Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and various community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Abdel Soussi Gounni

While I agree on the importance of safety, this by-law is poorly written and lacks clear instructions for the future. Everyone has the right to protest, regardless of the time or place.

The proposed "Safe Access to Vulnerable Infrastructure" bylaw is vague and sets a dangerous precedent. The suggestion that a city could enact "charter-free zones" around a loosely defined concept of "nuisance" demonstrations is an unambiguous threat to the charter rights of Canadian citizens. Council should be concerned that such a proposal has even been seriously considered.

This proposal endangers the right to peaceful assembly as outlined in the Canadian Charter of Rights and Freedoms Section 2(c). The Charter guarantees the right to participate in peaceful demonstrations, protests, parades, meetings, picketing and other assemblies. The right to protest in public streets is also protected.

So why would the city of Winnipeg feel it necessary to create a by-law that tramples the Charter rights of its citizens? What is the goal in contradicting the standing definition of lawful assembly that applies to every other jurisdiction in Canada? Why is the definition of "nuisance demonstrations" being written with such intentionally vague language?

The Charter already addresses concerns regarding demonstrations that are not peaceful. This includes any event which could be a disruption to public safety or might impede access to so-called vulnerable infrastructure. Further, Section 2(c) does not protect riots or gatherings that seriously disturb the peace. Section 2(c) does not offer protection to demonstrations that physically impede or blockade lawful activities.

Again, why would the city of Winnipeg think it appropriate to create an ill-defined, broadly

applicable by-law that appears to seek control over peaceful demonstrations in public spaces?

I am a Canadian-American and I have watched as rights to peaceful protest have been eroded in the United States. We can no longer deny that a wave of dangerous limitations to civil liberties and freedoms there has created an environment ripe for the growth of fascist power. Now, seeing an attempt here in Winnipeg to curtail the ability of ordinary citizens to engage in legal peaceful assembly, speaks to a very concerning shift in the interests of our local leadership.

Do you serve your constituents? Have you pledged to protect our rights and improve our communities? Or do you serve the institutions and power structures that would rather not have to sometimes see citizens gathering to publicly and peacefully express their objections and concerns? Who are you trying to protect? Whose rights do you value most?

"Nuisance" is an incredibly vague choice of language for a by-law. This proposal would give the current city government and future governments very broad powers that directly contradict the Charter Rights of Canadians. The lessons from our neighbours to the south and countries further abroad should be clear; such slippery slopes in the limitation of a population's basic rights and freedoms can only have one grim outcome. The power to control peaceful assembly will inevitably be abused and rights will continue to be eroded.

I had the great privilege of choosing Canada to be my home country. I took an oath, promising to "faithfully observe the laws of Canada, including the Constitution". I also swore to adhere to the responsibilities of being a Canadian citizen. Part of my responsibility is to protect what makes this country so remarkable as a beacon of freedom throughout the world. As the councillors and administrators of the city of Winnipeg, and as citizens of Canada, you also hold these responsibilities.

Rather than attempting to restrict rights that are clearly outlined and protected in the Charter of Rights and Freedoms, you should be defending those same constitutional guarantees as if your jobs and our future freedoms depend on it. I urge you to do the right thing and oppose the Safe Access to Vulnerable Infrastructure by-law.

Dear Executive Policy Committee,

I am writing to express my opposition to this proposed by-law on the grounds that it would restrict our charter rights to freedom of expression and peaceful assembly. The proposed by-law is excessively broad in its definition of nuisance protests and I do not believe it could possibly be enforced in a fair and equitable manner without infringing upon the rights and freedoms of Winnipeggers. There is existing legislation prohibiting violence, incitement of violence, and hate speech which already address the problems targeted by this by-law, making it an unjustifiable restriction of our protected rights.

I ask that you remove the proposed by-law from consideration as it is against the interests of all residents of Winnipeg.

Signed,
A Concerned Resident

I do not support the proposed bylaw listed in the EPC Agenda as item 7: Safe Access to Vulnerable Infrastructure. The bylaw is extremely broad and would jeopardize peoples' right to protest. I think it would even jeopardize peoples' ability to gather together for reasons other than protest since using a loud speaker or microphone within 100m of a designated facility is enough to trigger fines. There is already legislation in place to protect people from hate speech and to protect people who are trying to enter hospitals and health facilities. The already existing laws are sufficient.

I do not support this move toward control and suppression of freedom of speech by our municipal government. Governments do not always make the right decisions or work in directions supported by the people and it is essential that the people be able to participate in democracy by letting governments know when they are acting outside of the interests of the people.

I am writing to express my opposition to a motion going before the policy committee next week re: the vulnerable infrastructure by-law.

I believe this is highly dangerous and even if unintended, has the effect of suppressing free speech. I also believe this by-law will be challenged and may be declared unconstitutional. I am a lawyer and have practiced in the areas of human rights, administrative law, and legislation.
we live in Canada. We are guaranteed rights and freedoms from the charter which includes our right to gather and express ourselves freely. if that expression becomes hateful, harassing or threatening, we have the criminal code for that. hate speech provisions are already enshrined in our system.

This is government overreach and can have grave and perhaps unintended consequences. as currently drafted, it is a dangerous piece of legislation which threatens the rule of law in this country. We see what is happening in the States, and we do not want to see similar trends take place in our country.

Please note, once again, my opposition to this by-law.

It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Aren Dexter-Nickel

Dear mayor Gillingham, Councillor Duncan, and members of the Executive Policy Committee,

The Nuisance By-Law that is on the table today infringes upon Canadian freedoms of expression and assembly as decreed by the 1982 Charter of Rights and Freedoms and I implore you to abandon its adoption. The by-law's unreasonable overreach, both definitively and geographically, effectively makes peaceful protest illegal because of the 100m buffer zone it affords. Other cities in Canada where similar legislation has been put in place, namely Vaughan, Ontario, have been litigated by the Canadian Civil Liberties Association for impinging the Charter freedoms as mentioned above.

I understand that this council has been under stress as Winnipeg residents are becoming more involved in their civics and engaging their democratic right to dissent, but if council refuses to do their job and listen to the plights of those they do not agree with, then there are more effective ways to cut down on "nuisance" protests—on the top of that list, to genuinely listen to the problems and expertise their constituents share and to be a leader in making Winnipeg a vibrant city for all its residents.

Thank you for taking the time to read this.

I am writing in support of Agenda Item #7 at the February 17, 2026, EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. This measure is a necessary step to protect essential community institutions and ensure Winnipeg remains a safe and welcoming city for all. This by-law protects all Winnipeggers, and personal context strengthens its importance.

Dear Executive Policy Committee,

I am writing today to express my opposition to the proposed “Safe Access to Vulnerable Infrastructure By-Law.”

This is an anti-democratic policy. Protest, public debate and gathering are essential for a healthy functioning society.

While I understand this proposal does not ban protests outright, it essentially bans them in most of the locations where protests are most often held. Location is paramount to the entire concept of the right to protest. Cultural, religious, educational, healthcare and community institutions are very often the site of political activity and therefore people should be free to express their opposition or support at these locations. While it is important that harassment and intimidation are curtailed, there are already laws in place to address those problems. And while peoples access to these institutions should be maintained, the restriction of access during protests has not historically been an issue in Winnipeg.

This proposed bylaw is also discriminatory toward low income and marginalized communities as it is often on behalf of these groups that protests are held. In addition the punishment of a fine impacts low income people more harshly than others, including the proposed administration fee needed in order to appeal convictions.

Policies like this contribute to the ongoing polarization and isolation of people and groups in our society. Shutting down public spaces to debate and conversations and limiting people’s ability to gather as a community will lead to a less engaged and less empathetic public discourse as people further retreat to online spaces where nuance and compromise do not thrive. If we as a community want to resist hatred and chaos as some claim this policy is designed to combat, then we need to foster a healthier society where people are free to express themselves as well as listen to others without fear of suppression.

The last point I would like to make is to highlight the absurdity of the fact that under this bylaw people would not be able to protest next to the “Bloody Saturday” sculpture in front of the Pantages Theatre. Winnipeg prides itself on the courage of the general strike. Our identity as Winnipeggers is derived from the protest and actions of 1919, which would have been outlawed under this policy. This cannot be allowed to pass. Please reject this bylaw.

Thank you for your time.

Signed,
Arthur Antony

Dear Executive Policy Committee,

I'm writing to you today to express my outrage, shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in vehement opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils, strikes and rallies to round dances, bike rallies and the Pride parade, public demonstrations have been used to help win rights for workers and tenants, women, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment and the overall betterment of our communities.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. How hypocritical

to be the city that is home to the first national human rights museum of its kind, to be attacking such basic and fundamental rights of its citizens to draw attention to injustices. The language of the proposed bill is also dangerously vague and ambiguous. Without legitimate justification or specificity, this by-law risks allowing a rampant escalation of hostilities against those demonstrating for justice by those in positions of authority that don't want to hear it. There is a clear right and wrong choice to be made here.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy. This is a blatantly obvious attempt to implement policies in support of fascism and authoritarianism. We must take any and all action to ensure that our basic charter rights are protected and that the people have the freedom to voice their concerns and hold our government officials accountable.

I implore you to drop further consideration of the proposed demonstrations bylaw. Please choose to be on the right side of history.

Signed,
Calantha Jensen

Submit comments in writing

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City's objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

I am writing in support of Agenda Item #7 at the February 17, 2026, EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. This measure is a necessary step to protect essential community institutions and ensure Winnipeg remains a safe and welcoming city for all.
I have heard too often from my Jewish friends that they feel fearful in their community. That they have felt the need to hide their faith ensuring no symbols of Judaism is on their person or their homes. That they do not feel free to express themselves and celebrate their traditions in peace is something I have never before experienced in Winnipeg. Hard working, kind, generous, contributing members of our society should NOT be feeling this way. The fact that this By-law is needed is sad enough, but clearly necessary in these times of unrest and confusion.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Catarina

February 13, 2026

Dear Executive Policy Committee,

We are writing to express our grave concern at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. We are strongly opposed to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community. As retired healthcare workers, we are sensitive to the vulnerability of the workers at these sites. Nevertheless, we feel that our Charter rights are too important to suspend. .

If passed, we are concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not likely do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of undemocratic curtailing of the freedom of expression has no place in Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. We urge you to remember your legal obligations to uphold the Charter and protect our democracy.

We implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely

Celia Rodd, MD, MSc, FRCPC,

Comments
I am writing to share my strong opposition for the proposed bylaw - Safe Access to Vulnerable Infrastructure By Law. Not only is this bylaw a violation of people's human rights, it strongly leans towards facist tendencies. Is this what the City of Winnipeg wants? To be associated with the dictatorship of the United States? I truly am aghast at the suggestion of this bylaw and this it is even going to a vote. I am asking you to please critically think about this and empathize with the human citizens in your city who have a right to protest things they do not agree with and/or stand up for the human rights of those who are being persecuted. I have never ONCE been to any protest where the people who are protesting are causing the issues- it is always peaceful and non-violent. But you know who does cause problems and act violently? The owners of businesses, the trucker convoy, the police. I was almost run over by a truck protesting at a slaughterhouse. You know what the police did? They asked for my name and address so they could notify my family if I was murdered. Truly appalling behaviour.

As citizens we all have a right to continue protesting without fear of being fined or further prosecution. Isn't this part of a living in the "true north strong and free" stands for? To be free to live in a democracy. This bylaw is unconstitutional- the CCLA agrees. Further the language of this bylaw is non-specific therefore it could be applied to any and all actions that whoever - I'm assuming the police, find a nuisance, which is highly subjective. Public spaces are what WE the citizens of Winnipeg pay taxes for. It seems illegal to me, for the city to use my tax dollars to harm peaceful citizens who are exercising their democratic rights. Further we are guests on stolen land- this is Indigenous territory and you have no right as a government to police their actions on their OWN land. I am concerned about the

racist application of this bylaw that would result in the unjust persecution of Indigenous and other racialized people. I am appealing to your humanity and to what you know is the right thing to do- oppose this bylaw on Tuesday, February 17th. Please do the right thing and oppose this bylaw, vote no on Tuesday, February 17th. Thank you for your time and your attention to this matter.

Dear Executive Policy Committee,
I'm writing to you today to express my disgust and deep concern at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. A very significant and recent example is the work undertaken by MMIWG2S families and advocates to bring home Rebecca Contois, Morgan Harris, Marcedes Myran, and Ashlee Shingoose, who were murdered by a predator and disposed of in city landfills. When the leaders in our city, some of whom remain in their positions, refused to provide dignity for these women that were brutalized by recovering their remains, their families and our communities had to come together to bring them home. Not only this, but this particular issue became political fodder for the PC campaign during the last election. When a government and city systemically enables racism, transphobia, xenophobia, homophobia (amongst other prejudices), you cannot expect people to stay silent. And, as the political tensions with our southern neighbours continue to heighten, it should be abundantly clear how important the right to peaceful assembly is (and in turn, as a form of free expression). To remove it, let alone in a city like Winnipeg, which is stricken with problems that impact everyone, we must have the right to organize peacefully on behalf of causes that impact our most vulnerable.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in

inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. The new proposed "Nuisance Ban" on protests is not the type of legislation that a democracy such as ours should even be considering. This is an attempt to silence the public and is a slippery slope towards an authoritarian government. Canadians, such as myself, like to think that we are somehow protected from the fascist rhetoric coming out of the United States, but we are not. We need to show that we believe in public protest and that we care for our democracy by rejecting this very type of legislation. Furthermore, framing this as in the interest of public safety and protecting the public from "nuisance" protests is an unethical use of language and a gross attempt to sway those who would otherwise disagree with this proposal. Those who back this legislation should be ashamed of themselves.

Dear Executive Policy Committee,

I'm surprised and saddened by the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. It is disppointing to me that our civic leaders would seek to impose upon, rather then defend, our Charter rights to free expression and peaceful assembly -- at any time, but especially now, when threats to democracy and human rights are so clear, and so near.

If passsed, the sole exemption in this bylaw -- to allow demonstrations as part of a legal strike -- serves to underscore the many other worthy causes for which people would not be permitted to gather in certain places and show their support in otherwise legal ways. Thus, I want to register both my strong opposition to the proposed bylaw, and my deep concern for what its continued consideration by this esteemed council will say about their understanding and respect for people's legal rights in our city.

Sincerely,

Dan Bailis

February 13, 2026

To the Executive Policy Committee of Winnipeg,

Re: Safe and Vulnerable Infrastructure By-law

I am writing in support of Agenda Item #7 at the February 17, 2026 EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. A culture of permissiveness has grown around the expression of hate towards identifiable groups over the past two years. Locally, anti-Israel protesters have routinely positioned themselves outside of a Winnipeg Jewish community centre, daycare and school complex. As I have personally witnessed and as covered widely by local media, these people customarily carry signs and shout dehumanizing slogans depicting Jewish Israelis as garbage, diseased, and deliberate killers of children.

The location of these protests alone highlights their true intent. A Jewish community centre is not the Israeli or Canadian embassy, nor is it the office of any Canadian Members of Parliament. A Jewish community centre, school or daycare is, of course, not in a position to influence Canadian foreign policy. Protests outside locations such as this—particularly where the slogans act to dehumanize an identified group of people, have one obvious purpose: to intimidate the individuals and families who attend this centre. The location of these protests also underscores a popular pretense where “anti-Zionism” is often used as a dishonest placeholder for antisemitism. It would be inconceivable for a local Jewish group to protest against the terrorist entity Hamas outside of a Muslim community centre or to imply that all Muslims are responsible for the horrors perpetrated by Hamas and, if that ever happened, I would hope that the authorities would put a prompt end to it.

As a forensic psychologist and academic in the field of violence prediction and prevention, I would also highlight more than 50 years of research indicating a causal link between dehumanizing a group of people and the commission of violence towards that identified group. Targeted violence does not happen out of nowhere. It occurs through a process of building grievances and hate and this process is facilitated by making human beings appear to be less than human and, perversely, responsible for the hatred directed against them. When cultures develop that make the expression of hate permissible and local authorities are unable or unwilling to address this, violence becomes predictable. Historical examples include the Nazi Holocaust and the Rwandan genocide. Recent examples include numerous acts of violence in Canada, the United States, Europe and Australia against Blacks, Indigenous peoples, LGBTQ individuals, Latinos, Asians, Muslims and Jews. The Bondi Beach mass murder of fifteen Jewish individuals is a particularly salient recent example with personal resonance for me. It highlights that, even in Western societies we like to consider modern and civil, these events are possible and our families are not as safe as we might have previously assumed.

The Safe and Vulnerable Infrastructure By-law is an important measure, not just for protecting the rights of diverse individuals to live in a civil society free from intimidation based on their identity. It is also important for preventing a culture of intolerance and targeted violence against citizens of this community.

As a concerned citizen and member of many cultural and advocacy groups here in Winnipeg, MB, I am deeply concerned with the proposed #7 Safe Access to Vulnerable Infrastructure By-law. This type of by-law is simply so broad that it tramples on the multiple rights in a democratic society like ours, and I trust that City Council members will understand that it goes far beyond the notion of protecting vulnerable groups. Such a By-law would is a profound overreach and gives law enforcement powers that are beyond it's mandate, therefore curtailing the very constitutional and democratic legal rights that are inherent to our society.
Having participated in countless peaceful demonstrations over multiple decades, not once have I seen protests and marches infringe on others rights to or access to their places of worship, work or community. (To name of few: Indigenous Rights, Water Rights, Idle No More, Black Lives Matter, Solidarity for Palestine, Solidarity for Sudan, Language Rights for the francophone community, LGBTQ2S+ issues and many more marches). In the last two years, push back has come from certain groups who falsely claim that protesting political events at a community centre infringes on the safety of their specific community members. To be perfectly transparent, whatever one's views may be of an ongoing violent conflict, inviting soldiers who most likely have participated in state sanctioned crimes against humanity to speak at an event is in itself abhorrent. The level of gaslighting and moral cognitive dissonance required to then push for by-laws such as this to come before City Council is beyond acceptable.
If such a By-law was to pass, myself and my fellow citizens could be fined, detained and arrested simply for peacefully advocating for any just cause as mentioned above. In a city, province and country built on Treaties and colonial practices, I would only hope that City

Council members are able to see through these recent manipulations and reject this unconstitutional infringement on our democratic rights. Our strength as community does not come from silencing voices of dissent or objection, but rather from allow those voices to be heard and considered safely and clearly.
I trust that you will make the right decision to protect the rights for ALL people.
Sincerely,
Daniel Roy

I fully support the bylaw. I am submitting comments in writing only as I feel intimidated to come in person given the attacks on Jewish people in Winnipeg (remember the Folklorama event) and in Canada in general.
Politicians keep proclaiming that "Jew-hatred as no place here" but it's all empty words, nothing ever gets done. It's about time this changes and this by-law is a solid first step towards really protecting good people from haters.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Deanna Bogaski

Executive Policy Committee
Winnipeg City Council
City of Winnipeg
510 Main Street
Winnipeg, MB

Dear Chair and Members of the Executive Policy Committee,

Re: Opposition to the Proposed Safe Access to Vulnerable Infrastructure By-Law

I am writing to formally express strong opposition to the proposed *Safe Access to Vulnerable Infrastructure By-Law*, scheduled for consideration on February 17. While the stated goal of ensuring safe and reliable access to schools, hospitals, community centers, and places of worship is understandable and important, the proposed by-law is overly broad and infringes upon fundamental freedoms protected under the Canadian Charter of Rights and Freedoms.

Sections 2(b) and 2(c) of the Charter guarantee freedom of expression and freedom of peaceful assembly. These rights form the foundation of democratic participation in Canada. Any restriction on these freedoms must be demonstrably justified, necessary, and proportionate. The proposed 100-metre buffer zones around a wide range of public facilities do not meet this standard.

As drafted, the by-law defines “nuisance demonstrations” in expansive and ambiguous terms, including actions such as “obstructing the passage of pedestrians or motor vehicles

thereby rendering passage impassable or difficult" and "using amplifiers or microphones." Such language introduces significant uncertainty and grants broad discretionary power in enforcement. Lawful, peaceful gatherings could be subject to penalties ranging from $500 for a first offence to $5,000 for repeat violations.

For organizations such as Bike Winnipeg, this raises serious concerns. Group bicycle rides—an established and peaceful form of civic engagement—often involve traveling at reduced speeds for safety and occasionally using megaphones for pre-ride safety briefings. Under the proposed language, such activities could potentially be interpreted as rendering vehicle passage "difficult" or as constituting a "nuisance demonstration." This uncertainty creates a chilling effect, discouraging lawful civic participation due to fear of punitive enforcement.

The right to protest is not merely tolerated in a democracy; it is essential. Peaceful demonstrations provide residents with a vital means to express dissent, advocate for policy change, and hold government accountable. The establishment of sweeping 100-metre exclusion zones around a broad array of civic institutions—including schools, community centers, and places of worship—would effectively create extensive "no-protest zones" throughout Winnipeg. The City's own administrative report acknowledges the breadth of these restrictions.

Importantly, existing laws already address harassment, intimidation, obstruction, and public safety concerns. Rather than narrowly targeting harmful conduct, this by-law imposes generalized prohibitions that risk capturing legitimate, peaceful expression.

I urge the Executive Policy Committee to reject this proposal and to use the existing more narrowly tailored and proportionate codes, acts, and laws to address specific safety concerns without undermining constitutionally protected rights. A balanced approach can and must be achieved—one that safeguards access to essential services while preserving the democratic freedoms that underpin our community.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Desmond Bushie

Peaceful protests are an invaluable way for members of the public to draw attention to human rights violations and important societal issues. Making this illegal would be a move toward fascism. This is a democracy.

I agree that protests near vulnerable places such as hospitals, clinics, places of worship, etc, should be banned. All protests should take place at the Legislative grounds unless union members are protesting against their place of employment.

Aniin Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,

I'm going to skip the templates suggested - there are plenty of submissions I'm sure that are rooted in justifiable fear, anger, disgust. I don't blame them, they probably see this issue from an even better perspective than I do. I am concerned though, and I'm going to express that.

I'm concerned that this recommendation or proposed action on 'Nuisance Protests' is vague and open to far too much mis-interpretation. While I support the need to be civil, protest in an organized fashion, and respect the needs and boundaries of others, this is too far reaching and puts a blanket buffer on locations where decisions are being made. Not everyone can have a seat at the table, but when occasions arise for collecting outside the proverbial front door, citizens shouldn't feel that right is being threatened to be taken away - that maneuver likely won't result in more productive and balanced gatherings. There has got to be a better way to maintain decorum, protect our collective interests as folks who live, work, raise families, pay taxes, and steward the land in this part of the world.

I can only hope that each person holding public office in our city, province, and even country is doing so because they were moved by a cause at some point in their life, felt supported by community, or wanted to see change in the world around them.

Protests are one way that community comes together to connect, grow, and achieve outcomes. So are more amenable events like group bike rides, round dances, rallies. These

are moments that motivate people to DO something in their communities, take part, make change. Apathy is a growing epidemic, (among other things like the lack of basic life sustainment skills, and critical thinking) taking part in the political process, includes the option of attending protests, and being part of community includes engaging in events like group rides, rallies, round dances.

I understand that when groups get large, they become difficult to manage, however I know that a lot of effort goes into planning any kind of group gathering, and those planning more often than not do take safety and public respect into consideration.

The ground will swell regardless, we can build rafts together or sink on splinters solo.

THE UNIVERSITY OF WINNIPEG

Dr. Erin Millions
Department of History
University of Winnipeg
515 Portage Avenue
Winnipeg, MB R3B 2E9

13 February 2026

Dear Executive Policy Committee:

I am writing in response to Agenda Item: #7 Safe Access to Vulnerable Infrastructure By-law. As an historian of Canadian and Winnipeg histories, I am deeply concerned about the impact of the proposed bylaw on Winnipeg's long history of and on-going engagement with civil protest. Winnipeggers are leaders in forging and protecting the rights of Canadians. Winnipeg's histories of protest include the 1914 Mock Parliament in support of the women's vote, led by Nellie McClung and others, and labour action including the establishment of the first Black labour union in North America in 1917 (Order of Sleeping Car Porters) and the 1919 Winnipeg General Strike.

Protest and civil action are fundamental to what defines Winnipeg as a city. Portage and Main is not just a key intersection in Winnipeg, but a space whose histories represent Winnipeggers' fierce advocacy on behalf of the rights of all Canadians. Winnipeg was a key site of the Idle No More Movement in 2012 and, in more recent years, Winnipeggers have gathered to show support for Black Lives Matter, Trans Rights, and families impacted by the epidemic of Missing and Murdered Indigenous Women and Girls. Every year, thousands of Indigenous and non-Indigenous Winnipeggers gather on September 30th to walk in commemoration of the National Day for Truth and Reconciliation.

Winnipeg is also a Human Rights City, reflected in the institutions, committees, and educational initiatives in this city that center human rights. This includes the City of

Winnipeg's own Human Rights Committee of Council (HRCC). The 2023-2026 HRCC Strategic Plan identifies "the establishment of Winnipeg as a Human Rights City" as one of its four core mandates.[1] The right to protest is a fundamental human right, protected in Canada by the *Charter of Rights and Freedoms*. Amnesty International contends that:

> **The ability to protest safely is an issue that intersects with the right to be free from discrimination. People who face inequality and discrimination, based on their age, race, gender identity and many other factors, face even more dangers to their right to protest. It is crucial that everyone can protest safely and without discrimination**.[2]

Others are better positioned to speak to the legality of the proposed bylaw and the existing laws that already allow police to address unlawful measures. As a historian and regular participant in civil action in Winnipeg, however, **I argue that the overly-broad nature of the proposed bylaw contravenes the long histories of civil action that are fundamental to who we are as Winnipeggers. Moreover, the proposed bylaw transgresses the City of Winnipeg's stated goal of establishing and promoting Winnipeg as a Human Rights City**.

Sincerely,

Dr. Erin Millions
Assistant Professor
Department of History
University of Winnipeg

I oppose the proposed motion.

The right to protest is a fundamental tenet of a functioning democracy. As written, the proposed act opens the door for subjective and draconian assessment of whether a protest is permissible or not.

I understand of course the tension- I personally feel that some protests or activism are less appropriate than others (see: pro life campaigns at medical facilities vs cycling protests in favour of safe infrastructure). However, the broad sweep of sites chosen for the buffer include places best suited for productive protest and include language that is so broadly open for interpretation that it puts meaningful democratic conversation at risk.

Whereas I don't personally have a key recommendation for adjustments, I think the sweeping and subjective language throughout makes this act a poor one. I encourage council to more concretely describe the public safety issues meant to be addressed by this act, and open an evidence-based discussion about an effective response.

Dear Executive Policy Committee,

I am writing to express my deep concern and alarm regarding the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law, which would restrict Charter-protected rights to freedom of expression and peaceful assembly. I am strongly opposed to this proposed bylaw.

This is about the next seven generations. The bylaw would limit fundamental freedoms Winnipeggers have long used to fight for social justice—from vigils and rallies to round dances. Public demonstrations have helped secure rights for Indigenous, racialized, 2SLGBTQIA+ folks, workers, tenants, and environmental protections.

Passing this bylaw would be against our human right to protest and demonstrate lawfully. It risks infringing on constitutional rights, silencing marginalized voices, enabling police overreach, and failing to prevent acts that are already criminal. The Canadian Civil Liberties Association has also warned that broad rules like this often harm marginalized groups who rely on protest to create change.

This is about protecting freedom of expression and association—cornerstones of a free democracy. As we see rights suppressed elsewhere, I urge you to uphold the Charter, protect our democracy, and drop further consideration of this bylaw.

Signed
Felisha Hartig

Comments
As the Policy Advocacy Director of the Manitoba Eco-Network, I submit these comments on behalf of our organization in opposition of the draft Safe Access to Vulnerable Infrastructure By-Law. The need for a by-law to protect "vulnerable infrastructure" has not been adequately established by the City of Winnipeg, nor does the proposed by-law provide any insight into this perceived need. Instead, the proposed by-law seems to be entirely focused on creating unnecessary barriers and legal consequences for citizens seeking to exercise their Charter protected democratic rights.

The Manitoba Eco-Network is a non-profit registered charity which seeks to strengthen Manitoba's environmental community with the goal of protecting our environment for the benefit of current and future generations. The Eco-Network facilitates connections, engages in advocacy opportunities, and undertakes community-based research that promotes meaningful public participation in environmental governance processes.

We serve as an umbrella for environmental non-governmental organizations across the province. We build capacity and support grassroots organization's participation in the environmental community, we celebrate positive environmental actions that happen within Manitoba, and work to elevate the voices of all those within our community.

Peaceful public protests, such as rallies, round dances, and bike jams, among other activities, are an important and valuable way for concerned citizens and public interest organizations to raise public awareness and inspire change. For example, the global climate movement was inspired by Swedish activist Greta Thunberg who started Friday's for Future as a student strike for climate in 2018. This small action from a high-school student has subsequently grown into an international movement seeking stronger

environmental protections and better climate policy, and inspired many past and ongoing peaceful climate demonstrations in Manitoba.

Instead of protecting the public and inspiring lawful protests, we believe the proposed Safe Access to Vulnerable Infrastructure By-law will actually cause public harm by creating large protest-free zones throughout the city that will diminish the ability of Manitobans to protest anywhere in Winnipeg, not just in close proximity to “vulnerable infrastructure”.

The definition of “nuisance demonstrations” proposed in the by-law is too broad, as it captures any in-person protest or demonstration that does any one of the following:
1. Expresses an objection or disapproval towards an idea, action, person or group based on or related to any specified characteristics,
2. Obstructing the passage of pedestrians or motor vehicles without an applicable permit issued by the City,
3. Using amplified speakers without a City permit.
For example, one of the “specified characteristics” under the first part of the definition is “source of income”. This would have a chilling effect on any environmental protest aimed at divestment in fossil fuels, which is an important issue in the environmental community.

The proposed prohibition of “nuisance demonstrations” within 100 meters of designated facilities is also problematic as this captures a large number of locations across Winnipeg, including cemeteries, community centres, schools, cultural centres, healthcare facilities, hospitals, libraries, place of worship, and post-secondary institutions. When mapped out, the overlapping 100 meter buffers create entire protest exclusion zones, particularly in the downtown area. There are also a number of locations unintentionally included in these proposed exclusion zones, such as the offices of elected political officials, that happen to be located near community centres, schools, and other facilities that would be considered a “designated facility”. Thus, there is significant potential to limit peaceful protests that do not intentionally target a designated facility, just happen to be located nearby.

The Manitoba Eco-Network does not tolerate or condone intimidation, inciting hatred, violence, intolerance, harassment, or discrimination. The peaceful assembly we support does not include hate speech, violence, riots, or attempts to physically impede or blockade lawful activities. When these problematic actions occur, there are already adequate laws to protect citizens and punish those who behave in an unlawful manner. There is no need for this proposed by-law as a means of legal protection, thus, we can only infer that the City’s intention is to limit the rights of their citizens to peacefully protest. The overly broad definitions of “nuisance demonstrations” and "specified characteristics" discussed above,

among other problems with the language of this by-law, will serve to prohibit a much broader range of public discourse than just hate speech.

This includes the advocacy actions of elementary, high-school and post-secondary students, our leaders of tomorrow, who will be limited in their ability to undertake protest activities at their own educational institutions, which would be captured under the "designated facility" definition. In the spirit of intergenerational equity and environmental justice, we should be creating space for youth advocates and encouraging them to speak up about the issues that concern them. As Greta Thunberg has shown the world, a small student-led local action can have positive global consequences.

There are also important issues, such as ongoing racism in our healthcare system, that do not seem to be addressed by government until the public loudly speaks up. For example, public action in response to tragic and unfortunate situations, such as the deaths of Brian Sinclair in the Health Sciences Centre emergency waiting room in 2013, and Joyce Echaquan at Joliette hospital in Montreal in 2020, drew attention to problems with systemic racism in the healthcare system towards Indigenous peoples. If passed, the proposed by-law would prohibit protests or demonstrations regarding systemic racism in our healthcare system as this objection or disapproval would be based on specified characteristics. This means people could not hold peaceful protests or demonstrations about systemic racism in the healthcare system within 100 meters of healthcare facilities, hospitals, or universities, as they would be considered a "nuisance demonstration".

Another example of a valid public action that could be prevented by this proposed by-laws is a bike jam, where numerous cyclists gather to ride together with amplified music. This serves not only as a means of having fun, it also serves to raise awareness and make an expression about the benefits of cycling for health, environmental protection, and smart city planning. In accordance with the proposed By-Law, if the bike jam came within 100 meters of hundreds, if not thousands, of designated facilities across Winnipeg this would be a breach of the proposed by-law simply because they are playing amplified music.

These are just a couple of examples of how the proposed Safe Access to Vulnerable Infrastructure By-law is too broad and will create unnecessary barriers for citizens seeking to undertake lawful protests in the City of Winnipeg. You will undoubtedly hear more examples during the meeting.

Overall, the Manitoba Eco-Network recommends that the EPC should reject the proposed by-law, for the many reasons discussed above. There are also ongoing legal challenges to

other similar by-laws in Canada, such as the challenge initiated by the Canadian Civil Liberties Association of a by-law passed in Vaughn, Ontario, that could inspire similar action in Manitoba if the proposed by-law is passed. We feel it prudent for Winnipeg to at least wait until Courts provide guidance on the constitutionality of these types of by-laws before enacting its own.

Dear Executive Policy Committee,

The ability to stand up and be counted on the street in person is something that I have always considered to be a human right in Canada. I had never thought that it would even be attempted in Winnipeg or Canada that a law could make that simple act illegal. This is way to broad plain wrong spirited to be allowed to be seriously considered by council. This is not a path to fascism. This is an attempt to install a main feature of fascism in our city.
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United

Cities and Local Governments (UCLG) “Human Rights City” since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Ian August

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal

Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Submit comments in writing

Comments
I write these comments in opposition to the draft Safe Access to Vulnerable Infrastructure By-Law (proposed By-Law), scheduled for consideration by the Executive Policy Committee on February 17th, 2025, #7 on the Agenda.

I write these comments as a private citizen, but I am also a lawyer called to the Bar in Manitoba. Ultimately the Courts will decide (should they be called upon); but in my opinion there are serious risks that the proposed By-Law could be successfully challenged on constitutional grounds.

LEGAL OVERVIEW

There seems little doubt that this by-law infringes on Charter rights, including (but not necessarily limited to) freedom of expression (Subsection 2b), and freedom of peaceful assembly (Subsection 2c).

This by-law limits a "nuisance demonstration" within 100 meters of: "(a) cemetery, where the City is the registered owner; (b) community centre; (c) commercial school; (d) cultural centre; (e) healthcare facility; (f) hospital; (g) independent school; (h) library; (i) neighbourhood rehabilitation home; (j) place of worship; (k) post-secondary institution; or (l) public school."

Nuisance demonstration is defined to include "any expression" "towards an idea, action, person or group based on or related to any specified characteristics" or "obstructing the passage of pedestrians or motor vehicles without an applicable permit issued by the City" or using amplified speakers without a City permit.

The question the Courts will undoubtedly need to address is whether the by-law is justified in accordance with Section 1 of the Charter, states that rights and freedoms are “subject only to such reasonable limits prescribed by law as can be demonstrably justified in a free and democratic society.”

