I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee

I write in opposition to the proposed Safe Access to Vulnerable Infrastructure By-law that is currently being considered by the City of Winnipeg. Marginalized groups have relied on their Charter-protected rights in order to advocate for their freedoms and peacefully gather to express their opinions and beliefs. This by-law will restrict the voices of 2SLGBTQIA+, Racialized and Indigenous communities if passed. I urge to Executive Policy Committee to not pass this by-law.

Signed
Evan Wilson

I think that retracting people's right to protest is infringing on people freedom of speech. We are a democratic country and should be able to freely express our views without fear of a fine. There are events happening within the world that is important to spread awareness for and advocate on behalf of those individuals affected.

This policy is an infringement of free speech that every Canadian is entitled to. Just because you dont like what they have to say doesnt mean they get their rights removed. It's disappointing to see Winnipeg want to put this through my family has been here for generations and we pride ourselves on activism and protesting which has been built and fostered IN WINNIPEG! going in this direction will be unacceptable and I hope you dont pass this. Many rights were obtained through protesting and its how we move our country forward through expressions. ESSPECIALLY AS THERE IS FASCISM IN THE USA BELOW US IT IS ESSENTIAL WE PROTECT ALL VUNERABLE CITIZENS AND FREEDOM OF EXPRESSION

Limited right to protest sets a dangerous precedent. We already, and quite rightly, have laws against destruction of property, excess noise violation, etc.
These can be used when and if needed.
Limiting the right to assemble is draconian and echoes, far too loudly, the regime south of the border.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but also silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

As a Winnipeg citizen, I demand that you drop further consideration of the proposed demonstrations bylaw.

Signed,
Gabriel Dallago

Dear Executive Policy Committee,

I was shocked to see this by-law is being seriously considered. It constitutes an obvious attack on the right to peaceful protest enshrined in our constitution, and essential to any functioning democracy.

If you'd like to see fewer protesters it would surely be wiser to spend time/money addressing their concerns instead of shutting them up and corralling them somewhere out of sight.

I'd like to believe I live in a city that listens to and works with its people. Please do not pursue this by-law any further.

Dear Members of Executive Policy Committee -- I urge that you reject further consideration of this proposed by-law. Its ultimate adoption by the City would effectively muzzle the voices of Winnipeggers at, and adjacent to, our representatives' places of work, public spaces where legislation is created and administered. It would impinge on the freedoms of free expression and peaceful assembly. These are Charter-protected rights in Canada, but that is not to say they are not fragile as history and recent global events have shown of such rights. Please do not join the ranks of those who disassemble core freedoms. After all, they are your rights too. - Gail Perry, Winnipeg - 12 February 2026.

Free speech is essential for the functioning of democratic systems. To fine people for expressing their graphic, written or oral opinion is completely authoritarian, no matter the location. There is a certainty that organizations contributing to social harm would use this by-law as a way to escape public protest in bad faith.

Dear Executive Policy Committee,
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law. While the goal of ensuring safe access to public facilities is understandable, this by-law as drafted represents a significant overreach that threatens the fundamental rights of all Winnipeggers. Freedom of expression and peaceful assembly are the cornerstones of a healthy democracy, and implementing 100-metre buffer zones around a vast list of public and private buildings effectively bans the right to gather in much of the city's public square.
Furthermore, acts of violence, property damage, harassment, and intimidation are already illegal under the Criminal Code of Canada. We do not need a new municipal by-law to police behaviour that is already subject to criminal prosecution. The definition of nuisance and intimidation in this by-law is also concerningly subjective, which may lead to inconsistent enforcement and the silencing of legitimate dissent simply because it is deemed disruptive.
Winnipeg has a long history of public demonstration. Moving protests away from the very institutions they are addressing renders that expression invisible and ineffective. I urge the Committee to uphold our constitutional obligations and reject this by-law. Public safety should be managed through existing laws without dismantling the civil liberties that protect us all.
Sincerely,
Dr. George Dyck

The right to free speech, free expression, and freedom of association are core to the healthy continuation of our Canadian democracy. It may be that Council sees protests, such as that have been ongoing in Minneapolis, as 'nuisances' to be suppressed. If that is the case, I cannot disagree more. On the contrary, peaceful protest is integral to the protection and advancement of our rights and interests. This by-law, as written, would have made it an offence to protest peacefully in favour of divestment from Apartheid South Africa or the unjustified invasion of Iraq by the United States in 2003. I still remember marching peacefully in opposition to the Second Gulf War as a child, a major demonstration that passed by many sites that would have been 'protected' from peaceful protest under the By-law. Was simply passing by these facilities, in protest of the actions of Americans (a nation and nationality), offensive conduct? Would protesting the racism of White South Africans have been offensive, since White South Africans are a race or nationality?

We cannot simply pick and choose what forms of speech will be tolerated in the public square. While actual intimidation and violent conduct can already be prosecuted under the Criminal Code, the proposed by-law would effectively ban even the most peaceful and innocuous forms of protest through large portions of the City - including at City Hall and the Manitoba Legislature. If, then, this motion is intended to protect access to amenities and services for vulnerable or historically-disadvantaged groups, it goes far beyond what is necessary to achieve that goal. The idea that a person holding a sign in front of City Hall poses an inherent threat to public health and safety because it is within 100 metres of the property line of Red River College is absurd.

As a Winnipeg citizen, I humbly ask that EPC send this proposal back to the Administration for additional study and consideration. While true harassment and intimidation should be

undoubtedly be prohibited, the right to free speech and peaceful protest remain at the heart of a healthy democratic society. Even where we disagree with another person's opinions, their right to speech - when exercised peacefully - should not be banned from the public square unless it amounts to hate speech or an incitement to violence.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed by-law.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations by-law.

It is for this reason that I am in opposition to the proposed bylaw.
It should be obvious to everyone in City Hall that public demonstrations are an extremely important form of communication between us and you. This by-law would lead to an out of touch city council with even less understanding of the needs of the city. This by-law is an unprecedented and outrageous attach on our charter rights and the fact that it was even put forward indicates that the councillors who allowed it to progress are not qualified for their positions and not adequately prepared to work in any level of government. If this by-law was to pass it would make this city, and city council, a laughing stock and embarrassment nationally. a single city councillor does not have the authority to override our charter rights. shame on you.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Dear Executive Policy Committee,

I am writing today to oppose the proposed by-law that would restrict our charter-protected rights as Canadians. As citizens we have the right to freedom of expression and peaceful assembly. Public demonstrations have been integral to the success of previous efforts that have strengthened rights for women, the queer community, Indigenous peoples, disabled people, etc... It is an essential right of a functioning democracy. Given the anti-democratic processes that are taking place in the US, it is especially concerning that our city would attempt to pass a by-law that suppresses democratic discourse.

As representatives of Winnipeg citizens, you are all supposed to work with us, and not for us. We deserve to have a say in the decisions of our governments and one of the primary methods of public discourse is protesting and demonstrating. Passing this by-law would send a very strong and concerning message that the City of Winnipeg is not invested in a fair and strong democracy.

Signed,
Grace Carey

Although protest can certainly be a nuisance, that ability to do so is an integral part of a just society.

There should be very little limiting to the ability to protest, provided the people protesting are not infringing in the freedoms of others.

Preventing any protest within X distance of specific locations is too broad of a measure. It seems intended to ensure the freedoms of non - protestors, but it has far too much potential to curtail the right to protest in general.

A balance can be struck, but this proposed balancing measure is not acceptable.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting "nuisance demonstrations" within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation

to decisions, events, or speakers hosted at those sites.

The definition of "intimidation" is also concerning. Language such as conduct "reasonably expected" to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing.This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City's objective is to prevent obstruction, harassment, or threats, existing Criminal

Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and

Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation-not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Comments
I am writing to express serious concerns regarding the proposed "Safe Access to Vulnerable Infrastructure By-Law" and to urge the Council to reject this measure as currently drafted.

While I understand the stated intent to protect critical infrastructure, this by-law represents a significant overreach that threatens fundamental rights to peaceful assembly and free expression. The broad language defining "vulnerable infrastructure" creates the potential for excessive restrictions on legitimate protest activity that is essential to a functioning democracy.

Of particular concern is the redundancy of this proposal. Manitoba already has comprehensive laws governing protests near sensitive locations. The Freedom of Access to Clinic Entrances Act establishes buffer zones around healthcare facilities, and the Provincial Offences Act provides mechanisms to address obstruction, harassment, and threats to public safety. Additionally, the Criminal Code contains provisions against mischief, intimidation, and interference with lawful use of property. These existing frameworks have proven effective at balancing the right to protest with the need to maintain access to essential services.

