactment.
4. Ensure that any measures adopted uphold dignity, democratic participation, and equitable treatment.

The health of a city is measured not only by safety, but by how it protects the rights, voice, and humanity of all who call it home. We ask that the concerns raised by frontline workers and community advocates be heard with seriousness and care.

Thank you for your consideration.

Sincerely,

Renée Vaugeois

Safe Access to Vulnerable Infrastructure By-law statement

Gustavo Zentner, CIJA – February 17, 2026

Good morning, Your Worship and Members of the Executive Policy Committee.
Thank you for giving me the opportunity to speak today.
My name is Gustavo Zentner, and I am here on behalf of the Centre for Israel and Jewish Affairs (CIJA), the advocacy agency of the Jewish Federations of Canada–UIA.
CIJA represents Jewish Canadians nationally, and here in Winnipeg, through the Jewish Federation of Winnipeg.

We welcome this Committee's consideration of the Safe Access to Vulnerable Infrastructure By-law. City staff and the Legal Department have done careful, thoughtful work. This is a critical step in making Winnipeg a city where everyone can feel safe. And we endorse the By-law.

For over two years, Jewish communities across Canada, as well as in Winnipeg, have faced repeated protests targeting places of worship, schools, and community institutions. These are spaces serving children, seniors, and other vulnerable individuals.
While protest is a fundamental right, these demonstrations have often become intimidating. Families attending religious services, cultural programs, or educational activities should not have to fear going about their daily lives.

Winnipeg is proud of Folklorama, celebrating multiculturalism and community. Yet, for years, visitors to the Israel Pavilion at the Asper Jewish Community Campus have faced harassment and intimidation, even during what should be a joyous celebration.
The protests have featured deeply antisemitic slogans and chants, such as "From the River to the Sea," "Go Back to Europe," "Hamas is Coming For You", and "Intifada Revolution," all of which promote hatred and incite violence, without consequence.

This past summer was no exception. Parents, grandparents, and visitors asked me: *"Why should families feel unsafe while celebrating culture?"*, *"Why can't the government or police do more to protect us?", "Who will be targeted next?".*

These are urgent, heartfelt appeals, not rhetorical questions.

And while the Winnipeg Police Service has done a tremendous job of supporting and providing reassurance to the community, the reality is that these threats and protests have been a strain on police resources.

Canada's promise, the promise that drew me and so many others to this country, is founded on justice, equality, democracy, respect. That promise guarantees the right to practice faith, raise children, and celebrate heritage safely.

But fear is now part of daily life for too many. Families hesitate before attending services or programs. Children feel anxiety walking near community centers. Seniors feel unsafe in spaces that should offer comfort and connection.

The toll is real, tangible, and lasting.

Freedoms of expression and assembly are fundamental, but not absolute. Cities like Calgary, Toronto, Brampton, and Vaughan have defined safe perimeters around vulnerable institutions, balancing freedom of expression with public safety.

Section 1 of the Charter allows reasonable limits to protect the safety and well-being of others. Instituting such a by-law will ensure Charter rights are protected and protecting those looking to use vulnerable institutions.

Today, I met with many fellow Winnipeggers and heard a range of perspectives. While people may approach this issue differently, that must not come at the expense of acknowledging the very real challenges our community is facing.

Yesterday, we were notified that our submissions will be taken 'as information' to inform focus around safety. References were made to Bill C-9, the Combatting Hate Act, which, with proposed amendments, we support. As a law-abiding community, we look to elected officials to pass legislation and work with all levels of government and law enforcement to protect our community and all communities. Accepting our submissions as information and waiting for other governments does not protect us.

Our shared values and way of life in Canada are at stake. Intimidation, hate, and intolerance weaken democracy, keep families at home, and undermine shared responsibilities. This is not about restricting lawful protest. It is about ensuring that demonstrations do not intimidate children, disrupt religious practice, or prevent residents from safely accessing community spaces.

Manitoba must not become a home for hate.
Every Winnipegger deserves to live free from fear and harassment.
Protecting vulnerable institutions strengthens democracy, it does not weaken it.
We urge this Committee to advance these measures with urgency, clarity, and accountability, in partnership with community stakeholders and consistent with the Charter.

The time to act is now.

Thank you for your time, attention, and commitment to keeping Winnipeg safe for all.
-end-

Gustavo Zentner
Centre for Israel and Jewish Affairs (CIJA)

Dear EPC members,
I'm writing in full support of the recommended item #7 Safe Access to Vulnerable Infrastructure By-law.