The interpretation of the Section 1 of the Charter, or in other words when infringements on rights and freedoms are justified, is well established law. The Supreme Court of Canada’s 1986 decision R. v. Oakes (1986 CanLII 46 (SCC), [1986] 1 SCR 103) is the seminal decision that established what lawyers often refer to as the “Oakes justification test.”

The Oakes test sets out how to determine whether limits on rights and freedoms prescribed by law are reasonable and demonstrably justified in a free and democratic society. The party seeking to uphold the limitation has the onus of justifying why an exception to the guaranteed rights and freedoms is justified (Oakes, para 66).

Firstly, there must be an objective that relates to pressing and substantial purpose that are of sufficient importance to warrant overriding a constitutionally protected right or freedom. The standard must be high in order to ensure that objectives which are trivial or discordant with the principles integral to a free and democratic society do not gain s. 1 protection (Oakes, para 69).

Secondly, there has to be proportionality between the objective and the means used to achieve it. This will vary with the circumstances, but requires a three component sub-test:
-First, the measures adopted must be carefully designed to achieve the objective in question. They must not be arbitrary, unfair or based on irrational considerations. In short, they must be rationally connected to the objective.
-Second, the means, even if rationally connected to the objective in this first sense, should impair "as little as possible" the right or freedom in question.
-Third, there must be a proportionality between the effects of the measures which are responsible for limiting the Charter right or freedom, and the objective which has been identified as of "sufficient importance." There has to be a rational connection (Oakes, para 70).

With respect to the third component: “the inquiry into effects must, however, go further. A wide range of rights and freedoms are guaranteed by the Charter, and an almost infinite number of factual situations may arise in respect of these. Some limits on rights and freedoms protected by the Charter will be more serious than others in terms of the nature

of the right or freedom violated, the extent of the violation, and the degree to which the measures which impose the limit trench upon the integral principles of a free and democratic society. Even if an objective is of sufficient importance, and the first two elements of the proportionality test are satisfied, it is still possible that, because of the severity of the deleterious effects of a measure on individuals or groups, the measure will not be justified by the purposes it is intended to serve. The more severe the deleterious effects of a measure, the more important the objective must be if the measure is to be reasonable and demonstrably justified in a free and democratic society" (Oakes, para 71).

With the application of the Oakes test being adaptable to the specific circumstances of each case, reference to a couple other decisions is helpful.

Recently (on January 6, 2026), in Ruck v. City of Mississauga, 2026 ONSC 73 (CanLII) the Ontario Superior Court of Justice struck down sections of the City of Mississauga's Nuisance Weeds and Tall Grass Control By-law, which prohibited property owners from growing grass over 20 cm in height and having certain nuisance weeds on their property, as unconstitutional infringements on the right to freedom of expression under s. 2(b) of the Charter.

In applying the Oakes test the Court found that the first part of the test had been met, there was a pressing and substantial objective. In applying the second part of the test the Court found that the first component had been met, the limit was rationally connected to the right, but the Mississauga by-law failed the other two components of the test. It was not minimally impairing, nor did it survive the proportionality arm of the Oakes analysis (Ruck, paras 72-86).

In Ramsden v. Peterborough (City), 1993 CanLII 60 (SCC) the Supreme Court of Canada was confronted with the constitutional validity of a municipal by-law that prohibited all postering on public property. The Court held that while the legislative goals were important, they did not warrant the complete denial of access to a historically and politically significant form of expression.

In applying the Oakes test the Court held that the first part of the test had been met, avoiding aesthetic blight can be a pressing and substantial objective. In applying the second part of the test the Court found the first component was met, the total ban was rationally connected to these objectives, but the second and third components were not met. A complete ban on postering did not restrict expression as little as is reasonably possible. Many alternatives to a complete ban exist. Proportionality between the effects

and the objective was not achieved because the benefits of the by-law were limited while the abrogation of the freedom was total.

APPLICATION TO THE CURRENT PROPOSED BY-LAW

Applying the Oakes test to the proposed Safe Access to Vulnerable Infrastructure By-Law demonstrates that this by-law is both unconstitutional and a bad idea.

PRESSING AND SUBSTANTIAL PURPOSE (1)

There is absolutely a need to create safe spaces. Behaviours such as intimidation, inciting hatred, violence, intolerance, harassment, or discrimination do have negative effects and should not be tolerated.

However, it is unclear what new pressing or substantial need is being addressed?

There are already ample laws in place to address such behaviours.

The Criminal Code already has provisions for the public incitement of hatred, assault, intimidation, criminal harassment, unlawful assembly and rioting.

The City of Winnipeg Traffic By-Law already requires that a parade permit is required to have demonstration or gathering on public streets, and the Manitoba Court of Appeal has found this be a constitutionally justified limit (R v Michalchuk, 2017 MBCA 103 (CanLII)).

The City of Winnipeg Noise Control By-Law addresses nuisance noise.

It is unclear why the proposed By-Law is needed? What pressing and substantial purpose does it seek to remedy?

The proposed By-Law may also have the opposite of the purported effect. It may end up targeting, rather than protecting, marginalized or vulnerable populations due to selective enforcement.

It is therefore arguable if the proposed By-Law has an objective that relates to a pressing and substantial purpose that is of sufficient importance to warrant overriding constitutionally protected rights or freedoms at all, but for argument's sake let us presume this part of the test is met.

RATIONAL CONNECTION (2A)

The proposed By-Law is not rationally connected to the intended purpose of creating safe spaces, and prohibiting behaviours such as intimidation, inciting hatred, violence, intolerance, harassment, or discrimination.

The definition of "nuisance demonstration" is too broad. It prohibits demonstrations that express objection or disapproval "based on or related to any specified characteristics," or obstructing the passage of pedestrians or motorists without a permit issued by the City, or the use of amplifiers or microphones without a permit issued by the City.

The use of the words "based on or related to any specified characteristics" would capture, for instance, anti-racism protests or demonstrations. Prohibiting individuals and the public from protesting or demonstrating outside a hospital, library, community centre, school, university, or other designated facilities with respect to alleged mistreatment or discriminatory practices on the basis of specified characteristics is contrary to the purported intents of the act, and thus is not rationally connected.

The use of the word "or" denotes that only one of the three conditions needs to be met. This means for instance, that someone simply amplifying music or a microphone within 100 meters of a designated facility without a permit could be captured by this By-Law. Once again demonstrating that the proposed By-Law is not rationally connected to its intended purpose (nor is the impairment minimal).

As an aside, there is also a formatting and typographical error with respect to the definition of "nuisance demonstration." The third sub-clause (c) is missing and the definition runs in the next definition for "place of worship." This is likely an honest error, but it also raises questions with respect to how thoroughly this proposed By-Law has been considered.

The definition of "designated facility" is extremely broad. There is not a clear rationale for why protest and demonstration should be prohibited from these portions of Winnipeg, but not others. If we want to create safe and inclusive spaces, rationally connected measures would target the behaviours or actions not the location, so that we could create safe and inclusive spaces across the entire City.

MINIMAL IMPAIRMENT (2B)

As stated, the definition of “designated facility” is extremely broad. One local blog site, Chromatin.ca, has attempted to map the hundreds, possibly thousands of locations, and estimates that nearly 17% of Winnipeg’s area would be covered by these demonstration bubble zones. As noted, there is not a clear rationale for why these portions of Winnipeg should be “protected spaces” and not others. The net is cast too wide, and so it does not minimally impair rights to expression, and peaceful assembly. As highlighted above, someone simply using an amplified speaker within 100 meters of a designated facility could be captured by this proposed By-Law. Having the measures target behaviours or actions, rather than locations, is a better way to achieve minimal impairment.

In Ruck (para 81) the Court made it clear that identifying minimally impairing by-law standards requires more than a jurisdictional scan. It is not sufficient for a municipality to simply say ‘we are doing what everyone else is doing.’ The municipality needs to meaningfully turn its mind to searching for reasonably minimally impairing solutions to achieve its pressing and substantial objective and lead evidence that demonstrates the same.

It does not appear that the City of Winnipeg has done this. The jurisdictional scan, included as Appendix A, is inadequate. Simply outline what other jurisdictions are doing is not enough (Ruck, para 81).

It should also be noted that the jurisdictional scan identified the Protecting Vulnerable Social Infrastructure By-Law passed by the City of Vaughan in 2024. The jurisdictional scan, however, fails to recognize that this by-law is currently facing a court application filed by the Canadian Civil Liberties Association that challenges the constitutional validity of this very similar by-law.

As a means of limiting litigation risk, it would be wise for the City to at minimum hold off on passing any similar by-laws until after a decision is rendered with respect to the Vaughan by-law, and tailor any by-laws in accordance with any guidance that that decision might provide.

PROPORTIONALITY (2C)

Rights to protest and demonstrate, is the bedrock to a functioning democratic society. The By-Law proposes serious infringements on Charter protected rights. It is unlikely to pass the proportionality balancing test given the severity of the deleterious effects and the overbroad nature of the proposed By-Law. The stakes are simply too high, and so the onus

on the City will be similarly high.

CONCLUSION

This proposed By-Law should not be passed. It is debatable if one is needed at all, but at minimum significant revisions are needed in order for this by-law to serve its intended purpose as well as meet the requirements of justification under the Charter.

Should you have any questions or concerns, please feel free to contact me.

The proposal to increase discretionary law enforcement powers is concerning. Such by-laws leave too much discretion in the hands of law enforcement often in the heat of difficult situations, when a broader perspective is difficult to maintain. Further, whether a demonstration or action represents a "nuisance" is typically a matter of opinion or perspective, not fact. Human history and recent global events demonstrate that such powers are often invoked inconsistently, often targeting persons who are racialized and/or perceived to be taking unpopular political positions. Current laws already provide sufficient powers for law enforcement. If difficult situations arise, our law courts are the appropriate places to adjudicate whether a particular demonstration can be objectively categorized as "intimidating." In the absence of such court decisions, we, as a society, should ensure that rights of assembly and speech are protected by law, even if certain demonstrations make some of us uncomfortable on occasion.

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Members of the Executive Policy Committee,

I am writing to express my opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law. While I support efforts to ensure safe access to public services, I am concerned that the by-law, as currently drafted, would place broad and unnecessary limits on the Charter-protected rights to freedom of expression and peaceful assembly.

Public demonstrations have long played an important role in Winnipeg and across Canada. Vigils, marches, and rallies have helped communities advocate for improvements in labour rights, environmental protection, Indigenous rights, and many other social issues. Restrictions that prevent peaceful protest across large areas of the city risk undermining this essential part of democratic participation.

I am also concerned about the potential unintended consequences of the proposed rules. The definition of “nuisance demonstrations” appears broad and open to interpretation, which could lead to inconsistent enforcement or discourage lawful, peaceful gatherings. Existing laws already address harassment, violence, and property damage. Expanding restrictions in ways that primarily affect peaceful expression may do little to address those issues while creating new barriers for residents seeking to be heard.

Organizations such as the Canadian Civil Liberties Association have noted that sweeping restrictions on demonstrations can disproportionately affect marginalized communities, who often rely on public protest to bring attention to their concerns. For this reason, it is important that any limitations on Charter freedoms be carefully justified, narrowly targeted, and clearly necessary.

I respectfully urge the Committee to reconsider this by-law in its current form and to explore more balanced approaches that protect both access to services and the fundamental freedoms that are central to a democratic society.

Sincerely,
Jason

Submission to the Executive Policy Committee
Re: Safe Access to Vulnerable Infrastructure By-law

Dear Members of the Executive Policy Committee:

I am writing today not only as the President & CEO of the Jewish Federation of Winnipeg, the representative body of Winnipeg's Jewish community, but as a concerned citizen, to voice my strong support of the proposed Safe Access to Vulnerable Infrastructure By-law.

This legislation is necessary and, frankly, long overdue. It reflects values most Winnipeggers, and by extension Canadians, share: that people should be able to gather in community spaces without being threatened, harassed, or intimidated.

What happened at Folklorama last year made that reality impossible to deny.

At the Israel Pavilion, hosted at the Asper Jewish Community Campus, families arrived expecting music, food, and celebration. Instead, they were met with a screaming mob outside the entrance. Guests, including children and seniors, were confronted with chants glorifying violence, young female Israeli dancers were threatened with rape, sexualized slurs were shouted at women and girls, and crowds repeatedly yelled "Hamas is coming for you" at people entering the building.

Amplified sounds of gunfire and screaming were blasted into the evening air. This occurred at the doors of a community centre that houses a fitness facility, early childhood programs, cultural programming, and serves as the beating heart of Jewish life in Winnipeg.

This was not an abstract debate, nor was it peaceful dissent. It was intimidation directed at people as they entered a community space – and this is just the tip of the iceberg.

For years, when the Campus has hosted politically charged speakers or cultural programming connected to Israel, such as the Israel Pavilion, it has attracted

protests. And, in that time, demonstrations have escalated into rhetoric and behaviour designed to unsettle and make people feel unsafe.

The Campus is home not only to Jewish communal organizations, but also to a daycare serving toddlers, Gray Academy, a Jewish day school educating students from Junior Kindergarten through Grade 12 (approximately four to eighteen years old), and the Rady Centre fitness facility, whose patrons represent Winnipeg's diverse communities.

On any given day, toddlers are arriving for childcare, four-year-olds are beginning school, teenagers are in class, seniors are attending fitness programs, and families are gathering for cultural and recreational activities. Jewish and non-Jewish patrons alike have had to navigate shouting crowds at the doors of a building that is meant for childcare, learning, and community.

Our community's relationship with the Winnipeg Police Service is very positive. They have been there to protect our community spaces and synagogues, thereby ensuring the safety and security of our community members and the most vulnerable populations. But their presence, while appreciated, cannot be the only answer. Officers can separate groups and monitor, and respond when lines are crossed. But families should not have to run a gauntlet of threats and antisemitism to enter a building. Children should not have to ask their parents why strangers are yelling threats at them. Seniors should not feel their safety is in question while walking into a fitness class.

That is why clear, enforceable boundaries are of great importance.

This by-law does not silence protest, nor does it outlaw disagreement. It does not prevent individuals from expressing their political views. What it does is establish distance and draw a line between expression and intimidation at the doors of community spaces.

Other jurisdictions in Canada have already recognized the need for protective buffer zones around places of worship, schools, and community facilities. Winnipeg should not lag behind in taking this important action. Manitobans deserve the same basic protections.

Opposition to this by-law will likely frame it as an "attack on free expression". It is not. The right to protest does not include the right to harass families at the entrance of a community centre. It does not include the right to threaten children. When intimidation is allowed to take root at its doors, the harm is not limited to one community. It undermines confidence in the basic promise that we can gather safely in our own community spaces.

This by-law is a measured and logical response to a documented pattern. It reflects careful consideration of similar measures adopted elsewhere. It provides clarity for law enforcement and reassurance for families. Most importantly, it signals that Winnipeg will not accept intimidation as the price of participation in community life.

Members of this Committee have an opportunity to make a powerful statement: that hate has no place at the entrances of our community spaces.

We urge you to support this by-law as a practical step toward protecting safe access, dignity, and shared Canadian values in our city.

Respectfully submitted,

Jeff Lieberman, President & CEO

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United

Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for

social change. According to the Canadian Civil Liberties Association, the right to protest is not simply permitted in a democracy—it is essential. Peaceful protest is a primary way in which residents can express dissent, hold governments accountable, and influence public policy. Broad 100 metre exclusion zones around an extensive list of facilities—including schools, community centres, and places of worship—would effectively prohibit legitimate, peaceful demonstrations across large portions of the city.

The City's own administrative report confirms this by-law would create wide "no protest zones" around nearly every major civic institution in Winnipeg. Such sweeping restrictions go well beyond addressing harassment or obstruction (which existing laws already cover) and instead create generalized bans that would chill democratic participation.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

It is unacceptable to functionally ban protest across wide swaths of the city on these spurious grounds. Occasional exposure to contrary opinions in public space is part and parcel of living in a democratic society. Council needs to decide if they believe in liberal democracy or not.

Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

Additionally, I ask you to consider the quality of leadership displayed in this proposal. A leader who would prefer to shut the people up and silence criticism is behaviour unbecoming of a Boy Scout troop leader, nevermind politicians in government. Silencing criticism is a fearful act taken by cowardly men who would prefer to ignore issues rather than address them.

I implore you to drop further consideration of the proposed demonstrations bylaw.

My understanding is that we already have laws to keep people safe from harassment and intimidation, this seems like a restriction of the right to protest and free speech.

13 February 2026

Dear Mayor Gillingham and Members of the Executive Policy Committee of the City of Winnipeg:

We are writing to you in regard to the "Safe Access to Vulnerable Infrastructure By-law" proposal to be discussed at the February 17th meeting of EPC. We write as professors, instructors, and academic librarians who work in Winnipeg's post-secondary institutions and as members of the Winnipeg community.

The proposed by-law conflicts with the mission of post-secondary educational institutions. It threatens to chill political speech beyond the University and violate Charter-protected rights to free expression and peaceful assembly.

The proposed by-law bans any obstruction of traffic or use of sound amplification without a permit from the city, and includes post-secondary institutions as sites governed by the ban. Moreover, it authorizes substantial fines for non-compliance (up to $5000 for repeat offenders). As a result, the ban would effectively block many members of our University communities from engaging in common forms of speech on our campuses, including teach-ins or other types of rallies.

Freedom of expression is essential for the mission of post-secondary educational institutions. Free debate and discussion—including peaceful acts of protest—allow for the exchange of ideas that is required for the discovery, preservation, and dissemination of knowledge. Restrictions on protest also limit the University's ability to prepare students to engage in public debate and respond to intellectual challenges. The proposed by-law would undermine this freedom of expression in a way that would compromise these core missions of the University.

The proposed by-law also threatens to substitute the judgments of city officials considering whether to permit activities that involve amplified sound or traffic disruption for those of University authorities. Campus communities have had long, ongoing, and vibrant debates around what free expression looks like on our campuses, and are best placed to continue those discussions and decisions under collegial governance processes. And the University's ability to effectively pursue and share knowledge requires maintaining distance from government interference, which is threatened by the proposed ban's imposition of political interference on University matters.

We are especially concerned about the proposed by-law's application to post-secondary institutions. But we also have serious concerns beyond our campuses. We believe the by-law will chill public expression, and penalize people for exercising their Charter rights to free expression and peaceful assembly. We also fear that the by-law may be unevenly applied to limit speech and assembly that government officials or enforcement agents disfavour.

Finally, this proposed by-law goes well beyond what has been enacted (and legally challenged) in other jurisdictions. For example, by-laws in Calgary and Toronto, to which it has been

compared, apply to far fewer spaces (childcare centres, places of worship, or schools, in Toronto; libraries and community centres in Calgary). Neither jurisdiction imposes restrictions on post-secondary educational institutions. Nor do they limit amplified speech or disruption of traffic. Instead, they simply restrict conduct that limits people's access to public space, discourages or intimidates people from accessing those spaces, or targets people on the basis of Charter protected characteristics. The restrictions proposed in the by-law before the EPC significantly exceed these restrictions.

As academic faculty, we call on the Executive Policy Committee to vote against the proposed by-law.

Sincerely,

Professors, Librarians, and Instructors from University of Manitoba, Université de Saint-Boniface, University of Winnipeg

I am writing in support of Agenda Item #7 at the February 17, 2026, EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. This measure is a necessary step to protect essential community institutions and ensure Winnipeg remains a safe and welcoming city for all.

When my wife served as Folklorama Ambassador for the Israel Pavilion in 2024, I strongly discouraged her from doing so as I was worried for her safety. There were numerous loud and threatening protests almost every night outside of the Pavilion. I also worry for our children who use the Asper Campus facilities. Jewish people should not have to worry about their safety or hide their identity and certain places like synagogues and community Centres should be kept as safe zones without fear of hate or intimidation.

I am asking my city to protect its citizens by placing these reasonable limits on intimidating and antagonizing behaviour.

This policy proposal likely contravenes the Charter and is blatantly anti-democratic. I read in the Winnipeg Free Press that Zionist groups had been lobbying for this. A group at Harvard recently estimated that 600,000 people have died in Gaza so far in what an increasing number of organizations and individuals have recognized as a genocide.

In light of this, for the municipal government to want to restrict the ability of people to protest issues which you have condescendingly described as "nuisances" in much of the city is abhorrent.

Repression is never the answer!

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter

and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Jordan Lee

Public Hearings Before Committee of Human Rights

of

Winnipeg City Council

Should the IHRA working definition of antisemitism, designed to stimulate discussion, be converted into Policy?

What is the relevance to Manitoba and Canada Today - February 2026?

Respect to all delegates for their presentations;
to Committee Members;
to City Council for providing a democratic forum for citizen participation.

The IRHA - International Holocaust Remembrance Alliance Working Definition of antisemitism has been passed into policy by Federal and Provincial governments and organizations throughout Canada.
On March 27, 2023, the City of Winnipeg, Human Rights Committee held the only public hearings in Manitoba on this working definition conversion to policy, permitting citizens of opposing views to speak.

Five Jewish proponents, two of whom were full-time lobbyists, and a Federation Church representative, had been given time at the Human Rights Committee to ask that this working paper be converted into city of Winnipeg policy. Hearings had to be postponed. Word spread to the public. Thirteen citizens, seven Jewish, six of diverse backgrounds, submitted requests to speak in opposition. The larger numbers required Council Chambers. Deputy Mayor Markus Chambers, assisted by City Clerk Rebecca Ford, ensured a respectful and democratic process (YouTube https://www.youtube.com/watch?v=rtdvczD1J1I).

The conclusion of the hearings pointed to action. Neither the City nor any other body of government has taken up the call to action. This synopsis of the four hours of hearings comes from a belief that four years later, the recommendation is critical and can assist in clarification of a tangle of conflicting identifications, strengthening democratic values.
Synopsis of opposing different identifications p. 3-4;
synopsis of presentations p. 5-15;
glossary of organizational identifications of delegates p. 16-17.
Manitoba situation today p. 18

1** *Kenneth Stern, o*riginator of the Working Paper on the IHRA, Director of the Bard Center for the Study of Hate and Human Rights project, Author, and Attorney:** “Passing this document into policy by institutions and governments resulted in the misuse of a document created for academic discussion. The IHRA as a policy serves as a tool aimed at shielding Israel from resistance to its oppressive form of racial governance and, following its recent war on Gaza, from accusations of genocidal violence.” A*ntisemitism and Zionism: The Internal Operations of the IHRA Definition, 2024* Kenneth Stern identifies as a Progressive Zionist.

Different Identifications

Opponents: While the main definition is general and innocuous, the IRHA's focus on Israel is counterproductive in combating racism. We should be concerned about all discrimination and hate against all citizens. What does discrimination look like to different targeted groups? Working together is more successful to stop targeting of any group.

Proponents: Traditional anti-Semitism is the denial of the rights of Jews to live as equal members of society. The new mutation of anti-Semitism is a denial of the state of Israel as having the right to exist as an equal member of the nations. The IHRA was adopted as policy by the Federal government, the Provincial government, and dozens of organizations. It does not criminalize criticism of Israel or Jews. It stands against hate of all kinds. "From River to the Sea" is a code for the annihilation of the Jewish state.

Opponents: Israeli law states: "Only Jews have the right of self-determination." Palestinians, Indigenous to the land, do not have the same rights as Israelis. Segregation is based on race. Proponents of IRHA as policy state "claiming that the state of Israel is a racist state" is antisemitism. If I am aware of what is being done to Palestinians, and state that, I am considered antisemitic, as are Amnesty International and other human rights organizations. Calls for equality to all inhabitants between the River and the (Mediterranean) Sea is not antisemitic. It is a cry for freedom from military occupation.

Proponents IHRA is an educational tool; Criticisms of Israel are not anti-semitic. Words "context" and "may" are there. If people choose to think things are anti-semitic that is not what it says. It may be used to explore if the person has anti-Semitic intentions. It does the exact opposite of chilling free speech. Comparing the policies of modern-day Israel to the Nazi's is anti- semitic. This idea that it affects free speech is not true. It can be or may be anti-Semitism. It is up to the organization (that adopts it) to determine if it is antisemitism.

Opponents This is out of step with everything I know about racism. A good definition is clear. This IRHA definition states: “a certain perception of Jews that may be expressed as hatred of Jews”. Imputing motives may be harmful. I may be nervous with a comparison of Israel to Nazi’s but think it’s okay to ask the question. The ambiguity of this sets up an impossible situation. IHRA is an open-ended policy for harassment and intimidation, a muzzle on necessary public discourse. For more than 50 years, we who spoke out for Palestinians were targeted, called “Self-hating Jews,” “Traitors,” and “So-called Jews”. Anti-Palestinian racism is well documented.

Proponents You have to be a Jew to understand the pain of antisemitism. It is the most prominent form of religious hatred and bigotry. The greatest atrocity in the history of mankind is what was done to the Jews. If there is a perception of the Jewish community of antisemitism, it is antisemitism. We need court hearings, prosecutorial actions, hate crime statistics, and help in funding.

Opponent As a Palestinian witnessing our relatives and the trauma being committed I worry about my daughters. It would contribute to the ongoing oppression of Palestinian people. In school, my daughters’ safety is at risk.

———————————————————-

Proponents were asked, “How would you address the concern that a person who has criticism of Israel is not stigmatized and vilified? How can they be heard, recognized, and validated? Would you be willing to remove the seven clauses that the opponents find objectionable?”

The answer to these questions was a unanimous,**“No”**.

1. Opposed: **1:56 - 13:00 Harold Shuster, Independent Jewish Voices (IJV)**
As a Jew, I object to a policy statement preventing political criticism of another country. This policy silences students and staff of educational institutions. The Jewish community cares about human rights for all citizens — including Palestinians. We cannot protect ourselves from anti-semitism without also condemning racist hatred against all people and religions. Israel is granted exceptional status and is protected from sanctions. IHRA is opposed by 40 human rights organizations, 600 academics, the BC Association of Indian Chiefs, and the United Nations.

2. Opposed: **16:33 Norman Rosenbaum, Civil Rights & Family Lawyer, United Jewish Peoples Order (UJPO)**
Manitoba has a Human Rights Code protecting political dissent. The IHRA definition of antisemitism is vague and contradicts the Charter of Rights and the European Union Charter. It is impossible in its ambiguity. It silences dissent, triggers punitive actions, and sets up the community for conflict and litigation. There is a chilling effect on public discussion in Manitoba.

3. **Proponent: 27 min Richard Marceau, Lawyer and Politician. former Member of Parliament/ Committee for Human Rights, Quebec Canadian Israeli & Jewish Affairs (CIJA) *2**
There is a criminal code defining hate speech and crimes. IHRA was adopted by the Canadian government in 2021. It can guide policy and cannot have criminal charges. It does not criminalize criticism of Israel or Jews. It stands against hate of all kinds.
The stated examples to the IHRA serve as illustrations of what is antisemitic. It is simply not true that the definition has been used to stifle critics.

---

*2 Canadian Israel Jewish Alliance (CIJA) is a registered lobby for the Jewish Federation. Full time staff use: “Strategic, based on research, and analysis” with “wide experience in conducting missions to Israel.

4. Proponent: 39-51 min Gustavo Zentner, President Jewish Federation of Winnipeg

“We are talking of human rights. There is consensus among the Jewish community, the vast majority. We must accept the views of the community that is targeted. If there is a perception of the Jewish community of antisemitism, it is antisemitism. You can’t recognize things if you don’t know what antisemitism is. These statements define it. These things hurt us and relegate us to second-class citizens. That is why our provincial government recognized us. It does not impede free speech. “

Winnipeg is a city of many cultures. There is consensus among the majority of the Jewish community. We must accept the views of the community that is targeted. If there is a perception of the Jewish community of antisemitism, it is antisemitism. You can’t recognize things if you don’t know what antisemitism is. These statements define it.

The Jewish community has a respectful and engaged communication with the Arab and Jewish communities. We celebrate and build the most vibrant and multicultural city. We stand up together against Islamaphobia. 349 universities have come together in 34 countries to debate this openly.

---

*2. The assertion that this view represents the majority is challenged by Jewish individuals and Jewish groups. JFW is not an elected body. The Canadian Jewish Congress, a voting body, is now defunct. When Shimon Fogel was appointed Director of the newly formed Canadian Israel Jewish Alliance, a registered lobby group for the Jewish Federation, he asserted, “The distinctions between domestic agenda and Israel have been blurred so much it is impossible to tell one from the other.” This left out dissenting voices in the Jewish community who also embraced their Jewish heritage and values of their culture. Dissenting voices of Jews are sometimes referred to as “traitors,” “so-called Jews,” and “self-hating Jews” by the group who identifies Israel as their birthright. The group who views Israel as their birthright is sometimes referred to as “the Establishment” by those who do not accept Israel’s treatment of Palestinian people.

5. **Proponent: 51-1:10: Belle Jarniewski, Jewish Heritage Centre of Western Canada.**
IHRA may be used to explore if the person has anti-semitic intention. It is an educational tool. No one has ever been accused of a crime because of the IHRA definition. It does the exact opposite of chilling free speech. It shows we can criticize Israel. City councils can consider whether things that are said are legitimate if they pass the policy.

Criticisms of Israel are not anti-semitic. Words "context" and "may" are there. If people choose to think things are anti-semitic that is not what it says. You cannot sue anybody over a policy. It is never meant to be turned into legislation. Comparing the policies of modern-day Israel to the Nazi's is anti- semitic. This idea that it affects free speech is simply not true. It can be or may be anti-semitism. ***3**

6. Opposed: 1:16 - 1:30 Dr. Joel Kettner, Professor Medical School University of Manitoba; Former Chief Public Health Officer, Province of Manitoba, Jews for Social Justice, Winnipeg Chapter, United Jewish Peoples Order

My focus is on how to stop racist attitudes in health care systems. This is so out of step with everything I know about racism. A good definition is clear. What people do, what they say, and what is the impact on people. This IRHA definition states: "a certain perception of Jews that may be expressed as hatred of Jews."

Laws exist; definitions exist. Please don't pass this definition. Imputing motives could be more harmful than helpful. Hatred is not a measure. I might be nervous that someone is drawing comparisons of Israel to the Nazis…but I think it is okay to ask the question. Let's do something to avoid racism. Maybe we can strengthen, not create distractions. Go back and get some other people involved to look at "can this be improved for the city of Winnipeg".

---

*3 Policy sets the Direction. Law is the enforcement.

7. **Proponent: 1:32-1:42 Adam Levy Public Relations Director for Jewish Federation of Winnipeg. Investigator of complaints of anti-semitism.**

Jews have a long and painful history of discrimination. You have to be a Jew to understand the pain of anti-Semitism. Anti-Semitism is the most prominent form of religious hatred and bigotry.
We need court hearings, prosecutor actions, hate crime statistics, and help in funding to civil society organizations and human rights organizations to counter anti-Semitism. Those are just a few examples of the way the IHRA definition could be used. ***4**

8. **Opposed: 1:42 - 1:52 Wendy Boyd, Canadians for Justice and Peace in the Middle East, Independent Jewish Voices; United Church, Multiple Human Rights Groups**

My personal experience has been a long history of Palestinians as a people facing difficulty. Academics or people anywhere in Canada declaring support for Palestinians also faced difficulty.

It's a horrible, terrible shame. Jews who criticize Israel face prejudice. IHRA sets a double standard. Israel compares to South Africa in its past behavior and policies. The media limit coverage of the Israeli government. I do not hear a voice of Palestinians. I believe people are afraid to state the situation of Palestinians.

9. **Proponent: 1:53 - 1:58 James Christie, Federation of Christian Churches, former Dean U of W faculty of theology, Ridd Institute for theology**

IHRA supports dialogue among religions to promote peace. The IHRA can be a working definition as a diagnostic tool intergovernmentally. IHRA identifies and exposes words and actions that can descend into antisemitism. It can be used as a template for confronting religious bigotry.

***4** Proponent Levy contradicts the statement of Proponent, Delegate 5 Jarniewski "never meant to be turned into legislation". He states conversion to policy would provide this. Policy guides law.

10. Opposed: 2:00-2:12 Dr.Mark Etkin, Psychiatrist, Independent Jewish Voices

I am a Jew since birth. Proponents of the IHRA do not speak for me. Palestinians are kept apart from Israelis and do not have the same rights as Israelis; segregation is based on race. Israel fits the definition of an apartheid state. The IHRA specifically states that "claiming that the state of Israel is a racist state" constitutes antisemitism. By this criterion, Human Rights Watch and Amnesty International are labeled as antisemitic, as are many other civil rights organizations, both inside and outside Israel.

The IHRA is a muzzle on necessary public discourse. Muzzling is its purpose, and the reason it is being pushed through. The IHRA is a travesty of truth and justice.

11. Opposed: 2:12 Diane Zack, Independent Jewish Voices, United Jewish Peoples Order

I opposed antisemitism all my life. It is ludicrous to have to defend my identity because I became aware of the Palestinian people. How could Israel have been built on the destruction of Palestinians' homes?

For more than 50 years, we who spoke out for Palestinians were targeted, called "self-hating Jews" and "traitors." In social circles, defenders of justice and equality on other fronts did not speak up. The mainstream Jewish community had blinders on. Jewish opposition to Israeli policies is growing in North America. An increasing number of Israelis are active in struggles for justice. This IHRA definition states that taking a just stand against Israel's policies is antisemitism. It stands against rights and justice for Palestinians.

12. Opposed. 2: 23 Allen Mills, Retired Professor of political science, University of Winnipeg

My experience proves the IHRA is, in practice, an open-ended policy for harassment and intimidation.

A debate held at the U of W five years ago between Palestinians and a rabbi was hard-hitting toward both sides. One of the proponents of

the IHRA, who is here today, then responded by holding a private meeting, lobbying the head of the U of W to declare the event anti-semitism. The University came out with a declaration that it was anti-semitic. I looked at the video of the event. I approached that proponent and asked if the person would sit down with me and show me what part of the debate (which was on video) was anti-semitic. The proponent would not. I asked the University head and asked the question. They did not reply.

Recently on global news, after the burning and pillaging of Huwara, a Palestinian village, an Israeli newspaper described the Israeli settler attack on the village as a violent pogrom against Palestinians as racist. A bloodied Israeli protester declared, “This is a dictatorship .” The IHRA definition tangles criticism of Israel with antisemitism.

13. Proponent: 2:32 Irwin Cotler, Ontario: former federal Justice Canadian Government.

IHRA is against anti-Semitic stereotypes. The new anti-Semitism is a denial of the state of Israel as having the right to exist as an equal member of the nations. In my experience a Jewish student on campus who considered himself leftist felt he was seen as representing Israel and felt marginalized. The IHRA working definition is intended to be protective of free speech, including harsh criticism of Israeli policy.

14. Opposed 2:50 Jane Karpa, long term citizen of Winnipeg

The charter of rights allows me to respectfully criticize. My partner is a Jew. I oppose antisemitism. I was a believer in the good of Israel. Over time, I learned about Palestinians living under occupation and policies that have turned Israel into an apartheid state.
IHRA manipulates and gaslights us into believing criticism of Israel is antisemitic. Israel can be omnipotent without accountability. I am critical of the treatment of Palestinians living in Israel under occupation.

15. Opposed 2:53 Rubin Kantorovich, United Jewish Peoples Order

The Jewish ethnic community has a diversity of views, as do all ethnic groups and religions. My father was a Holocaust survivor in Poland. His family was sheltered by a Catholic Polish family, who would have been executed had they been discovered.