Rather than layering additional restrictions that risk chilling lawful dissent, the Council should focus on robust enforcement of current laws. The right to peaceful protest—even when inconvenient or unpopular—is a cornerstone of Canadian democracy that must be vigilantly protected. Overly broad by-laws set dangerous precedents for limiting civic participation and could be deployed to suppress legitimate advocacy on issues ranging from environmental concerns to labor disputes to healthcare policy.

I urge the Council to reject this by-law and instead work within existing legal frameworks to address any genuine access issues at specific locations.

Respectfully submitted,
Greg Abra

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Artbydeee/ Hadiza

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

To whom it may concern,

I have seen that there is a new policy that is trying to beautify to place that does not sit well with me. I feel that #7 Safe access to vulnerable inastructure bylaw is an infringement on human rights. Please refrain from passing this bylaw. Our community deserves the right to free speech and safe rallying/protests to have their voices heard.

Sincerely,
Haley Stevens

If passed, the proposed by-law risks seriously impairing the rights of those in Winnipeg without taking any new action to address concerns of intimidation. The definition of "nuisance protests" proposed by the draft by-law is vague and overly broad such that it may significantly impair the section 2 Charter rights of those in Winnipeg. The purpose of this proposed by-law may be to deter and punish intimidation and incitement to hatred in the context of protests at certain buildings and institutions. If this is the case, "intimidation" as defined by the proposed by-law can be dealt with by the Canadian Criminal Code under sections 319 and 432. If passed, the by-law would be rife for costly legal challenge, deeply affect many residents' faith in City leadership, and stifle the use of peaceful protest to affect change.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Hannah Dunn

This bill is mind boggling. How could we look at what is happening in the USA and think “ya, let’s do that.” Peaceful organizing and the right to protest are fundamental to a democracy. The City would be doing every citizen a disservice by supporting this bill in any way.

The power and importance of community mobilization could not be more clear when we look at what is happening in our sister city of Minneapolis, and other cities across the states. It is shocking that at a time like this, Winnipeg city council would be considering taking steps to chill public protest.

Regardless of political affiliation, I believe a basic level of freedom of speech and freedom of assembly is essential to our democracy. I didn't agree with the cause of the truckers convoy, for example, but I respected their right to organize. But it is significant that this bylaw is being proposed now, when thousands of Winnipeggers, including Jewish ones, have been rallying in solidarity with Palestinians and against the Gaza genocide, and not in 2022 when the whole street in front of the legislature was blocked off by the truckers convoy for several weeks.

I understand that this is not an across the board protest ban, but nevertheless it is obviously meant to have a chilling effect and is a significant overstep.

I ask all councillors to please vote against this item.

I believe that the passing of this law would be infringing on the right of Winnipeg citizens all around the city. It's INCREDIBLY important to have protected rights to protest, this is how we as a people speak our minds and show opinions when it matters most. The fact that this is even is being considered is ridiculous to me.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Protest By-Law Opposition Letter Template
Dear Executive Policy Committee,

I’m writing to you today to express my shock and alarm at the City of Winnipeg’s consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities’ voices, lead to police overreach, and result in inadequate options for responding to hate. The City’s proposed “Safe Access” by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression

has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

To the Members of Executive Policy Committee

I write in objection to the proposed “nuisance” protest bylaw put forward by Councillor Evan Duncan. His purported objective to “protect” churches, synagogues, schools and community centres is a smokescreen for suppressing the right of people to participate in political activities - the ones he doesn’t want to hear expressed.

If the above-names institutions are used for political purposes, they should expect that people who do not agree with speakers or activities organized in these building will use their right to speak and advocate in front of them. It’s a smokescreen to say that he (or the Council) is interested in protecting religious observances, children, etc. It has been made evident in the past few years that the intent behind restrictions to demonstrations and rallies has been aimed at the movement for justice in Palestine. These rallies, etc. have been peaceful, but those who do not want to address the issue of Palestinian occupation insist that the activities are the equivalent of anti-semitism. I wonder what study, discussion or analysis Councillor Duncan has done to learn about this topic.

This proposed bylaw is an attack on democracy. It’s a soft approach to creeping authoritarianism, in the same way as is happening in the U.S. Canadians and our City Council should be firm in safeguarding citizens’ right to dissent and citizens’ demands for justice. These rallies are not “nuisances;” they are an expression of opposition to genocide and fascism as it is growing in the Middle East and elsewhere.

This bylaw would he a step backward in our city’s and country’s history. I urge EPC and City Council to withdraw or reject this bylaw. Trying to suppress dissent will not make the problems go away. If EPC and Council want to reduce conflict over issues, they should

organize forums and workshops to elaborate on them and encourage people to learn from each other and advocate for justice.

Protest is how change happens. If we restrict protest, are we any better than the countless authoritarian regimes around the world? This isn't about safe access, it's about convenience and not wanting to be uncomfortable regarding the issues we see globally.

This by-law doesn't actively protect vulnerable communities, but rather inhibits the ability of people from the right to protest, especially at government buildings.

The proposal to limit our ability to peacefully protest based on the specific recommendations in this proposal is undemocratic and unconstitutional. As a physician and mental health expert, I would like to strongly assert that this concept being put forward of “mental safety” is intellectually incoherent and completely unacceptable. While protests can make people feel uncomfortable, our current legislation is sufficient enough to protect against actual harm or violence that may happen during a protest or any other interpersonal encounter. To adopt this framework as a city would stand against our values of democracy and free speech. It would also disproportionately affect BIPOC people, discrediting any real anti-racism work and commitments that the city has committed to. Finally, this would not stand up to a charter challenge, and the city would face a great deal of legal difficulties in enforcing and maintaining this framework- which is a waste of all of our time which should be spent on the pressing issues we face together as a city.

I am writing to express my opposition to the “7. Safe Access to Vulnerable Infrastructure By-law”. It infringes on the public's freedom of expression and to peacefully protest in order to placate one particular group. This is political power run amok and I urge the Executive Policy Committee to vote against this bylaw and preserve our enshrined rights. Infringements on our Charter rights should not be dictated by a special interest group.

This proposal is undemocratic and will obviously be used to silence whoever the WPS and EPC decide needs to be silenced. I agree that some protests are lame and stupid but we all deserve the right to protest. Public officials, religious leaders, community leaders should be able to handle seeing and hearing opposition IN REAL LIFE. “Vulnerable infrastructure”? (Eyeroll) Put on your big boy pants and deal with it in therapy, Evan and Scott rather than fining people $5000 for showing up and being passionate about life.

Everyone has a right to protest and shouldn't be chosen by the city what they believe is peaceful Or a nuisance. If people weren't able to protest against those animal abusers im sure they would have got a lot of a less sentence . Again everyone has a right and as Canadian also Manitoba I want to keep my right and not be in fear of being arrested to stand up in what I feel is right

Dear Executive Policy Committee,
The following letter expresses my feelings about this issue. In short. In a democracy we should be able to peacefully protest.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Re: Safe Access to Vulnerable Infrastructure By-law

Dear Executive Policy Committee

Allow me to begin by commending you for the time and energy you have dedicated to this sensitive matter. Let me also continue by expressing my whole-hearted agreement with the spirit of this by-law.

In a democratic society, no individual should feel unsafe by being subjected to harassment and attacks on their person. Irrespective of a group's opinion regarding religion, mask mandate, abortion, Gaza Strip conflict, and so on, no one should feel personally vulnerable and subjected to physical or emotional abuse by that group for holding an opposing opinion.

No person of faith must feel unsafe to enter their place of worship and attend their religious ceremony. No mask-wearing hospital staff or patient entering a health care facility should have felt intimidated by the actions of a group of staff and public opposing mask mandates. Any woman, seeking an abortion and having already undergone emotional turmoil regarding that decision, need not be confronted by yet another anxiety, produced by an anti-abortion crowd at the entrance to the Women's hospital. No publicly elected official must be faced with an angry mob at the door to their constituency office or personal residence. And certainly, the life of the residents of the Ottawa neighbourhoods surrounding Parliament Hill must not have been disrupted by the actions of the so-called Freedom Convoy.

But the first thing that comes to mind is the famous adage "If it ain't broke, don’t fix it."