Though the process may have been less than the hoped for broad consultation, and some improvements must be made, the urgency and critical importance of said By-law to tackle the real and present danger to vulnerable communities is essential. I would have attended in person but as a targeted member of the Jewish community I do not feel safe to be amongst a throng of Jew Haters.

Since Oct 7/23, my family and I have personally experienced multiple violations of existing laws and by-laws by so called Islamist pro Palestine woke left protesters and followers demonstrating their upside down inversions of free speech. We have been harassed, intimidated, confronted entering Jewish businesses, community centres, places of worship, schools, had our synagogue sprayed with hate speech and Nazi symbols, been followed, stalked, had our home targeted with our doors banged on and our mezuzah taken note of. A relative had their front window shot out, while a neighbour walking their dog had a gun pointed at them by a drive by. NO Winnipeg citizen, visitor, tourist, should ever be exposed to such anti Canadian values under any pretext and false claims to free speech and fake civil liberties cries.

Jew hate minimally, is racism. Our community members, visitors and friends are all equally supposed to be a protected by the Canadian Charter of Rights and Freedoms, the Manitoba Human Rights Code and Federal and Civil laws. Enforcement has been patchy and weak, resources are underfunded. Post Oct.7/23, the city has complained at exponential escalating costs to police bad actors/protestors holding both tax payers and Jews hostage.

Freedoms don't come without responsibility, respect and accountability. Free Speech is not unlimited. It has been said by legal minds that Canadian common Law has ruled that "individuals should not be hostage to the message the protesters wish to send them. The right of freedom of expression does not include the right to a captive audience. That freedom of expression assumes an ability in the listener not to listen but turn away if one wishes". We could not look away because they invaded our personal spaces. When identifiable protected vulnerable individuals and/or groups are held hostage by encampments, physical safety boundary blurring, invasion of personal, commercial, cultural, spiritual, leisure, living space, property lines, overtaking of civic infrastructure, with electronic loud speakers P.A.'s, megaphones, spewing hateful modern twists on ancient blood libel Islamist Genocidal propaganda resplendent with visuals and scripted robotic Jihadist chants; I dare anyone not to hear the vitriol and hate. I dare anyone to look away. I dare anyone to remain silent. The 3 monkey approach resulted in the Holocaust. Jews don't have a choice to look away!

When and if enacted, Bill C-9 will only enhance existing laws, but fails to create safer spaces. Hence new tools are needed to augment the fostering of Safer spaces by creating distances required to keep haters and those that would do us harm away. It is a harm reduction By-law.

Failure to pass the spirit and intent of this By- law, will be recorded as a wholesale colossal systemic institutional failure to remember the lessons of history. There is no basis for selective Jew hate, speech and actions. Words matter as they lead to action. Allowing bad actors to act badly with impunity escalates more bad action.

The opposition to this proposed Vulnerable Infrastructure "Safety" and 'Security" By- law wrongly proclaim todays Antizionist protests are essential like the 1919 general strike! To conjure such sacred hallowed ground for worker rights and freedoms and a honest living wage as synonymous to flaunting ancient vile blood libel Jew hate as desirable free speech…is

Outrageous outlandish and absurd! They forget the true history which would indicate the movement was built on many Zionist's backs to the success for all Canadian labourers. How does spewing targeted hate speech at protected minority Indiginous groups serve the greater good for all Canadians?

It is disappointing and somewhat ironic that AMC Grand Chief Kyra Wilson chooses this moment to comment on eliminating potential protections for the Indigenous Jewish peoples communities and Institutions and that she knows more than we do about fighting Jew hate. Her narrow focus on valid First Nation Treaty rights excludes the intentionality of also protecting other Manitoban's personal safety rights. I note her letter only has 4 of 63 chiefs in Manitoba signing her letter of concern, that she wishes to sit with council and not others to improve the proposition. She implies by her suppositions that all protests are equal and should be protected. Clearly she hasn't faced down Jew hater so called protesters. I invite her to attend any and all that we have been subjected to, then we can sit down and talk.
Hate speech is not Free speech. Alleged protests containing hate speech are not peaceful. Hate speech is violence. It is undeserving of protection.
Post Oct.7/23,The type of vitriolic protests, harassment, intimidation etc. that Jews face daily are not the same. If she wants to get to know us better, she can call.

It is unfortunate that the city's legal department failed to first properly broadly consult.
It is a sign of cowardice and pandering to bullies, that councillor Duncan lost his grit and caved at first blush with what Winnipeg Jews have had to contend with since Oct.7/23. Don't throw the baby out with the bathwater.

Please move this Bylaw forward to council for improvements. This buffer By-Law is critical to offer all minority communities protections against thugs and populists.