Hate laws exist. We should be concerned about all racism and hate against all citizens. In 2017, Israel passed a nation-state law: “Only Jews have the right of self-determination”. Seven out of ten articles in the IHRA are about defending Israel from criticism. Yet, the Israeli defense minister declared, “The village of Huwara should be wiped out.” Just as Hitler called for the extermination of Jews, this Israeli minister called for the extermination of Palestinians. If I condemn this, I am declared anti-Semitic.

IRHA is not in the interests of citizens. It is used to suppress the rights of Palestinians in the occupied territories. At the outset of COVID, Israel announced it would not be distributing vaccines to the Palestinians. MP Leah Gazan, a Jew and Indigenous woman by birth, and MP Charlie Angus criticized this. Bnai Brith smeared these two MP as antisemites. Imagine if the Canadian government announced it would not distribute vaccines to all Indigenous peoples!

UJPO rejects IHRA, the deception of Bnai Brith, and the violation of international laws. We do not need the Israeli lobby to educate us.

16. Opposed 3:03 David Weller, former Special Needs Teacher, Independent Jewish Voices

I advocate for Palestinians and all other people’s human rights. Jews and other citizens believe in human rights for all people. We are not a minority of the Jewish community.
IRHA is biased and silences criticism, especially mentioning Israel. Antisemitism is discrimination, prejudice, hostility, and violence against Jews, as stated in the Jerusalem Declaration.
Supporting equality for all inhabitants between the river and the Mediterranean Sea is not antisemitic. This calls for the self-

determination of Palestinians, whether in two states, a democratic state, or any other form. It is not, as Mr. Cotler said, a God-given right for the state of Israel to exist as only a Jewish state. ***5**

Since the University of Michigan adopted the IRHA as policy this past month, a booth was closed down because it contained literature critical of Israel. The representatives of CIJA said, “Not my problem.” If you adopt it, it becomes your problem to decide, not theirs.

17. Opposed 3:11 Susan White, International development for 40 years, Anti-racist educator, Lecturer of Religious Studies at University of Winnipeg, Independent Jewish Voices, CUSO International

I have been an international anti-racist activist for 40 years, including 15 years in South Africa during their liberation movement. I’ve worked with African and Caribbean groups fighting for independence from colonialism. I was imprisoned for being a delegate to Grenada after the US invasion. My partner is from the Black community and has been an activist for 40 years. This shows my deep understanding of racism, including anti-semitism. Racist rhetoric and actions target many people. Working together is more successful than as separate interest groups**.**

While the main definition is general and innocuous, the IRHA’s focus on Israel, exemplified by 70% of its examples, is counterproductive in combating racism against all groups experiencing attacks. Anti-Palestinian racism is well documented. You might be wondering, “If I do not pass this proposal, will I be considered anti-semitic. It is hard to have the courage. Please do not adopt this as policy.”

---

*5. Observer, Indigenous filmmaker Darryl Nepanik, noted a quiet incident during Delegate #16 Weller. One of the four male proponents seated behind Delegate #2 Rosenbaum, said to another, “That so-called Jew!” Mr. Rosenbaum turned, quietly stated, “That person is just as much a Jew as you are.” One responded quietly, “I didn’t say that.”

18. Proponent: 3:22 Shimon Fogel, CEO of Canadian Israel Jewish Affairs

Anti-Semitism is on the rise exponentially. The IHRA definition has been adopted by many governments, the Province of Manitoba, and the Federal Canadian government. Assaults on the Jewish state are unending. "From River to the Sea" is a code for the annihilation of the Jewish state.

The IHRA definition has been adopted by dozens of nation-states, including the Province of Manitoba and the Federal Canadian government. No one gets to define anti-semitism other than the Jewish population themselves.

Hate will not be legislated away. Education is the answer. Do the right thing and adopt the policy of the IHRA.

19. Opposed: 3:27 Bassam Hozaima, Canadian Palestinian Association of Manitoba,

I was born in a refugee camp in Gaza. I am very troubled and urge the committee to defeat this motion.

My grandparents were driven out of their homes in 1948 and forced into the Gaza Strip. We lived in inhumane conditions in the open-air prison of Gaza. Over the years, assaults have continued…this is only a glimpse into my story. The oppression, injustice, and trauma are my story. Atrocities are committed on a daily basis.

IRHA would defeat the idea of safety and inclusion. I would feel threatened, marginalized, and criminalized if this were to be passed, not included. I hope and pray the Committee will not pass it.

This definition would be used in the services in Winnipeg, police services would be policing Palestinians. I graduated from University of Manitoba.

I wish I could tell my story without criticism of Israel. IHRA is soft peddled as an educational mechanism. It is a wolf in sheep's clothing.

City of Winnipeg is already leading the way to combat hate. IHRA can not be separated from the examples of protection of Israel from criticism.

As a Palestinian witnessing our relatives and the trauma being committed to them, I worry about my daughters. In school, their safety is at risk. Under this definition, many Canadians would be labelled anti-semites. It would contribute to the ongoing oppression of Palestinian people.

20. 3:38 Opposed Judith Morrow, BSW, MSW, RSW, former Inner City Community Worker, School Clinician, Filmmaker, United Jewish Peoples Order, Canadians for Justice and Peace in the Middle East (CJPME), Amnesty International

I am a Goy, a not nice word for a non-Jewish person. Racist comments about Palestinians are common. Some who stand for human rights in other areas but continue to describe in terms “Us” against “them”: Israel is a “beacon of light surrounded by darkness”, or refer to Palestinians as ‘Terrorists’.

I travelled to Israel more than 50 years ago, stayed in the “New City” of Jerusalem with an Israeli family. I explored the “Old City,” met a Palestinian Christian. A folkloric dancer who created a folkloric dance group of Israelis and Palestinians. He and his Muslim friends guided me through sacred spaces and beautiful architecture. His family, eight people in one large room, slept on benches at night, their living space in the day quiet and beautiful. His uncle lived in a room the size of a large closet. I didn’t understand the problem. He walked outside of Jaffa Gate. Four Israeli youth walked by, said something insulting to me. He walked over and spoke to them. They knocked him to the sidewalk, with a swelling black eye. In Canada, now a grandfather, he and his Lebanese wife founded a church to help refugees. Fifty years later, they still encounter harsh suppression of their human rights in Ontario. Incidents such as: wiretapping of their phone, witnessing a youth waving a Palestinian flag on a highway in front of their church being immediately surrounded by police cars persist.

We’re only learning the history of Canadian Indigenous peoples. Outside these doors, the effects are visible. People die on our streets. You, the human rights committee, understand racism. You feel its demeaning impacts. Culture focused only on our own view of the world leads to racist, bad things, ethnocentric thinking. “Us” vs “Them”.

Ethno-culturalism is crucial to Winnipeg. You, as community leaders, are crucial. I believe in you and your ability to succeed. Soon, I hope to see Indigenous people represented here.

Question from the Chair to Proponents:

“How would you address the concern that a person who has criticism of Israel is not stigmatized and vilified? How can they be heard, recognized, and validated? Would you be willing to remove the seven clauses that the opponents find objectionable?”

Response to the questions, **“No.”**

3: 54 Deputy Mayor Markus Chambers

I was highly influenced by Swiss (Catholic priest and poet), Hans Kung: *“No peace among the nations without peace among religions, no peace among religions without dialogue between religions, and no dialogue between religions without investigation of the foundations of religions.”*

More discussion needs to happen between all parties. I move that we accept the motion as information with the instruction that this committee is to work with all the groups that have attended here today for more meaningful work to continue. To strengthen its policies around racism, which includes antisemitism, Islamophobia, xenophobia, hate, Indigenous racism, anti-black racism, as well as any racism against the LGBTQ two-spirited community.

Accepting the motion as information will allow work to continue working in collaboration, with all the groups that have attended here today, for more meaningful work to continue. To a greater understanding and education of what this definition represents, and how it can be useful in all or in part in addressing the rising of antisemitism, so we can continue working in collaboration, with all the groups that have attended here today, for more meaningful work.

Glossary: Identifications of Delegates from Jewish Organizations and Others Website tour May, 2025

Opponent Independent Jewish Voices (IJV), condemns antisemitism and racism in all forms, condemns the ongoing genocide of Palestinian people and advocates for justice and peace for Israelis and Palestinians. Published handbook on the detrimental impact of the IHRA (International Holocaust Remembrance Alliance conversion to Policy) on both Jewish and Palestinian communities.

Opponent United Jewish Peoples Order (UJPO), entering its 100th year, identifies with Jewish history and culture and organizes for the protection of human rights and social justice for all. It opposes racism, oppression, and Israel's military occupation. It supports Palestinians to achieve justice.

Opponent Jews for Social Justice, a network of 63 organizations pursuing social justice from a Jewish perspective.

Opponent Canadian Palestinian Association of Manitoba ensures that Palestinian stories, voices, memories, and truths are acknowledged within the broader human rights narrative. It serves as an advocate for Palestinians in Manitoba, promoting intellectual freedom and cultural events of the Palestinian people. All are welcome to attend.

Organizations named by Opponent Delegates as informing their view: Amnesty International, United Church, Canadian University Services Overseas, Canadians for Justice and Peace in the Middle East

Proponent Winnipeg Jewish Federation supports Israel 'in every way we know' and 'all things Jewish'. Partners include the American Jewish Joint Distribution Committee and Birthright Israel Canada. Founded in 1929, the Jewish Federation of Winnipeg played a key role in the establishment of Israel. As part of its charity work, JFW funds programs that give free first-time trips to Israel to Jews and influencers. All political

parties have had members take advantage of these free trips. JFW donates to selected others and has charitable tax status.

Proponent Canadian Israel Jewish Affairs (CIJA), a registered lobby for the Jewish Federation. Full-time staff use “strategic, advocacy-based research, polling, and analysis” with “wide experience in conducting missions to Israel for Canadian influencers and decision-makers.” The Quebec branch focuses on fighting antisemitism, strengthening Canada-Israel ties, and lobbying groups like Quebec’s National Assembly, promoting education (e.g. IHRA adoption), and fostering business/ academic links.

Proponent Western Canadian Jewish Heritage Centre houses a research library preserving, documenting, and interpreting Jewish history; including the ‘mutated’ version defined by Delegate #13 Cotler, teaches groups and schools about antisemitism. Initially supported by volunteers and donors from the United Jewish People’s Order (UJPO), there is no room in the schedule for speakers who show empathy to Palestinians, so identities diverge.

Proponent Federation of Christian Churches: Believes in the deity of Jesus Christ; his miraculous conception by the Holy Spirit; his sinless life; his ascension to the right hand of the Father; and his personal imminent return.

Proponent Bnai Brith Referred to by Delegate #15 Kantorovich, supports Jewish nationalism and patrols social media and mobilizes actions to protect against anything critical of Israel and supportive of Palestinians. Identifies the land of Israel as the birthright of all Jews. Does not recognize the Palestinians as a people so believes they have no the right of return.

Honest Reporting active in Manitoba, is an Israeli media advocacy group monitoring anti-Israeli news, such as support for Palestinian people or their culture. Manitoba chapter assists the above organizations by also searching online accounts to detect expressions of empathy for Palestinians or postings critical of Israel. They post news and visit individuals and heads of organizations seen as guilty of anti-Israel postings.

Current relevance in Manitoba and Canada

The Fragile Line Between Protecting Communities and Criminalizing Dissent

Prosecutorial independence is one of the quiet pillars of Canada's constitutional democracy. When prosecutors are influenced—directly or indirectly—by political actors or advocacy groups, public trust in the justice system begins to erode. Manitoba's recent announcement of partnership with the Centre for Israel and Jewish Affairs (CIJA) to train the provincial Prosecutions Branch on hate crimes puts that principle at risk. It opens the door to political advocacy, shaping decisions about who is charged and for what.

At the center of this concern is the IHRA Working Definition of Antisemitism. Created which was envisioned as a tool to promote discussion by open ended questions. References to Israel were added, and, this has been adopted by governments and institutions as if it were a legal standard. Several of its examples link criticism of Israel to antisemitism, depending on "context." Civil liberties groups, academic associations, and many Jewish organizations have warned that this ambiguity can be used to mix political dissent with hate.

CIJA is a registered political advocacy organization with clear positions on Israel-Palestine and strong support for the IHRA definition. When such an organization helps shape prosecutorial training, the line between advocacy and state power blurs. Even if prosecutors remain impartial, the appearance of influence alone undermines confidence in the justice system.

This risk becomes sharper when viewed alongside international developments. The International Criminal Court has issued arrest warrants for leaders of both Hamas and the Israeli government. Canada has pledged support for the ICC's processes, regardless of the outcomes. Yet under an expansive reading of the IHRA definition, public discussion of these same legal findings could be framed as antisemitic. A democracy cannot champion international justice abroad while chilling debate about it at home.

Proposed expansions of “bubble zone” legislation add another layer of concern. While intended to protect community institutions from harassment, these laws can unintentionally restrict peaceful political protest—especially when political events are hosted in community centers. When an event celebrates military action in Gaza, complete with promotional imagery of armed soldiers, citizens must be free to protest without fear of criminal sanction. The location of a political event should not determine whether dissent is legal.

Meanwhile, Manitobans who expressed empathy for Palestinians—sometimes through nothing more than a social media post—have faced online vilification, professional consequences, vandalism, and threats. When government policy begins to mirror the social pressure to silence certain viewpoints, democratic debate suffers.

Winnipeg’s Human Rights Committee recommended broader dialogue on discrimination affecting many communities. That conversation never occurred. Instead, Manitoba moved toward a narrower, more punitive approach to speech—one that risks deepening division rather than fostering safety.

Democratic backsliding rarely arrives all at once. It comes through incremental shifts: vague definitions, expanded enforcement powers, and partnerships that place advocacy groups close to prosecutorial authority. It comes when governments decide that protecting the public requires restricting the public’s voice. It comes when dissent becomes suspect.

Manitoba faces urgent challenges—homelessness, inequality, and the unfinished work of truth and reconciliation. Meeting them requires a democratic culture capable of disagreement, empathy, and open debate. It requires institutions trusted to act impartially. And it requires vigilance whenever the state’s power to prosecute intersects with political advocacy.

Protecting communities from hate is essential. But it must never come at the cost of criminalizing political expression. The line between the two is thin, and it is ours to defend.

Dear Executive Policy Committee,

I'm writing to you today to express my disapproval of the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

It is a fundamental right to protest. This by-law would limit the foundational freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. As citizens, we have the right to speak up and engage in activism through protests to contribute to positive change. Protest location matters as it is a site for change where the heart of the issues often lie. Peacefully protesting at on-site areas allows one's activism to be heard where it is most pertinent.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Julia Froese

I am writing to register my opposition to, and concern about, this bylaw.
Nonviolent dissent plays an extremely important role in a democratic state. This by-law unecessarily limits freedom of expression; we already have legislation such as noise bylaws or anti-hate laws that are sufficient to ensure that protests and demonstrations remain within acceptable bounds of behaviour. There is no need for this bylaw.

Dear Executive Policy Committee,

I'm writing to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. This would restrict our charter-protected rights to freedom of expression and peaceful assembly. It is the reason I am in opposition of this bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

We all have a right to gather and use our voices to demonstrate to politicians what our needs and wants are. Silencing, and criminalizing people for their expression goes against what a democracy stands for. Please do not let this by-law pass.

From a concerned human being,
Kate Vonderbank

I am opposed to the recommendations. Speaking specifically to the topic of student and student protest, this is a major threat to students' right to protest on their own campuses. Universities are places of critical discussion where difficult conversations are encouraged. Protests and demonstrations are part of a democratic and fair student life. Student protest is essential for a healthy student body and student union.

Dear Executive Policy Committee,

As the Executive Director of the West Broadway Community Organization, I am writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. As a community organization that works to support marginalized individuals and amplify their voices, we have grave concerns that this by-law might limit their ability to advocate on behalf of themselves and their communities.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and

undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Kelly Frazer,

Dear Executive Policy Committee,

I cannot understand how legislation like this could ever be considered, and I am beyond disappointed to know that it was put forward by the councillor meant to represent my ward. This is a lazily written and dangerously vague by-law that should be laughed out of committee. The right to protest is entrenched in our Canadian charter, and this proposal aims to restrict that right with vague terminology. This proposal is ignorant of how it could very easily be used dangerously. It's overly broad scope would give government and law enforcement the right to be arbiters in deeming anything a "nuisance", opening the door for police and government overreach. Officials could simply deem any peaceful assembly as falling under the definitions of this legislation and silence it. Having the full right to protest is paramount for marginalized groups such as racialized people and LGBTQ+ people to have their voices heard.

It is completely asinine that the municipal government will preach about Winnipeg's rich history, which includes the Red River rebellion and the Winnipeg General Strike, and then try to approve legislation that, if it existed at the time of those two events, would have restricted the rights of those to freely assemble and self-express.

To me, it is clear that the only nuisance on display is the fact that we, the people, need to go through this preposterous exercise that wastes the city's time and resources. Councillor Duncan is meant to be a public servant representing Charleswood, Tuxedo, and Westwood, a ward of which I am a lifelong citizen. Simply put, no matter how much we are told that this committee "completely respects and values people's right to gather and express

themselves," I, and many others, feel that we are not being represented in this proposal, nor do we feel safer like this proposal claims to do.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Thank you for your time.
Signed,
Kimberly Ta

Dear Executive Policy Committee,

I'm writing to you today to express my absolute disgust at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Referring to protests as "nuisances", but then not doing anything to address the concerns Winnipeggers are expressing during those protests is just run-of-the-mill bad politics - but I know this city council and I know that's how you function. You know what real nuisances are? Here are a few off the top of my head:

- People having to take multiple buses now because the new transit system was planned by a toddler.
- Being the only major city in Canada without at-home compost pick-up
- Being one of the only major cities in Canada without rail-based public transit
- The constant greenfield housing development that puts a strain on our infrastructure; we should be building up, not out!
- Spending one third of our municipal budget on policing when we have a housing crisis

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

Also: classic that the councillor from one of the wealthiest parts of the city came up with this fascist idea. Who would've thought, huh?

I demand you drop further consideration of the proposed demonstrations bylaw.

Signed,
A Concerned Transconian

Manitoba Association for Rights & Liberties
Association manitobaine pour les droits et libertés

Dear Executive Policy Committee,

On behalf of the Manitoba Association for Rights and Liberties (MARL), I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that we are in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Since 1978 MARL has continued to support the rights of the marginalized in our province through education and advocacy. It is unfortunate that the present malaise of denying the weakest in our society their legal right to peacefully protest is now being proposed in our province - a province once known for its progressive stance and civil rights and liberties.

If passed, we are concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

Dear Executive Policy Committee,

I'm writing to you today to express my concern for the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I urge you to drop further consideration of the proposed demonstrations bylaw.

Kind Regards,
Matilda

A protest is meant to bring attention to the issues at hand. Taking away the right to vote in specific areas simply because it is more convenient for everyone else goes against what a protest is supposed to be. Protests are meant to be uncomfortable, that's the entire point. They exist to ensure that something is done and that issues are noticed.

These specific places have their own concerns, and if you cannot voice your opinions in those locations, then your right to free speech is effectively being taken away.

At a time when the rights and freedoms of Canadians, Americans and citizens around the world are being threatened and rolled back, it is especially important to stand firm and protect the ability to publicly demonstrate. Agenda item #7 directly attacks the critical right of the citizens of Winnipeg to express their rights and freedoms. While citizens would still be permitted to demonstrate, doing so in accordance with this by-law would place these events well outside of the public eye and public discourse, rendering them effectively useless - a situation that must be known to those preparing this by-law. This change signals that our city council is not interested in letting a key pillar of democracy remain accessible - a deeply troubling and frankly embarrassing development. Any legal wrongdoing by a citizen at a public demonstration would clearly be managed by existing civil and criminal law. This leads me to believe that the spirit of this by-law is actually a tool of intimidation of our citizens, not one that provides safety. I firmly stand in opposition to the Safe Access to Vulnerable Infrastructure By-law as it violates our basic civil liberties.

Letter: Safe Access to Vulnerable Infrastructure By-law

Dear Executive Policy Committee,

I am writing in opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law.

I was been born and raised here in Winnipeg. I have fondly participated in local cultural and political events since I was a child. Many of our events (Pride Parade, Folklorama, Critical Mass, etc.) are are ultimately driven by the desire to raise-up and celebrate marginalised groups. Events like these are one of the reasons I am proud to be part of the city.

However, I am deeply concerned that this proposed by-law will have far-reaching consequences that ultimately suppress and silence the voices which we claim to protect. Peaceful demonstrations are one of the few impactful avenues that less-privelaged people can pursue to make their voices heard in a democratic manner. If passed, this by-law would not only greatly stifle the effectiveness of said demonstrations, but would also select for those who can afford to lose hundreds or thousands in fees.

Blatant violations of our rights and freedoms like this by-law are merely the top of a slippery slope. After all, the current situation in the United States (abuse, intimidation, detention, deportation, and murder of coloured people) didn't happen overnight: it began gradually. I urge the Executive Policy Committee: please, do not give this by-law another thought if you wish protect our marginalised groups and our democracy.

"Rights which are only grated conditionally are no rights at all".

Signed,

Michael McMahon

I am opposed to this because I think the proposal is too broad. I agree we need to protect vulnerable people from disruptive protests. People should be able to access healthcare facilities (including abortion clinics) without being harassed. People who are dealing with issues that require the treatment of a halfway house or rehab institution or safe use sight should not be exposed to harassment. Kids going to school should also be protected.

However the proposed legislation is way too broad. It covers much more than the situations I described above. A lot of the harmful conduct that could be problematic from protesters could be addressed effectively under existing laws at various levels of government. This includes sections 175, 264, 319, and various other sections of the criminal code of Canada as well as existing municipal bylaws and provincial trespass statues.

The right to protest is a fundamental right in any free and democratic society. It might even cause some offence or annoyance, but that is a trade off for living in a society with rights and freedoms. This proposal is far too broad and should be narrowed significantly. As it is proposed it could be abused by a future government who wants to shut down speech they don't like. The current situation in the United States is a great example. The Trump DOJ charged the journalist Don Lemon under a statute that's main purpose was to protect people who were seeking abortions.

I am opposed to this item. While it is important to protect vulnerable members of our city, the measures in this item are excessive and open the city to shutting down reasonable protests. The definitions are far too vague, and it concerns me that the City and Council might use this by-law to remove protests for any topic the city administration deems inconvenient.

I urge at minimum that the city revise these measures, and preferably cancel them.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone

of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United

Cities and Local Governments (UCLG) “Human Rights City” since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

Dear Executive Policy Committee,

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law. While the goal of ensuring safe access to public facilities is understandable, this by-law as drafted represents a significant overreach that threatens the fundamental rights of all Winnipeggers. Freedom of expression and peaceful assembly are the cornerstones of a healthy democracy, and implementing 100-metre buffer zones around a vast list of public and private buildings effectively bans the right to gather in much of the city's public square.

Furthermore, acts of violence, property damage, harassment, and intimidation are already illegal under the Criminal Code of Canada. We do not need a new municipal by-law to police behaviour that is already subject to criminal prosecution. The definition of nuisance and intimidation in this by-law is also concerningly subjective, which may lead to inconsistent enforcement and the silencing of legitimate dissent simply because it is deemed disruptive.

Winnipeg has a long history of public demonstration. Moving protests away from the very institutions they are addressing renders that expression invisible and ineffective. I urge the Committee to uphold our constitutional obligations and reject this by-law. Public safety should be managed through existing laws without dismantling the civil liberties that protect us all.

Sincerely,

I am writing in FULL SUPPORT of the proposed Safe Access to to Vulnerable Infrastructure Bylaw that is Agenda item #7 at the 17 February 2026 EPC meeting.

I think this Bylaw is very overdue for Winnipeg and types of "activism" and "direct action" that have targeted persons such as myself who are complete bystanders trying to access infrastructure that is targeted by a demonstration.

In recent years, my children and I have experienced direct and confrontational harassment by protesters at our community hall, at our cultural center, and at the constituent office of our elected federal representative.

The presence of these elements has made it more difficult to meet with our representative during town halls and during the election cycles.

Opponents of this bill seem to think that this bylaw is a threat to democratic expression in Winnipeg. I completely and wholeheartedly DISAGREE. Peaceful and non-hateful demonstrations should always have a place in civic life in Winnipeg, but the city and WPS need tools to deal with people who scream hateful rhetoric at children going to parks, and people participating in our democracy by consulting with our elected representatives --- both of these are situations I have personally experienced in the last 24 months.

Please adopt this bylaw to keep vulnerable infrastructure accessible to all who need to use it.

RE: Safe Access to Vulnerable Infrastructure By-Law

Greetings!

I am writing to compliment you all on your most recent move to promote our fair city - this by-law to suppress protests in the community the Canadian Museum for Human Rights calls home will definitely put us ALL on the map!

Sure, it will be for being one of the most hypocritical cities north of the U.S. - Canada border. So what! As long as they get the name right, eh?

Smart remarks aside, this is one of the dumber ideas I've seen the City of Winnipeg look at. Stop embarrassing our community and drop further consideration of the proposed demonstrations bylaw.

Regards,

Rob Kristjansson

I am writing in support of Agenda Item #7 at the February 17, 2026, EPC meeting, urging passage of the Safe and Vulnerable Infrastructure By-law. This measure is a necessary step to protect essential community institutions and ensure Winnipeg remains a safe and welcoming city for all.
As a Jewish Winnipegger, It is unsettling and disturbing when synagogues, cemeteries and other Jewish institutions are vandalized, defaced or threatened.

I find this policy is unworkable in practical matters like the ability to move/march/protest in a reasonable fashion in the city. In a practical manner, it actually criminalizes non-aggressive movement of citizens. Also, much of this overlaps with provisions for safety made in the Canadian Charter of Rights and Freedoms, and is unnecessary. From an historical perspective, the 1919 General Strike in Winnipeg was a wide-ranging, multiple area, long-lasting, and peaceful protest. The current policy would create the same conditions of potential violence that were eventually used to attack the Strikers from RCMP and Special Police forces, with back-up from the Canadian military, who paraded machine guns down Main Street. Do we need this as a society?

I write today to express a worry about the scope of the proposed bylaw. Protest is an important part of public discourse in Canada. At a time when the world is on heightened status politically, and when political leaders seem to want to rule by dictate rather than by democracy both in nearby nations and in our own provinces, there may never have been a time in Canada where Protest was more appropriate. By its nature Protest any place is going to make some other people there feel concerned for their safety at some level. The bylaw doesn't seem to put a limit on the reality of that feeling. If only that concern led them to consider the matters at hand rather than only feel the concern. Certainly many protests I've attended, even permitted ones, give me some level of concern for my safety due to counter protests and the heightened level of activity at such a site. In particular I have concerns about the exclusions of post secondary institutions who have always been bastions of discussion and protest. If there were real concern about public access this bylaw would have been passed when far angrier people were protesting covid restrictions and blocking access to hospitals. But this council didn't act at that time, and I've seen nothing recently which warrants a bylaw not required then. This bylaw is far too vague and limits against far too many potential places of protest. If actual intimidation or actual safety concerns were to take place there are laws in place already to deal with that.

NATIONAL COUNCIL OF CANADIAN MUSLIMS

Your Voice. Your Future.

Good afternoon Mayor and Members of Council,

Thank you for the opportunity to speak today.

Let me begin by stating clearly that we fully support the protection of religious communities and other vulnerable institutions. Individuals must be able to attend places of worship, schools, and hospitals free from harassment, intimidation, or violence. That objective is both legitimate and important.

Our primary concern, however, is the process by which this bylaw has been developed. When a municipality proposes legislation that directly engages Charter-protected freedoms, particularly freedom of expression and peaceful assembly, robust and inclusive consultation is essential.

Consultation is the mechanism through which municipalities can identify potential issues before they crystallize into significant problems. It allows governments to recognize where definitions are unclear and where enforcement may be inconsistent. Consultation ensures that protective measures are effective and aligned with constitutional requirements.

Several aspects of the current draft illustrate why consultation is urgently required. The definition of a nuisance demonstration includes the expression of objection or disapproval toward an idea, action, person, or group based on specified characteristics. But that formulation directly engages expressive content and risks capturing lawful protest and political advocacy. The bylaw also defines intimidation in terms that rely on perceived effects and potential outcomes. While the objective of preventing intimidation is entirely legitimate, standards framed in this manner create uncertainty about what conduct is prohibited.

The proposed 100-metre buffer zones around a broad range of sites, including places of worship and schools, further demonstrate the potential breadth of this legislation. In many urban areas, these zones encompass sidewalks, parks, and public streets that function as legitimate forums for lawful assembly. Bubble zone legislation of this nature can significantly restrict lawful public assembly and peaceful expression, effectively limiting the ability of individuals and groups to participate in public discourse. Without thorough consultation, there is a risk that bubble zones will be applied in a

manner that inadvertently suppresses Charter-protected rights and creates uncertainty for our enforcement authorities and the public alike.

These factors collectively indicate that the bylaw is at risk of being vague and overbroad, as well as difficult to enforce. But these are precisely the foreseeable consequences of advancing legislation without consultation with all impacted groups.

Consultation should include religious communities, civil liberties organizations, legal experts, and protest groups. Engaging these stakeholders will allow Council to clarify definitions, identify overlaps with existing regulations, and ensure that enforcement is consistent and proportionate.

The risks of proceeding without consultation have already been observed elsewhere. The City of Vaughan enacted a similar bylaw and is now subject to a Charter challenge supported by civil liberties organizations including ours, the National Council of Canadian Muslims. Winnipeg has the opportunity to take a different path, and craft legislation that is protective but also enforceable and constitutionally sound.

Our shared objective is clear: we all want to protect vulnerable communities. But the path to achieving that objective with legitimacy and durability requires requisite consultation with all impacted groups. That step must come first. Without it, the City risks enacting legislation that is vulnerable to challenge, difficult to enforce, ultimately undermines the protection it seeks to provide.

We respectfully urge Council to undertake broad consultation and return with a revised bylaw that is precise, narrowly targeted, and constitutionally defensible. Consultation at this stage will not weaken this initiative but rather will strengthen it, ensuring that Winnipeg protects its communities while respecting the rights and freedoms central to our democracy.

Thank you.

Sadaf Ahmed, PhD
Manitoba Advocacy Officer, Department of Government Affairs and Public Policy

We have seen similar legislation passed in numerous countries in North America and Europe recently, and while it is easy to understand why governments would find it useful to have this legislative tool in their toolbox, it runs counter to rights to peaceful assembly and protest that have been enshrined in law, including in the Charter of Rights (articles 2c and 2d). A court in the UK recently decided that the government's ban on the protest group Palestine Now was unlawful, and the decision reaffirmed the right to peaceful protest. Legislating assembly and protest in advance must be seen as a form of prior restraint of constitutionally guaranteed rights, and I urge the Executive Committee to vote down this bylaw.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter

and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Samantha Cahatol

Hello,
I am requesting further consultation be made with the Canadian Civil Liberties Association regarding the "Safe Access to Vulnerable Infrastructure By-law", in order to refine the by-law (or to drop the by-law, if refinement isn't made). As it stands, the by-law is too broad and could be misused, so I oppose the by-law as it currently stands.
Thank you,
Sarah Ciurysek

Dear Executive Policy Committee

I write today to express my shock and concern about the proposed Safe Access to Vulnerable Infrastructure By-law. While I understand the intention is to protect families and vulnerable groups in places like hospitals, schools, and places of worship, limiting protest areas severely and proposing hefty fines not only infringes on the constitutional rights of Winnipeggers to exercise their right to protest, but also comes off as disingenuous .

Protests and peaceful demonstrations have been and continue to be an accessible way for all people, especially minority groups and workers to demand change of their institutions and government. The definition of “nuisance protests” as

“ any protest that involves expression of objection or disapproval toward an idea or action related to race, religious beliefs, colour, gender, gender identity, gender expression, physical disability, mental disability, age, ancestry, place of origin, marital status, source of income, family status, or sexual orientation, by any means including graphic, verbal, or written”

is controversial, especially the phrasing ”idea or action related to”, which is very vague and leaves things completely subject to interpretation and opens doors for biases for and against any and all types of peaceful demonstrations in the future. Furthermore, passing this by-law will not prevent hate crimes, violence, or destruction of property. Instead, the proposed fines are very likely to reduce participation in peaceful protests and gatherings, and this will serve to alienate Winnipeggers from engaging in the civic process and government in the future. I also believe the city will expend more resources, time, and

energy trying to prove that certain demonstrations fall under “nuisance protests”.

Since the aim of this by-law is to protect vulnerable groups, it would be appropriate to discuss the child poverty rates mentioned in the Manitoba: Missed Opportunities- Campaign 2000 report. Winnipeg Centre has a child poverty rate of 39.6 percent, with Indigenous and First Nations children being disproportionately affected. While many socioeconomic factors contribute to this issue, the city has been aware of these disparities for decades. In this context, restricting protest rights in the name of protecting marginalized communities may appear disingenuous and inconsistent with the aim to protect vulnerable groups. Protesters are not a detriment to these groups and more often than not tend to advocate for groups that are struggling and are looked over by city reps.

I once heard a quote that said “one cannot legislate their way to acceptance” as in passing legislation alone is not enough to resolve problems or initiate change. Protests and gatherings function as a means to raise awareness and push for the social change that is needed to ameliorate the issues we face in our society. They encourage connection, discussion, and active participation by community members. Limiting the right to protest is thus limiting our community in freedom and its capacity for growth.

I implore you to drop consideration of passing this proposed demonstration by-law.

Signed,
Sarah Eid

Dear Executive Policy Committee,

I'm writing to you today to my displeasure 9and not at all shocked at this blatant act of oppression against a marginalized people with the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. With changes to the municipal, provincial and federal government systems there would be NO NEED for protests but we have been placed into the hands of power hungry men.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate which is the hope in passing this by law.
The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. Are we a democracy or are we a totalitarian dictatorship that only serves one type of people???

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Comments
Dear Executive Policy Committee,

I'm writing to you today to express my opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law on the grounds that it would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as this may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. I share these concerns.

As written, the proposed by-law would effectively make much of the downtown area a nuisance zone, including city hall. Making it a fineable offence to hold peaceful protests near government offices is profoundly undemocratic.

I fear that the current language of the proposal is too broad and will be used to target peaceful demonstrations, while doing nothing to more effectively address actual safety concerns such as property damage, hate crimes, or violence —these acts are already criminal. Additionally, a law setting a 50-meter buffer zone for demonstrations around reproductive healthcare facilities already exists. In that case, the law is protecting the right of citizens to seek healthcare with their privacy intact. The proposed by-law would give the civic government the means to punish citizens for peaceful demonstrating near civic offices, which is not a protection for citizens at all.

If passed, I am concerned that this by-law could not only infringe on constitutional rights,

but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for peacefully demonstrating and participating in democracy.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

It's too broad. What does "other facilities" include? I can understand hospitals and child care centres, but schools and, specifically, universities are an unreasonable inclusion in this by law. Limiting the amount of free speech of our youth and students a step too far.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

I am writing as a young voter to strongly oppose the Safe Access to Vulnerable Infrastructure Bylaw. This proposed bylaw violates human rights, specifically Charter rights to peaceful protest and equality rights of non-discrimination.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

I am extremely concerned about the Safe Access to Vulnerable Infrastructure By-Law. The proposed bylaw duplicates existing provincial legislation, effectively bans most protests with its overly broad language, and impinges on charter rights, inviting expensive litigation. I am particularly worried how interpretation of this bylaw will disproportionately affect Indigenous communities, and others who face significant systemic marginalization, despite falsely claiming to protect vulnerable groups.