What is lacking in our current legislation that comes up short in protecting the public from abuse, and will be remedied by this by-law? Let's not forget that Stephen Harper's government faced a strong backlash and rightful ridicule for opening up the Barbaric Cultural Practices Hotline. The very first simple and justified question put to them was "What's wrong with "9-1-1?" This may have contributed to their landslide loss in the subsequent election and to this day, this issue continues to haunt them.

As much as I agree with the spirit of the proposed by--law, I must admit that I have some trouble with the letter of it. At times, I find the language foggy and in serious need of clarity. For instance, I object to the following:

“nuisance demonstration” means any in-person protest or demonstration occurring in view of the public or in a location ordinarily used or frequented by members of the public that involves the expression by any means, including graphic, written or oral, of objection or disapproval towards an idea, action, person or group based on or related to any specified characteristics.

I find this definition very vague. There is no reference to the nature of the assembly, peaceful or otherwise. It is a blanket statement open to interpretation, resulting in a whole slew of potential abuse and unintended consequences. As it is worded, it goes against the very essence of freedom of speech and the right to peaceful protest.

And at times, I see this as a gateway to government overreach. for example:

Enforcement authority: The designated employee and enforcement officers are authorized to administer and enforce this By-law and to remedy a contravention of this By-law, and for these purposes have the powers of a “designated employee” under the Charter.

With all due respect to law enforcement, a very obvious indicator of a democratic society is limiting the power of the executive branch as much as possible, while maintaining its functionality.

As mentioned before, the unclear definition of nuisance leaves the interpretation to the enforcement authority. This is unfair to the democratically-minded enforcement officers, and open to abuse by the not-so-civic-oriented ones.

Let us learn the lessons supplied to us by the past and particularly current events south of the border. Generally, oppression does not enter the scene full force with guns blazing. It quietly seeps in while we are unaware and establishes itself firmly. We detect it too late and then have a steeply uphill battle to eliminate it. Let us be mindful and shut out the autocracy creep.

I hope to see changes to the language of the by-law to make it more acceptable to me and many of my fellow Winnipeggers. As it stands today, I will be obliged to sign any petition to

launch a legal challenge against it.

Sincerely

Although some shorter distance restrictions around certain locations such as elementary schools might be appropriate, this bylaw goes much too far:

“Nuisance Protest” is non-specific, meaning any and all public protests, marches, round dances and other gatherings could be subject.
Areas restricted by this by-law are public spaces and points of proximity to decision makers.City Hall, University Campuses, Wab Kinew’s Office, etc. Much of the city would be subject to the geographic restrictions of this by-law.
Fines of up to $5000 could be issued to every person who shows up to Round Dances, rallies, group bike rides, marches, etc.
The language of the by-law extends to any protests in these exclusion zones that use amplified sound or block traffic.
Police will have new tools they will use to silence and punish protesters.
It is almost certain this bylaw will be racist in its application.

The proposed bylaw to restrict our Charter-protected rights to protest attempts to set a dangerous precedent. Protesting is a fundamental element of a healthy democracy and to attempt to chip away at this right is disturbing. The policy is far too vague and would give police and other enforcement agencies far too much power to scare people away from exercising their rights due to fear of fines or other issues. Existing ordinances related to things like excessive noise volume already exist and can, and should, be used only to restrict protests which are unreasonably disturbing visitors to a space and/or residents. I implore City Council to listen to the voices of myself and countless others calling for this policy to be rejected.

This proposed by-law is showing extreme cognitive dissonance. At the last three museums I visited, the Manitoba Museum, Canadian Human Rights Museum, and the Canadian Museum of History in Ottawa, each had multiple exhibits about how protesting made positive social change. There is literally a statue commemorating the 1919 Winnipeg General Strike across the street from City Hall. The City should focus on enforcing the by-laws it already has.

Dear Executive Policy Committee,
I am writing to express my deep concern about the City of Winnipeg's consideration of the proposed Safe Access to Vulnerable Infrastructure By-law. As drafted, this by-law risks restricting Charter-protected freedoms of expression and peaceful assembly. For that reason, I oppose its adoption.
Public demonstrations—including vigils, rallies, round dances, and marches—have long been essential tools for community advocacy and democratic participation. Winnipeggers have relied on these freedoms to advance social and policy change, including rights for workers and tenants; justice for Indigenous communities; equity for racialized and 2SLGBTQIA+ people; and protections for the environment.
If passed, I am concerned this by-law could infringe constitutional rights, disproportionately silence marginalized voices, invite police overreach, and narrow the space for lawful dissent. It would not meaningfully prevent property damage, hate crimes, or violence—acts that are already addressed under existing criminal laws. Instead, it would primarily constrain peaceful protest. Such an excessive and undemocratic limitation on expression is incompatible with the values Winnipeg has claimed to uphold, including its efforts since 2018 toward being recognized as a United Cities and Local Governments (UCLG) "Human Rights City."
The Canadian Civil Liberties Association (CCLA) has also warned that broadly framed restrictions like these can unfairly limit Charter-protected speech and peaceful demonstration, and that these measures often fall hardest on marginalized communities who depend on protest to advocate for change.
This is fundamentally an issue of protecting freedom of expression and association—cornerstones of a healthy democracy. At a moment when we are witnessing alarming erosions of rights and freedoms elsewhere, I urge you to uphold your legal and ethical obligations to protect Charter rights here in Winnipeg.

I respectfully ask that you discontinue further consideration of this proposed by-law.
Sincerely,
Houda Elmimouni

I strongly support the By-Law. As a physician and university professor, I too frequently see vulnerable people frightened to enter buildings by protestors. There are plenty of places for people to protest and this is a reasonable By-Law that will ensure that patients, students and worshippers are not deprived of their rights to safety and security of person.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Ian Link

I feel this proposed by-law is the peak of a slippery slope into anti-democratic territory. People should be protected from harassment, but we already have laws in place for that purpose.

What is the function of peaceful protest if it is washed away and hidden from where people congregate? How will we approach difficult conversations in policy or the running of society if our daily experiences are sanitized of the conflict necessary to create change. I WANT my children to take notice and say, "Why are these people protesting?" so they can learn that they have agency within our systems, that they are ALLOWED to have ideas that conflict with the status quo, with what others think, and that they feel the freedom and safety to express those ideas in a way that is meaningful and VISIBLE.
Silencing protest in public is an attack on all of us and diminishes our right to speak out against the wrongs in the world.

Dear Councillors,

I am writing in strong opposition to Item No. 7, the *Safe Access to Vulnerable Infrastructure By-law*. While I fully support ensuring safety and access to public services, this by-law significantly overreaches and threatens rights guaranteed under the **Canadian Charter of Rights and Freedoms**, including the fundamental **freedom of peaceful assembly (s.2(c))** and **freedom of expression (s.2(b))**. These freedoms cannot be restricted without clear, necessary, and proportionate justification—standards this by-law does not meet.

According to the **Canadian Civil Liberties Association**, the right to protest is not simply permitted in a democracy—it is *essential*. Peaceful protest is a primary way in which residents can express dissent, hold governments accountable, and influence public policy. Broad 100-metre exclusion zones around an extensive list of facilities—including schools, community centres, and places of worship—would effectively prohibit legitimate, peaceful demonstrations across large portions of the city.

The City's own administrative report confirms this by-law would create wide "no-protest zones" around nearly every major civic institution in Winnipeg. Such sweeping restrictions go well beyond addressing harassment or obstruction (which existing laws already cover) and instead create generalized bans that would chill democratic participation.

Should Council choose to pass this by-law, I intend to peacefully protest it—an act protected by the Charter—and you can count on seeing me in court to challenge it.

As a public-school teacher and a school trustee representing Ward 1 of the Louis Riel School Division, I cannot support legislation that undermines democratic rights, suppresses community voice, and sets a dangerous precedent for protest restrictions in our city.

Regards,

Ian Walker

As a believer in the Charter of rights and freedoms which is designed to "protect the right to protest through sections 2(b) (freedom of expression), 2(c) (freedom of peaceful assembly), and 2(d) (freedom of association), these fundamental freedoms ensure the right to gather, express opinions, and demonstrate, provided the assembly is peaceful. However, these rights are subject to "reasonable limits" prescribed by law."
These are not reasonable limitations. I understand there are hours of the day in which one can protest, and when it's related to safety, I also will concede the point. However, the terminology in the proposal shows more dubious language when describing what will and won't be allowed.

Please reconsider tabling such a bill until the finer points can be resolved with public input. We look at the crackdowns and cooling effect these policies have on our neighbours to the south, and the last thing I want in Canada is the scaling back of freedoms for Canadians at large to satisfy the whims of special lobbying and special interest groups who seek to control policy and our political parties with financial influence and messaging.