This is a very delicate time for human rights. I feel if this bylaw is passed it is like saying the police or other enforcement have the right to use violence against us for caring about human rights. This bylaw isn't protecting human rights, and it won't detract hate like homophobia, antisemitism and Islamophobia. Most everything about those movements is violent, they move under the cloak of night, and they have no regard for human life, human rights, or laws, which they evade by being secretive. It feels like Councillor Duncan has never taken part in a rally or protest before so therefore does not know the sense of community one feels as part of a group hoping to make things better for people who have had their rights threatened or need to fight to attain them.

Protests are in their nature a nuisance because it is supposed to wake privileged people up to the harms oppressed people are facing. I'm so grateful we live somewhere I can speak my mind, as a woman we only got that right in the last 100 years and it was because a group of us stood up because they disagreed, in spaces that could reach the most people to inform them. Women's rights are still under attack continuously with government wanting to control what we do with our bodies, just as they are doing with the trans community. We are seeing this right now not only in the United States but two provinces over in Alberta. This threat moves swiftly without much press as we see with the

introduction of this bylaw, that I just found out about yesterday because of all the other things I must do to keep afloat, let alone thrive.

I attend a lot of rallies, and I'll say it reinforces community more than blocks the flow of traffic, promoting love and hope for the people who are struggling. I don't know what is more important than preserving the mental health of the human race, I could be 30 minutes late or use another route to see an improvement in that. The language in this bylaw is dangerously giving more power to those who would like to harm the vulnerable, because in its essence it is saying we can't gather to shake things up in someone's day enough for them to look into things that are threatening other people's lives and freedom that, for example, they missed while watching the Olympics, although it wasn't even mentioned on the news. If things were to magically change and our world had everyone's best interest at heart we'd only need to gather once. If you want to make any amendments ban hate speech and prevent people who block others from accessing healthcare, but you'll see we already have those protections in place. We have a right to free speech right now but if this bylaw is passed, I fear for the infringement on that right, as well as the safety of humanity.

Hello EPC,
Please consider my comments in opposition to Evan Duncan’s proposed “Safe Access to Vulnerable Infrastructure” By-law.

My opposition is out of support for freedom of assembly which is a requirement of a democratic society. Disruptive but peaceful rallies and protests are essential to be protected even if they are deemed a nuisance. The designated areas listed on the by law draft are too expansive and infringe on the ability for members of our community to participate in a democratic and peaceful way.

The proposed by-law infringes upon Winnipeggers' Charter-protected right to peaceful assembly.
This proposed by-law could silence marginalized community members.
Finally, this proposed by-law will be needlessly costly for taxpayers as widespread court challenges will inevitably occur.

Comments
Dear Mayor Gillingham and Members of the Executive Policy Committee,
I am writing to you today to express my concerns regarding the "Safe Access to Vulnerable Infrastructure By-law" as currently drafted.
While I fully support the intent of ensuring safe and fair access to medical care, education, and religious institutions, I believe the current language of the by-law is overly broad and creates a significant risk of infringing on the right to peaceful assembly. I urge the Committee to rework the following sections before proceeding:
1. The Definition of "Nuisance Demonstration" (Section 2.1)
The current draft defines a nuisance as any expression of "objection or disapproval towards an idea". This is an incredibly low and subjective threshold. In a healthy democracy, the peaceful expression of disapproval toward an idea is a protected form of speech. By framing "objection" itself as a nuisance, this by-law risks being used to silence legitimate, peaceful dissent.
2. The 100-Metre "Blanket" Buffer (Section 3)
Section 3 prohibits nuisance demonstrations within 100 metres of the site of a "designated facility". When combined with the extensive list of facilities in Section 2—which includes libraries, community centres, cultural centres, and cemeteries—this creates massive "no-protest" zones throughout our city. Many of these locations could be where peaceful demonstrations are intended to be seen and heard. This "blanketing" approach effectively outlaws peaceful protest in many locations where it was likely never intended to be restricted.
3. Subjectivity and Potential for Abuse
Because "intimidation" and "nuisance" rely on conduct that "could reasonably be

expected" to cause fear or deter access, the by-law grants significant discretionary power to enforcement officers. Without more precise definitions, there is a high potential for this by-law to be applied inconsistently, potentially targeting peaceful groups based on the content of their message rather than the nature of their actions.
The intention to protect vulnerable citizens is good, but the execution as written is flawed. I ask that the Committee amend this by-law to more narrowly define "nuisance" and "intimidation" and to reconsider the 100-metre buffer to ensure it does not inadvertently dismantle the right to peaceful protest in Winnipeg.
Sincerely,
Tyler Crichton

I support the Safe Access to Vulnerable Infrastructure Bylaw. I experienced the protest of April 1st at the door of the Rady JCC when picking up my child from school/after school daycare.
Everyone has the right to protest, just not anywhere and not in a violent way. It was very disturbing and felt unsafe. Police was there and it felt they were more concerned on the rights of not-peaceful protest than on the rights of children of being safe and free from violence.
No one should be protesting in front of any school/house of prayer/community centre, of any faith, or any ethnic group. Their rights to protest are important, but not as important as other people's rights to safety, peace and dignity.

Submission for a committee of council

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
V. Botting

Comments
I'm writing to share concerns that have been raised by a number of neighbours regarding the proposed Safe Access to Vulnerable Infrastructure Bylaw.

Yesterday, approximately 70 residents met at West End Commons to discuss the issue. Many feel that the proposal represents a significant overreach by the City and may infringe on their rights and freedoms. Several individuals involved in social justice initiatives expressed concern that their Charter rights could be impacted. As someone who has organized numerous social justice rallies in the past, I am also concerned that the bylaw could impede efforts to raise awareness about important community issues.

One of the attendees asked whether I would be willing to speak with you about these concerns and whether you might consider supporting them. I explained that you are not on EPC, but I would be happy to pass along their concerns for your awareness.

Please let me know if you would like any additional information or if you would be open to speaking with them directly.

Thank you for your time and consideration.

A “Nuisance Protest” Z is non-specific, meaning any and all actions could be subject. Where is the clarification? It sounds like this is an attack on a basic human right to protest. Now I have to be told where I can protest?

I was one of many people who visited the University of Winnipeg Palestine Encampment. Something that many saw as a “nuisance”, I saw completely differently. The encampment was full of wonderful, nice people. People that were donating items and taking time and effort out of their days to be there. As well as helping a lot of people in need. Multiple people would come by and grab free stuff, whether it was food, water, or safe & clean needles.

Anyone who visited that encampment saw first hand what community meant, and how important it was for the protest to happen in the first place. It didn’t last forever, but we all learned valuable lessons. Something that a lot of people nowadays could benefit from learning. The same people who think a protest is a “nuisance”, most likely because that same person has never attended one, or cared to.

I am writing today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that wold restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed by-law.

In a time when we are witnessing the alarming suppression of fundamental rights and freedoms in the states (and even some of our provincial neighbours), it is clear that the right to peacefully protest is the last right available to us to take meaningful action. It is horrifying to me that the city would entertain such a proposition.

I assume, based on the way Mr. Duncan presents, he does not understand the need for peaceful assembly as it is most likely that he has been afforded more benefits than the majority of Winnipeg's constituents. This by-law would be a mistake, further oppressing the rights and freedoms of many vibrant, yet vulnerable communities in Winnipeg.

I implore you to drop further consideration of the proposed demonstrations by-law.

Hello Executive Policy Committee members,

I'm writing to you today to express my great concern at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

I am concerned that it also does not bring acknowledgment of the history of protest within the many stories which make Winnipeg unique and a valued place.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of oppressive curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

The vague wording of the "nusiance protests" invites enforcement that could, and would if it is passed, severely limit the freedom of expression for the people of Winnipeg. This is not made with the safety of citizens in mind, but instead the inconvience of those who are bothered by people raising their voices together. This will almost certainly be enacted against those of vulnerable groups, largely affecting those of marginalized groups.

This is a classist, racist move and the people of Winnipeg deserve better. Those who vote in favour of this do not have the citizens of Winnipeg's best interest in mind, and therefore should not represent them.

I am writing to oppose the proposed Safe Access to Vulnerable Infrastructure By-Law.

While protecting public safety is important, this by-law risks unnecessarily restricting the fundamental democratic right to peaceful protest. Broad limitations on where people can gather create a chilling effect on lawful dissent and public participation.

There is also no clear need for this expansion. The Freedom of Access to Clinic Entrances Act already provides legal protections to ensure safe access where it is required. Creating additional sweeping restrictions is redundant and unjustified.

It is also in poor taste to introduce new limits on protest at a time when many people are deeply concerned about democratic backsliding and the suppression of dissent, including what we are currently witnessing in Minneapolis and across the United States.

I urge you to reject this by-law and protect both public safety and the right to peaceful protest.

To the members of the Executive Policy Committee,

I am very concern by this bylaw will be racist in its application, limiting protest and rallies that are meant to be peaceful AND visible in order for constituent who are part of marginalized communities to make their voices heard, especially but not limited to Indigenous rights, among others. This bill is not meant to keep them safe, but keep them quiet. I do not want those repressive bylaws in my city, and my community doesn't want it either.

Sincerly,
Mrs A.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Abby Swanton

The proposed by-law will negatively affect activists and politically-conscious people who do not feel that their voice is being represented by their elected representatives.
MLAs, MPs, and City Councillors can and often do elect not to respond to criticisms, comments, petitions, and queries. Assemblies and protests give voices to the voiceless. They enable people otherwise disgruntled and ignored to step forward and be heard on a wide array of issues, whether it be Canadian issues such as city management, the environment, or labour strikes, or international issues such as the crisis in Palestine.
The people of Winnipeg have not asked for this agenda. The people of Manitoba - I stress Manitoba because this will affect all Manitobans that care enough about their concerns and their priorities to travel to Winnipeg to join in these assemblies and protests - do not benefit from being denied the ability to assemble and protest in areas with high foot traffic, areas where their voices can be amplified and heard by as many people as possible.
Furthermore, there has been no serious discussion among the public that could encourage an agenda such as the one presented today. One must ask where the pressure for such an agenda to be approved is coming from, where this repressive idea has been suggested and discussed, and to whom it offers any actual benefits.

This proposal goes too far and will restrict our fundamental rights to protest. Anyone who lends support to this motion is acting against the interest and well-being of Winnipegers, Manitobans, and Canadians who have no other avenues for their voices to be heard than bold protest. This is an erosion of our liberty and I stand in staunch opposition to these changes to legislation.

I understand there are good intentions behind the idea of this by-law, but its vague nature gives room for sweeping generalizations and misrepresentation that can be used to penalize free speech and scrutiny. Vague or not, no amount of re-writing or adjustments made to this idea will stop it from being used as a tool to silence and dissuade people from using their voices in protest.

At best, this is a misguided idea with the best of intentions that will restrict free speech and penalize differing opinions, something that is profoundly un-Canadian. Let's not take steps that fundamentally change what makes this city and country so great; that we can have differing opinions and express them without fear of judgement or punishment. We are better than this.

At worst, it is a step towards tyranny. Giving people and institutions the option to fine someone who is critical of their operations is totally a power imbalance that I fear will be abused.

Please remember, peaceful protest at public gathering places is not a nuisance: it is quite literally THE PUBLIC, GATHERING.

I am writing to oppose the proposed *Safe Access to Vulnerable Infrastructure Bylaw*, Item 7 on the February 17, 2026 Executive Policy Committee agenda.

This bylaw would create 100-metre “intermediary zones” around hospitals, schools, places of worship, and community centres, prohibiting what it calls “nuisance demonstrations.” Violations would carry fines starting at $500 and rising to $5,000. While framed as a safety measure, the bylaw is overly broad and would severely restrict peaceful protest across a wide range of public spaces.

As a Christian, I believe deeply in protecting safe access to our places of worship—spaces of peace, hope, and community. At the same time, my faith calls me to speak out against injustice: violations of human and labour rights, climate and transportation inequities, and the ongoing failure of governments to advance true reconciliation. Scripture is clear on this responsibility. Psalm 82:3 instructs us to “Defend the weak and the fatherless; uphold the cause of the poor and the oppressed.”

Peaceful assembly and freedom of expression—protected under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms—are essential tools for this work. These rights cannot be limited without clear, necessary, and proportionate justification. This bylaw does not meet that threshold. Its scope is vague, its restrictions sweeping, and its potential to chill democratic participation significant.

Whether marching for climate justice, rallying for human rights, or joining a Critical Mass bicycle ride to challenge car-centric policy, protest remains one of the few accessible avenues for civic engagement in an increasingly fragile democracy. Enacting this bylaw would mark another step down a slippery slope toward eroding those rights.

Thank you for your consideration.

The right for peaceful protests is a fundamental right according to the canadian charter for human rights 2(c). To even suggest the ban and fines is fascist, unconstitutional, and disgusting. It shows a frankly humiliating amount of ignorance. To make a call like this right now, considering the civil unrest and protests happening in the USA, takes a side with the current, objectively corrupt, American administration. Banning protests says that the city is siding with ICE (directly or indirectly if you want to feign ignorance about it). Me and my spouse recently moved to Winnipeg from Saskatoon because of how minorities including ourselves were treated. Winnipeg is supposed to be better and more progressive, and the desire to strip away the rights from its citizens is despicable and completely hypocritical. Winnipeg has been the site for historical victories that have come from protests, such as the general strike, without these liberties this city could have never gotten to where it is now.
The City of Winnipeg is sitting on the fence of history right now, dangling its feet onto the wrong side. Choose correctly. Stand up for your people.

While I recognize the intention of this bylaw, I am concerned that the definition of specified characteristics is too broad and relies too heavily on the interpretation by the current government. Additionally, the defined designated facilities are too broad. It should not be prohibited to protest at the universities, legislative building or city hall.

As we have seen in other countries, the people can not rely on the good intentions of the current government to extend to other administrations. The bylaw in its current state will negatively impact the public's ability to protest.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

Public safety and ensuring unobstructed access to essential services are legitimate municipal objectives. However, this by-law is drafted in a manner that is overly broad, vague, constitutionally vulnerable, and one must question the thought process behindthr proposition. It infringes, manifestly on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed buffers apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are precisely where critical matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning and ripe for bad faith interpretation. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is deeply subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard to a concerning degree, relying on enforcement discretion, which is not and never has been a substitute for precise legislative drafting. This is, at best, reckless and poorly thought out. At worst, it is a weaponizing of the language of security with the plannee intent to curtail human rights and deny freedom of expression to any cause selectively deemed inconvenient.

One questions the good faith of such a measure as provincial legislation already provides buffer zones around abortion services. If the City's objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction are available and need only be enforced. Selective enforcement of existing statutes is worrying in the extreme. Expanding protest-free zones across large portions of the city is not a minimally impairing response and cannot reasonably be seen as such.

The freedom to peacefully protest is a cornerstone of democratic society protecting all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal entirely. If Council believes further action is necessary, it must be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad or generalizee restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg, particularly as we watch our Southern neighbors and their municipalities, states, and federal agencies trample the inalienable human right to protest .

Protest By-Law Opposition Letter Template
Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
A. T.

I strongly oppose this attempt to limit our charter rights and freedoms. The right to peaceful protest is essential to a functioning democracy, and it is shocking to me that the City of Winnipeg is considering this legislation at a time when rights are so clearly being eroded around the world. The definitions of “nuisance protest” are too vague. Protests by their very nature should cause some inconvenience, it is essential that our right to protest peacefully and freely is preserved.

February 13, 2026

Dear Executive Policy Committee,

I am writing to express my opposition in the strongest possible terms to the proposed Safe Access to Vulnerable Infrastructure By-Law. I've lived Winnipeg for the last decade, and one of the things I appreciate so much about this city is how strongly engaged so many Winnipeggers are in fostering a safe, caring, welcoming community, and advocating for changes in the systems and services that are needed to achieve an equitable society where all can thrive, here and extending across the globe. That spirited engagement makes Winnipeg a special place, and being able to exercise the right to protest is an absolutely essential and necessary part of that engagement. This proposed bylaw would harms our Charter-protected rights to peaceful assembly and expression. There are a number of reasons to prevent this bylaw from going forward:

1. Peaceful assembly and expression are core protected freedoms needed for a functioning democratic society. The category of "nuisance demonstration" including amplifiers without a permit or obstructing vehicles means a large swath of protests and rallies would fall under this definition – like public demonstrations with a megaphone, or music, or that spontaneously move through Winnipeg streets. Protests without a permit are not nuisance – they are the lifeblood of democracy and an engaged society. The idea that the only legitimate protests are ones with a permit is false, and punishing people for exercising core political rights to assembly and expression without a permit is very scary.
2. The map of areas that would be off access to "nuisance" protest is the vast majority of the downtown, leaving a tiny patchwork of allowable spaces. This bylaw would both severely limit the absolute area that protest is allowed to be in, and also prevent movement. It would be nearly impossible, as a participant in protests, rallies, vigils, round dances and other public demonstrations, to ensure that you are outside of any of the forbidden spaces under this bylaw. Even protest around the Provincial Legislature and City Hall would be affected. Even if it is never enforced, this bylaw would have an extreme chilling effect on confidence in participating in public demonstrations through the threat of fines in the hundreds to thousands of dollars.
3. There significant risks of partial enforcement of this bylaw. Given how expansive it is in scope, It will not be applied to everyone – so who will this bylaw be wielded against? Public demonstrations are especially relied upon to advocate for change by groups that face marginalization and injustice. Rather than being protective, this proposed bylaw means increased risk of being targeted for already marginalized groups. This is an especially important issue in context existing systemic racism in policing. I'm particularly concerned about how this bylaw could be used against people rallying in support of Palestinian rights and against Israeli state-sponsored genocide.
4. There are already laws in place for hate crimes, property damage, etc.
5. Enforcement of this proposed bylaw would require more resources for police and bylaw officers, but more resources for policing protests will not make people in our city more

safe. Investment in health services, social services, poverty-reduction, transit, etc. is what is needed to keep our community safe.

As policymakers, you must think about not just today, but how such a bylaw could be misused in the future. Even if you think that it is fair and will be applied reasonably now, can you be sure that in 10 years, there will not be a context in which this bylaw will be used to punish and repress? Proponents will argue that there are benefits of this bylaw, but the harms and risks above far outweigh any potential benefits. Please do not allow this proposed bylaw to move forward – it must be completely struck.

Regards,
Agata Durkalec

This by-law WILL be enforced in a racist manor. People have their God given RIGHT to protest and should keep it that way, taking something like this is facsitic and reminds me of the Trump regime. Do not be like Trump because if this by-law goes through. Theirs going to be a lot more than protests. Let's keep it civil.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to post-secondary institutions, community centres, and places of worship. These locations are often precisely where matters of public concern arise, especially college and university campuses where diverse groups meet to safely but enthusiastically trade ideas. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting. This language also stymies solidarity picketing during legal labour action, as other labour groups joining locked out or striking workers could be interpreted as participating in the overly broad definition of "intimidation" included in the proposed by-law.

There is already provincial legislation establishing buffer zones around abortion services. If the City's objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Dear Executive Policy Committee,

Today I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I'm not asking, I am demanding you reconsider.

Signed,

Aimee Skye Rivers.

I am strongly opposed to this by-law. This is an infringement on our rights as community members and will allow for biases to take over through policing and public opinion. Stop demonizing you constituents.

The right to freedom of speech, free peaceful protest without fear of danger from law enforcement is crucial to what makes Canada a respected, safe nation. This is a silence tactic so that those in power need not be accountable or understand dissenting voices. I am opposed to to these recommendations.

Dear Executive Policy Committee,

I am writing to you as someone who deeply cares about our city and the rights we all share within it. I was alarmed to learn that the City of Winnipeg is considering the Safe Access to Vulnerable Infrastructure By-Law, which I believe would restrict our Charter-protected rights to freedom of expression and peaceful assembly. For this reason, I strongly oppose the proposed bylaw.
Public gatherings, whether vigils, rallies, or marches have long been part of Winnipeg's story. They are how we as citizens have been able to push for better working conditions for employees, standing up for Indigenous, racialized, and 2SLGBTQIA+ community members, and demand stronger environmental protections. These freedoms are not abstract principles, they are tools our communities have relied on to make our city and our country more just and compassionate.

I am deeply concerned that, if passed, this bylaw could infringe on constitutional rights, silence marginalized voices, and open the door to police overreach, all while failing to meaningfully address issues that may be problematic such as hate, violence, or property damage, acts that are already criminal under existing laws. Instead of targeting harmful behaviour, the bylaw risks placing sweeping limits on peaceful protest. That feels both disproportionate and out of step with the democratic values Winnipeg has been striving to uphold, especially as the city has worked toward recognition as a "Human Rights City" through United Cities and Local Governments since 2018.
Organizations such as the Canadian Civil Liberties Association have raised concerns that broad measures like this often end up restricting lawful, peaceful demonstrations and disproportionately impacting marginalized groups who rely on protest as a means of being heard. That possibility should give us pause.

At its heart, this is about protecting freedom of expression and association which are cornerstones of a healthy democracy. At a time when we are witnessing troubling erosions of rights and freedoms elsewhere, it feels especially important for our city to stand firmly on the side of the Charter and the democratic principles it protects.
I respectfully ask you to reconsider and to halt further consideration of this proposed demonstrations bylaw. Winnipeg can and should remain a city where people are free to gather, to speak, and to advocate for a better future. These abilities allow for a better Winnipeg and a better world.
Sincerely,

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Most of Winnipeg exists within 100m of a hospital, school, or place of worship, so this by-law effectively means that the city can shut down any protest without oversight or transparency. This result is rather clearly a travesty against democratic values of public debate, free expression, freedom of congregation etc. I urge the committee in the strongest possible terms to reconsider this by-law.

The Canadian Civil Liberties Association clearly states that "Disruptive, non-violent protest is part and parcel of a vibrant functioning democracy."
To go forward with this ban would be to violate part of what makes use a democracy. The right to protest is a charter right. 100m within the declared bounds is still a lot of ground to cover. There is a right to peaceful assembly and disruptive protest that we must have. Part of what makes a protest effective is its inability to be ignored. That is how voices are heard when every other channel has been depleted.

It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Alera

* "Nuisance Protest" is non-specific, meaning any and all actions could be subject.
* Areas restricted by this by-law are public spaces and points of proximity to decision makers. Much of the city would be subject to the geographic restrictions of this bylaw including City Hall and University Campuses.
* Fines of up to $5000 could be issued to every person who shows up to Round Dances, rallies, group bike rides, marches, etc.
* Police will have new tools they will use to silence and punish protesters.
* We are very concerned this bylaw will be racist in its application, limiting protests and rallies promoting Indigenous rights, among others.

Dear Executive Policy Committee,

I am writing to express my strong opposition to the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law, which would restrict Charter-protected rights to freedom of expression and peaceful assembly.

Public demonstrations—whether vigils, rallies, or round dances—have long been essential tools for advancing workers' rights, Indigenous sovereignty, racial and 2SLGBTQIA+ equality, tenant protections, and environmental safeguards. This by-law would undermine those fundamental freedoms.

I am concerned it would infringe on constitutional rights, silence marginalized voices, and enable police overreach, while doing nothing to prevent property damage, hate crimes, or violence—acts that are already criminalized anyway. Instead, it would severely limit peaceful protest. Such restrictions are inconsistent with Winnipeg's commitment to becoming a UCLG "Human Rights City."

The Canadian Civil Liberties Association has also warned that broad restrictions like these often harm marginalized communities and unfairly limit Charter-protected speech and assembly.

At a time when democratic rights are under threat elsewhere, I urge you to uphold your legal obligations under the Charter and protect freedom of expression and association in our city. Please drop further consideration of this proposed by-law.

Sincerely,
Alex Paseka

Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

As a student at the University of Manitoba, I am particularly concerned for how this legislation will prevent student and staff participation in rallies and protests around causes important to us, especially given that we are here to learn about how the world works and expand our knowledge and skills, and engaging directly with advocacy and sharing our opinions on issues that affect us is a key tenant of this.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Alex

Dear Executive Policy Committee,

I oppose the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law.
The proposed bylaw would restrict our Charter-protected rights to freedom of expression and peaceful assembly, a terrifying move towards fascism.
Today I write to you from the banks of the Assiniboine river, a place I occupy with freedoms to express myself because of the labouring of those who came before me, often screaming to be heard. My life, your life and the lives of all our neighbours have been impacted by someone else's freedom of expression and right to peaceful assembly. We need no history lesson when the streets of Minneapolis are closer to our doorstep by car than visiting that aunt you probably have in Calgary. Shall we not compare ourselves by putting down the misery of others but simply observe with the unshakable knowing that we do not want what they have. So let's continue to work towards the United Cities and Local Governments (UCLG) "Human Rights City" status like we have since 2018 and drop the consideration of this bylaw.
If passed the proposed "Safe-Access" bylaw would not prevent acts that are already categorized as criminal and subject to enforcement such as property damage, hate crimes, or violence. Instead it would give opportunities for peaceful assembly to be subject to police overreach; within the broad terms of this proposed bylaw could someone not be subject to debilitating fines for wearing a t-shirt with a slogan that resonates to them too close to city hall?
I want to live in a city where I can advocate for the same rights and freedoms I have for the next person just as someone else has fought for me before. If you enjoy a 5 or less day work week you are no different than me. Unions fought for that so that you could go home and see your family on the weekend. They fought for it publicly. In view of necessary

infrastructure.
If your life was taken from you, would you not also want your community to have the opportunity to gather publicly in your honour. The bill also threatens communities ability to grieve together as public vigils would be subject to enforcement of the bylaw. We do not live inside of private space. The city is a public place. The “Safe Access to Vulnerable Infrastructure” bylaw has no place in our city and I encourage this Executive Policy Committee to drop the proposal immediately and without revision or negotiation.

I believe putting a restriction against protests is a violation of our freedom of speech and expression. Protesting is important for communities affected by the reason for the protests and our voices should be heard. Even if it makes you uncomfortable. If this law is put into action, then people who preach Christianity in the streets should also be affected by this law.

Peaceful protests are a democratic right. Citizens have a right to express their concerns about issues that affect them, and often, gathering in numbers is the only way to get the attention that an issue deserves. With everything that is going on in the USA right now, the right to peaceful protest is more relevant now than ever.

Dear Executive Policy Committee
I am horrified that my city is considering restricting our charter protected rights to freedom of expression and peaceful assembly. Frankly, it looks authoritarian and undemocratic to do so. I strongly oppose the city's consideration of the Safe Access to Vulnerable Infrastructure By-law. We all have the responsibility gut to advocate for social and policy changes. This by-law could have a chilling effect on our basic freedoms. We as Canadians have an obligation to oppose the city's proposed bylaw that even the Canadian Civil Liberties Association has expressed concerns over. Frankly, this bylaw looks like what I would expect in the US at this time. We should not cross this line in our own body politic. Please drop any further consideration of this by law.
Sincerely
Alexander Sawatsky

This proposal is wildly and overly broad in its scope and intent. This essentially eliminates the ability for citizens to protest at far too many places. If there are concerns about safety, intimidation, or violence at protests, then by all means, work on THAT specific issue. For the most part intimidation and violence are already against the law and should be enforced properly.

This proposed by-law is a sweeping assault on our freedom of expression, and believe me, I will be remembering who voted for it during the next election.

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This feels like something the Trump Admin would do. And we need NONE of that.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

I'm concerned about the implications of the #7 Safe Access to Vulnerable Infrastructure By-Law. As written, it is broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

I am especially concerned about "source of income" being included in the category of "special characteristics". What if a person or group sources their income through the exploitation of or violence against vulnerable people? This is not something that should be protected.

Dear Executive Policy Committee,

I'm writing to you today to express my extreme concern at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. I am strongly opposed to this proposed by-law because I believe it will restrict our Charter-protected rights including the fundamental freedom of peaceful assembly (s.2(c)) and freedom of expression (s.2(b)).

While I fully support ensuring safety and access to public services, this proposed by-law has some significant issues:
1. It overreaches on what is considered a "designated facility" and the buffer zone (100m) is far too large, resulting in many key areas of the city (such as City Hall and areas of the Manitoba Legislative Building grounds) falling within the buffer zones of designated facilities.
2. It is too broad on what would be considered a "nuisance". For example, amplifiers are often necessary at large protests to adequately communicate instructions and messages to the crowd.
3. Individuals who show up to peacefully protest (even as defined within the constraints of this proposed by law) cannot control the actions of others, and should not be swept up into the punishment of being at a "nuisance demonstration" just because someone else

brought an amplifier or is holding a prohibited sign.
4. The intimidation activities prohibited in the by-law are already considered crimes under our current legal system and their prohibition can be enforced without the additional by-law. This proposed by-law would not do anything to further prevent property damage, hate crimes, harassment, or violence from taking place.
5. Restricting the content of a protest, peaceful or otherwise, based on “specified characteristics” is a blatant suppression of freedom of expression. As much as I would LOVE if people couldn’t protest against things I care about, it is not ok to only support freedom of speech when people are saying what you agree with. Freedom of speech is a two way street.

I fear the combination of designated facilities, buffer zones, nuisance definition, and specified characteristics could be abused by dark parties to undermine democracy.

I also fear that having a by-law like this in existence would make many people afraid to attend peaceful protests at all, in case they turn into “nuisance demonstrations” (through no fault of their own). This places an unnecessary barrier before people’s right to demonstrate.

This type of undemocratic curtailing of the freedom of expression is particularly terrifying in light of the attempted suppression of rights and freedoms we are witnessing in the U.S.

I urge you to remember your legal obligations to uphold the Charter and protect our democracy. I beg you, to not take the first step down a slippery slope of eroding democracy. At the very least, please, consider the upcoming elections in October 2026, and how unpopular this by-law is, if nothing else.

Please, drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee

It breaks my heart to see a bylaw like this be proposed in my home in the heart of Canada. Our city has a rich history, a monument across the street from city hall reflects this history of our citizens protesting the abuses of power that occur here.

Harassment, property destruction, and violence are all already illegal, this bylaw will do nothing to prevent unlawful behavior. This bylaw will punish those who peacefully speak up and protest injustice. I and many other Manitobans believe this proposed bylaw like the others it is based on directly goes against Canadians right and freedom to peaceful assembly. Protests are an important tool for citizens to call out abuses of power which can occur in most if not all the locations this bylaw could completely shield from accountability.

History tells us this bylaw, if implemented, will not be used to protect the wants and will of the citizens of Winnipeg, It will protect the institutions and lobbyists that push members of the EPC to pass bylaws like this. Nobody wants to have to protest, it's something we unfortunately must do to protect our rights. Please don't deny Canadians our right to peaceful assembly. Please stand with the citizens of Winnipeg, do not pass this shameful bylaw.

Dear Executive Policy Committee,

I am absolutely disgusted by this proposal to limit the fundamental rights of Winnipeggers. This bylaw is designed solely to silence marginalized and oppressed voices in this city, so that the wealthy ruling class may enjoy unlimited convenience with no need to interrogate their consciences.

EPC, it's time to start making decisions that benefit and improve the lives of all Winnipeggers, not just a chosen few. Stop trying to silence protests and start listening to the messages they are sending you: safe infrastructure for active transportation, no more murdered and missing Indigenous women and girls, support workers' rights, end police brutality, invest in climate solutions, and end complicity in the genocide of Palestinians.

Signed,
Alexis Kanu

This by-law is far too vague to be moved forward.

While I can see merit in providing a buffer around hospitals or even schools, this by-law allows too many restrictions which could easily be misused. Considering what is happening with our neighbors to the south, a bi-law like this is simply dangerous.

This is a scary proposal at a time where it feels like democracy in this country continues to be under threat due to actions in the United States. Let's not set that precedent here. It is not welcome. I understand protecting vulnerable groups, and that should be a priority, but "disruptive, non-violent protest is part and parcel of a vibrant, functioning democracy" (Canadian Civil Liberties Association). Nuisance protest is extremely vague and this could be used as a tool for violence, racism, and loss of freedom of speech Note the term non-violent in the above quote. Let's keep Winnipeg democratic and not pass this unconstitutional proposal. This is a slippery slope we do not want to go down.

Dear Executive Policy Committee,
I am in awe and disgust at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment in Winnipeg and beyond. Shame on this threat to our right. Shame on this rejection of our history.
If passed, I am concerned that this by-law would be used to silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate.
If people are looking to perform criminal activity they will already. Property damage, hate crimes, or violence are already criminal. This By-law will effect the right to peaceful protests as their reach would be severely limited. This type of undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. It is fear mongering to associate all protest with crime and pushes our city towards a politically disconnected future. Speaking up politically should be celebrated instead of punished.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalised groups who rely on protest to advocate for social change. Shame on this potential infringements of our rights.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., which has descended into political fear and suffering. This is not a future I want for Winnipeg.
I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I beg you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Alison Holliday

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
alleah marie cumlat

Dear Executive Policy Committee,

I'm writing to you today to express my deep disappointment with the City of Winnipeg Executive Policy Committee's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. This is true for members of the disability community that our organization represents. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, protections for the environment, and also to assert disability rights.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely

limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018. This is not a bylaw that should be passed by any so-called Human Rights City.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. This bylaw would cause more harm to the disability community than good.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Allen Mankewich

Comments
Dear Executive Policy Committee,

I am extremely alarmed at the proposed Safe Access to Vulnerable Infrastructure By-Law, which will soon be voted on at City Council. I must convey my deepest concerns that this by-law, if passed, would grossly limit the public's rights to freedom of expression and peaceful assembly. I am solidly in opposition to the proposed bylaw.

Public, disruptive, and non-violent protest is a necessary freedom used by people of all backgrounds to advocate for social and policy changes and to express displeasure at what is being done on local, national, and international levels. They are especially necessary for marginalized groups who have limited access to levers of power, and the proposed bylaw will disproportionately impact these marginalized groups - Indigenous, racialized people, 2SLGBTQIA+ community members, labour workers, as well as protections for the environment.

This proposed bylaw, while well-intentioned, has the potential to infringe on constitutional rights, silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. It would not prevent property damage, hate crimes, or violence from taking place—acts that are already criminal and do not require further legislation to address. However, peaceful protests would be severely limited.

Frankly, I am shocked that the City of Winnipeg would propose this sort of undemocratic by-law which would undermine freedom of expression. The fact that human rights organizations such as the Canadian Civil Liberties Association has flagged this as a matter of concern confirms to me that the proposed by-law is overly vague and broad, which will have the impact of restricting peaceful protests and demonstrations, which are protected

under the Canadian Charter.

When I look south of the border and other places around the world right now, I see the impact of the suppression of rights and freedoms. As a professional historian, I also look back at examples throughout history when this sort of legislation was introduced and the resulting impact. This only further cements my concerns and certainty that the by-law as proposed is unnecessary and deeply problematic.

I implore you all to consider your legal Charter obligations and to vote against the proposed demonstrations bylaw. Our democracy rests on pillars such as this.

With grave concern,

Dear Executive Policy Committee,

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law. Its use of language is broad and leaves margin to misuse. This bylaw would restrict Charter-protected rights to freedom of expression and peaceful assembly—rights that have been essential for Indigenous peoples, workers, and other marginalized communities to advocate for justice and meaningful change.

Public demonstrations, from rallies to round dances, have been central to advancing Indigenous rights and securing protections for workers and tenants. Limiting these freedoms risks silencing communities who rely on protest to defend their rights and hold governments accountable.

Acts such as property damage and violence are already criminalized. Expanding restrictions on peaceful protest instead invites police overreach and disproportionately harms Indigenous peoples and working-class communities. As Winnipeg works toward becoming a Human Rights City, it should be strengthening—not curtailing—democratic freedoms.

I urge you to uphold the Charter of Rights and Freedoms and protect the fundamental rights that safeguard Indigenous sovereignty, workers' rights, and our democracy.

Let's keep free speech free! Disruptive, non violent protest is a part of a functioning democracy and we must not lose that ability. We wouldn't have the rights we have today such as women being able to vote, or 5 day working labour laws, plus countless others without protests. This by-law is unjust and undemocratic.

It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Alyssa McAlpine

To the Executive Policy Committee

I am writing to state my firm opposition to the draft legislation regarding public assembly restrictions. The proposed measures represent a significant overreach that threatens essential liberties.

The Canadian Charter of Rights and Freedoms protects the right to gather and express dissent. These protections are the foundation of a democratic state. The government should only interfere with these rights in the most limited and specific cases. The current proposal uses vague definitions that allow for arbitrary enforcement. When the state has the power to decide what qualifies as a public disturbance, it can silence any group that it finds inconvenient. This creates a dangerous precedent where the definition of an acceptable protest changes based on the political climate.

Public assembly is often meant to be disruptive. This disruption is the method by which citizens bring attention to serious issues. If the state removes the ability to disrupt public life, it effectively removes the right to be heard.

Any limits on assembly must be narrow. These limits should only apply to critical infrastructure where safety is paramount. Medical facilities and primary education centers for minors are appropriate examples. Transitional housing for those in precarious positions also warrants protection. These rules should not apply to universities, colleges, or other centers for adult learners. Adults must be expected to encounter and process diverse viewpoints in public.

The law must also be applied without bias. There is no logical reason to grant special

treatment to trade unions or worker organizations. If a picket line blocks access to a medical facility, the harm to the public is the same regardless of who is holding the signs. Exempting specific groups from these safety requirements is unfair and contradicts the justification for the law.

The committee should abandon this draft. The city should rely on existing criminal laws to handle actual safety threats. Creating broad new powers to suppress assembly will result in costly legal battles and a loss of freedom.

All people and communities of peoples deserve to have a voice. Punishing people for peaceful protests, banning protests at all, is a silencing of the people. It communicates that Winnipeg's council does not support mobilization and action for change and social justice. I strongly oppose a ban on activism.

Dear Executive Policy Committee,

I'm writing to you to express my deep concern at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would greatly restrict Charter-protected rights to freedom of expression and peaceful assembly. The arbitrary and broad nature of this bylaw goes far beyond its stated aim and will turn the expression of dissent to a very heavily regulated and prohibited act.

This by-law would limit the fundamental freedoms Winnipeggers regularly exercise in advocating for meaningful change in our city and beyond. These gatherings that range from vigils and rallies to round dances, public demonstrations have been key in winning rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, and securing protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices and further increase police overreach. The issues that the City is proposing to address with the "Safe Access" by-law, namely preventing property damage, hate crimes, or violence from taking place, are already illegal under existing legislation. This unnecessary piece of legislation thus achieves nothing but to severely limit peaceful protests. The City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018, should reject any such draconian and undemocratic curtailing of the freedom of expression presented by this by-law.

Many organizations have expressed their concerns, including the Canadian Civil Liberties Association (CCLA), who hold that broad rules such as these may unfairly restrict Charter-

protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

As a democracy, freedom of expression and association should be held paramount, and the idea of placing such restrictions on them draws parallels to the current situation in the United States of America and other autocratic nations across the world where dissent is criminalized. I urge you deeply reflect on your duty to your constituents and reflect on the harm that this by-law would bring to them.

I implore you to drop further consideration of the proposed demonstrations bylaw and reject any such attempts to curtail freedom that may be presented in the future.

Respectfully,
Amar Singh

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Amaya

Dear Members of the Executive Policy Committee,

I am writing as a Winnipeg resident, parent, and community wellness practitioner to express my deep concern regarding the proposed Safe Access to Vulnerable Infrastructure By-Law.

At its core, this proposal raises serious questions about the protection of fundamental freedoms guaranteed under Section 2 of the Canadian Charter of Rights and Freedoms, including freedom of expression, peaceful assembly, and association. These rights are not symbolic. They are foundational to a functioning democracy and to the ability of citizens to advocate for themselves and their communities.

Throughout Canadian history, peaceful public demonstrations have played an essential role in advancing workers' rights, Indigenous rights, environmental protections, and protections for marginalized communities. Vigils, rallies, round dances, and public gatherings have been powerful and lawful tools for social change. Restricting these activities in broad or ambiguous ways risks undermining the very civic engagement that strengthens our city.

I am particularly concerned that this proposed by-law may be disproportionate to its stated

aims. Acts of violence, property damage, and hate crimes are already criminalized under existing law. Expanding restrictions in a way that limits peaceful assembly risks infringing upon Charter-protected freedoms. Such measures may also disproportionately impact communities who rely on public protest as one of the few accessible avenues to be heard. Winnipeg has expressed commitments toward human rights principles and civic inclusion. Any new legislation should reflect those commitments by carefully balancing safety concerns with constitutional obligations.

As a citizen who values democratic participation and the protection of civil liberties, I respectfully urge the Committee to reconsider the scope of this proposal and ensure that any measures adopted are narrowly tailored, demonstrably justified, and fully consistent with the Charter.

Thank you for your time and consideration.

Sincerely,
amy Dreilich

It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason
that I am in opposition to the proposed bylaw.
Two simple questions I need you to reflect on:
1- What is the reason for such by-law?
2- How do you define "nuisance"?
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and LGBTQ+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.
This type of undemocratic curtailing of the freedom of expression has no
place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate
for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Comments
Dear Executive Policy Committee,

I am deeply alarmed and, frankly, disturbed by the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This bylaw would, in practice, effectively place the voices of the marginalized into the category of "nuissance" and acts to seperate the act of free and peaceful assembly from public spaces of significance, and of those of decision makers. The act of which works to effectively silence the voices of those most impacted by said decision makers under threat of fines. This would make the right to protest and peacefully assemble a privilege of those with more monetary resources while pushing those without further to the margins of our city. This does not protect safety, it systemically zones protest out of public spaces.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely

limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This proposed by-law is a dangerous step into restricting freedom of speech for vulnerable populations and marginalized groups. The vague and broad scope of the wording leaves it open for police to determine who is a "nuisance" when they are having a peaceful protests. The criminal activities council is concerned about don't happen at peaceful demonstrations, they happen in the middle of the night when windows are smashed or hate speech is written on Palestinian businesses. The right to protest is an important part of a democratic society that gives governments a clue about what people are concerned about. The fact that there are so many protests happening should tell decision makers that they need to deal with the issues, not that they need to stifle concerned voices. People's humanity and right to live should never be up for debate and the demonstrations happening these days are simply people standing up for our right to live healthy dignified lives. This by-law isn't concerned with protecting people, it's a thinly veiled attempt to silence marginalized people, and it holds great risk for being enacted in a racist and classist way.

* "Nuisance Protest" is non-specific, meaning any and all actions could be subject.
* Areas restricted by this by-law are public spaces and points of proximity to decision makers. Much of the city would be subject to the geographic restrictions of this bylaw including City Hall and University Campuses.
* Fines of up to $5000 could be issued to every person who shows up to Round Dances, rallies, group bike rides, marches, etc.
* Police will have new tools they will use to silence and punish protesters.
* I am very concerned this bylaw will be racist in its application, limiting protests and rallies promoting Indigenous rights, among others.

As a student at UofM, I do not and have not ever felt threatened by protests on campus. Nor have i felt threatened by protests anywhere else in the city. What does make me feel threatened however, is anyone (anywhere on the political spectrum) being at risk of losing their right to use their voice in a peaceful manner. Protesting is not a 'nuisance' to anyone besides those who benefit from silence. I would hope that elected officials are not those types of people.

I am writing you today to express my shock, dismay, and outrage at the proposed by-law that threatens to fine protestors for exercising their right to protest in public spaces. This law would disproportionately affect marginalized communities that I, myself am part of and those I align with. From Pride marches, to Pro-Palestine rallies, to calls for action on MMIWG2S, demonstrations are an essential part of society and help to move the needle on policy and advocate for communities that need it most.

I have attended countless peaceful rallies over the years and have never once seen or heard of anyone being harmed by our actions. Protest organizers are some of the most thoughtful and respectful individuals that I have had the pleasure of working with and standing next to. Individuals are designated to ensure our safety throughout the demonstrations and also exist to protect anyone outside of the gathering that may be opposed to the cause. This is something that I have witnessed police officers fail to do many times, often inciting violence and creating an unsafe atmosphere for all in proximity of the demonstration.

With everything that is going on south of the border and within our own, protest is more important than ever. To be relegated to specific sanctioned spaces determined by a government and to fine individuals for speaking out is counter-productive and a slippery slope that will lead to further oppression and injustice.

I stand firmly opposed to this by-law and will continue to fight for what is right in this world alongside other community-minded individuals to try and make our city and the world a better place. I urge you to vote no on this short-sighted and discriminatory by-law.

Dear Executive Policy Committee,

Today I am writing to you because of the Safe Access to Vulnerable Infrastructure By-law, a proposal that would significantly impact the rights of Winnipeg and Manitoba residents to peacefully assemble and freely express their opinions on matters that are significant to our communities. Due to these concerns, I am strongly in opposition to this proposed by-law.

Peaceful assembly and freedom of expression are rights that have been used throughout the history of our city to push for the social and policy changes that have made our city a place where marginalized communities can participate and live freely. Without the ability to advocate for these rights in accessible public spaces, workers, 2SLGBTQIA+, Indigenous, and racialized community members would be substantially hampered in the work they are doing to make our city a more welcoming, diverse, and connected place.

I do not believe that this by-law would do anything to protect our people or our spaces. We already have the Criminal Code of Canada safeguarding us from hate offences including public incitement & wilful promotion of hatred, mischief to property, violence, and damage. Futhermore, the Winnipeg Police Service already has a section of the Major Crimes Division specifically devoted to hate crimes. This by-law would instead silence vulnerable communities and suppress the rights and freedoms we all consider central to our democracy.

Please take the time today to hear the voices of those who would be affected by this proposed by-law and understand the damage it would do to our community.

Thank you,

Andrew Ridd

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Andrew Woolford

To the Members of the Executive Policy Committee,

I am writing to formally voice my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law. The prospect of the City of Winnipeg implementing legislation that restricts our Charter-protected rights to peaceful assembly and free expression is deeply unsettling.

Public demonstrations are not merely disruptions; they are the historical engine of social progress. Throughout our history, Winnipeggers have utilized rallies, vigils, and round dances to secure vital protections for workers, tenants, the environment, and Indigenous, racialized, and 2SLGBTQIA+ residents. This by-law threatens the very tools used to build the equitable community we live in today.

My concerns regarding this proposal include:

Redundancy and Misplacement: Acts such as violence, hate crimes, and property damage are already illegal under the Criminal Code. This by-law does not offer new protections against crime; instead, it creates a mechanism to suppress peaceful protest.

Marginalization: Such broad restrictions often disproportionately silence vulnerable groups who rely on public advocacy when other avenues of influence are closed to them.

Democratic Backsliding: Implementing "draconian" limits on expression contradicts Winnipeg’s stated goal of becoming a UCLG "Human Rights City."

Legal Overreach: As the Canadian Civil Liberties Association (CCLA) has noted, vague and

expansive rules like these frequently lead to police overreach and unconstitutional infringements on civil liberties.

In an era where we see democratic freedoms being eroded globally, it is more important than ever for local governments to uphold their legal duty to protect the Charter. A free and fair democracy cannot function if the right to associate and speak out is treated as a secondary concern.

I urge the Committee to defend our democratic values and reject the proposed by-law in its entirety.

Sincerely,
A. Prymak,
Professor, UofM

If implemented, this by-law would severely curtail freedom of expression through protest. The motion is inherently discriminatory against Indigenous people and culture, as it says traffic cannot be impeded - interpreting that to be no more round dances at Portage and Main.

We already have laws about hate speech, inciting and even perpetrating violence. This by-law seems to be motivated by revenue generation for the city of Winnipeg, specifically targeting historically marginalized communities. Winnipeg is home to the Canadian Museum of Human Rights, and this by law would severely undermine the rights of citizens.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

The advocacy of this redundant bylaw restricting protest is a cheap attempt at political grandstanding by a small fish in a very small pond who also does not seem to be familiar enough with the constitution to understand that the further suggested impediments would illegally undermine human rights.
Ostensibly Evan Duncan presents it as a necessary by-law to limit what he refers to as "nuisance demonstrations." That is subjective as is the word 'safe.' The implication is protesters such as myself create unsafe situations.This is offensive. Manipulation of semantics is not an argument. 'Unsafe' is not a synonym for 'uncomfortable' Your job should be to comfort the afflicted and afflict the comfortable not the other way around.
We have very meticulous laws that prohibit violence and obstruction that is unsafe in context of protest. That is all redundant and not the purpose of the proposed by-law at all which is entirely specious and dishonest.
The purpose of this by-law is to quell dissent and demonize people who organize events that afflict the comfortable residents of Tuxedo.
A sale of stolen Palestinian lands at a synagogue is not a religious ceremony. Persecution of transgendered children in a school is not educational. When a groups of people engaging in a round dance in the centre of the city is attacked by a lunatic driving a truck into them, they are not terrorists threatening 'vulnerable infrastructure' ; they are being attacked by terrorists. The argument does not hold in such circumstances and would be struck down.
By the way, for the record, my husband and I have attended protests outside the Asper Campus. They were never inside or near the entrance and always small groups. We attended the protest against the Israeli war criminals who spoke at the Berney Theatre.It took place on a public sidewalk outside a fence about a hundred feet from the theatre and away from the entrance road.
In advance of the protest MP Ben Carr mislead people to believe that we were going to a

daycare or school somewhere in the vicinity. The result was that our small group, several of whom were elderly like my husband and myself, were inundated with a large angry mob of Zionist extremists, blasting the neighbourhood with loud music and sirens over and amp. (They claimed to be concerned about frightening children). They surrounded us, blocking the entrance road by the way. They had to be held back by the numerous police that were there to protect us. Who did you say you wanted to protect? This is the thin edge of the wedge. It leads to state terrorism of the sort in which we have seen ancient protesters in wheelchairs in the UK being dragged away by police. This has no place in a democracy and contravenes our constitution.To pass such a by-law would be ignominious.

I oppose the motion by Councillor Evan Duncan that proposes widespread restrictions on public demonstrations in vulnerable locations. The appropriate, nonviolent expression of opinion through public presence in the form of gatherings, signs, slogans, speeches and song is a pillar of democracy. An open and pluralistic society will always have conflicting priorities; there needs to be a variety of legitimate and peaceful ways to express these opinions in the location of their choice. Municipal bylaws, and when necessary, police, already have ample power to regulate behaviours that are threatening or disproportionately disruptive. Police, in particular, are already guilty of overstepping their professional boundaries in some instances, and wilful neglect of duties in others. The institutions already in place need better oversight and leadership in order to adequately protect citizens and politicians alike.

It is for this reason that I am in opposition to the proposed bylaw.

This by-law, would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Looking at a map of all the proposed places in the city would essentially make it illegal to protest over a vast area of the city. The wording about microphone use is also vague, and although I do not believe it to be the intent, I believe it could be misinterpreted and misused to prevent people from recording and sharing information about protests .

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

People have the human right of free speech. To make it illegal for citizens to protest, that is taking away our freedom of speech. This is not the United States, do not turn this province into an authoritarian and censored society. If you censor our words, you are just trying to shut us up and we will not shut up.

This proposed Bylaw to protect sensitive areas is a poorly veiled attempt to curb democratic dissent.
It is a dangerous step and could be used to further prevent public gatherings of any size in any area of the city for any purpose deemed disruptive.. I see it as an attempt by an unpopular mayor and city council to keep the unhappy people of this city from appearing at their door with legitimate problems, opinions and demands. Do NOT PASS THIS BYLAW or anything like it.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) (https://www.google.com/url?q=https://ccla.org/&sa=D&source=editors&ust=1770958327789720&usg=AOvVaw2SZ_PjIIbJehS-A0naxuDK) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Anne-Lise Costeux

Bonjour Executive Policy Committee,

I am truly shocked by this consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict my Charter-protected rights to freedom of expression and peaceful assembly. I am in opposition to the proposed bylaw.

It is truly disheartening that you are considering this By-Law, in the name of the safety of vulnerable infrastructure, while it would endanger our activities of promoting and demanding more safety for our community members and society, whether through protests for climate action, against violence and war, etc. Do you really think this will make us more safe? We live in a democracy! Please act like it and stop the efforts to limit our rights and freedoms.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Anne-Sophie

While perhaps well intentioned, in its current form, I do not believe this legislation will have the intended effect of protecting vulnerable people and places. Firstly, it would infringe on our rights as citizens of Winnipeg to engage in peaceful non-violent protests which are protected under the Section 2(b) and 2(c) of the Candian Charter of Rights and Freedoms. Secondly, it disregards Winnipegs historical importance as a site of protest. The Winnipeg General Strike played a crucial role in strengthening workers rights across Canada. While it was a 'nuisance' in the short term, its long term impacts reinforced the right to fair quality of life. A bylaw such as this not only stifles current and future expression, but also disregards past protests that are part of our history and the fabric of our city. Thirdly, the City of Winnipeg touts its diversity as one of its strong suits. With the diversity that strengthens the cultural fabric of our city comes diversity of ideas. It is important not only to embrace that diversity as an initiative and a characteristic but also as something worthy of protecting. Fourth, the proposed 100m boundaries would include the area around city hall. As a hub for city politics, this would prohibit expression of dissent in one of the most critically relevant areas. For example, this was the site of the protest to reinstate funding for city art spaces like art city in the summer of 2024. Lastly, if the ultimate goal is to protect vulnerable populations, I think it would be worthwhile to reconsider the amount of spending on the Winnipeg Police Service and perhaps reallocate that funding towards supports for community services.

Dear Executive Policy Committee,

My name is Anny Chen and I am resident in Winnipeg. I am extremely concerned that the City of Winnipeg has proposed the Safe Access to Vulnerable Infrastructure By-Law, which would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

The 100 m bubble zone would prohibit protest at key institutions, such as City Hall, the Winnipeg Police Service headquarters, and Wab Kinew's office. The definition of 'nuisance demonstration' to include expressing objection or disapproval towards an idea' is over broad and far-reaching, as well as the broad definition of 'health services.' Responses to injustice don't always allow time for permits, such as when people are holding vigils and round dances, and this law will disproportionately affect Indigenous peoples and other systemically marginalized groups.

I implore you to drop further consideration of the proposed "Safe Access to Vulnerable Infrastructure" bylaw.

Signed,
Anny Chen

Activism should be strategic and purposeful if the goal is to be heard. Protesting in places like schools, hospitals, or places of worship doesn't make sense. Children are trying to learn. Healthcare workers are already working exhausting 12- to 24-hour shifts and dealing with burnout. Patients are vulnerable. Worshippers are practicing their faith. Creating disruption in those spaces doesn't strengthen a cause it distracts from it and risks turning public support away. Effective activism targets decision-makers and systems of power, not everyday people who are simply trying to study, heal, work, or worship. If the goal is meaningful change, the method should reflect that.

This bylaw is overstepping. The public has the right to free speech and peaceful protest. Protests are supposed to be a nuisance. This council's behaviour has been childish when it has come to consciousness members of the public looking to speak out and the introduction of this bylaw is a great example of your inability to handle discourse and instead looking to extort and punish citizens for having an opposing view. The list of locations furthers the ridiculous nature of this bylaw.

Dear Executive Policy Committee,
I'm writing regarding the Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law limiting peaceful protests and demonstrations. With all due respect, are you kidding? This is how democracy works and it's basic free speech. We do not live in a police state. We live in a country where minorities, marginalized groups, and the general public are allowed to advocate for their rights.
Public demonstrations have defended the basic human rights of Indigenous people, workers, the LGBTQ+ community, and others, as well allowing citizens to speak against environmental injustice and other forms of discrimination.
This bylaw violates free-speech and basic constitutional rights. It is undemocratic, and it feels suspicious that it comes at a time when our neighbours to the south are instituting drastic and inhumane violations against marginalized populations. We need to stand firm in protecting human rights and the safety of minorities, and not piggy-back on America's decline into violence, surveillance, and hate.
To reiterate: nobody wants this except the people who want to maintain a status quo of inequality and to restrict the freedoms of marginalized populations and the communities who have had to fight for basic safety and fair treatment.
I fail to see how silencing freedom of expression is constitional.
Please do not consider this bylaw any further.

Sincerely,
Antonio Luna

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

This by-law infringes on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms,

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.
Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear mayor Gillingham, Councillor Duncan, and members of the Executive Policy Committee,

The Nuisance By-Law that is on the table today infringes upon Canadian freedoms of expression and assembly as decreed by the 1982 Charter of Rights and Freedoms and I implore you to abandon its adoption. The by-law's unreasonable overreach, both definitively and geographically, effectively makes peaceful protest illegal because of the 100m buffer zone it affords. Other cities in Canada where similar legislation has been put in place, namely Vaughan, Ontario, have been litigated by the Canadian Civil Liberties Association for impinging the Charter freedoms as mentioned above.

I understand that this council has been under stress as Winnipeg residents are becoming more involved in their civics and engaging their democratic right to dissent, but if council refuses to do their job and listen to the plights of those they do not agree with, then there are more effective ways to cut down on "nuisance" protests—on the top of that list, to

genuinely listen to the problems and expertise their constituents share and to be a leader in making Winnipeg a vibrant city for all its residents.

Thank you for taking the time to read this.

Members of the Executive Policy Committee,

I won't mince words. The by-law that is being proposed at this meeting is undemocratic and presents clear violations to the Canadian Charter of Rights and Freedoms. The idea that this by-law's intent is to ensure that protests and rallies occur in the "correct" places and "correct" ways, while the buffer zones exclude almost the entirety of City Hall property, the majority of downtown, many MP/MLA constituency offices, police HQ, and many other places where citizens may rightfully want to publicly assemble to express discontent, is simply outrageous. If brought into effect and used against citizens, this by-law would surely be the subject of legal challenges that would waste the City's time and money.

This by-law, if it passes, would set a dangerous precedent for government overreach. Winnipeg is the home of the 1919 General Strike, and many of us working class citizens take to heart the importance of that movement, along with countless other labour and social movements in the century since, in making this city a great place to live. By bringing to the table a by-law that goes beyond the scope of similar by-laws in other Canadian cities, this EPC flies in the face of our proud history of democratic demonstration. Get outta here with this fascistic nonsense.

Considering that the goals of this by-law are already covered by existing legislation on human rights, hate speech, noise control, and traffic, I urge the EPC to strike this by-law down in its entirety and focus its time and effort on policies that would actually make our City a safer place to live and thrive. Increase funding for community programs, transit, bike infrastructure, fix potholes and replace burnt out street lights, regulate consumer vehicle sizes and speeds, beef up employment programs for vulnerable community members, increase the housing supply and safe drug access. But don't do this. This is a dark road to

go down, and, to be perfectly frank, no anti-protest by-law will actually stop your citizens from fully engaging in the democratic process by practicing their freedoms of expression and peaceful assembly. This by-law is garbage. Put it in the bin.

To the Executive Policy Committee

I am writing to state my firm opposition to the draft legislation regarding public assembly restrictions. The proposed measures represent a significant overreach that threatens essential liberties.

The Canadian Charter of Rights and Freedoms protects the right to gather and express dissent. These protections are the foundation of a democratic state. The government should only interfere with these rights in the most limited and specific cases. The current proposal uses vague definitions that allow for arbitrary enforcement. When the state has the power to decide what qualifies as a public disturbance, it can silence any group that it finds inconvenient. This creates a dangerous precedent where the definition of an acceptable protest changes based on the political climate.

Public assembly is often meant to be disruptive. This disruption is the method by which citizens bring attention to serious issues. If the state removes the ability to disrupt public life, it effectively removes the right to be heard.

Any limits on assembly must be narrow. These limits should only apply to critical infrastructure where safety is paramount. Medical facilities and primary education centers for minors are appropriate examples. Transitional housing for those in precarious positions also warrants protection. These rules should not apply to universities, colleges, or other centers for adult learners. Adults must be expected to encounter and process diverse viewpoints in public.

The law must also be applied without bias. There is no logical reason to grant special

treatment to trade unions or worker organizations. If a picket line blocks access to a medical facility, the harm to the public is the same regardless of who is holding the signs. Exempting specific groups from these safety requirements is unfair and contradicts the justification for the law.

The committee should abandon this draft. The city should rely on existing criminal laws to handle actual safety threats. Creating broad new powers to suppress assembly will result in costly legal battles and a loss of freedom.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,

I'm writing to you today to express my shock, disappointment, and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our ***Charter-protected rights to freedom of expression and peaceful assembly***. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. As one who has protested and rallied for over four decades in favour of basic human rights to give voice to those who have none, and to support and protect the environment and the planet on which I reside, I am deeply concerned about the restrictive and oppressive nature of this by-law. I have seen positive change result from peaceful protest and advocacy, and I have watched in horror as oppressive regimes and governments have moved to silence the voices of those calling for a better world.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. It is particularly surprising as Winnipeg has a strong and proud tradition of protest for change, as far back as the 1919 Winnipeg General Strike, where politicians tried to exert the weight of their power to suppress the rights of workers and citizens. Heck, plays and movies have been made, and monuments erected celebrating the strength of the people who brought about historic, beneficial changes to workers and their rights, from which we have all benefited.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the United States and United Kingdom, I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Asha Pereira RN, PhD

This proposed policy infringes on the federally protected chartered rights of citizens to be able to peacefully assemble and protest (Section 2(c) – Freedom of peaceful assembly)

The language used in the proposed policy is purposely vague and allows it to be wielded in an unjust, punitive manner by law enforcement. It's hard to believe that this absolute lack of specificity isn't intentional. Anyone who claims it as an oversight is declaring their incompetence for their role as a public servant.

It's actually embarassing that it's being proposed at all.

Protesting is a right we have as Canadians that should never be trampled on. We have the right to protest safely. Most of the protests we see around the world right now are in direct opposition to corrupt government regimes. Please stop letting US politics and divisive rhetoric creep into Canada. This should not be something government, especially at the municipal level, even has a voice on. Full stop. (Oh, and just so you know, this is coming from a white educated highly affluent person with a career and family earnings of over 300k... You know, because it seems this stuff matters nowadays 🙄). Do better.

"Nuisance Protest" is non-specific, meaning any and all actions can be subject. The ability to protest is upholding Human Rights and Freedoms and allowing people to have a voice to freely express thoughts and opinions. Being Canadian means there's an expectation all our Rights and Freedoms will be upheld. Just as we are not to be put in jail for unjust reasons, we are also allowed to join a group, hold peaceful meetings, not to mention, all Canadians have a duty to as citizens to allow all other Canadians to enjoy their Rights and Freedoms as well. "Nuisance Protest" is unspecified and therefore allows peaceful expression of opinion and the duty of bringing attention to moments where not everyone has had their Rights and Freedoms being held through protesting. If a group is peacefully meeting, is that considered a protest? Who is it a nuisance for? Is it proposed that I now call 311 anytime I don't understand a protest and demand it be shut down, even if peaceful and just? Would the pride parades we are proud to have in the city, now be considered "Nuisance Protests" because someone who has hate in their hearts deems it to be so? I am very concerned with this by-law and its application. I am concerned it will be unfair, racist, and uninclusive, limiting protests and rallies that are essential to the fabric of our Charter of Rights and Freedoms in Canada, as well as those protests and rallies that promote peace, Indigenous advocacy, and the collective strive for fairness our country values.

Dear Winnipeg City Council

I'm writing to you today with my deep concern, and to express my opposition to Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law --- which would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United

Cities and Local Governments (UCLG) “Human Rights City” since 2018.

This proposed by-law is counterproductive, regressive, and fundamentally at odds with human rights. Winnipeg cannot claim to uphold human rights, reconciliation, equity, or UNDRIP on one hand, and then silence the very people who have historically had to rely on public protest to be seen and heard on the other.

Winnipeg has not advanced human rights because power voluntarily listened. Progress has happened because of grassroots advocacy, because people showed up, because voices were raised in public spaces when formal systems failed them.

Indigenous peoples.
Families of MMIWG2S+.
Disability advocates.
Anti-racism organizers.
Community members demanding accountability.

These movements were not “nuisances.”
They were necessary.

This proposed by-law does not simply protect access to services. As drafted, it restricts peaceful protest and expression based on location alone, across large parts of the city, near the very institutions where decisions are made. That is not how democracy works. That is how dissent is managed and minimized.

It is also critical to name who this by-law actually protects.
The only clear exemption written into the law is for lawful labour disputes and collective bargaining. In other words, people who are already employed, unionized, and inside formal capitalist systems retain protected avenues to be heard.

Those who are unemployed, precariously employed, excluded, harmed, or ignored by institutions do not.

That creates a two-tier system of voice.
If you are inside the system, your dissent is legitimate.
If you are outside it, your visibility becomes a problem.
That is not equity. That is hierarchy.

And we must talk about who is given the power to enforce this silence.
This by-law places sweeping discretion in the hands of City enforcement staff and police, the very institutions many communities are protesting because they have not been listened to. It gives public officials the authority to shut down people exercising their rights, even when those people are responding to arbitrary, exclusionary, or discriminatory practices by the same systems now empowered to penalize them.

When your aim is to silence people whose only remaining tool is public protest, especially when institutional channels have already failed them, that's control. Human rights are not advanced quietly behind closed doors. They are advanced when people are visible, vocal, and impossible to ignore.

When you are not seen, you are not heard.
When you are not heard, your rights are not protected.

So who is this really protecting?

It is not marginalized communities.
It is not people shut out of decision-making.
It is not those seeking accountability.

It protects power, not people.

A city cannot say it supports human rights while criminalizing the methods that have historically been required to enforce them.

If Winnipeg is serious about equity, reconciliation, and its human rights obligations, it must choose accountability over comfort and democracy over silence.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Ashley Walklett

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Ashlynn Argo

I understand the intent behind the proposed Safe Access to Vulnerable Infrastructure by-law, to protect people accessing schools, hospitals, places of worship and other facilities from intimidation and obstruction.

However, I am concerned that the current proposal is overbroad and may unduly restrict the democratic right to peaceful protest, which is a fundamental part of Canadian civic life protected under the Charter of Rights and Freedoms. Peaceful protest, including expressing disagreement with public policy, institutional decisions, or societal issues, is a legitimate way for citizens to engage in civic discourse and advocate for change. Restricting where peaceful demonstrations can take place based on proximity alone could chill lawful expression and limit meaningful democratic participation.

If the by-law proceeds, I urge the committee to ensure it is narrowly tailored so it does not infringe on peaceful, non-intimidating protest and is consistent with Charter protections. Specifically:
1. Clarify and tighten the definition of prohibited “nuisance demonstrations” so that peaceful expression that does not obstruct, intimidate, or block access is explicitly allowed.
2. Ensure that buffer zones do not function as blanket bans on protest in large parts of the city, especially near institutions that are often the subject of public debate.
3. Include explicit protections for peaceful, non-violent protests and a clear statement that

the by-law cannot be used to suppress lawful free expression.

Peaceful protest strengthens democracy and community engagement. We can protect safe access to services without undermining constitutional rights.

Thank you for considering this important balance.

Dear Executive Policy Committee,

I support the right for groups of people to voice concerns in public spaces on issues significant to human rights and the environment. Peaceful protests are an important method of communication between the people of our city and our various levels of government.

Dear Executive Policy Committee,

I'm writing regarding the Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law limiting peaceful protests and demonstrations. With all due respect, are you kidding? This is how democracy works and it's basic free speech. We do not live in a police state. We live in a country where minorities, marginalized groups, and the general public are allowed to advocate for their rights.

Public demonstrations have defended the basic human rights of Indigenous people, workers, the LGBTQ+ community, and others, as well allowing citizens to speak against environmental injustice and other forms of discrimination.

This bylaw violates free-speech and basic constitutional rights. It is undemocratic, and it feels suspicious that it comes at a time when our neighbours to the south are instituting drastic and inhumane violations against marginalized populations. We need to stand firm in protecting human rights and the safety of minorities, and not piggy-back on America's decline into violence, surveillance, and hate.

To reiterate: nobody wants this except the people who want to maintain a status quo of inequality and to restrict the freedoms of marginalized populations and the communities who have had to fight for basic safety and fair treatment.

Please do not consider this bylaw any further.

While the safety of Winnipeggers should be prioritized, prohibiting any form of protest anywhere, infringes of the rights and freedoms of Winnipeggers. It's one thing to prohibit protest around places that provide healthcare and daycares but schools, post-secondary institutions, libraries is a different matter. Places of education are the places that should be open to expression and freedom of opinion.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,

Our city has been alive with the strength of our protest, we have a rich history of using our rights and freedoms to stand up for the poor, the marginalized and the colonized. This is something I have been very proud of. It is why I choose Manitoba and Winnipeg as my home and city.

I am grateful for the opportunity to voice that our Freedom of thought, belief, opinion and expression is threatened by this Bi-Law. A protest is used to communicate the wants of the masses to civil servants like yourself. It is not just the fact that we gather but WHERE that sends a message. Its purpose is to cause inconvenience and draw attention to the disagreements at hand.

I understand that this by law is trying to prevent further property damage, hate crimes, and violence. These acts are already illegal and limiting the space at which people protest is not the way to address these. Mistakes have been made in our history of protesting, Winnipegger's have tipped over train cars, hit protesters with their car, and used hate speech in their messaging. All these happenstances are already illegal wither or not they have been memorialized in art pieces (i.e the labor protest train car next to the concert hall). The fact is that the majority of protest are peaceful, most of our protest use our right and freedoms with respect and consideration of our fellow citizens.

If you truly wish to address these concerns, there are ways to do it without infringing on rights and freedoms.
Some options might be having more Cadets and Police to help supervise and navigate traffic. Maybe the city can employ some de-escalators that help to manage the feeling of injustice that often arise in a protest. I do not pretend to know the answers, but I would be willing to help brainstorm options.

I do know that limiting the access to spaces which people can protest is to limit peaceful demonstrations, free speech and democracy.

I understand that there would be a convenance to limiting the space that protesters use. But I do not feel that convenance is worth trading in our ability to ask for accountability, the chance to influence of public opinion, push for political, legal, and social change, amplifying marginalized voices, challenges existing power structures, and the chance to build solidarity among Winnipeggers, Manitobans, Canadians or humanity. Limiting the space is to limit the protest in its entirety.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. There are many places around the world where the freedom to expression is banned, and it is leading to further oppression of the citizen and division between us all. I truly believe that if passed this will only CAUSE harm to vulnerable infrastructure and more importantly to our community's most vulnerable.