Thank You,
Ian W

This will not make people more safe, protests are peaceful in Winnipeg and they provide necessary information share and community gathering in a safe productive way. By creating rules like this you limit people's ability for free speech and to engage in community. This will further anger the populous and create more chaos. Do not buy in to these distorted belief systems that by-laws like this keep people more safe or that it does anything productive. It is more divisive and will create more issues. Listen to real Winnipeggers, not some snooty rich folk who can't be inconvenienced to acknowledge our city and nation are struggling with real issues that need to be vocalized.

Attn: Winnipeg Executive Policy Committee
Re: #7 Safe Access to Vulnerable Infrastructure By-Law

It is deeply disturbing to see this policy proposal put forward by Councillor Evan Duncan. Such a proposal exemplifies what are among the worst of the anti-democratic tendencies on the rise across the Canadian political landscape in this moment.

Misleadingly titled the "Safe Access to Vulnerable Infrastructure By-Law," if adopted, this by-law would limit both access and safety, as it is a thinly disguised and draconian maneuver designed to silence Winnipeggers' rights to object, to assemble, and to speak against harmful municipal, provincial, and federal policies, police violence, corporate corruption, and all forms of neglectful, violent, racist, and otherwise destructive governmental and corporate practices.

The proposed by-law is also built on a falsehood: the implication written into it, that protest in Winnipeg has been violent or unsafely obstructive, is patently false.

Historically, legislation that is designed to restrict peaceful protest, such as the form of protest we see in Winnipeg, appears due to a ruling class desire to silence the views of regular citizens who are working towards and rallying for desperately needed change, including in this case, for the reversal of devastating cuts to social programs and services in Winnipeg, change to Winnipeg's backwards infrastructure and housing policies in their unfair allocations that benefit companies rather than residents, an end to a disgracefully inflated police budget that drains all public services, and the reversal of creeping privatization practices that work across the board against the interests of Winnipeggers.

But such a policy proposal is not only designed to shield Winnipeg's City Council from criticism. In its demonstrable effort to reduce avenues of public dissent, it would also necessarily restrict both public opposition—and importantly, the visibility of such opposition—to the particular destructive policies and practices that people routinely hit the streets to protest; those of the province of Manitoba, the federal government, and large corporations for their innumerable violations, including of UNDRIP, the Genocide Convention, and trade and industrial practices to which Canada is ostensibly bound by international laws.

Crucially, this includes Indigenous demands for the full and timely implementation of the TRC Calls to Action and the MWWIG Calls for Justice, development of alternatives to the unchecked practices of fossil fuel and other destructive extractive industries, and the reversal of the ramping up Canada's unprecedented mass-militarization plans.

All of these are among the reasons why people gather publicly to use their collective voice in the City of Winnipeg, and it is their legally protected right to do so. To be clear, the "Safe Access to Vulnerable Infrastructure By-Law" would specifically stand in the way of Winnipeggers' legally enshrined rights and ongoing collective efforts to speak publicly against the destruction of human life and the planet.

Councillor Duncan, with Mayor Gillingham's support, has therefore put forward an inherently unconstitutional by-law, one that stands in the way of the right to speak against ruling powers and catastrophic practices, and that therefore also stands in the way progressive development in Winnipeg; both the Councillor and the Mayor should be ashamed, but if you, members of the EPC, fail to halt such a by-law from passing, this disgrace will rest on the shoulders of your office, and on all City of Winnipeg councillors.

If you do pass such a blatantly unconstitutional by-law, it will in all likelihood be eventually overturned by public pressure of the kind you are no doubt already facing, but history will most certainly reflect that you will have knowingly passed anti-democratic legislation that flagrantly violates the Canadian Charter rights of Winnipeg, Treaty 1, and all Manitoba residents throughout Treaties 2-5 territories, including their rights to assemble and speak against oppression, and for a just future.

As a Winnipeg and Treaty 1 resident myself, I have often been ashamed and angered to witness the dismantling of public social programs and services in this city, especially in recent years, and the city's disdain for the impoverished and marginalized, for Indigenous peoples, and for all those who advocate for a better future.

Make no mistake, the true obstruction to access here is the Councillor's brazen by-law proposal in all of its destructively anti-democratic proportions, not the voices of protesters who gather to speak about the truth.

It should be obvious to you, members of the Executive Policy Committee, that the "Safe

Access to Vulnerable Infrastructure By-Law" violates existing constitutional law, that it is an insult to every person living here, and that it should never have reached this level of review. In order to adhere to the commitments of your office, it is your responsibility to reject it unequivocally.

This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
JM

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

This ban on “nuisance protests” is too nebulous and provides the city authority to issue more fines to protestors as yet a new way to crackdown on public displays besides the violence and job risks of already being present at a protest. Moreover how long until this is extended to union organizations or even peaceful public gatherings, this is yet another attempt for a city in Canada to infringe on charter s. 2 rights. If passed it will not be held by the SCC

Protesting is an important aspect for a progressive society and a way for citizens and community members to make their voices heard. The term "nuisance protest" is not specific and can be unfairly used to silence voices.

Dear Members of the Executive Policy Committee,

I am writing to express serious concerns regarding the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law. I strongly oppose this bylaw and urge you to not move it forward.

My concerns include:

* The bylaw would restrict freedoms protected under the Canadian Charter of Rights and Freedoms, including freedom of expression and peaceful assembly.
* These rights are foundational to a healthy democracy and must not be limited without compelling justification.
* Public demonstrations—such as rallies, vigils, round dances, and marches—have historically played a critical role in advancing workers' rights, tenant protections, Indigenous rights, racial justice, 2SLGBTQIA+ equality, and environmental protections.
* Limiting protest spaces or imposing broad restrictions undermines this long-standing democratic tradition.
* Communities that rely most heavily on peaceful protest to be heard may be the ones most affected.
* There is a real risk of increased police discretion and overreach, which could disproportionately impact racialized and marginalized residents.
* Property damage, hate crimes, harassment, and violence are already illegal under existing criminal laws.
* The proposed bylaw appears to target peaceful protest rather than address unlawful conduct.
* The Canadian Civil Liberties Association has warned that broadly worded restrictions can

infringe on Charter-protected activities and chill lawful dissent.
* Winnipeg has been working toward recognition as a United Cities and Local Governments (UCLG) “Human Rights City.”
* Enacting sweeping restrictions on peaceful assembly would undermine that commitment.

At a time when democratic rights are under increasing pressure globally, it is essential that municipal leaders uphold constitutional protections and safeguard space for lawful civic participation.

For these reasons, I urge you to halt further consideration of the proposed bylaw.

Sincerely,
Jackie Avent

Dear Executive Policy Committee,

I am disappointed and disturbed to see this by-law being considered. Organizations like CIJA and the Jewish Federation of Winnipeg which support this by-law do not represent the entire Jewish Community and instead represent a strict adherence to an incredibly exclusive definition of Judaism that prioritizes nationalism over spirituality and inclusive community.

These organizations fracture our communities, polarize discourse and make Winnipeg a less welcoming and inclusive place. I have experienced the harms of the Jewish Federation's leadership personally.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law

would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

Comments
Dear Executive Policy Committee,

I am writing to express my concern over and disapproval of "The Safe Access to Vulnerable Infrastructure By-law." While I agree that Winnipeggers and indeed all people have a right to safe access to healthcare, worship, education, and more, I disagree that the this is the correct way to ensure that safety.

Firstly, Document ID 27552 is not available on the website currently, so Winnipeggers are unable to read the full text of the proposed by-law. The wording is too vague to be informative in the news post, and the link to the full text does not work. The city should need to provide a firm list of designated zones for a by-law like this, and changing said list should require a formal process. Maybe this is the case, but since the full text is not available, it is unclear.

Secondly, existing laws regarding public nuisance already prevent protestors from outright blocking access to designated spaces already. By-law 1573/77, sections 9 through 11, and the Highway Traffic Act already outline the requirements for when a permit is required. The Safe Access to Abortion Services Act already allows medical care facilities and pharmacies to request a 50 meter buffer zone. Escalating these laws risks weakening fundamental freedoms granted in our Charter Rights and Freedoms.

Furthermore, financial punishment for peaceful protests directly violates Section 2b of our Charter of Rights and Freedoms, but indirectly it also gives an unfair advantage to protestors who are financially sponsored. If the punishment for a crime is monetary, then it is only a crime for the poor.