I implore you to drop the proposed demonstrations bylaw.

I am disappointed that this motion is even being considered. Winnipeg is a city that is passionate and stands up for what we believe it. We have the right to protest peacefully, and horns/traffic delays may be a nuisance but they are certainly not unpeaceful. I'm disappointed this is proposed as a bylaw.

I'd like to begin with a quote from John F Kennedy that I'm sure you're familiar with by now

"Those who make peaceful revolution impossible will make violent revolution inevitable"

I'd like to expand on what this means. Before I start I would like to clarify that I am AGAINST violence of any kind, and so I very much want PEACEFUL protests to be able to continue in the city. The language I'm using is simply for illustrative purposes, as a way of speculating how bad things COULD get (and have gotten in the past!) without the ability to peacefully protest

Here Goes:
Don't you dumbasses FUCKING REALIZE that peaceful protests, specifically DISRUPTIVE protests are already the compromise position where WE can have our voices heard and YOU don't have to worry about threats of violence???

You should already know that peaceful protests work as a release valve for social discontent so that issues can be dealt with before they get heated.

Surely you must agree there should be something between people sitting at home twiddling their thumbs or protesting so far from the halls of power that their cries don't even have a chance a being heard, and bringing out the FUCKING GUILLOTINE???
Surely you as our elected officials would like to know if people are upset with you WITHOUT your house being firebombed???

And DON'T try to tell me this is about protecting minorities or other vulnerable groups. As a member of a vulnerable group myself (the trans community), this would only make me

MORE vulnerable, as it would take away the ability for my community to advocate for ourselves. We already have laws against hate speech AND against protesting near hospitals, so this by-law would be redundant at best! This law would prevent religious minorities from speaking out at their OWN sites of worship and students from protesting at their OWN schools, and you know it, you cowardly pieces of shit.

If you, like I am, are AGAINST the possibility of dissent turning violent, and are FOR living in a PEACEFUL DEMOCRATIC society, please vote AGAINST this bylaw. If, instead, you are against DEMOCRACY? please resign immediately.

Thanks!
- Someone who likes having rights, like freedom of expression and freedom of peaceful assembly, as guaranteed in our Charter of Rights and Freedoms, alongside many others

Democracy is based in a person or group of people's right to peacefully protest. How can the City Council try to pass a bylaw to take this away? Especially in light of the facist policies we are seeing to the south in the US. Why is a Canadian city trying to squash our human rights?

This is a slippery slope to total censorship. Our right to demonstrate should not be restricted in any way. If a protester or is being offensive or endangering the lives of others, then the police can deal with that protester. Who determines is a protest is a nuisance!

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Bassam

I highly oppose the proposed bill to ban, and fine protesters. This country prides itself on democracy, being part of the 1st world. Actions like protests are good, allowing each community to arrange for matters that have value. They are peaceful demonstrations to each civilians right to a voice in their community, and government. Democracy does not exist without the people. To ban protests is vile, and an inexcusable slight to every person's human right. Civilians have a right to demonstrate in support of any cause, protests are not meaningless nor are they a 'nuisance', rather, throughout history, protests have shaped the way we live today. Where would today's women rights, and liberties be like without protests?

Cher Comité exécutif des politiques,

Je vous écris aujourd'hui pour exprimer mon choc et mon inquiétude face à l'examen par la Ville de Winnipeg du règlement proposé sur l'accès sécuritaire aux infrastructures vulnérables, qui viendrait restreindre nos droits protégés par la Charte à la liberté d'expression et de réunion pacifique. C'est pour cette raison que je m'oppose au règlement proposé.

Ce règlement limiterait les libertés fondamentales que les Winnipegger·e·s ont utilisées pour revendiquer de nombreux changements sociaux et politiques dont nous bénéficions aujourd'hui comme communauté, et même comme nation. Des veillées et rassemblements aux tables rondes et manifestations publiques, les mobilisations ont permis de faire avancer les droits des travailleurs et des locataires, des peuples autochtones, des communautés racisées et 2SLGBTQIA+, ainsi que la protection de l'environnement.

S'il est adopté, je crains que ce règlement n'empiète non seulement sur des droits constitutionnels, mais qu'il réduise au silence les voix des communautés marginalisées, entraîne des excès d'intervention policière et offre des réponses inadéquates face à la haine. Le règlement municipal proposé sur « l'accès sécuritaire » ne ferait rien pour prévenir davantage les dommages matériels, les crimes haineux ou la violence — des actes qui sont déjà criminels. Il limiterait plutôt sévèrement les manifestations pacifiques. Ce type de restriction draconienne et antidémocratique de la liberté d'expression n'a pas sa place dans la Ville de Winnipeg, qui aspire depuis 2018 au statut de « Ville des droits humains » de l'organisation Cités et Gouvernements Locaux Unis (CGLU).

L’Association canadienne des libertés civiles (ACLC) a exprimé des préoccupations selon lesquelles des règles générales comme celles-ci pourraient restreindre injustement les manifestations pacifiques et la liberté d’expression protégées par la Charte, et que de telles lois nuisent souvent aux groupes marginalisés qui dépendent des manifestations pour revendiquer des changements sociaux.

Il s’agit ici de protéger la liberté d’expression et d’association, pierres angulaires essentielles d’une démocratie libre et équitable. Compte tenu de la suppression inquiétante des droits et libertés à laquelle nous assistons aux États-Unis, je vous exhorte à vous rappeler vos obligations légales de respecter la Charte et de protéger notre démocratie.

Je vous implore d’abandonner toute considération supplémentaire du règlement proposé sur les manifestations.

Beaudry Labossière.

This proposed bylaw seems like a heavy handed attempt to stifle public demonstrations and targets groups who have no other avenues to voice their opposition to legislation, to offer demonstrations of solidarity or to raise public awareness around different issues. These demonstrations are a fundamental part of any healthy democracy and offer a non-violent avenue for people to voice their discontent or support in a public setting. It is not in the purview of city council to infringe on our Charter rights. Section 2(c) guarantees the right to peaceful assembly. Having attended many public demonstrations in the past decade, I have seen massive public demonstrations with no violence and nothing that would constitute a blockade or riot. Minimal impact on traffic and negligible impact on other Winnipeggers.

Prioritizing someones convenience in navigating the city is not a justifiable reason to restrict others rights in the public arena.

I can’t believe I am doing this, and I am disgusted that this by-law was even proposed. Evan Duncan hinted, more or less, that the ICE protests in Minnesota are an indicator of what’s coming to Manitoba. I don’t have to say anymore. I am extremely disappointed it has come to a point where I need to oppose this by-law. This is a complete embarrassment.

Dear Executive Policy Committee,
I'm wish to express my opposition to the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.
This by-law would limit Winnipegers' fundamental freedoms to advocate for social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
I am concerned that this by-law will infringe on our constitutional rights, silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Zachary Gage

I am writing in opposition to the proposed “Safe Access to Vulnerable Infrastructure” bylaw. While protecting public safety is important, this bylaw is overly broad and risks undermining fundamental rights to freedom of expression and peaceful assembly protected under the Canadian Charter of Rights and Freedoms.

The definitions of “nuisance” and “intimidating” protest are vague and subjective, granting broad discretionary powers to bylaw officers and police to shut down lawful, peaceful demonstrations. Many existing laws already address violence, harassment, and hate speech. This bylaw appears unnecessary and risks suppressing legitimate civic engagement rather than enhancing safety.

The geographic scope is also deeply concerning. Applying restrictions to public spaces such as libraries, universities, City Hall, and other locations near decision-makers would significantly limit residents’ ability to make their voices heard. The potential for fines of up to $5,000 per participant is disproportionate and could have a chilling effect on peaceful protest.

I urge Council to reject this bylaw and instead pursue measures that protect public safety without infringing on constitutional rights or limiting democratic participation.

This proposal is so broad it amounts to a de-facto ban on protest through much of the city, especially the downtown core. It is very reminiscent of the actions of the USA Federal government in it's heavy-handed approach to justified demonstrations against their immigration "crackdown". What's happening in the USA should encourage us to reinforce the right to protest, not limit it. The city should be defending our freedoms, not advancing authoritarianism.

Not only is this By-law clearly wrong, it is also unconstitutional, and will inevitably result in an expensive lawsuit that the tax-payers of Winnipeg will have to pay for.

This By-law should be rejected.

Dear Executive Policy Committee,

I'm writing to you today to express my opposition to City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

The word authoritarian gets overused and misused a lot these days, however that is the only way to describe the policy that is being proposed here. It stands firmly against the Canadian Charter of Rights and Freedoms. It is shocking that a city council would suggest Charter-protected rights of expression to be limited.

The right to protest is fundamental to a functioning democracy. To be a nuisance is sometimes, unfortunately, the point. If the only citizens with an approved voice are once that are not a "nuisance" to those in power, then you are living in a fascist society.

Globally we are witnessing alarming suppression of rights, and the violence that is trust upon everyday people in societies that tamper with freedom of expression and association. Don't let this happen to our community.

I have endured many protests in this city that I firmly disagreed with. But to strip that right from the people I disagree with is infinitely worse.

You are considering removing the citizens of Winnipeg's right to freedom of peaceful assembly. Do you want your legacy to be the council that stripped peoples right to freedom of peaceful assembly? Is that how you should like to be remembered?

I understand the attempt is to balance peoples safe access to facilities with peoples right to protest. But to have the bylaw open to vague interpretation is only opening the door to authoritarianism, overreach and violence. It is wrong, against the Charter, and if passed should be challenged in court.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

To the Executive Policy Committee

I am writing to state my firm opposition to the draft legislation regarding public assembly restrictions. The proposed measures represent a significant overreach that threatens essential liberties.

The Canadian Charter of Rights and Freedoms protects the right to gather and express dissent. These protections are the foundation of a democratic state. The government should only interfere with these rights in the most limited and specific cases. The current proposal uses vague definitions that allow for arbitrary enforcement. When the state has the power to decide what qualifies as a public disturbance, it can silence any group that it finds inconvenient. This creates a dangerous precedent where the definition of an acceptable protest changes based on the political climate.

Public assembly is often meant to be disruptive. This disruption is the method by which citizens bring attention to serious issues. If the state removes the ability to disrupt public life, it effectively removes the right to be heard.

Any limits on assembly must be narrow. These limits should only apply to critical infrastructure where safety is paramount. Medical facilities and primary education centers for minors are appropriate examples. Transitional housing for those in precarious positions also warrants protection. These rules should not apply to universities, colleges, or other centers for adult learners. Adults must be expected to encounter and process diverse viewpoints in public.

The law must also be applied without bias. There is no logical reason to grant special

treatment to trade unions or worker organizations. If a picket line blocks access to a medical facility, the harm to the public is the same regardless of who is holding the signs. Exempting specific groups from these safety requirements is unfair and contradicts the justification for the law.

The committee should abandon this draft. The city should rely on existing criminal laws to handle actual safety threats. Creating broad new powers to suppress assembly will result in costly legal battles and a loss of freedom.

We are organizing action against Evan Duncan's "By-law of THE CITY OF WINNIPEG to prohibit nuisance demonstrations and intimidation of persons at or in respect of vulnerable social infrastructure".
Read all the details -
WHY do we need to fight this by-law? Here are some important points:
"Nuisance Protest" is non-specific, meaning any and all public protests, marches, round dances and other gatherings could be subject.
Areas restricted by this by-law are public spaces and points of proximity to decision makers.City Hall, University Campuses, Wab Kinew's Office, etc. You can see on this map (https://chromatin.ca/blog/nuisances/), much of the city would be subject to the geographic restrictions of this by-law.
Fines of up to $5000 could be issued to every person who shows up to Round Dances, rallies, group bike rides, marches, etc.
The language of the by-law extends to any protests in these exclusion zones that use amplified sound or block traffic.
Police will have new tools they will use to silence and punish protesters.
It is almost certain this bylaw will be racist in its application.
Please let me know if I can count on your help with this important action!
TIMELINE FOR ACTION IS IMMEDIATE:
⚠️ The City of Winnipeg's Executive Policy Council votes on this on Tuesday, Feb 17th. If it passes it goes to the city council to enact.
‼️ Deadline for written positions and registration to delegate on Tuesday Feb 17 is THIS Friday, Feb 13 at NOON ⁉️
⁉️ Here's how:

1. Register as a delegation or submit comments to a committee of Council
2. Address: Executive Policy Committee
3. Agenda Item: #7 Safe Access to Vulnerable Infrastructure By-law
4. Click "I am opposed to the recommendations"
5. Click "submit comments in writing" or register to delegate if you are able to attend in-person (A comment box will pop up)
6. Use this script or write your own.
7. Let us know you've submitted your comments here!

This is starting to get ridiculous with the Control Over People and 'fiscal savings' , the provinces-so far-are trying to pull!! The Emerg/Medical systems drastically changed, we payin for it now!!! Sloppy/shady construction/developments/deforestations, poisoning public family pet areas,,,all done,, then report to public and we pay for courts when caught.
Transit/ Road Systems, well total fk up,,, layoffs, union businesses n strikes!! People who get pissed off at a slum lord! Granny's who don't get their afternoon tea at 2 ...And even organizations who get into traffic for $$ or Unity...Angels/WFP, Round Dances,,,Even for an info gathering like for the abuses of cats, horses,,,to morn a tragedy,,,..
Some provinces wanna Use the Not Withstanding Clause?
OR...
""Let's just change/make a new RULE and No One will be allowed to gather in any way, for any reason, for any Human /Animal Rights .Work, Environment Infractions. ......A neighbourly bbq n music playin...Street Hockey ...(banned already) ....Kids playin in the school yard.....Anything.....
Are governments then going to get out special guards who spray chemicals/shoot us??
Sounds like the beginning of Minneapolis authoritarian sht to me....
It starts small..but ,,,,,,,Start pissin people off and there's a reason to 'gather'....which leads to upset people on both sides d fence.
And from personal experience, all it would take. is on pissed off person to make a call, and the By Law sht begins!!....
A Rally to Unite Against the Nuisance Protest Restrictions By Law ....Sounds pretty good to me!!!
This is the start of something so wrong!

Concerned Fighter For Rights ....Woman,

I am writing in opposition to this needlessly broad law. It is drafted in such a way to restrict the right of the public to protest and assemble peacefully. As a physician, I can appreciate the need for the safety of the public and the need for essential services to be protected. However, the language of the law is incredibly broad and is at tremendous risk of being abused.

Further, as our society is increasingly fractured and we spend more of our time in the digital world where our very view of reality is curated by algorithms , public spaces such as outside of the legislature represent the public square. These are places where we can confront the problems facing our society and interact with those who are trying to make their point of view known.

The proposed zones to restrict any protest that the cities deem a "nuisance" is a direct attack on the citizens of Winnipeg ability to express their disagreement with city policy and have their voice heard. The non-specific language on what deems a protest a "nuisance" allows for suppression of protests based on the whims of what is acceptable speech to whoever is in office and can be used to silence protests across the board no matter the messaging they provide.

Not to mention that the 100m range within certain public institutions also blocks areas that SHOULD be protest zones, places like city hall and universities (establishments that have a well established placed for protests across history). The blocking of these places to protest is a disgrace and attacl on our rights as citizens to protest what we think the government is doing as morally wrong.

The freedom to express one's views through peaceful protest is one of the most basic and fundamental rights in any democratic society. It is unequivocally protected by section 2(c) of the Canadian Charter of Rights and Freedoms. It is so established and uncontroversial that there is relatively little jurisprudence about it compared to other protected rights. I am deeply troubled that any sitting councillor would entertain the idea of undermining this most elementary principle of democracy.

If citizens cannot make their voices heard through peaceful protest, they will find other ways to make their voices heard. Council would be wise to remember this if it is so concerned about the "vulnerability" of infrastructure.

The proposed by-law is offensive and plainly unconstitutional. If Councillor Duncan would like to live in a society that disregards citizens' right to peaceful assembly, Minneapolis is not a far drive. Bon voyage!

It sets a very dangerous precedent to silence or constrain people's rights to peacefully protest.

People protesting is one of the only things keeping me going right now and feeling like people are advocating for the right side of history. We need the right to push for progress and speak up about things we care about, publicly, and peacefully, period.

I am writing to oppose the proposed bylaw restricting protests within 100 metres of schools, hospitals, places of worship, and other community facilities. I support safe access to these spaces, and I agree that intimidation, harassment, threats, and blocking entrances should be addressed. But this proposal goes too far by restricting peaceful protest primarily based on location, rather than focusing on unlawful conduct.

Peaceful protest is protected under the Charter as freedom of expression and peaceful assembly. Any limit must be clear, narrowly tailored, and minimally impairing. A broad buffer zone around a wide list of sites risks sweeping in lawful speech on public sidewalks and chilling legitimate civic participation. It also creates significant discretion in enforcement, which invites uneven application and erodes public trust.

Winnipeg should be especially careful here. Our city's history includes the 1919 Winnipeg General Strike, a defining reminder that democratic change often depends on the right to gather and be heard in public. Creating broad protest free zones normalizes the idea that public dissent should be moved out of sight rather than engaged with.

If the City's goal is safety and access, there are better options. Focus on conduct, not geography. Strengthen and enforce rules against harassment, threats, hate based intimidation, and obstructing access. If any buffer is considered, make it tightly limited to entrances and narrowly defined circumstances, with a clear sunset clause and public review.

I urge you to withdraw this bylaw as drafted and pursue targeted, evidence based measures that protect access without undermining Charter protected rights.

RE: The motion by City Councillor Evan Duncan (Charleswood–Tuxedo–Westwood) to create a new bylaw against “nuisance demonstrations”

It is of great concern this motion is being forwarded. The use of term "nuisance" is an insult to democracy. Demonstrations are one of the few options the general public has to voice their opposition to important local or global issues and is a critical channel for people to engage with our political system. This motion significantly weakens Manitoban's right to demonstrate. Unfortunately the proposed bylaw aligns with the rise of anti-democratic forces in the US and seems to stem from systemic efforts to silence Palestinian voices. In 2025 the Rady Centre hosted an event where members of the Israeli Occupation Forces (IOF) spoke. As you are likely aware, there is significant evidence the IOF has, and continues to violate international laws including torture and murder.

The wording of the motion is reportedly vague which allows enforcement to be arbitrary. Is the US Consulate, City Hall, MLA or MP offices, or the Legislative Building considered "vulnerable infrastructure"? Will First Nations' only be allowed to demonstrate against government polices within certain parameters? The motion penalizes the use of megaphones, so how do large groups of people communicate with each other. There are safety concerns if a mass of people cannot receive direction from organizers. This motion has many gaps in logic and is fundamentally undemocratic. I oppose this motion.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Brent Fisher

I strongly believe issues around right to public protest should not be within the jurisdiction of Municipal government.

The city should make a formal request to the Manitoba Government to work with the city to address the need for such a law. Any such law should be specific and as limited as possible. (Similar to the Provincial Abortion Protest Law) It should be carefully written to avoid subjective interpretation.

This proposed law as drafted is too broad and could be interpreted subjectively and potentially abusively.

As someone who requires regular access to healthcare service, I do believe the safe access to healthcare services is a critical issue. I don't believe this drafted by-law is the correct and balanced solution.

Please work with the province to solve this issue before pursuing such a law at the municipal level.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Brette Elias

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Brigid Christison

This recommendation is a direct attack of our Canadian Charter of Rights and freedoms, 2(b) and 2(c). This allows us the right to assembly for the purpose of freedom of expression.

Penalizing any form of peaceful protesting is a direct violation of human rights as declared by our country.

With the direct attack of the United States against Canada non-stop to allow the slippery slope of removing one of our rights makes it seem like the city council has more nefarious purposes.

The proposed agenda item is an attack on Sections 2(b) and 2(c) of Canada's Charter of Rights and Freedoms. Given the size of the area covered by this proposed change I do not believe that Section 1 of the Charter is applicable.

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter Rights and Freedoms and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Brooke Nelson

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

The right to protest is one of the most basic aspects of democracy and must not be removed. While I might support some limitations, the current proposal is too broad. Given the choice between this proposal and zero limitations on protests, I would have to choose the latter. For instance, while I personally find protesting abortion with the types of graphic imagery typically used by such groups outside hospitals, I would disagree that doing so on a university campus is inappropriate, even though I disagree with the stance and tactics in every possible way. I might support a more minimal distance limitation for young students at schools, but again, not this wide sweeping ban. Leaving variables up to police discretion leaves far too much space to exert political agenda over who gets to protest what topic and who does not, and this cannot be allowed.

Dear Executive Policy Committee,

I understand that the intentions behind proposing this by-law were good, that the intent is to protect vulnerable people accessing necessary services. I am in agreement with the intents behind this by-law - I also want people to be able to access health care, education, etc. safely. However, this by-law dangerously oversimplifies the problem that it is seeking to address.

It's always important to ask - who's safety are we trying to protect? Blanket by-laws like this that penalize people's autonomy, may protect some, but will also endanger others. Demonstrations beside hospitals, beside schools, can also function to protect people. Minneapolis is a very current example of this - anti-ICE demonstrations alongside schools throughout the city have been key to protecting vulnerable students and their parents from being kidnapped. Students, from elementary to university have participated in demonstrations necessary to improve our society, from demonstrating on school grounds for climate justice, to organizing walk-outs in opposition to new anti-trans laws in girl's sports that require for them to provide (like in Edmonton and Calgary in fall of 2025). The ability to organize and protest in these spaces allows those who are 'vulnerable' to voice what they need and want. Yes, this means opposition and disagreement can also occur, which is not always fun nor easy. But this is a burden we carry in the interest of democracy, respect for autonomy, and the desire to lift up the voices of those who are vulnerable.

This mistake of taking away autonomy in the interest of "safety" is being made everywhere right now. Pro-life laws endanger the lives of women and babies they seek to protect. Anti-trans laws in sports, which seek to protect "women", actually puts them under additional danger, leading to even higher changes for physical scrutiny and sexual harassment.

Protecting the 'vulnerable' by also taking their autonomy to demonstrate away, simply results in further oppression of the very people you are trying to protect. Again, I ask - who are you trying to protect? And will this solution genuinely ensure their safety, or is it actually preventing other forms of solidarity that would build long-term change?

Trust me, this isn't easy nor simple. I would much rather live in a world where pro-life protesters are not present at an abortion clinic. But I will accept that consequence if it means that I can also participate in the protests that are important to me. This law doesn't just take away harm, it also takes away community's opportunities to look after each other, to support each other. We need the ability to do this now, more than ever. Events in the U.S., just 7 hours south of us are showing us that. It is so incredibly important that we learn from what is going on around us, and apply this to how we govern each other here.

I ask you, do not pass this by-law. The results will be much more complex and harmful, it will not result in the good that it intends to do.

Instead, let's work together to identify the real source of the harm we're trying to address here, so that we can find an effective solution that builds up our communities, and supports us in supporting each other. If we oversimplify solutions, we will only be creating more harm for those in our city, now and in the future. I vehemently oppose this Bill, and would love to discuss alternative ways for us to meaningfully support those who need us / who we need too.

Dear Executive Policy Committee,

I believe that even with the best intentions of protecting the public, and some situations benefitting from this by-law, it will be a very slippery slope. To what extent will the by-law be enforced or used against certain groups, and to what cost to our fundamental freedom of expression?

Many groups currently enjoy the freedom of expressing their beliefs with protest, without fear of retribution. While this by-law may have been drafted to protect vulnerable members of society, it will equally, if not disproportionately harm even more vulnerable and marginalized groups. Indigenous groups, anti-war protesters and demonstrators, and many more people will suffer under this harmful mandate. Taking the example of both pro-Israeli and Palestinian demonstrators—both sides will be harmed with the limit on where they are able to protest and demonstrate their beliefs. The Asper Jewish Community Campus has been used as a starting point for many Jewish people wishing to protest, and Palestinian supporters should also not be completely limited in the spaces where they can demonstrate.

While I do agree that protesters could, and should use discretion as to how members of the community could be affected, this by-law goes too far. By limiting public spaces all demonstrators may use, the fundamental freedoms the all residents of Winnipeg enjoy are infringed upon. Hate crimes, vandalism, and other acts of violence this by-law hopes to prevent will not be deterred; these acts are already criminal and punishable by the law. Instead, peaceful protesters and all communities that use their freedoms to express their beliefs will be harmed.

I specifically worry about how this by-law is to be enforced—if certain groups will be more subject it than others. Will the by-law only be enforced if others feel uncomfortable? What does this mean for social issues that society is inherently uncomfortable with approaching? I worry that the city will be able to use their discretion to enforce the by-law on certain groups while turning a blind eye to others. As we all watch what happens south of the border, where freedom is becoming a question and many marginalized communities live in fear, I implore your committee to think about what this by-law means for the future of our vibrant, diverse city. The government, at all levels, should be a projection of what the people want, not an oppressive force.

Thank you for your time, I truly hope you take my comments, along with surely the comments of many others into consideration.

Dear Executive Policy Committee,

I am writing today to express my strong opposition to the classification of some protests as 'nuisance' protests.

Protesting is a fundamental right that all Winnipeggers must have. A municipal government introducing a By-law that can restrict protesting is a violation of constitutional rights given to all Canadians, namely the rights to freedom of speech and expression.

This by-law would, without a doubt, infringe on the rights of marginalized communities more than most. These include 2SLGBTQIA+ folk, Indigenous peoples across the city, racialized groups, tenants, workers.

Protests are integral to Winnipeg's past, and they are just as integral to Winnipeg's future. To limit them is to limit what makes Winnipeg a great city.

This is not an issue of some protests being a 'nuisance', this is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy.

Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

By-laws that limit the right to protest are deeply problematic and only put into place by people who are in positions of privilege whereby they don't have to protest to protect their rights. It's un-Canadian, undemocratic, and alarmingly similar to the early steps of policy that lead toward situations like the ones in the US. And I think early steps is important to emphasize. These proposals are vague. They're confusing and relatively open-ended, and they punish people financially, which makes them extremely classist (ie any law punishable only by fine is functionally legal if you have enough capital). The people have the right to be heard and to peaceful protest. It SHOULD be a nuisance. Protests are sign that the government is ignoring the needs of the people that they have tried to have addressed through the polite and proper channels. You are in power through democracy, and it must be maintained.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Caleb Beswatherick

Protests are protected under the Canadian Charter of Rights and Freedoms. Any attempt to curb the rights of protestors or place limitations on the right to protest is a concrete and dangerous step towards fascism and the erosion of free speech (the actual legal definition, not the right wing bastardisation or the term).

A public who cannot gather to oppose their government is a public who loses significant portions of their rights as citizens. Protesting is a major way that disadvantaged groups such as Indigenous people, other racialized individuals, 2SLGBTQ+ people, and disabled people have achieved human rights advancements. It's how people speak out against their elected officials not representing their wishes and that accountability must be preserved.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Sincerely,
Caleb Clay

The proposed by-law has good content (banning protests seeking to target particular racial, gender, sexuality, religious groups etc, protecting access to medical care), but it goes too far. By banning protest near any building that may be inconvenient and preventing the blocking of roadways, we render peaceful protest meaningfully less effective in our city, and make it seem more authoritarian both to prospective and current inhabitants.

By all means, no one should be able to stop anyone from accessing medical care, but on the same note, we as a city have no right to hamstring peaceful protest within our borders.

I oppose restrictions surrounding the right to protest as I consider protests to be a meaningful and impactful way to make my voice heard. Right to peaceful protest and assembly is a protected human right in our charter and we shouldn't put unnecessary limitations on that.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Carlie Kane

This is against the charter and a clear step in the direction of fascism. That council would even consider this is an abomination.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

While I understand the intention behind this, I do not believe it falls within the rights and freedoms offered to Manitobans.

Changing the standards of protest (even protestors that I personally find bigoted, regressive, bad faith actors, and so on) can set a precedent for all kinds of protest, including those that have been historically important for the progression and maintenance of many people's basic rights - to be controlled, managed or outright disallowed.

Protests and demonstrations are by their very nature, at least a little disruptive. As a communicative medium, it is important that Manitobans are able to do this as they have been able to.

There are groups and movements that I find personally objectionable, of course. Many anti-abortion activists and demonstrators make a point of harassing vulnerable people and medical workers. Even still, I believe that changing the definition of allowed protest would impede upon my ability to show up and provide community care or support in these moments.

I believe that we can find better ways to support our most vulnerable.

Thanks for your time.

Dear Executive Policy Committee,
I am writing to express my deep concern regarding the City of Winnipeg's consideration of the proposed Safe Access to Vulnerable Infrastructure By-law. This proposal would restrict Charter-protected rights to freedom of expression and peaceful assembly, and for that reason, I strongly oppose its adoption.
Public demonstrations—whether vigils, rallies, round dances, or peaceful protests—have long been essential tools for advancing social and policy change in Winnipeg and across Canada. These actions have contributed to hard-won protections for workers and tenants, Indigenous peoples, racialized and 2SLGBTQIA+ communities, as well as environmental safeguards. Limiting these freedoms risks undermining the very mechanisms that have strengthened our community and our democracy.
I am concerned that this by-law could infringe constitutional rights, silence marginalized voices, and enable police overreach, while failing to meaningfully address hate, violence, or property damage—acts that are already prohibited under existing law. Rather than preventing harm, the proposed by-law appears likely to restrict lawful, peaceful protest. Such an approach is inconsistent with democratic principles and stands in tension with Winnipeg's commitment since 2018 to becoming a United Cities and Local Governments (UCLG) "Human Rights City."
The Canadian Civil Liberties Association has also raised concerns that broadly framed restrictions of this nature may unjustly limit Charter-protected expression and assembly, and that these measures disproportionately affect communities who rely on protest to advocate for change.
Freedom of expression and association are cornerstones of a free and democratic society. At a time when civil liberties face mounting pressures globally, it is vital that our municipal leaders uphold their legal obligations under the Charter and protect these fundamental rights.

I respectfully urge you to discontinue further consideration of this proposed by-law.
Sincerely,
Carolyn Regehr

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Winnipeg has a long history of successful protests and successful community organizing for social and personal issues which needs to be recognized and protected.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Carrie Wasson

Dear Mayor and Councillors

I'm opposed to the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly as was the case for the Lemay Forest Sacred Fire, which a peaceful, community sustained settlers with Indigenous people protest. It was within 100m of a local school adjacent to the Lemay Forest. Staff, students and parents sat in ceremony with the firekeepers and community members and firekeepers participated in ceremonial teachings at the school. And that is what truth and reconciliation is about.

It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. Rallies, vigils for MMIW, round dances and rallies are what raise awareness for social justice and environmental issues and this bylaw is offensive in its nature.

Please do the right thing.

Winnipegger, activist, ally and public participant in a democracy.

I was quite shocked and very discouraged to read that this by-law is being proposed in the city I've lived in my entire life. It is not what I want for my home city, my province, my country...or my children! We live in a dangerous age of misinformation, disinformation, corporate controlled media and now AI technology that enables the convincing creation of entirely false narratives. It is more important than ever that Canadian citizens retain their rights to rally, to provide informational outreach to fellow community members, and to protest in locations where their voices can be heard. The right to express oneself in public and to assemble peacefully with others is enshrined in the Canadian Charter of Rights and Freedoms. As a concerned and responsible citizen, I have exercised these right many times and have never once though of intimidating anyone or seen it happen. I am certain that the Winnipeg Police already have the authority to deal with threats of intimidation and violence. Do they not? I believe that the City already has the authority to enforce regulations around megaphones and amplifiers. Do you not? There is no need to trample on the Charter and blanket-ban peaceful assembly in thousands of Winnipeg locations. We could all sit at home on our hands and watch Netflix in our spare time, but engaged, caring citizens put in the effort to hold corporations and governments accountable to make our country, and world, a better place. We are not a "nuisance". The very idea of this by-law, which sets a dangerous precedent, makes me think that we are moving dangerously closer to the U.S. in terms of infringing on the rights of citizens. I implore the City Councillors of the City of Winnipeg to vote "Nay" to this by-law. Thank you.

I wholeheartedly oppose this proposed by-law — which would, in effect, restrict citizens' right to exercise a healthy, democratic practice of social engagement in local community — that of gathering in public space to voice concern, to demonstrate, to protest.

How can you, as our local government, say that your work is in service of the community if you are actively trying to fine and punish folks for gathering in public space, in a proposed by-law that is sloppy and dangerous, that uses broad, open-ended language? That the Canadian Civil Liberties Association deems unconstitutional and part of a concerning trend?

This proposed by-law is in opposition to the Charter of Rights and Freedoms. If it passes, it will be challenged at higher levels of court and it will be defeated. The city will waste money and time tied up in the case(s), leaving less resources for the for us to spend on the more important issues facing our city.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

This proposed bylaw is a limitation on basic freedom of speech. It would be not only disconcerting, but embarrassing, to see it implemented.

Adopting this bylaw would absolutely bring on legal and human rights challenges which, as well as being an embarrassment to the city and province, would also cost taxpayer money.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

This item is a blatent disregard for the peoples right to peaceful protest. This attempts to prohibit protest in areas where protest commonly happen, and have commonly happened for years. They happen in these places for good reason: its where people are, and its where people will be heard. This is an active attempt to silence the public by prohibiting protest. If this passes, where will be left for the people to be heard? Does the mayor expect us to protest quietly in our homes? No, it is vital to the right to protest peacefully that citizens be allowed to congrigrate peacefully, and limiting that is an active attempt of silencing us, and an active disgregard what we stand for in Canada.
You cannot simply decide when and where its convenient for the people to be heard.

While your heart may be in the right place, in practice this by-law would restrict nearly all peaceful protests - a fundamental right for citizens making themselves heard. Yes protest may occasionally be uncomfortable but that's how change happens. The idea that a university would be off limits from challenging ideas is ludicrous.

The right to peaceful protest is included in the Canadian Charter of Rights and Freedoms. This by-law is infringing upon that right. We need to make sure that we remain a healthy democracy and allow all voices to be heard.

This bylaw is far too sweeping and vague. Freedom of expression is a cornerstone of democracy, and if it's a little messy at times, that is the price we pay. If ever a demonstration goes awry and becomes violent, there are already laws to deal with such a turn. This looks very much like something that would come out of the Trump/Republican playbook.

From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Chase Fincaryk

Residents of Winnipeg should have the right to peacefully protest something they oppose. It would be a violation to our human rights to pass this by-law.

WHY fight this bylaw?
* silences our citizens and infringes on our freedom of speech
* "Nuisance Protest" is non-specific, meaning any and all actions could be subject.
* Areas restricted by this by-law are public spaces and points of proximity to decision makers. Much of the city would be subject to the geographic restrictions of this bylaw including City Hall and University Campuses.
* Fines of up to $5000 could be issued to every person who shows up to Round Dances, rallies, group bike rides, marches, etc.
* Police will have new tools they will use to silence and punish protesters.
* We are very concerned this bylaw will be racist in its application, limiting protests and rallies promoting Indigenous rights,

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.
It is far too broad and will limit the fundamental freedoms that citizens have to express their opinions, protect rights, and advocate for positive change.
There is certainly a concern for the safety and freedom of people who just want to do their job, to go to school, or to access their place of worship. But I feel this bylaw is so broad and poorly defined that it will discourage individuals from engaging in issues that affect their community, and will be minimally effective in stopping individual who's intent is to harass, intimidate, or assault. The solution can't be to restrict all voices in certain locations. This seems like a very lazy solution – punish all so there's no need for an investigation into who is causing the real problems.
If this bylaw was in place a year ago, Lemay Forest would have been decimated by now, as the sacred fire was within the proposed 100m buffer from a school. It was only through the protests of individuals and not-for-profit organizations that the full ecological, cultural, and historic value of this property came to be known, which resulted in its protection by the provincial government.
Thank you for the opportunity to comment.

I am horrified and angered to learn that the City of Winnipeg would even entertain the idea of a by-law restricting the rights of its citizens to exercise their Charter rights to assemble, and peacefully protest. Peaceful protest is a fundamental aspect of democracy and must be protected at all costs. We are seeing the rise of facism across the globe, but particularly with our neighbours to the South where peaceful protesters are being kidnapped, beaten and killed in the streets simply for objecting to their government's policies. We can not allow even the hint of this kind of dictatorial control to infect our governments.

“Nuisance Protest” is unspecific meaning any and all actions could be subject

This infringes on our right to protests.

Through protests the people are given a voice which has initiated massive change throughout history.

Police will have new tools in which to punish those who protest in peace.

Will affect those in marginalized communities who are otherwise left unheard

Comments
Dear Executive Policy Committee,

I'm writing to share my deep concern about the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law. I'm shocked and alarmed that this by-law is being considered, as it would limit our Charter-protected rights to freedom of expression and peaceful assembly. For this reason, I strongly oppose it.

Public demonstrations have always been a powerful way for people in this city to push for positive change. From vigils and rallies to round dances, Winnipeggers have used peaceful protest to fight for workers' rights, tenant protections, Indigenous, racialized, and 2SLGBTQIA+ communities, and environmental justice. These freedoms have helped shape the community and country we live in today.

If this by-law is passed, I'm concerned it will infringe on constitutional rights, silence marginalized voices, and lead to increased police overreach. It won't prevent property damage, hate crimes, or violence — those actions are already illegal. Instead, it would mainly restrict peaceful protests. This kind of heavy-handed and undemocratic approach has no place in Winnipeg, especially as the city has been working toward becoming a UCLG "Human Rights City" since 2018.

The Canadian Civil Liberties Association has also warned that broad laws like this can

unfairly limit free speech and peaceful protest, and often end up hurting marginalized communities who rely on these tools to advocate for change.

This is about protecting freedom of expression and association — basic rights that are essential to a healthy democracy. At a time when we are seeing worrying attacks on these freedoms elsewhere, including in the U.S., it's more important than ever that you uphold the Charter and protect our democratic values.

I strongly urge you to stop moving forward with this proposed by-law.

Sincerely,
A Winnipegger

I am in strong opposition to the proposed bylaw. There are very few reasons for peaceful protests to be outlawed, regardless of the location designations as conditionals, when these determinations are unilaterally decided and dictated by governing bodies. This inherently violates the right to open discussion, for public assembly, and the right for the public to freely voice opposition and diverse viewpoints, particularly around serious issues. This creates a precedent that leads down a slippery slope of enabling the governing bodies to stifle opposing voices that are enacting one of the only available means of publicly opposing unfair or unfavourable changes. While there may be legitimate concerns around safety and the hazards that potentially arise, particularly around sensitive and critical areas, such as hospitals. The current draft, however, is too generalized and wide-reaching, without nuance to allow flexibility and allows too much control by governing bodies to make decisions around when/where protests are allowable.

Comments
To the Executive Policy Committee,

I whole heartedly oppose this proposed By-law to prohibit "nuisance" demonstrations as a violation of our Charter-protected rights to freedom of expression and peaceful assembly. This By-law would limit the fundamental freedoms that our community needs to express our needs and rights.

If this is passed - I am concerned that it not only infringes on our constitutional rights but also silences the voices our city needs to hear the most. As well - this provides even more power to police to declare any 'protest' they do not like to be a nuisance. We already have laws on the books to prohibit property damage, hate crimes, and violence.

As a city that prides itself on the Winnipeg General Strike of 1919 we shouldn't be acting to restrict the peoples voices from being heard.

I am originally from the United States and I have watched as that country has systematically stripped the constitutional rights from its citizens - and now Winnipeg is looking to go down the exact same path. Please do not follow in the footsteps of our southern neighbours! This by-law would make it an offense to protest in nearly every square inch of our great city - confining the voices of our people to miniscule "free speech zones". Should the image our city presents to the world be one of armed police arresting unarmed citizens for expressing their charter rights?

I beg of you to please drop further consideration of this bylaw.

Thank you,
Chris Taylor

I am opposed to this proposal as it limits freedom of expression.

The nuisance or inconvenience caused by a protest is not an adequate harm to justify restricted Charter protected rights and freedoms. This is an inappropriate use of government power, and i do not believe that the claim of "protecting vulnerable infrastructure" is justified. This proposal is too broad and heavy handed. With the rise of an authoritarian regime to our south, it is very important that we are very, very careful not to begin down a path of restricting and limiting people's rights.

If the councilor who proposed this is too weak to handle public criticism, perhaps he should seek a new, more isolated job rather than try to tell other people what they can and cannot say and where they can and cannot say it.

I would like to write in opposition of the proposed, so-called Safe Access to Vulnerable Infrastructure By-law. Compared with our southern neighbours' free speech landscape, I've always been pleased with the balance that the legal interpretation of Canada's Charter right to free expression strikes. I am concerned that the EPC feels the need to impose Winnipeg-specific restrictions to this right. Vaguely-written by-laws intended to curtail our right to expression under the guise of protecting infrastructure seems like obvious pandering to interest groups and those whose primary civic concern is traffic flow. I also find the timing of this proposal troubling considering the events that have been unfolding in our sister city of Minneapolis over the past couple of months. A by-law like this in the Twin Cities could easily have been used as a tool to prevent criticism and opposition to Trump's ICE clampdown, including protest action at or near "vulnerable infrastructure". I don't think that Winnipeg will be faced with such a dire situation in my lifetime, but chipping away at our ability to express opposition to injustice with by-laws and fines is an incredibly bad look, especially considering how brave and resilient our international neighbours have been over the past weeks and months. I proudly stand in objection to agenda item 7 and ask that you vote to kill this proposal in EPC.

Thanks for your time.

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Christie Paul

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

Comments
Dear Executive Policy Committee,

I am strongly opposed to the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law seeing that it infringes upon our charter rights to freedom of expression and peaceful assembly.

These freedoms have allowed for Winnipeggers to rally for social policy changes that bettered the lives of marginalized populations and the general working class. These movements have allowed people to strengthen bonds as a community that they can feel safe and proud of. However, we live in times that still require change to continue living safer and healthier lives through policy changes towards sustainability and social justice.

We are witnessing the impacts of suppressing these rights in the US, with at least 2 protesters being shot and killed. In Winnipeg, we already have populations that face substantially higher rates of police violence in our city and a history of racial profiling. This by-law can be too easily manipulated to allow for more police overreach and threaten the safety of all Winnipeggers. Winnipeg has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018, but this by-law will only harm our progress because it will not reduce crime but instead make up a new one.

The Canadian Civil Liberties Association (CCLA) has also expressed concerns that this by-

law will restrict charter-protrcted rights and harm marginalized groups advocating for social change.

As a concerned citizen I urge you to uphold your legal obligation to protect the Charter rights of all Winnipeggers, and our freedom of expression and association by dropping further consideration of the proposed demonstrations bylaw.

Signed,

Christina Tran

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Clara Fretz Corlis

Very opposed to this, protesting is a fundamental right and policing it in such a way goes against the entire structure of why people protest.

I am deeply concerned about the proposed Winnipeg bylaw creating buffer zones that would restrict protests near schools, hospitals, places of worship, and other designated community spaces. While protecting people from harassment and ensuring safe access to services is important, I strongly oppose this measure because it risks unnecessarily limiting fundamental democratic freedoms in Canada. I am frankly troubled that such broad restrictions on peaceful protest are even being proposed, given how central free expression is to our democracy.

Peaceful protest and freedom of expression are protected under the Canadian Charter of Rights and Freedoms. Creating wide exclusion zones could make it significantly harder for citizens to express dissent where it is most relevant — near the institutions, decisions, or policies they are seeking to influence. Restrictions like this risk setting a precedent that gradually normalizes limiting democratic participation.

There is also a concern that vague definitions of “nuisance” or “intimidation” protests could be applied unevenly or discourage legitimate, peaceful demonstrations. Canada already has laws addressing harassment, threats, violence, and obstruction; enforcing those existing laws is a more appropriate approach than broadly restricting where people can protest.

Democracy requires space for disagreement, even when that disagreement is

uncomfortable. While safety and accessibility must be protected, we should be extremely cautious about policies that curtail Charter-protected freedoms. For these reasons, I strongly oppose this proposed bylaw and urge decision-makers to carefully safeguard Canadians' longstanding right to peaceful protest.

I am writing to convey my deep concern regarding the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. The proposal, as presented, would place limits on our Charter-protected rights to freedom of expression and peaceful assembly. For that reason, I must voice my opposition to this bylaw.

Public gatherings—whether vigils, rallies, round dances, or other demonstrations—have long been vital tools for Winnipeggers advocating for meaningful social and policy change. These forms of expression have helped secure advances for workers and tenants, Indigenous peoples, racialized and 2SLGBTQIA+ communities, and environmental protections. Restricting these freedoms would undermine the very mechanisms that have strengthened our community and our country.

I am troubled that, if enacted, this bylaw could infringe upon constitutional rights, silence marginalized voices, invite excessive policing, and provide no meaningful improvement in addressing hate or violence. Acts such as property damage, hate crimes, and violence are already illegal under existing laws. Rather than addressing those issues, the proposed "Safe Access" bylaw appears poised to significantly curtail peaceful protest. Such sweeping and heavy-handed limitations on freedom of expression are inconsistent with democratic principles and do not align with Winnipeg's commitment to becoming a "Human Rights City" through its engagement with United Cities and Local Governments since 2018.

The Canadian Civil Liberties Association has also cautioned that broadly framed restrictions like these can unduly limit Charter-protected expression and assembly, and often have a disproportionate impact on marginalized communities who depend on public protest to advocate for change.

At its core, this matter concerns the protection of freedom of expression and association—foundational pillars of any healthy democracy. In light of troubling examples of democratic backsliding elsewhere, including in United States, it is more important than ever to uphold our legal obligations under the Charter and safeguard our democratic institutions.

I implore you to drop further consideration of the proposed demonstrations by-law.

Dear Executive Policy Committee,

I am writing to you today to express my alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition of the proposed bylaw.

It should be no new information to anyone in City Council of our City's strong and integral history for advocacy such as the 1919 Winnipeg General Strike. We should pride ourselves for our admirable history of labour activism and the changes brought about of which every citizen benefits from today. This is only one of many, profound and pivotal instances in which the citizen's voice could not have been more crucial. Peaceful protests are essential to uphold our right to expression, a voice, and a democracy as a city.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers, tenants, Indigenous, radicalized, and 2SLGBTQIA+ community members, as well as protection from the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized community voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place - acts that are already criminal. Instead, peaceful protests would be severly limtied. This type of draconian and undemoncratic curtailing of the freedom of expression

has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Govenrments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protests to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. This proposal needs to be withdrawn, on the basis that "nuisance protest" is a subjective term that cannot be applied equitably. Thus being used to suppress the rightful expression and association of peaceful protesters. This right is deeply rooted in the culture of Winnipeg, from the 1919 General strike to Louis Riel.

This law sets a dangerous precedent, that should not be given any further consideration.

To City Hall,

Given we have the Human Rights Museum within walking distance of City Hall where protest is celebrated it is astounding to me that city hall has made it a goal to effectivly ban protest throughout Winnipeg.

Relegating democratic participation to a vote every four years is not democracy.

I loose faith in the institutions we structure society around more and more everyday.

This is a facist authoritarian move and I will dedicate every possible moment to not only making sure this fails but that anyone who has had their fingers in this fail to maintain any position in our public structures.

The plan to ban protest is one of the highest betrayals of "public service". This plan must be rescined and scraped in its entirity. There is no need to ammend such a disgusting piece of legislation.

History will not be kind to you for even suggesting this.

The doors of litigation that this opens for tax payers will be profoudly costly if this goes forward. You have already lost, please do not put Winnipegers in a position where pointless legal costs will shame your names for generations.

You have declared war and you will loose if you dont abandon this in its entirity,
NO AMENDMENTS,

Cody Gabrielson

This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Cole Eichel

The proposal is overly broad and terms such as 'nuisance demonstration' are subjective; this is no doubt purposeful in order to allow government/police to limit peaceful opposition to upcoming policy/legislation decisions. This decision falls in line with dictatorial practices intended to minimize visual dissent/opposition to policy decisions that actively put the public in harms way. The intention behind this is not to protect the public, but rather protect special interest groups from having to be accountable for decisions they make and to protect them from having to deal with / interact the public that is harmed by those decisions.

This policy is vague and grants too much discretion to authorities to decide which causes are allowed to be heard.

This policy is unnecessary, as laws currently exist that address intimidation, violence, and harassment; police forces already have the tools to manage what this policy allegedly addresses.

This policy is vague to the point of being sinister; our executive policy committee should want to engage with public discourse rather than being fearful of the public that they serve. This is a trend that is in-line with geopolitical shifts that are obviously intended to limit the rights and freedoms of the general public in favour of special interest groups. For the council to deny this is disingenuous.

If the council is legitimately interested in protecting the public with policy then this is not the way to move forward.

Dear Executive Policy Committee,

This city has a clear history of abuse of power at the local level. Look at our previous Mayor in court right now. This law is far too vague to even consider passing this. You all need to start doing better for this city. You are an embarrassment to even let this get this far.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely

limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Colin E.

The definitions of Vulnerable Infrastructure and Nuisance Protest are far to vague to be comfortable supporting this by-law.
The stated infrastructure is incredibly vague as to what buildings would actually be affected. In the case of Public and Private Educational Institutions would it be illegal to protest at the universities? Would City hall suddenly be a community centre? What of The Legislative Building?
The definition of nuisance protest as written includes everything RELATED to the listed groups, this would define any protests against injustice to these groups as "nuisance protests"; this is contrary to the by-law's goal of creating safer, more welcoming places.
There exists provincial legislation protecting vulnerable infrastructure, what reason is there to introduce a by-law on the same issue but to obfuscate and expand what an illegal protest is?

I am writing to oppose this by-law. While I can see the heart behind the proposal, I believe it is more destructive than good. I disagree with almost every protest I see in Winnipeg, however, I support the people's right to gather and the right to free speech. While this by-law would protect vulnerable infrastructure, it is too restrictive. Either a narrower scope of infrastructure or smaller zone around the infrastructure would make me support this bill.

Banning protests on or around university campuses is really anti-democratic. University campuses should be a place of political discourse, and this includes protests. This includes both internal protests, e.g., if the university admin people are doing something wrong, or protests about things more external, e.g., the university admin people investing in weapons and thus profiting off killing people abroad.

This is my first time submitting my opinion to the City. I don't attend Protests. Protests by nature are meant to interrupt and put eyes on an important cause. Listen to them, really hear what they're asking. If you want to prevent protests listen and act accordingly. This is just going to make them more organized with more people attending. Listen!!!!!

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. This By-Law would restrict our Charter-protected democratic rights to freedom of expression and peaceful assembly. It is for this reason that I am deeply opposed to the proposed bylaw.

This by-law would limit the fundamental freedoms that myself and other Winnipeg citizens have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers, tenants, and Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, this broadly worded By-Law will infringe upon our protected Constitutional rights, and could easily be weaponized to further silence marginalized communities' voices by those with more power and privilege. It could also lead to police overreach, and result in deeply inadequate options for responding to hate at both the individual and community level. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts which are already defined as criminal and already have a legally defined process of action and accountability. The only additional prevention this by-law provides is the severe limitation of peaceful protests. This type of draconian and undemocratic curtailing of the freedom of expression sets an extremely dangerous precedent, and has no place in the City of Winnipeg. We are only 8 hours north of Minneapolis, USA. It has never been more clear that the elected governments of a democratic nation are mandated to actively protect the

Constitutional rights of ALL citizens at every level, and ensure the guardrails and safeguards of democracy are steadfastly maintained. As a citizen of Winnipeg, and on behalf of my children and the generations to come, I demand that you drop further consideration of this by-law.

Our city has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018, and we need to ensure the vision of what our city can aspire to be is followed through with continued consistent and meaningful action towards that goal.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Ms. Cory Storm

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Courtney Kolthof

The very idea that protests should be quelled instead of listened to is insulting to the citizens of Winnipeg. The right to protest, and organize, in order to show collective solidarity or collective disdain, should never be under threat by the government. If the problem is small enough, there will be no protest. If the problem is large enough to warrant a protest, then the problem is worth discussing in council and in news etc.

Who is to say which protests are justified and which are a nuisance? How can that possible be fairly judged, across time and across cultures?

Lastly, this will do nothing to heal the constant waning trust in our police. It will only increase community tensions.

While maintaining access to critical infrastructure is important, the scope of this bylaw is immense and allows broad limit of free speech within 100m of so many facilities throughout the city. At a minimum there should be an investigation/report into how this would specifically impact dense areas such as downtown, the exchange, and osborne, with a map that will identify all "designated facilities", including the 100m range around them. For example, I suspect the result would be extremely limiting to an ability to protest down major public roadways.

Of particular concern, and worthy of specific investigation of impact, are these definitions:

Nuisance demonstration: "any in-person protest or demonstration occurring in view of the public or in a location ordinarily used or frequented by members of the public that involves the expression by any means…of objection or disapproval towards an idea, action, person or group based on or related to any specified characteristics"

designated facilities and their respective definitions (e.g. “community centre” means a building or group of buildings used for recreational, social or multi-purpose activities by membership or members of the public, whether publicly or privately funded, including leisure centres, skating rinks, curling clubs, swimming pools and community halls)

Based on the above, I assume that the library facility near the courts would severely limit ability to protest near the legislature. The University of Winnipeg, and Canada Life Centre (private skating rink) means there can be no protests along Portage Avenue. This would be unacceptable. There are obviously many more examples throughout downtown, likely being extremely disadvantageous to a free society and an ability to protest.

This law effectively bans protest in much of the city, because we are comparatively well-off for the density of community centres and civic buildings, etc. Winnipeg has a proud history of disruptive protest, and has enjoyed the benefits of protests making "nuisances". A protest that can be driven by or walked by can be ignored, and without people being forced to engage with a demonstration's points we wouldn't have labour rights of any kind, parental leave, or a plethora of other benefits of living in Canadian society.

The proposed bylaw envisions a society where meekly asking for change is the only meaningful contribution a citizen can make. Given the chaos and state violence happening to our South, we should ask ourselves if that is the society we want to live in: one where the citizenry are almost apathetic and those who speak up against injustice are executed by their own democratically elected government.

This is not us. Vote against this.

The language of the proposal is entirely too broad and too restrictive of the right to protest. I'll take the occasional protest I don't agree with if it means that the right to protest things I support is maintained.

From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed, Dana Guimond

Dear Executive Policy Committee,

On behalf of Manitoba Animal Save, I write in strong opposition to the proposed “Safe Access to Vulnerable Infrastructure” by-law.
I would like to appear as a delegate but unfortunately I work during these hours so I am submitting my comments here.

Manitoba Animal Save is a grassroots, volunteer-led organization that engages in peaceful, nonviolent public vigils, demonstrations, and community outreach to raise awareness about animal suffering and to advocate for a more compassionate food system. Our actions are grounded in bearing witness, education, and the democratic right to peaceful assembly.
This proposed by-law raises serious concerns for civil liberties in Winnipeg.
The language around “nuisance demonstrations” is vague and overly broad. “Nuisance” is subjective and risks capturing lawful, peaceful protest that some may simply find inconvenient or uncomfortable. Democratic expression is often disruptive to the status quo — that is precisely why it is protected under the Canadian Charter of Rights and Freedoms.
Section 2 of the Charter guarantees freedom of expression and peaceful assembly. Municipal governments must ensure that any limits on these rights are narrowly tailored, demonstrably justified, and minimally impairing. A broadly framed prohibition around undefined “vulnerable infrastructure” risks chilling lawful advocacy across a wide range of issues — from animal protection to environmental justice to Indigenous rights.
As an organization that regularly holds peaceful vigils in public spaces, we are deeply concerned that this by-law could be used to restrict proximity-based protest in ways that effectively silence marginalized voices. Social change movements — including those that

challenged residential schools, secured labour protections, and advanced civil rights — relied on the ability to gather in visible, meaningful locations.
We fully support protections against harassment, intimidation, and violence. Those behaviours are already addressed in existing laws. Creating sweeping new protest restrictions is not the answer. The City must be careful not to conflate peaceful dissent with intimidation.

Winnipeg should be strengthening democratic engagement, not narrowing it. This is especially concerning in the current political climate.
We respectfully urge the Executive Policy Committee to reject this proposal. If Council believes further protections are necessary, they must be precise, evidence-based, and fully compliant with Charter standards. Chsnges should be developed through public consultation with civil liberties organizations and community stakeholders.
Peaceful protest is not a nuisance. It is a cornerstone of democracy and we oppose this proposal.
Thank you.

Sincerely,
Danae Tonge
Manitoba Animal Save

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I am not in support of this bylaw. The definition of nuisance is far too broad, and would allow the city to essentially shut down any protest they simply do not like or find inconvenient, including protests in support of missing and murdered indigenous women, LGBTQ2SI+ rights, or protests against gun violence, for example. Furthermore, this bylaw would restrict protest access from approximately 17% of the total area of the city of Winnipeg, which simply cannot be construed as anything other than a violation of Charter Rights, which enshrine the right of Canadians to protest on public property. The point of protests is that they are inconvenient- they force people to pay attention to issues and allow citizens to express themselves to their elected representatives. If elected representatives are allowed to avoid having to see protests as they go to work at City Hall or the Legislature simply because they are a “nuisance” then it follows that soon they will not have to listen to their constituents, because that would also be a nuisance. If you make it so citizens cannot protest on a university campus, which have been longstanding places of peaceful protest, you will be restricting the ability of citizens to exercise their ability to affect change in our city, country, and society.

Furthermore, a provincial law blocking protest access within 50 metres of surgical centres, clinics, and hospitals already exists, as do legislation and bylaws for protests that block access to these essential services - they simply need to be enforced. Additionally, laws that encompass unacceptable protester behaviour, such as harassing families, specific ethnicities, and religious groups, already exist - they simply need to be enforced. We already have the tools in our toolbox to combat the issues targeted by this bylaw. The addition of this bylaw to this metaphorical toolbox would be like trying to fix your glasses with a power drill - it’s simply not the right thing for the job, and will end up causing more harm than good.

I strongly appose banning protesting in the city! Having our voices silenced destroys trust within our governments. We all know non-violent action is how major movements have succeeded in the past and in order to continue evolving to what we the people need, we need to be able to voice it through protests.

I have deep concerns about the motives and impacts of this legislation. Our country already has hate laws that address hateful and violent speech, which makes them illegal regardless of the chosen location of protest. This law would only serve to limit Winnipeggers' right to peaceful free speech as provided by the Charter of Rights and Freedoms. This prohibition can be used to silence already marginalized communities. This bylaw will inevitably lead to the use of "community centres" and other "vulnerable infrastructure" as a shield to criticism. It does not matter whether you or I agree with the content of that expression. People have a right to feel safe, not necessarily a right to feel comfortable.

If your community centre, school, or place of worship hosts an event promoting hatred towards a marginalized community, perhaps the members who feel unsafe should be joining the protestors outside rather than lobbying the city to limit legal and peaceful expression.

Dear Committee, I am vehemently opposed to the proposed "Safe Access to Vulnerable Infrastructure" bylaw, both in premise and in wording.
In its premise, Evan Duncan has referenced events unfolding in the United States: "The chaos that is unfolding south of us right now is a clear indicator that it's coming our way and if we don't put these things in place to stop that, it's going to be your neighborhood next, it's going to be your place of worship next. And we don't want that to happen." As a US Citizen myself and someone who's only one degree of separation from Alex Pretti, a victim of fascist violence and government overreach, I urgently beg you to consider the alarming deduction of Councillor Duncan's reasoning: by drafting a By-Law that restricts protests and increases the enforcement capabilities of police in Winnipeg, it seems that his conclusion of what's happening in the US is that citizens are in the wrong for upholding their rights and protecting each other, and that they should submit to constitutional violations and kidnappings at the hands of masked, fascist thugs. He is placing the blame of violence and destruction upon the victims and not the perpetrators. We already have established parameters for assembly and protest. Why would we allow this kind of poisonous ideology to influence the way our wonderful city is governed? If any Canadian is wondering how the violence and division that's happening in the States could happen here, it's through this kind of legislating to erode our Rights and Freedoms.
In its wording, this proposed bylaw is reckless in its ambiguity. What can be considered a "nuisance" is astonishingly subjective and reaches far beyond protests. Under its umbrella, many of the kinds of gatherings and community initiatives that make Winnipeg a vibrant, connected city could be expunged, or at least subject to harassment. Even bystanders could be subject to fines, which alarmingly discourages engagement and dialogue between differing opinions, for risk of association. Living in community is often inconvenient, uncomfortable and sometimes disruptive, but that's necessary and normal in a society that is continuing to grow and connect with each other. This bylaw is too

dubious in its distinction between inconvenience and discomfort versus actual harm. While the current members of Winnipeg's government might not use this bylaw to the full extent of its harmful potential, it leaves the door wide open for future harm. I might not agree with Councillor Duncan's conclusion, but I do agree that we need to learn from the events down South.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

The by-law proposal as it stands is too broad and is likely unconstitutional. The term "nuisance protest" is non-specific and could be weaponized in an undemocratic way too easily. This by-law if enacted would represent a real threat to the freedoms and rights of Winnipeg residents to protest peacefully and does little to nothing to protect the public that isn't already available to WPS through current legislation.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Danika

I am opposed to the proposed by-law as it violates our right to peaceful protest, free speech, and human rights. The proposed by-law has the potential to be used for great harm against any cause its executors deem a “nuisance,” which is unspecific and subject to personal biases, be they racist, sexist, homophobic, transphobic, or otherwise bigoted.

Canadians have and should remain to exercise the right to peaceful protest which is included in the Canadian Charter of Rights and Freedoms. This by-law is infringing upon that right.
Canada/Winnipeg is currently a democracy and I would like to keep it that way. This by-law is one step closer to making our city a Totalitarian Regime and this is simply put, wrong.

I am writing with the deepest concerns regarding the proposed Safe Access to Vulnerable Infrastructure By-law. As we look south of our border, we see how fundamental democratic rights of freedom of speech and freedom of association can be eroded under the umbrella of "public safety". Without going into detail, there are currently laws existing to address safety concerns which can be applied, especially "intimidation". As for "nuisance", though annoying it is well within the scope of free expression. Much is said these days that I find a nuisance (see Alberta) at this critical time - but I recognize their right to express their opinions publicly in a venue that will be heard by decision makers and stakeholders.

Today, looking south (and a bit to the west) the importance of our Canadian Constitution and Charter of Rights and Freedoms could not be more clear. Despite what your lawyers have said, I doubt much of what is proposed will ultimately pass the Oakes Test (R. v. Oakes, [1986], see https://www.justice.gc.ca/eng/csj-sjc/rfc-dlc/ccrf-ccdl/check/art1.html), especially regarding '"Minimal Impairment": ... The government will be required to show that there are no less rights-impairing means of achieving the objective “in a real and substantial manner”'. Given existing laws, this will be difficult. It will also be hard to argue that a "nuisance" to the status quo is a "legislative goal pressing and substantial". Especially since what is a nuisance to some will be a vital concern to others. For example, consider accommodations for accessibility in public and work spaces. Will demonstrations highlighting inadequacies of current accommodation occurring at the offending public places be possible under this framework? I think not.

We critically need discourse and public expression beyond "controlled" environments where what is said and discussed can be limited, or worse directly regulated. There is no free democracy without free discourse.

Dear Executive Policy Committee,

I'm writing to you today to express my dismay at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. At this time in world history, when self-proclaimed democratic nations openly thwart the rule of law and basic human rights, this by-law seems eerily similar and utterly tone-deaf.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

To the Executive Policy Committee,

I write to you today in complete shock at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would shamefully limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
As a proud out-member of the 2SLGBTQIA+ community, I take this sort of legislation as an attack on myself as a queer person, and my community as a whole.

If passed, I am well aware (hello, USA!!!) that this by-law will not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.
Masking a discriminatory law as protection for infrastructure is the kind of racist classist rhetoric used by U.S. Republican "Leaders" that will eventually land them all in prison.

This type of undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local

Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

My name is David Driedger. I am an ordained minister with Mennonite Church Manitoba and Leading Minister of First Mennonite Church of Winnipeg. Under this proposed by-law the building my congregation worships in would restrict 'nuisance demonstrations'.
I have mixed feelings about this bill. For over a year I helped maintain a sacred fire on the Manitoba Legislative Grounds in honour of those children who never returned from Indian Residential Schools. This was led primarily by 2Spirit Indigenous youth. During that time the Freedom Convoy also set up camp in this area protesting the government's COVID restrictions. Ultimately the MB government considered us both a nuisance. Our camp was bulldozed without notice in the early morning citing 'health and safety' issues. I do not know how the Convoy camp was dispersed. I would argue these demonstrations were fundamentally different in their aim and purpose but they could easily be collapsed together as a 'nuisance' by the government's understanding.
This tendency to view all disruptive demonstrations the same is a problem under a framework that only understands or accepts 'individual rights' as the highest or greatest priority. This is a problem under the proposed by-law which expands broad discretionary powers for the police over major sections of downtown Winnipeg.

By its own definition some of my sermons would fit the definition of a nuisance of demonstration as I have, often enough, spoken in "objection or disapproval towards an idea, action, person or group based on or related to any specified characteristics."
Specified characteristics are then defined as a person's or group's,
(a) ancestry, including skin colour and perceived race;
(b) ethnic background or origin;
(c) gender, gender identity or gender expression;
(d) marital or family status;
(e) nationality or national origin;

(f) physical or mental disability, or related characteristics or circumstances;
(g) religion or creed, religious belief, religious association or religious activity;
(h) sex or sex-determined characteristics or circumstances, including pregnancy, the possibility of pregnancy or circumstances related to pregnancy;
(i) sexual orientation;
(j) social disadvantage; or
(k) source of income.
I have spoken against the injustices that come with the 'source of income' under capitalism. I have challenged male (gender) and white (perceived race) supremacy. I have challenged Canadian (nationality) identity. This has caused conflict in our church at times (perhaps at times it has even 'incited intolerance' towards Canada as a 'nationality' and capitalism as a 'source of income'). And sometimes I got it wrong. But the church is one site of ongoing contested demonstrations. This is the hard work of communities resisting the use of policing in the face of conflict.
I believe that not *all* individual rights should be upheld in the midst of structural wrongs. This bylaw denies this difference. Who is being served by this by-law? Whose 'rights' are being responded to?

My understanding (and commitment) is that government exists to create laws and institutions that are first accountable to those who suffer most in society. This comes prior to flattening everything to 'individual rights' which can too easily keep injustice in place. I therefore oppose this bylaw.

While I agree with the wording of this city hall action, and agree with the outcome suggested, I must remind you that our laws already prohibit this misbehavior. It is clear to everyone that the city has chosen to not enforce those laws.
Here is a question for those supporting this measure: how can we be assured that protests in violation of any new bylaw will also be ignored by city enforcement?

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed, David Mckie

I can understand why this type of law could be put in place considering the state of the current world and how much protest has been seen and documented under You-Know-Who's presidency, but a good amount of protests take place within or near educational centers like college campuses or places of worship like churches, and being completely real here, like 70% of Winnipeg could reasonably fall under this law so the amount of space for a demonstration would not be enough, especially if something really was wrong with our government.

Which, I haven't personally seen yet, but it's better to have the space needed than not have it at all.

To whom it may concern;

I am deeply concerned by the proposal to effectively limit protest in Winnipeg. There are Charter issues here; what is being proposed might very well be contravening Canadian law at its highest level. There's the obvious and unsettling parallels in protestor crackdowns that we're seeing in the United States against anti-ICE protestors, not to mention international cases like Russia. There's Winnipeg's proud history as a city that champions human rights—we are the city of Louis Riel, and we have a massive museum dedicated to human rights that is an important tourist attraction.

So I am not only alarmed, but baffled. Everything about this flies in the face of what it means to be a Winnipeger and a Canadian right now, aligning with American politics—which Winnipegers are staunchly against at a civic and legislative level—to a jaw-dropping degree.

This all connects to me on a really personal level. During the trucker protests, I lived very close to the Legislative building. I remember when they got a train horn, I remember being scared to leave my apartment, I remember the constant din and the feeling that my life was being overtaken. I understand intimately the annoying and sometimes damaging effects of "nuisance protests" but I absolutely reject the idea that the passing of this proposal would be a net good.

I don't know how many protests in the name of any number of human rights causes you've attended as a participant, but the ones I've been to in Winnipeg have been characterized by interactions and conversations with passionate, articulate people who want a better world for our kids, and who want to discuss important ideas in the public square. Places

like universities, or city hall, are essential sites of public discussion—limiting those discussions would be disastrous for this city's heartbeat and identity. It also won't work—people will continue to protest, pay the fines, then do it again. The passion of people in this city for a better world means they won't allow themselves to stay benched; this proposal has already been subject to media coverage and it will continue to be if it is passed, because it would be a massive blunder for this city council that will significantly harm public trust and will get rehashed every time it's enforced. We're an elbows-up town and that's a huge part of what makes Winnipeg a wonderful place to live.

I imagine you're getting a lot of mail about this one; that's because it matters what you do, because Winnipegers believe in the right to speak our ideas publicly, even when we disagree. I've never written in about a policy before, but because this one so broadly affects Winnipegers' ability to participate in the democratic process, which will in turn affect ALL policy-making going forwards in this city, not to mention our charter-protected rights to protest and speak about the urgent issues of our country and time, it felt crucial to write in.

There is a literal monument to the 1919 General Strike across the street from City Hall. I hope and trust that the Executive Policy Committee brought this forward with the best interests in mind, but that you will honour Winnipeg's history and present commitment to building a better world, however we can.

Sincerely,
Davis Plett

Protests are a necessary function of our democracy and this bill only serves to limit them. I believe that if passed, it will be leveraged unfairly against already marginalized groups to prevent them from organizing.

As an active citizen of this city, who believes that I have a right to peacefully and publicly express myself, I am deeply disappointed in Winnipeg's city council for considering this draconian and undemocratic by-law. Why, especially in these tumultuous times, would our city attack one of the most basic rights of Canadians? We should be celebrating and supporting the people who participate in our democracy by peacefully protesting. There are already laws in place to ensure that protesters are not infringing on others comfort and safety. Do we want to be seen as a city that cracks down on demonstrations and attempts to quash differences in expression and opinion? Or, should Winnipeg support a healthy and thriving public discourse?

Comments
I am writing to voice my opposition to the proposed "Safe Access to Vulnerable Infrastructure By-law." Specifically Section (3) of the proposed by-law that would prohibit so-called "nuisance demonstrations." I believe the provisions of the proposed by-law are fundamentally flawed.