Lastly, the wording "and other designated facilities" creates an opportunity for oppressive governments to designate banned zones arbitrarily in order to benefit a particular agenda or quell genuine public expressions.

Also notable is the imprecise, dishonest naming of the proposed by-law, which does not clearly describe its contents. Most Winnipeggers would be against a by-law proposing a fine up to $5000 dollars for protests. Were the proposed by-law called something clearer and more representative of the contents of the by-law, for example: "Fines for Protests at Designated Spaces By-Law" most Winnipeggers could make a more informed decision about their support.

Please consider my thoughts. I am available if you have any questions.

Thank you,
Jacob Carewick

I was scheduled to speak at the Public Hearing regarding Bird-Friendly Window Treatments last month. I prepared a thoroughly-researched speech, paid for parking, trudged through -20 to the City Council building, and after waiting for hours, finally had to leave to go to work. It seems that hearing from the public was an afterthought at a "public hearing". Now you, as Council, are proposing removing a fundamental democratic right from your citizens (a right guaranteed by the Canadian Charter) in the form of sweeping "no-protest zones." It has never been clearer to me that the mayor and council has completely abdicated their responsibility of REPRESENTING their constituents, and instead seek to silence them. (Historically, this does not go well for the people in authority.) Please remember the job that you were elected to do, which is to represent the voices and interests of the citizens of Winnipeg, because as your actions currently stand, it seems to be an after-thought for you, if it's thought of at all. Have the day you deserve.

I am writing today in opposition of this change. As a openly queer, trans, and neurodivergent individual who helps operate and frequents community spaces I understand the need to keep community spaces safe more than most, however after reviewing this by-law I believe it will create an unnecessary burden on those seeking to have their voice heard and creates additional power structures that risk abuse by those that do not align with the values upheld by our charter rights. I strongly oppose this bylaw as it only serves to add tools that may be used for oppression and will simply not accomplish the goals being communicated as intended.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Jaden deBeer

This is a very troubling proposal, one that is overly broad and can be used to violate freedom of speech and expression. I am deeply concerned such a proposal is up for consideration at all on behalf of the City of Winnipeg. People have a right to protest meaningfully and peacefully, even for reasons you or I may not agree with. Our municipal government does not have the discretion of taking that right away by deciding what protests are meaningfully allowed or not. I understand we have laws already in place re: protesting around vulnerable infrastructure (e.g., healthcare settings) and yet this proposal attempts to go far beyond in its scope and application. It opens possibilities to a variety of interpretations that would be harmful, inappropriate, and potentially dangerous to vulnerable groups.

Protesting is a fundamental Canadian right and they are designed to be inconvenient in order to draw attention to the matter at hand. As long as they are peaceful, protests should be allowed to occur whenever and wherever they are needed or else we risk a slippery slope argument into a repressive society that doesn't allow its citizens the basic rights guaranteed in the Charter.

Public engagement (optional)

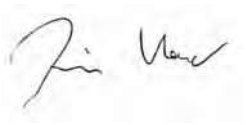
The Canadian Charter of Rights and Freedoms includes freedom of thought, belief, opinion and expression along with freedom of peaceful assembly among the 'Fundamental Freedoms" guaranteed to Canadians. In a democratic society, individuals must be allowed to voice their opinions publicly, and to assemble with others in protest where they perceive injustice, or wish to affect societal change.



As such, I oppose Councillor Duncan's proposed Safe Access to Vulnerable Infrastructure bylaw, which I concede is well-intentioned in seeking to enhance public safety and reduce the prospect of intimidation of community members, but is far too sweeping in establishing bubble zones banning "nuisance demonstrations" within a 100 m radius of hospitals, schools, daycares, community centres and places of worship. Without any definition of what constitutes a "nuisance demonstration", the proposed bylaw could ultimately be used to shut down protest and public demonstration aimed at informing members of the public of legitimate concerns, whether those are related to labour disputes or broader societal issues, as there is no operational definition of what constitutes a "nuisance demonstration". Further, the breadth of the list of institutions and areas from which demonstrations would be prohibited under the proposed bylaw leaves precious little space for individuals to assemble publicly to demonstrate their concerns, and as such, would significantly compromise our charter-guaranteed rights to peaceful assembly and freedom of expression.

Such restrictions on civil liberties have no place in Winnipeg, a city celebrated worldwide for its historical rights-affirming 1919 General Strike. While we may not agree with opinions being voiced publicly, a democratic society must defend the right of its members to voice their opinions and beliefs, allowing ideas and issues to be debated and tested publicly. This does not mean that we should not vigorously enforce Sections 318-319 of Canada's Criminal Code that were established to combat hate speech, nor ignore behaviour that constitutes criminal harassment as defined within Section 264 of Canada's Criminal Code. It does mean, however, that we should not attempt to reduce or eliminate criminal behaviour by enacting sweeping bylaws that constrain legitimate public protest. To do so risks the very freedoms that prevent us from plunging into a totalitarian state.

I encourage members of Executive Policy Committee to vote against the proposed Safe Access to Vulnerable Infrastructure bylaw. In attempting to deal with issues that are already sanctioned under Canada's Criminal Code, the proposed bylaw compromises our

Charter rights as Canadians, and would significantly curtail public debate over societal issues on which our collective future depends.

Sincerely,

Dr. James F. Hare

I have read the proposed legislation, and I am convinced that this policy serves no real public interest. In a democratic country/city, our laws need to protect those people who are non-violently, peacefully protesting. The way this is written, it will make it impossible for people to do so in the places where we should be afforded the enforcement of our right to protest something-anything. As a concerned citizen, I am asking policy makers to go and rewrite this to make it more clear. "Nuisance" is open to interpretation. It's self-evident that a protest is ALWAYS going to be a nuisance to someone--that is terribly harmful language to put into a policy, and it will affect those fighting for their rights. Can we not rewrite this thing? What if we just all agreed that there should be no violence in protesting? I think we could agree on that. I fear this is being pushed by one interest group to silence another--and that is a form of violence.
Yours sincerely,
James Kornelsen

My name is James and I am a resident of Downtown Winnipeg. My residence and University would be within these proposed buffer zones, but I am EXTREMELY opposed to this new by-law. This by-law encroaches on freedom of expression and the right of Winnipeg citizens to protest against political matters. The guise of “resident safety” that this by-law is operating under is unnecessary; I have never been made to feel unsafe as a Winnipeg resident by a peaceful protest, regardless of noise level or “disruption” to my day. Community centres and post secondary institutions ESPECIALLY should not be included, as both of these places often host political events and should be places of public debate and resident freedom. I am highly against this by-law without substantial revisions and am spreading the word for residents to voice their opinions. Thank you.

The restrictions proposed are overly broad and would likely violate Charter rights to protest. The use of "nuisance" to describe the protests is telling - these are not threats to the safety or security of the people of Winnipeg. Law-abiding citizens need to be able to express their Charter rights, even if it is an inconvenience to others, so long as they are not threatening the safety of others. What's interesting is that the text already recognizes this by including a carve-out for labour picketing. This is overly broad, restricts our rights, and should not be passed.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Jami Holden

Peaceful protest is a human right. This by-law would be detrimental to democracy. It gives police a tool to use unnecessarily on people voicing their opinions.

Protest is a public right and has existed through all forms of democracy. Removing it is anti-democratic and anti freedom. The voices of the people must be heard, and you as the leaders of the city we love must hear our voices, not silence them. Many peaceful rallies happen regularly in the city. They must continue to.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Non violent peaceful protest serves as a voice for the people and is the best way to bring institutional change to a community. The freedom to be seen and heard is part of what makes us Canadian. Being noticed in places like the legislative building and city hall is imperative.

Taking away peoples voice, with everything that is going on within this past year alone. Doesn't doing something like this seem wrong? All the united voices speaking for the liberation of people and you still put this as an option to underhand your own people. We are all the same but the differences in between us push us away from being happy and free for all.

The "Safe Access to Vulnerable Infrastructure By-Law" would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

I am in opposition to the proposed By-Law. Frankly, not only am I opposed, but I am embarrassed on behalf of Winnipeggers by the timing of this proposed By-Law. Today, the Trump Administration announced, "the surge of federal agents in Minnesota will soon end." (February 12, 2026; CBS News). I believe this announcement is a direct result of the brave Minnesotans who are exercising the freedom to raise awareness so that those in power will pay attention. This right needs to be preserved here in our city.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Protesting is a right.
What Counselor Duncan said is extremely concerning.
"I think that as things evolve globally we see a lot of change out there. The chaos that is unfolding south of us right now is a clear indicator that it's coming our way and if we don't put these things in place to stop that, it's going to be your neighborhood next, it's going to be your place of worship next. And we don't want that to happen."