The Canadian Charter of Rights and Freedoms guarantees in section (2) that freedom of "opinion and expression" and "freedom of peaceful assembly" are fundamental freedoms enjoyed by all Canadians. Any law or by-law that proposes to place limitations on those rights should only do so in exceptional cases, such as in the case of hate speech under section (318) of the Criminal Code of Canada (R.S.C., 1985, c. C-46). The definition of a "nuisance demonstration" as described in the proposed by-law limits actions against persons with "specified characteristics," as defined in the proposed by-law. Such actions are already illegal under section (318) of the Criminal Code. The proposed by-law adds no new protections beyond what is already limited under the Criminal Code of Canada (R.S.C., 1985, c. C-46).

However, the use of the term "nuisance demonstration" has the potential of being applied more broadly to any gathering to which some individual(s) object. It might easily be used to limit expression in opposition to actions of elected officials, official persons (such as inappropriate actions of law enforcement), or public gatherings seeking to advancing social justice. One need only look to the recent social upheaval in the United States where the U.S. federal administration has used incendiary labels to limit dissent and curtail fundamental freedoms. Canada is better than that. We must ensure that any proposed by-law is not open to similar abuse. I am deeply concerned that the provisions of this proposed by-law could be manipulated to suppress freedoms of expression and assembly that are guaranteed under section (2) of the Charter, while adding no new protections that

are not already addressed by laws already enacted.

As identified above, the key provisions of the proposed by-law (sections (3) and (4)) are already covered by other legislation. Specifically, the Criminal Code of Canada (R.S.C., 1985, c. C-46) makes hate speech or promoting hate, including antisemitism, a criminal offence under section (318). Threats of violence or acts of intimidation are already criminal offences under section (423) of the Criminal Code. Similarly, obstruction of traffic is also illegal under section (423) of the Criminal Code.

In summary, this proposed by-law provides nothing but an opportunity for Charter rights to be curtailed unnecessarily and inappropriately. For the reasons stated above, I strongly urge that this proposed by-law not be approved.

Dear Winnipeg City Council

I'm writing to you today with my deep concern, and to express my opposition to Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law --- which would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United

Cities and Local Governments (UCLG) “Human Rights City” since 2018.

This proposed by-law is counterproductive, regressive, and fundamentally at odds with human rights. Winnipeg cannot claim to uphold human rights, reconciliation, equity, or UNDRIP on one hand, and then silence the very people who have historically had to rely on public protest to be seen and heard on the other.

Winnipeg has not advanced human rights because power voluntarily listened. Progress has happened because of grassroots advocacy, because people showed up, because voices were raised in public spaces when formal systems failed them.

Indigenous peoples.
Families of MMIWG2S+.
Disability advocates.
Anti-racism organizers.
Community members demanding accountability.

These movements were not “nuisances.”
They were necessary.

This proposed by-law does not simply protect access to services. As drafted, it restricts peaceful protest and expression based on location alone, across large parts of the city, near the very institutions where decisions are made. That is not how democracy works. That is how dissent is managed and minimized.

It is also critical to name who this by-law actually protects.
The only clear exemption written into the law is for lawful labour disputes and collective bargaining. In other words, people who are already employed, unionized, and inside formal capitalist systems retain protected avenues to be heard.

Those who are unemployed, precariously employed, excluded, harmed, or ignored by institutions do not.

That creates a two-tier system of voice.
If you are inside the system, your dissent is legitimate.
If you are outside it, your visibility becomes a problem.
That is not equity. That is hierarchy.

And we must talk about who is given the power to enforce this silence.
This by-law places sweeping discretion in the hands of City enforcement staff and police, the very institutions many communities are protesting because they have not been listened to. It gives public officials the authority to shut down people exercising their rights, even when those people are responding to arbitrary, exclusionary, or discriminatory practices by the same systems now empowered to penalize them.

When your aim is to silence people whose only remaining tool is public protest, especially when institutional channels have already failed them, that's control. Human rights are not advanced quietly behind closed doors. They are advanced when people are visible, vocal, and impossible to ignore.

When you are not seen, you are not heard.
When you are not heard, your rights are not protected.

So who is this really protecting?

It is not marginalized communities.
It is not people shut out of decision-making.
It is not those seeking accountability.

It protects power, not people.

A city cannot say it supports human rights while criminalizing the methods that have historically been required to enforce them.

If Winnipeg is serious about equity, reconciliation, and its human rights obligations, it must choose accountability over comfort and democracy over silence.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Deborah Narine

The proposed Safe Access to Vulnerable Infrastructure by-law is government overreach that stifles the freedom of expression guaranteed by the Canadian Constitution.

“In light of the trouncing of rights in the U.S., with ICE protesters being detained killed, the timing of this proposed legislation is chilling. Does this bylaw set us on a potential path in this direction?

My objections include:

1. “Nuisance Protest” is a disarmingly vague term, open to broad interpretation and ripe for shutting down uncomfortable opposition.
2. Analysis by others using City of Winnipeg mapping data reveals that 17% of the city would be subject to restrictions, including City Hall and university campuses and other significant places where Winnipeggers have historically used their democratic voice in protest.
3. There is a $5,000 fine for violating this broadly worded bylaw, which would be an onerous burden on marginalized citizens who have felt pushed out of the mainstream political process and resort to public protest to be heard.

This bylaw is poised to allow the government to discount and silence marginalized and otherwise “inconvenient” voices in their favour. It is an undemocratic and gravely concerning step that I hope the City Council will vote against.

To the Executive Policy Committee

I stand in opposition to this proposed bylaw. This bylaw does nothing to protect vulnerable people and does everything to silence the marginalized folks in this city from expressing their discontent in peaceful ways.

The Right to Expression and Peaceful Assembly is a charter protected right. Canadian Civil Liberties Associations have warned that this is an authoritarian move, aimed at curtailing the voices of the people.

Fascism does not roll in with a train of emaciated folks. It comes in through bureaucracy and by laws, exactly like this. It comes in silently, pretending to help the people, pretending to the "vulnerable". But who does this bylaw actually protect?

Laws exist to protect property. Laws exist against hate crimes. Therefore, laws already exist to punish protestors who cause property damage or engage in hate crimes. So this law doesn't not "protect" vulnerable infrastructure.

What it protects is the people hiding behind these buildings to engage in unlawful activity, criminal proceedings, and unjust and unfair practices. Protests are not against buildings, they're often against ideas, ideologies, and actions.

This law seeks to protect such unlawful and unfair actions while penalizing those who stand in opposition to this slide into intolerance. This law seeks to illegal land sales in synagogues. This law seeks to protect discriminatory staff, unjust and unfair administrators at schools, colleges, universities, and hospitals. It seeks to protect corrupt

politicians who refuse to engage with their constituents. This law seeks to protect war criminals who have been using Winnipeg as a playground for their fascist propaganda. It seeks to protect law enforcement agents who overstepped their powers and terrorist their own communities.

This law gives powerful people even more power over the citizens. And seeks to silence those who opposed this power grab. Evan Duncan says this protects his people? Whoa are his people? His constituents are here, opposing this move. Are his people the group who benefits from silencing marginalized voices?

We should not be entertaining this bylaw. This bylaw gives discretionary powers to the local government and to the law enforcement agents to label any dissent they disagree with as unlawful. The fines are extortionately high- 500-5000 dollars for third offence. For what? Holding a sign near a govt building?

To the people supporting this bylaw:
You exist as part of society too. Protest is not an inconvenience, it is part and parcel of living with other people under systems that are not designed to be fair to all. What you are here supporting is your privilege, not your rights. You want your privilege protected at the cost of other people's rights. You should all be ashamed of yourself.

I firmly opposed this proposed bylaw. I urge the council to drop all consideration of this bylaw forever.

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
D. Rooney

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Delaney Chan

Dear executive policy committe, I'm writing to you to express my disgust towards this law you're thinking of installing. As Canadians we stand proud that we are a 1st world country with the basic human right of voting and protest. To all the women that are helping in this law I hope you give up your chair because you are unworthy of sitting in it if this is the way you're gonna thank the women that came before us, the only way you are able to be in the position you are in today is because of the protest for womens rights. Other countries respect us for doing good and standing for the right side. Installing this would be such a disgrace to the Canadian belief of honouring human rights, because you are punishing the people who fight for the rights of the LGBTQIA+, POC, the environment, the rights of women, the rights of people with disability, the rights of children, the rights of animals, the rights of our FELLOW MANITOBANS! I'm especially disgusted that this is happening in Manitoba, the province with their only tourist attraction being the HUMAN RIGHTS MUSEUM! It is sooo ironic. You guys are acting like the government of Alberta and Quebec right now and it's really shameful and disappointing. Shame on you. Do Better.

As an elderly citizen of this City, I wish to express my opposition to City's proposed By-Law to create a 100 metre buffer zone prohibiting demonstrations around schools, hospitals, community centres and places of worship. The right to protest is a fundamental tenent of democracy that is protected through sections 2b and 2c of the Canadian Charter of Rights and Freedoms. While I appreciate the need to ensure safety and access to public services, the proposed bylaw greatly overreaches. I have learned from various sources that if enacted the proposed by-law
- Could prohibit demonstrations on nearly 17 per cent of all of Winnipeg's lands
- Could prohibit demonstrations on all of our university campuses
- Could prohibit demonstrations along most of Portage Avenue and much of Main Street
- Incredibly, could prohibit demonstrations in the courtyard of city hall, on a portion of the legislative grounds and even the in front of the Premier's constituency office
- and might even restrict group bike rides undertaken by Bike Winnipeg and other organizations.
What if this by-law had been in place in Minneapolis, how much harder would it have made it for the citizens of Minneapolis to express their indignation and disgust about ICE's actions, among other things, through legitimate protests and marches in high profile locations.
I encourage Executive Policy Committee to completely revisit this matter and come up with a solution to the problem you are trying to address that does not violate our Charter Rights and is not as physically expansive.

I'm opposed to the proposed bylaw, for all of the reasons that have been expressed more eloquently by others. These include limiting freedoms of expression that push for social change, vigils, and response to hate.

Other concerns I have are the possibility of police overreach, and the effects of creating a 100-metre protest-free zone around "vulnerable" infrastructure. Specifically, pushing protesters back 50 metres from the extant 50-metre zone could well result in protesters taking up station in the vicinity of other such infrastructure. A protest near a given medical facility might result in protesters forming up in front of a school, or place of worship.

Any such issues such as ensuring unencumbered public access to such infrastructure are already addressed in existing laws and by-laws.

Increasing fines may only serve to further impoverish those who have to money to pay escalating fines, but feel a need to raise their voices against injustice. Needing to be heard shouldn't require paying fines.

I urge you all to consider our rights for freedom of expression. At the very least, agree to take more time to consider all the potential deleterious ramifications of passing this by-law.

Thank You.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

I am opposed of the recommendations in reference to our Canadian rights of Section 2(b) and (c) of the Canadian Charter of Rights.

Section 2(b) of the Canadian Charter of Rights and Freedoms guarantees freedom of thought, belief, opinion, and expression, including freedom of the press and other media of communication. It protects any activity that conveys or attempts to convey meaning, such as speaking, writing, art, and protest, provided it does not involve violence. Section 2(b) ensures individuals can express themselves without fear of government censorship. Most importantly, as courts have determined that the right to protest government action lies at the very core of this freedom. While section 2(c) specifically protects "freedom of peaceful assembly," Canadian courts often treat protest as an aspect of freedom of expression under 2(b) because the purpose of assembly is usually to communicate a message.

I find it extremely disheartening that the government wants to go agaisnt fundamental freedoms that represent core principles in our Canadian Constitution.

This is a direct human rights violation of the right to peaceful protest. Absolutely unacceptable. Mandating small bubbles to be able to access buildings such as hospitals is a different matter, but that legislation already exists. 100m is much too over reaching, especially when it involves universities, city hall, and most of downtown. Do not pass this.

To the Members of the Executive Policy Committee,

I write not only as a resident of Winnipeg, but as an Indigenous woman whose ceremonies have been publicly misunderstood and formally mislabeled.

At Lemay Forest in St. Norbert, I carried ceremony. We prayed. We fasted. We gathered in accordance with Indigenous law and responsibility to land. That sacred work was at times described and treated as protest.

It was not protest.
It was ceremony.

Yet the language used to describe our presence shaped how institutions responded.

I have since received federal acknowledgment recognizing my role in ceremony and land-based gathering connected to Lemay Forest. That recognition affirmed what we already knew — that this work was cultural, spiritual, and lawful within Indigenous tradition.

This is why I oppose the proposed Safe Access to Vulnerable Infrastructure By-law.

Section 2 of the Canadian Charter of Rights and Freedoms protects freedom of peaceful

assembly and expression.
Section 35 of the Constitution Act, 1982 affirms existing Aboriginal and treaty rights.

The United Nations Declaration on the Rights of Indigenous Peoples affirms our right to practice ceremony and maintain our spiritual traditions in community. The Truth and Reconciliation Commission of Canada Calls to Action calls on governments at all levels to adopt UNDRIP as the framework for reconciliation.

If a municipal by-law creates buffer zones and enforcement discretion without explicitly distinguishing intimidation from Indigenous ceremony, then history tells us who will bear the consequences.

Who decides whether a drum is disruptive?
Who interprets prayer as pressure?
Who labels Indigenous presence as protest?

At Lemay Forest, ceremony was targeted through language before it was ever evaluated through understanding.

Public space is often the only space where Indigenous peoples can fulfill responsibility to land, ancestors, and future generations. Discomfort is not intimidation. Ceremony is not obstruction.

If Winnipeg is committed to reconciliation, then any law restricting proximity to institutions must:

- Explicitly protect Indigenous ceremony and cultural gathering
- Include safeguards against disproportionate enforcement
- Demonstrate meaningful consultation consistent with UNDRIP Article 19
- Ensure that definitions of intimidation are narrow, objective, and evidence-based

Reconciliation is not symbolic. It is structural.

When ceremony is mislabeled as protest, democracy is weakened.
When cultural presence is treated as threat, trust erodes.

I urge this Committee to pause this by-law until protections for Indigenous spiritual practice are clearly written and consultation has occurred.

I will not allow ceremony to be mistaken for disorder again.

Respectfully,
Diane Bousquet
Shining Flowering Thunderbird Woman

Dear Executive Policy Committee,
I am very concerned that Council is considering a by-law that could infringe on my Charter rights -- especially in light of the Courts determination that the Federal government had exceeded it's authority in applying the Emergency Act for the infamous trucker convoy blockade in Ottawa!
Please, you were elected to thoughtfully find solutions for the many challenges our Winnipeg faces - and to be clear, this by-law is not one of them!!!
So, I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Diane Sabourin

The proposed by-law would restrict our charter of rights protecting freedom of expression and lawful assembly. Winnipeg citizens should continue to be free to advocate for social policy changes, as we have in the past. Rallies and Public demonstrations have helped to win rights for workers, tenants, protect the environment, as well as many other social justice changes. Peaceful protests are a cornerstone for democracy, and attempts to limit this kind of freedom of expression mimics what we have been witnessing by the governing party in the United States.
It is incumbent on the executive policy committee to reject any further consideration of the proposed demonstration by-law, uphold the Charter and protect our democracy.

Dear Executive Policy Committee,

I am taken aback by the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. I am concerned that a by-law such as this is not only too vague but also labels as "nuisance" those who have significant concerns to raise with elected officials and government associated organizations. People who gather in this way do not do so lightly and are acting within our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

Peaceful gathering and protest by the public have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the United States, I urge you to remember your legal obligations to uphold the Charter, protect our democracy, and listen to the voices of those who choose to raise their concerns publicly in peaceful protest, wherever it makes the most sense. These are often folks who are vulnerable (along with their allies) and need to be heard.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Dori Zerbe Cornelsen

This is a despicable attack upon democracy, freedom of speech and assembly, and our basic civil liberties. Living in a democracy our ability to communicate and share ideas and opinions is paramount. By limiting people's ability to affect social change you are limiting societies opportunities for growth and change especially regarding marginalized communities. This may frame itself as a move for law and order, but so is every action taken in the name of fascism, so we must be cautious in how power is applied.

I do not support making it illegal to hold peaceful protests near so-called “vulnerable city infrastructure.”

As a Winnipeg citizen and physician who works within essential public systems, I understand the importance of safety, continuity of services, and protecting critical infrastructure. Hospitals, water systems, transit hubs, and civic buildings must remain accessible and secure. However, broadly prohibiting protests in proximity to these sites risks undermining fundamental democratic freedoms protected under the Canadian Charter of Rights and Freedoms, including freedom of expression and peaceful assembly.

Public spaces near government and civic infrastructure are often precisely where citizens seek to be heard. Creating wide or vaguely defined “no-protest zones” could have a chilling effect on lawful, peaceful civic engagement. The term “vulnerable infrastructure” is also potentially overbroad and open to interpretation, which may lead to inconsistent enforcement and unnecessary escalation between demonstrators and authorities.

Importantly, Winnipeg already has laws and bylaws that address obstruction, trespassing, mischief, harassment, and threats to public safety. These tools allow authorities to intervene when conduct crosses the line into illegality without restricting peaceful, non-violent expression. Rather than imposing blanket prohibitions, the City should focus on proportionate, narrowly tailored measures that ensure access to critical services while respecting civil liberties.

A resilient city is not one that limits dissent, but one that manages it safely and lawfully. Protecting infrastructure and protecting democratic rights are not mutually exclusive goals. I encourage Council to prioritize clear enforcement of existing laws and dialogue-

based approaches over new restrictions that may unintentionally erode public trust and constitutional freedoms.

The right to peaceful protest is included in the Canadian Charter of Rights and Freedoms. This by-law is infringing upon that right. Canada/Winnipeg is currently a democracy and I would like to keep it that way. This by-law is one step closer to making our city a Totalitarian Regime and this is simply wrong.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
D. Kirkpatrick

This is a blatant attack on Winnipeggers' right to peaceful protest. The ability to impose fines on protesters defined as a "nuisance" by the WPS is unacceptable

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,

I'm writing to you today to express my deep concern and outrage about the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

Peaceful assembly and protest is how we make sure that our voices are heard. It is how we support one another, grieve and heal together, build community, and remember our interconnectedness as a city. In a time where we are bombarded by constant grief and horrors on the news and on our phones, coming together to organize is key in not crumbling into isolation and overwhelm. This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

How can we hold our countries only Human Rights Museum, a museum that celebrates movements of social change, while criminalizing our city's right to organize? The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm under-served groups who rely on protest to advocate for social change. This is one of the most accessible ways for underserved groups to make their voices heard. If you care about upholding justice and politics that reflects the needs of our city's people, why would you take away our main way to communicate our needs and issues that need attention?

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

If you benefit from the eight hour work day or enjoy weekends, you can thank a protest. Some may see these demonstrations as a nuisance, but I can guarantee that dealing with traffic comes no where close to the 'nuisance' our under-served communities are experiencing. We stand together even in our brutal winters not because we 'want to', it's because we have to. I implore you to drop further consideration of the proposed demonstrations bylaw.

If you suppress peaceful protest, the alternative becomes the only option remaining. Winnipeg will not stay silent if this by-law is passed. Save yourself the trouble, use common sense, and do not pass this.

I am not necessarily opposed to preventing protests blocking access to healthcare. But protest bubbles around all hospitals, schools, and cultural places severely limits people's ability to protest. A protest being within 100 meters of these places is no threat to public safety.

I'm deeply concerned at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law which would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently rely on for community support, engagement and advocacy. Peaceful protests, vigils, rallies, round dances, public demonstrations, etc have contributed to the advocacy for and protection of workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, women's bodily autonomy, protections for the environment and more.

If passed, I am concerned that this by-law would infringe our constitutional rights and limit the voices and advocacy for marginalized communities. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember Canada's commitment to being a diverse and democratic nation.

I am writing to oppose the proposed “Safe Access to Vulnerable Infrastructure By-law.” The vague terms like “nuisance” and “intimidating” give excessive discretion to police and bylaw officers to shut down peaceful protests, despite existing laws already addressing violence and hate. This risks violating Charter-protected rights to freedom of expression and peaceful assembly.
The bylaw’s broad exclusion zones and harsh fines of up to $5,000 will discourage ordinary residents from participating in lawful civic action and may be applied selectively against marginalized communities. I urge Council to reject this regressive bylaw and protect democratic rights in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Elan Beveridge

Everyone has a right to be heard, this is way overkill. It is not necessary to ban so many places from protesting - this bill doesn't function to protect people, it functions to silence them. We need to hear from the public what they want / need, or else we are headed towards a dictatorship. I don't agree with all Canadians all the time, but I would rather hear their opposition than have them be silenced. The right to protest is a right to be heard, a council that can't listen to the city is doomed.

The proposal is worded vaguely as all protests could be seen as a nuisance. This seems like a classicist attack on our more vulnerable citizens who have every right to protest.

Dear Executive Policy Committee,

I am very concerned about the Safe Access to Vulnerable Infrastructure By-Law. Peaceful, non-violent protest is an essential pilar of democracy.

I am a gay and married. The first pride event would be illegal under these rules. Protests are essential for social change. If the first pride event had not happened in Winnipeg, my queer experience would be much, much worse. Limiting peoples' right to protest makes marginalized peoples' lives worse.

From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Peaceful protesting is not a problem. There are tons of things to work on in Winnipeg. It's about time you idiots in power work on the areas that harm people. Protests aren't one of them. Use your brain.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) (https://www.google.com/url?q=https://ccla.org/&sa=D&source=editors&ust=1770834757895536&usg=AOvVaw3-ZneEyksJCqXVn2KhsWQX) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Ella Flett-McMahon

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

I am opposed to this by-law because it would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. Throughout Canadian history, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate.

This bylaw is claiming to be in support of vulnerable groups but fails the legitimacy test at face value because Canada already has legislation forbidding hate crimes and incitement. If city council is actually interested in targeting those who incite hatred and violence against marginalized groups then they should join those groups in demanding the enforcement of these laws against bigoted actors. This is something city council has never done nor has expressed any interest in doing; I invite them to reconsider this timid and disinterested stance that currently allows bigots to spread hatred in media, social media and in public without consequence.

what this bylaw will actually do is restrict our essential right to freedom of assembly and expression, and give police sweeping powers to arrest and fine people simply for engaging in acts of civic activism. This is anti-democratic and morally execrable, and needs to be called out for what it is: a shameful example of the global slide towards fascism taking place in our city which we will never accept or tolerate. I condemn those responsible and call for them to resign from office immediately because they are obviously a danger to our democratic rights and should vacate their seats to make way for citizens who are more ethically-equipped to be leaders in a participatory system of equals rather the elitist police state they are trying to force on us with this policy.

Peaceful protests should be a right, and if we take this away using vague language that can apply to any protest, we are putting ourselves in danger of not only taking away peoples' voices but putting people in physical danger as well. People will continue to protest, whether they are fined for it or quelled by the police or not. When there is a consequence to this act, one of our only tools to use our voices, it gives rise to more violent protests instead which will be dangerous for those protesting and those policing the protesting alike. It does not solve problems, it creates more. I would rather have a noisy protest marching through the streets than a violent riot and/or resulting police violence any day.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

This bylaw should be very narrow in scope to prevent, for example, protests from blocking access to health care (abortion clinics, hospitals). Instead it is creating huge swaths of our city where protests and other civic gatherings are banned. This is anti democratic and authoritarian.

I believe that the right to protest peacefully is a core principle of democracy. The proposed restrictions would excessively impede on that right, making it very difficult to meaningful express or support an opinion through means of peaceful protest.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

I am a criminal defence lawyer, a transgender woman, and a politically active Winnipegger.

As a criminal defence lawyer, the by-law in question is alarming and likely unconstitutional under s. 2 of the Canadian Charter of Rights and Freedoms, and is likely not saved by s. 1. The right to protest is essential to maintaining freedom in a democratic society and the law as proposed is extremely broad and not minimally impairing.

As a transgender woman and politically active Manitoban, I am extremely concerned that this law would likely prohibit my ability to contest threats to human rights in my community. If there's an anti-transgender speaker at a church or at a university, I would not be able to voice my opposition to that effectively, causing a chilling effect to my rights in Canada broadly. If there's a speaker at a community centre supporting the deterioration of human rights abroad, be it in Gaza, Sudan, Myanmar, or elsewhere, then I would not be able to effectively voice my dissent.

I would also express my concurrence to these concerns expressed elsewhere:

"The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise.Prohibiting 'nuisance demonstrations' within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers

hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting."

In short, I believe this proposal should be wholly rejected. If the policy objectives of this proposed by-law are to be achieved, then it must be approached in a different way that is within the bounds of constitutional law and broader notions of international human rights.

If the City of Winnipeg embarks upon a path against those things, then I know myself and many in my profession will do everything in our power to inhibit it. I do not include this to be dramatic. Our world currently is going through a dramatic decline regarding democratic norms and human rights. It is important that the City of Winnipeg move against that trend, not with it.

Thank you for your consideration,

Emily Peterson

Dear Executive Policy Committee,

I'm writing to you today to express my concern due to the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. Additionally, this By-Law would restrict University professionals and students from holding gatherings on campus as well as advocating for positive change. As we saw in the last proposed strike and the University of Manitoba, students and staff rallied to have a peaceful demonstration that lead to better working conditions for staff thus leading to better educational outcomes for students. With this By-Law in place, that would not have been achieved.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm groups who rely on protest to advocate for social change such as marginalized groups, students, workers, and communities in need of help.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Thank you

To whom it may concern,

This Agenda seeks to curtail the Charter rights of Canadians to free expression, assembly, and protest under the guise of civil safety. Winnipeggers are not falling for it. Let's be honest: this is about shielding businesses and bystanders from discomfort. This Agenda, if passed, would effectively prohibit any protests in Winnipeg's downtown area and slap fines on protestors for constitutionally protected activities that would be otherwise free of cost. This is a power move at the expense of ordinary citizens. God forbid citizens have to deal with pesky social issues, like people protesting a genocide or the further centralization of power under Carney's Liberal government. Maybe it would be easier for us all to roll over and die while we witness the genocide in Palestine or the criminal wealth transfer from the lower and middle classes to the 1%, but that doesn't sound as good for an Agenda, so this is what our cowardly councillors will settle for.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Emily

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. Protesting is apart of Winnipegs history, from the Winnipeh general strike and to enact this by-law would be harming the historical rights we built this city on. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. As a member of these communities I know the detrimental impacts this legislation would have on the people's.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. I believe everyone has a right to an opinion and these peaceful protests are the safest way for people to express concern about issues. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg,

which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

I believe this proposed by-law is too broad and has limiting implications that could obstruct peaceful protests. Protesting is often disruptive by nature, even the most peaceful protests in history have been considered a "nuisance".

I am not in support of this bylaw. The definition of nuisance is far too broad, and would allow the city to essentially shut down any protest they simply do not like or find inconvenient, including protests in support of missing and murdered indigenous women, LGBTQ2SI+ rights, or protests against gun violence, for example. Furthermore, this bylaw would restrict protest access from approximately 17% of the total area of the city of Winnipeg, which simply cannot be construed as anything other than a violation of Charter Rights, which enshrine the right of Canadians to protest on public property. The point of protests is that they are inconvenient- they force people to pay attention to issues and allow citizens to express themselves to their elected representatives. If elected representatives are allowed to avoid having to see protests as they go to work at City Hall or the Legislature simply because they are a “nuisance” then it follows that soon they will not have to listen to their constituents, because that would also be a nuisance. If you make it so citizens cannot protest on a university campus, which have been longstanding places of peaceful protest, you will be restricting the ability of citizens to exercise their ability to affect change in our city, country, and society.

Furthermore, a provincial law blocking protest access within 50 metres of surgical centres, clinics, and hospitals already exists, as do legislation and bylaws for protests that block access to these essential services - they simply need to be enforced. Additionally, laws that encompass unacceptable protester behaviour, such as harassing families, specific ethnicities, and religious groups, already exist - they simply need to be enforced. We already have the tools in our toolbox to combat the issues targeted by this bylaw. The addition of this bylaw to this metaphorical toolbox would be like trying to fix your glasses with a power drill - it’s simply not the right thing for the job, and will end up causing more harm than good.

I strongly oppose these recommendations. Limiting the right to protest is an extremely slippery slope. This proposed recommendation is far too broad and infringes upon rights while potentially protecting the morally bankrupt.

Executive Policy Committee - Submission
I'm writing this to state my clear opposition to the Safe Access to Vulnerable Infrastructure By Law.
This by law directly infringes on our Charter protected freedoms of expression and peaceful assembly. Section 2(b) of the Canadian Charter is unambiguous: political expression — including protest — is a fundamental democratic right. Courts across this country have affirmed this repeatedly. In R v. Kopyto, the Court of Appeal called free expression "the very life blood of democracy." We already have legislation that addresses harassment and hate motivated behavior. We do not need a new bylaw that restricts peaceful dissent.
The bylaw also undermines inclusion. People protest at schools, places of worship, and public institutions because those are the places where decisions are made and where harm or discrimination may occur. Redirecting protests away from these locations' silences marginalized communities and weakens their ability to influence the institutions that shape their lives. That is not inclusion — that is exclusion.

The language of the by law is vague, especially around so called “nuisance protests.” Without clear definitions, enforcement becomes subjective. Those who object are penalized, while those who agree are unaffected. That dynamic is divisive, and it erodes trust in public institutions.
And finally, I want to remind us all that many of the rights and public services we enjoy today exist because people protested. The 8 hour workday, weekends, minimum wage, and workers’ compensation came from collective action — including the 1919 Winnipeg General Strike, just steps from where we stand. Women’s right to vote was won through protest. Environmental protections were secured through Indigenous land and water defense. Even our public healthcare system was shaped by public mobilization.
We benefit every day from freedoms that were earned through objection, disruption, and civil disobedience. Supporting a by law that restricts protest while enjoying the rights protest delivered is a moral contradiction.
For these reasons — because it restricts Charter rights, promotes exclusion, and divides our city — I urge you not to adopt this by law.
Thank you.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our
Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason
that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community
members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but
silence marginalized communities' voices, lead to police overreach, and result in inadequate
options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.
This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and
Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate
for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of
a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Eric Rae

Dear Members of Council,

I am writing to share my concerns about the proposed Safe Access to Vulnerable Infrastructure By-law.

I understand and support the need for people to safely access schools, healthcare facilities, places of worship, and other important spaces. At the same time, I am worried that creating 100 metre buffer zones around such a wide range of locations could significantly limit where residents are able to gather and express themselves peacefully.

We are living in a time when many people already feel unheard and disconnected from decision makers. Peaceful protest is one of the most important ways ordinary citizens can make their voices known. I am concerned that this by-law, even if well intentioned, may go too far and unintentionally weaken those democratic rights.

I respectfully ask Council to reconsider the scope of this proposal and ensure that any restrictions are carefully balanced so they protect both public access and the fundamental freedoms of Winnipeg residents.

Thank you for taking the time to consider my perspective.

The right to protest is a cornerstone of a functioning democracy. By introducing new limits to where and how people can protest, it is stripping away this important right. I may not agree with all protests that happen within this city, but I will always defend their right to do it.

Comments
Dear Executive Policy Committee,

I am writing with deep concern about how the Safe Access to Vulnerable Infrastructure By-Law would affect the city of Winnipeg and restrict our charter rights to freedom of expression and peaceful assembly. I am particularly concerned with the broad and unspecified reach of the proposed by-law and the large area of Winnipeg that the buffer zone would include.

Protesting is an important tool for marginalized and oppressed people to advocate for social and policy change. The proposed by-law could silence marginalized voices, limit vigils, rallies, round dances and public demonstrations that have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

For these reasons I am opposed to the recommendations and urge you to drop further consideration of this by-law.

I oppose the notion banning “nuisance” protest. Non violent public protest is an inherent and necessary part of democracy. The propose measure would disproportionately affect marginalized people by effectively silencing them. The measure is deeply un-democratic.

I am writing today to express my opposition to the proposed bylaw that would require a buffer zone of 100 metres outside of schools, places of worship and other public buildings. I believe that the City of Winnipeg's proposal is too broad, and places an unjustifiable limit on freedoms of expression, peaceful assembly and association.

While I can appreciate that there are locations where protest and rallies may not be appropriate, police already have the power to intervene if protests pose a threat to physical safety or involve harassment or intimidation.

In this moment, as we see our neighbours to the south lose their rights as citizens and residents, to think that jurisdictions in Canada are considering limiting our opportunities to peacefully rally or speak out about issues that are important to community members, is simply unacceptable. None of this is necessary and, ultimately, is a detriment to our democracy.

Comments

Dear Executive Policy Committee,

I was shocked and distressed to read about the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure by-law, restricting our charter-protected rights to freedom of expression and peaceful assembly. I am very strongly opposed to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This undemocratic restriction of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,

Erin Sawatzky

Dear Mr. Mayor and Councillors,

I am writing in strong opposition to Item No. 7, the Safe Access to Vulnerable Infrastructure By-law, which significantly overreaches and threatens my rights as guaranteed under the Canadian Charter of Rights and Freedoms. Those rights and freedoms include the right to peaceful assembly (s.2(c)) and freedom of expression (s.2(b)). Those freedoms cannot be restricted if our democracy is to be preserved and protected.

Indeed the right to protest is not simply "permitted" in a democracy—it is essential to the democratic process. Peaceful protest is a primary way in which residents can express dissent, hold governments and leaders accountable, and influence public policy. Broad 100-metre exclusion zones around an extensive list of facilities—including public buildings, schools, community centres, and places of worship—would effectively prohibit legitimate, peaceful demonstrations across a significant portion of the city.

The City's own administrative report confirms this by-law would create wide "no-protest zones" around nearly every major civic institution in Winnipeg. Those restrictions go well beyond addressing harassment or obstruction (which existing laws already cover) and instead create generalized bans that would chill democratic participation by labelling them as "nuisance" protests.

If Council chooses to pass this by-law, I intend to peacefully protest it—an act protected by the Charter—and you can count on seeing me in court to challenge it.

As a journalist, filmmaker and Winnipeg resident I cannot support legislation that undermines my democratic rights, suppresses community dissent, and sets a dangerous precedent for protest restrictions in our city.

Sincerely,

Erna Buffie

The proposed ban, sited in Agenda Item: #7 Safe Access to Vulnerable Infrastructure By-law, doesn't come across as a proposal to protect vulnerable people/places, it reads like censorship and a way to control the population. It's an uncomfortably slippery slope, especially in light of what is happening to our neighbours south of the 49th parallel, to start saying who can gather when and where and say what and for what purpose.

Simply put, the proposed ban on protests for "the expression by any means, including graphic, written or oral, of objection or disapproval towards an idea, action, person or group" in "view of the public" in Winnipeg goes directly against Canada's Freedom of Expression laws. If you are unfamiliar with Canada's Freedom of Expression laws, they are clearly defined here: https://www.justice.gc.ca/eng/csj-sjc/rfc-dlc/ccrf-ccdl/check/art2b.html

Thank you for your time, please do not go forward with this ban.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Esmond Chong

The proposal is much too broad and infringes on the right of the populus to protest which is integral to a healthy democracy.

Colleges and Universities are places where thousands of young adults CHOOSE to pay tens of thousands of dollars to explore drugs, sexuality, and identity. They aren't children under guardianship. They aren't seniors needing care. They don't need coddling and protection from ideas and dissension. These grounds are meant to be a place for young adults to find their voice. What are you teaching them if you tell them it's unlawful to use it? I would ask each council member to look back at their own time in university and then justify why a post-secondary institution for ADULTS should be labelled as "Vulnerable Social Infrastructure".