The people rising up to protest for their rights is not the issue south of us. The issue for the states is the government not following the rule of law. The fact that Councilor Duncan thinks the people protesting are the issue says a lot about him.

Dear Executive Policy Committee,

This by-law not only infringes on constitutional rights but effectively silences the voices of the most marginalized. I expected better of a mayor who ran ran on the promise of a compassionate approach to the disenfranchised. Shame on all of you. Peaceful protest is an essential right in a functioning democracy. We should all pay close attention to what is happening in the US right now and choose the opposite direction. I am disappointed that such a proposal has even made it this far. This has no place in the City of Winnipeg or in any democratic country.

Do better.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law. I am deeply concerned that this by-law would restrict Charter protected rights to freedom of expression and peaceful assembly.
If adopted, it risks silencing marginalized voices, limiting peaceful protest, and creating fewer avenues to respond to hate. Such a restrictive and undemocratic measure has no place in a city that strives to be inclusive and responsive to its residents.
Protecting freedom of expression and association is essential to a healthy democracy. At a time when we are witnessing troubling rollbacks of rights elsewhere, I urge the Committee to uphold its legal obligations under the Charter and safeguard these fundamental freedoms.
I strongly urge you to discontinue further consideration of this by-law.
Thank you,
Jan

This legislation is incredibly vague, allowing police and policy makers to dictate what kind of protest and public gathering is unacceptable. Limiting what kind of protest can be present around City Hall without a permit, is a way to directly escape accountability from the harm those in power may commit against Winnipeg and those who call it home. Placing a fine as a threat increases the odds of low income people being unable to participate in community events and protests as fines may be a huge burden depending on income.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Manitobans have used to advocate for many social and policy changes that we currently enjoy as a community, as a province, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but further silence the voices of communities marginalized by systems of oppression, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm groups marginalized by systems of oppression who

rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

I am opposed to the proposed By-Law. Restrictions on civic space (which includes universities and government buildings) and restrictions on public protest undermine our democracy. Sufficient laws exist to deal with problematic protests (laws against vandalism, uttering threats, assault, etc.) without curtailing the rights of people to voice their opinions in the ways proposed. Please DO NOT PASS THIS BY-LAW.

My intension is to address this proposed agenda of removing rights regarding protest in certain areas. In the Canadian Constitution freedom of speech is protected under Section 2(b) of the Canadian Charter of Rights and Freedoms as a "fundamental freedom". Removing the right to protest near systems of power, such as the police headquarters destabilizes democracy and incites fear or lack of action by those who disagree. One example of this is MMIWG2S if people would not have protested, more of deceased woman's remains would be still be missing. The protests done for George Floyd had his murder arrested. Protesting is a human right and stands against injustices. Protesting creates positive change and educates others of potential legal changes that one may not otherwise hear about. Removing that right becomes a slippery slope towards fascism. Canada and Winnipeg especially, should be a place where freedom and peaceful protest are not only encouraged but also supported. We are a country that is working hard to learn accountability but if we take away the voices of the people (specifically minorities) who protest unfair laws made against them, we have chosen regression. We are better than this. We have seen the fall of what has happened to our neighbours in the US. Removing rights invokes fascism. We are better than that.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Anti protest by-laws are harmful because they restrict a core democratic right: the freedom to express dissent in public spaces. When governments or municipalities impose excessive limits on when, where, or how people can protest, they weaken an essential mechanism for holding power to account and bringing attention to social issues. These by-laws often disproportionately affect marginalized groups who rely on public demonstration to make their voices heard. Beyond silencing dissent, such restrictions can create a chilling effect—people may fear punishment for participating in completely peaceful, lawful activism. In healthy democracies, public protest is not a problem to be stamped out but a sign of civic engagement, and laws that curb it undermine both democratic participation and public trust.

Hello Executive Policy Commitee,
Are you kidding me? You are considering turning democracy into demockery. Even considering this bizarre bylaw is making a mockery of our whole system. How about instead of disallowing protest you work on fixing the things that people protest about.

This proposal is overly broad. People in this thread are thinking it applies just to abortion protesters at the hospital (and there's already a law on that). But no, read it.

Hospitals
Pharmacies
Doctor's offices
Schools
Libraries
Community centres
Cultural centres
Cemeteries
Churches
Halfway houses

So maybe you think it's still reasonable. Maybe you're still thinking it only applies to them, those crazies who hate abortion/the LGBT community/Jews/Muslims/whatever. No, it could apply to you as well.

There's a presentation by a speaker known for spreading anti-LGBT hate. Can't protest that, it's at a church. A professor is fired for their views on Gaza. Can't protest that, it's at a school. MAGA event at a park. Can't protest that, it's at a community centre. Nazi dies and all their Nazi friends are having a Nazi funeral? Can't protest that, it's at a cemetery.

You would be relying on the government to use their "discretion" on what is allowed and what isn't. Even if you think the current administration would be reasonable in their choices, what about the next one, or the one after that?

Freedom to protest is extremely important in Canada. There should of course be limits, but these should be very few. It should only be essential services and places predominantly for vulnerable people, like:

Hospitals
Schools for children (not universities, colleges, and other adult education places)
Halfway houses

And no bullshit exemption for labour. If it's wrong to block access to a hospital with a protest, it's wrong for any reason.

I'm horrified at this proposal to limit the fundamental freedom to protest, and restrict charter-protected peaceful demonstrations.

Let's not follow in the fascist steps of our southern neighbour.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

I am opposed to any bylaw that erodes our Charter-protected democratic rights — particularly the right to peaceful protest and dissent — in order to protect powerful institutions from criticism.

Canada's history is clear: some of the most serious and systemic abuses in our country were carried out, enabled, or concealed by organized institutions that demanded social deference. Many churches played central roles in residential schools, the forced removal of Indigenous children, and the broader suppression of Indigenous culture and identity. The long record of sexual abuse by clergy, and the institutional failures that protected abusers, is also well documented.

A bylaw that restricts protest in ways that prevent citizens from naming these realities is not reconciliation. It is silence.

Winnipeg has an obligation — morally and legally — to uphold the Charter, and to ensure that public protest remains possible, even when it makes people uncomfortable. Protest is not meant to be convenient. It exists because history shows that institutions often do not hold themselves accountable unless they are pressured to do so publicly.

I am also deeply concerned about the implications of this bylaw in the context of ongoing international human rights issues. Across Canada, there have been events organized by groups that promote or facilitate the sale of land in occupied territories — land that is widely viewed under international law as illegally seized.

This Proposal is not abstract. It connects directly to displacement, discrimination, and the destruction of communities — including long-standing Christian and Muslim Palestinian

communities - in the birthplace of Christ no less.

Winnipeg is home to the Canadian Museum for Human Rights. Council should not place itself on the wrong side of history by limiting protest against dispossession, occupation, or violence — particularly when those issues involve communities whose rights are already routinely minimized.

This bylaw risks protecting the feelings and reputations of the powerful, rather than protecting the rights of the public.

Many Winnipeggers come from families who sacrificed to defeat fascism and defend democracy. We should not dishonour that legacy by weakening the very freedoms they fought for — including freedom of expression, freedom of assembly, and the right to publicly condemn injustice.

If “Never Again” is to mean anything, it must mean never again for anyone. That requires the courage to allow dissent — and the humility to accept that protest, by its nature, will sometimes be uncomfortable for those being protested.

I urge Council to reject this infringement on our Canadian freedoms.

I cannot believe the city is trying to dissuade people from participating in protests? Protests are an essential form of civic engagement under democracy. To ban them—or use the threat of fines to punish participants—is a blatant act of fascism. Shame on those promoting this.

This is a wide reaching bill that would make pretty much any form of protest in most of downtown a by-law violation that could lead to fines. I would implore the executive policy comittee to simply look at a map of all locations where protest will be limited according to this proposal- a total of 80 square killometers. The language used in the bill to define a nuisance protest is open to interpretation, where any protest that obstructs pedestrians (which is unavoidable with a large protest) or even simply uses a megaphone while "expressing objection or dissaproval.... towards an idea" would be included. The areas that this would apply include limiting school and university protests, which is a dangerous and absurd violition of free speach It would even restrict protests at city hall itself due to the proximity of RRC. Again, please look at a map- creating 100m buffer zones around such a long list of institutions causes much of downtown to fall within a buffer zone- for example, protesting would be a bylaw violation along the entire length 19 block length of portage between arlington and edmonton. This is an absurd restriction of free speach and if the executive comittee has any respect for free speach at all, they will reject this bill.

To: The Executive Policy Committee

City of Winnipeg

I am writing to you to express my complete objection to the bylaw titled *The Safe Access to Vulnerable Infrastructure* or so-called "Nuisance Demonstrations" in our city. My objection is because we, as citizens, have charter rights to freedom of expression and peaceful assembly in this country and I am dismayed by the possibility of having those cornerstone rights blocked by a by-law.

The City of Winnipeg already requires a permit to demonstrate on streets or in any way block traffic or pedestrians. There are also anti-hate laws, anti-violence and anti-property damage laws in this country that prevent demonstrators from damaging property and using language that is offensive. These laws and provisions allow we, as citizens, to lawfully protest and express our views to the public and to those with political power.

As we watch the erosion of democracy across the world, we have been comfortable in feeling that our country is still safe and democratic. And now the City of Winnipeg wishes to begin to erode democracy here too.

I am concerned too, because this "Safe Access" proposed bylaw would limit the fundamental freedoms Winnipeggers have used for decades (Winnipeg General Strike of 1919, e.g.) to advocate for many social and policy changes that we currently enjoy. The implementation of this bylaw would also especially silence marginalized communities and would leave no options for we citizens to respond to hate.

Please continue to make the City of Winnipeg a place where democratic values still exist, where people have the freedom to express their objections to all levels of government. Voting to institute this bylaw is an erosion of our freedoms and of cemocracy, so please vote no.

Sincerely,

Jean Clipsham

Comments
I believe the proposed policy's definitions of nuisance protests are too broad, and with strategic interpretation on the part of the protested party, government or law enforcement, could be used to selectively discriminate and disrupt otherwise legitimate protests.

As it stands I believe the proposed policy infringes too much onto Candian's rights to protest.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I am writing to express my unequivocal opposition to the City of Winnipeg's consideration of the proposed Safe Access to Vulnerable Infrastructure By-Law.

Public demonstrations—vigils, rallies, round dances, marches, and peaceful assemblies—have long been indispensable tools for advancing justice and equality in our city and across Canada.

The rights and protections we value today were secured because people were free to gather, to speak, and to demand change. Workers, tenants, Indigenous communities, racialized residents, 2SLGBTQIA+ people, and environmental advocates have all relied on these fundamental freedoms to make their voices heard. To curtail these rights now is to undermine the very democratic traditions that built our community.

It is particularly alarming that this proposal emerges while Winnipeg aspires to recognition as a "Human Rights City" through United Cities and Local Governments. A city committed to human rights does not erode the constitutional freedoms of its residents; it safeguards them.

The Canadian Civil Liberties Association has warned that broadly framed restrictions of this kind risk unjustifiably infringing Charter rights and disproportionately harming those who depend on peaceful protest to advocate for social change. These concerns must not be dismissed.

I urge you, in the strongest possible terms, to abandon further consideration of this proposed by-law and to reaffirm your commitment to protecting the civil liberties of all

Winnipeggers.

Thank You.

This by law is not only detrimental to the people of Winnipeg, it is a direct attack against an incredibly important part of our democratic process in the city. This by law is so vague that that its practical use in law is far to broad of a reach and will negatively impact important events that happen in downtown Winnipeg that are integral to community building in the city. I am completely opposed to this by law and do not believe that this law will make anyone more safe. It should not be passed into law.

This by-law will do more harm than good, restricting our Charter-protected rights to freedom of expression and peaceful assembly. To quote the Canadian Civil Liberties Association, "disruptive, non-violent protest is part and parcel of a vibrant functioning democracy."

This proposed by-law risks infringing on constitutional rights of freedom of expression and freedom to peacefully assemble. It is too vague and liable to be misinterpreted by police, citizens, and government alike. This confusion would likely result in mistreatment of citizens by law enforcement and lead to costly legal battles between the city and those whose right have been violated.

As a resident of North Kildonan-Rivereast, I do not support this by-law proposal.

February 11, 2026

To Executive Policy Committee,

My name is Jenna Wilson, and I am a resident of St. Boniface and a Registered Social Worker working in Winnipeg. I am writing to formally express my opposition to Agenda Item #7: Safe Access to Vulnerable Infrastructure By-law.

Historically, legislation placing any limitations on the right to freely assemble in public has been a tool of oppression used against already marginalized populations. At a time when fascism is taking root globally, the danger of enacting this type of legislation in our community cannot be overstated. Over the past few years, we have seen how student rights to protest have been eroded on college campuses across the U.S., and this by-law would function as an endorsement of the same principles.

While I agree that individuals accessing education, healthcare, religious, and community services should be free from intimidation or harassment, that right cannot supersede the public's right to protest at these institutions. The language in the by-law that describes intimidation and harassment is too vague and allows individuals to weaponize it in bad faith against respectful protestors based on *feeling* unsafe rather than on *being* unsafe. As a social worker and mental health therapist working with survivors of intimate partner violence (IPV), I am well acquainted with the difference between an actual threat to safety and feelings of discomfort. While harassment, intimidation, and violence are major problems in this city and across the province, these things most often occur inside of homes and institutions, not outside of them. If you care about protecting Winnipeggers from violence and discrimination, I suggest strengthening our rights to protest and organize, not weaken them. In addition, harassment and intimidation are already covered by provincial legislation in the Human Rights Code, Domestic Violence and Stalking Act and Workplace Health and Safety Act.

One of the primary reasons that I have continued to live in Winnipeg for the past 10 years, is that the history and culture of activism and grassroots organizing gives me hope for a better future. I know that there are many other community members who feel the same way. The proposed by-law would infringe upon the right to protest in a way that would chip away at that culture and betray the city's history.

I respectfully encourage the committee to reject this proposal and consider broad and equitable community consultation, to generate a more balanced and collaborative solution to your concerns.

Sincerely,

Jenna Wilson

Dear Executive Policy Committee,
I'm writing to you today to express my disgust and shick at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I strongly suggest you to drop further consideration of the proposed demonstrations bylaw, as such decisions move us ever closer to the fascism we see displayed in the south, and are vehemently opposed to.

This proposal is highly undemocratic. The Canadian Charter of Rights and Freedoms guarantees the freedom of peaceful assembly, a proud Canadian value that this law would undermine. It's likely that this law, were it to pass, would create more chaos and legal challenges for the City.

Democracy belongs everywhere in our society - it belongs in our classrooms, in our churches, and on our streets. No person or institution should be immune from accountability under the system that maintains our social order. If you limit who can be accountable to the people, and whose voices can be heard and where, you are surrendering the fundamental principles necessary for democracy to thrive. The limits in this bill are unconscionable on face value. There is no amendment that can make this bill suitable for the needs of our public.

It's a shame to see the City of Winnipeg consider a law that mimics the most regressive authoritarian creep that we're seeing in other parts of the world. Why does this proposal label assembly, the most foundational of civic acts, as a nuisance? Is the very existence of your constituents nothing more than an inconvenience for you? Who is considered an inconvenience and who is celebrated? A law like this will punish Indigenous People's, racialized people, and others marginalized by oppressions disproportionately and will be a stain on this city. I expect any councillor who believes in a fair and free democracy to vote

against this proposition.

I strongly oppose this suggested by law which would infringe on Winnipegers right to exercise free speech and protest. This by-law is not in good faith. Organizations that choose to hold their gatherings in protected spaces automatically forgo that protection when the event being held has nothing to do with the building that was chosen to hold it in. I know why this is being brought up too, and that is also not in good faith. A while ago an organization chose to bring in war criminals from the Israeli army to our city to speak. They chose a space that had a Jewish school and daycare attached to it and when we protested they falsely said we were targeting Jewish children. This is vehemently untrue and they know that. This suggested bylaw is being used to stifle the voices who opposed such events as when war criminals come to speak in our city. We must be allowed to peacefully protest and vice versa. Anyone who chooses to hold their event in a "protected space" does not ensure the event carries such protections. Otherwise the right to protest becomes null and void and we are living in a fascist state. I see through this by law and I oppose it with all my being.
Thank you

I'm concerned that the wording used will allow unfair targeting of peaceful protest and may be applied unjustly. I question whether the true intent of this law is to protect citizens. Rather it seems likely it will be used to quiet, punish and hide valid dissent.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Jennifer Oborne Crolly

Dear Executive Policy Committee,

I am appalled and disgusted by the presentation of a by-law that would violate Winnipeggers' Charter rights to freedom of expression and peaceful assembly. I am strongly opposed to this by-law, which will inevitably be used to silence and punish the dissent of our community's most marginalized members. Hate crimes and violence are already illegal under the criminal code. We already have a provincial law creating a buffer zone so protestors cannot harass people accessing medical care. The rise of fascism south of the border will not distract Winnipeggers from fighting against similar power-grabs in our own city. I implore you to remember your legal obligations to uphold the Charter of Rights and Freedoms.

Restricting protests from public places is the most ridiculous and un-democratic thing I've ever heard Winnipeg council suggest. Remember we fought a couple World Wars exactly to protect the rights you are now trying to take away?...

This by-law is far, far too broad and will clearly be used to punish protestors who are doing nothing other than exercising their civil rights. I'd suggest Winnipeg change it's name to something like "Pyongyang," if this law was passed.

You can see on this map (https://chromatin.ca/blog/nuisances/), much of the city would be subject to the geographic restrictions of this by-law. Please don't make us a nation-wide laughingstock by passing this.

As a former resident of Charleswood & graduate of Oak Park High I can say that this idea by Evan Duncan does not represent the community I grew up in.

Dear Executive Policy Committee,
I'm writing to you today to express my shock, distaste and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. Did councillors forget the general strike of 1912? From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg,

which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy.

Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,

Jessica Derksen

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

This proposed bylaw is deeply concerning because it reframes peaceful protest, one of the few tools available to marginalized communities, as a nuisance simply for being visible, disruptive, or uncomfortable to those in power. Public protest is not meant to be convenient. It is meant to draw attention to injustice, especially when traditional political channels have failed or excluded certain voices. By restricting protests in public spaces and near decision makers, this bylaw targets the very places where democratic accountability is most meaningful and shields institutions and politicians from criticism rather than addressing genuine safety concerns. The City already has ample tools to deal with violence, obstruction, or harassment, and creating a protest specific enforcement regime sends a clear message that political expression, particularly when it challenges dominant narratives, is the problem being managed. This is especially alarming given Winnipeg's racial history and present realities, where laws that rely on discretion and vague concepts like nuisance are rarely enforced equally and have historically been used to police Indigenous peoples, racialized communities, and solidarity movements far more harshly than state aligned or socially accepted gatherings. The threat of severe fines will not deter harmful conduct. It will deter participation by students, low income residents, and racialized people who already face disproportionate surveillance and punishment. Protecting institutions from public discomfort is not a neutral policy choice. It reflects whose voices are valued and whose are treated as expendable. If City Council adopts this bylaw, it will signal that the City is more concerned with preserving political comfort and quiet streets than with upholding democratic engagement, racial justice, and the right of communities to speak out against oppression in the public spaces that belong to all of us.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly, as well as completely violate Treaties and Indian Status Rights for Indigenous People's. Winnipeg cannot claim to stand for reconciliation whilst agreeing to consider this by-law. It is for these reasons that I am in opposition.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment, all in which we are still lacking.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach and potential police violence for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United

Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

I am alarmed at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our freedom of expression and peaceful assembly (protected by the Charter of Rights and Freedoms!).

Winnipeggers have long used public demonstrations to advocate for social and policy changes that have bettered our community and our nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on our constitutional rights, but silence marginalized communities' voices, lead to police overreach, and lead to inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we

are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Jillian Garofalo

Peaceful protest is a protected right, not a nuisance. This bylaw puts that right at risk and should be opposed.

In the current political climate of erosion of citizen rights , political bodies who truly want to represent the people they serve should do everything to protect the rights of their constituents to voice their opinions. This by-law does the opposite. Restricting non-violent protest only serves to widen the gap between government and the people.

This bylaw attempts to remove the right to peaceful protest and is unconstitutional. The underlying issue is people are protesting political activities being held at synagogues such as real estate sales of occupied Palestinian land (illegal war crime), hosting of Israeli military (suspected war criminals), or fundraising for the IDF (definitely not a moral army). These activities are using the synagogues as cover to avoid scrutiny and the justified protest. The protesters are not against prayer or religious activities but the political ones being conducted in secret. The proposed bylaw would suppress the much needed and well justified peaceful protest to the horrible actions occurring in Israel and the West Bank. There are likely other issues that this bylaw would encumber but this is the main one I know about and likely the Zionist lobby is the initiator of the bylaw proposal. It should not pass as it goes against the open and engaging character of our city. Thank you, Joe Ackerman

Controlling the right to protest peacefully is against very basic human right to do so. This is a very slippery slope. Terrible idea - makes Winnipeg look terrible , everyone who cares about anything is upset.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers (and those of us who live adjacent to Winnipeg) have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This motion to repeal Agenda Item #7 is unconstitutional and unsoundly. How can you be defending the vulnerable members of our community and our access to public discourse and spaces if our city's right to public assembly is compromised? By threatening to limit our collective voice, you risk alienating your neighbours, friends, family, and delegates.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,

Please do not fine me for this written protest.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free

speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Thank you,
John Seymour

Good afternoon

I will not put this lightly, the suggestion of this law is a digusting insult to the rights of Winnipegers. As canadians, we have the right to organize in protest, and to limit where we do such, in turn, limits what we can protest, or how meaningful that protest to be.
To pass this By-law is to prove that the council is against giving power to the citizens of winnipeg if it inconveniences them, to prove that the council cares not about justice and only for the status quo. At a time like this, when protestors in the US are shot in the streets, to limit our protesting freedoms here in Winnipeg is a turn in the wrong direction, a turn that goes against the people of this city.

RE: Safe Access to Vulnerable Infrastructure By-law

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am strongly opposed to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights but also silence marginalized communities' voices, enable and excuse police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to prevent further property damage, hate crimes, or violence from taking place, acts that are already criminal. Instead, peaceful protests would be severely limited. This draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg. Especially since the City has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S. and around the world, I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw and explore options for managing blockages for access to critical and vulnerable public infrastructure that are not in opposition to the Charter and our civil liberties.

Signed,

Jonathan Rosset

Dear Executive Policy Committee,

I'm writing to tell you that I'm disgusted and horrified by the suggestion of taking away the right to protest and the right to free speech in Winnipeg.
Restricting our Charter-protected rights to freedom of expression and peaceful assembly is one of the first steps of fascism, and Winnipeg communities will not stand for this.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Good day. I am opposed to this by-law as currently written. It is entirely too broad in the language used and infrastructure selected. The term "nuisance" should not be considered. Defined designated areas / paths to the infrastructure should be made clear to prohibit physical blocking during a protest. Areas like emergency lanes and fire exits. Not broad distances as this by-law currently is. This is a slippery slope by-law that can lead to suppressing our rights.

Once you take away the means of peaceful protest, you leave only the option for violent protest. I don't always agree that people should be blocking streets to protest. But it is their right to do so.

The right to protest especially on campus' and near legislature and government buildings is important for everyone, no matter their political leanings. Taking away a communities right to protest is a slippery slope to very American behaviour. I do believe hate speech should be a crime, but marking off huge swaths of the city is not the answer.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
-Jordan Wood

This proposal is so vague that it calls into question about who may utilize these powers justly. I support the freedom to protest, to speak, print, share and march for actions, people and causes as I see fit. Be it my by myself or in a mass of like-minded individuals.

My issue is the openness of what is considered a nuisance. I find that a province built on history of public discourse cannot look itself in the face with said proposal when we as a province have faught for the right to display our grievance.

The mere notion that it's again a"nuisance" protest speaks to how little a violence we DO produce when we choose to express our dimsay.

Whether be a trolly tipping during the general strike or a statue toppled for the victims in residential schools back in 2021, I see no mass violence taken when protests occur. I see the CHOICE of words are open for interpretation in this proposal, and could easily be used to silence those who feel the need to stand up for their rights.

Regardless of views, partisan or not, I believe it's our right to express ourselves if a collective finds the need to address issues we disagree upon. Be it a government, a corporation or a group.

I am against this proposal. Let it stand as it is, so that we as Manitobans can continue the freedom to publicly express our disapproval as a community without fine or threat.

"We may be a small community and a half-breed community at that – but we are men, free and spirited men, and we will not allow even the Dominion of Canada to trample on our rights".

I am writing to voice my strong opposition to the Safe Access to Vulnerable Infrastructure By-law.

First off, I would like to note the irony in the titling of this proposed by-law. Safe access to infrastructure is a constant battle in this city where transportation is a constant barrier to access both in physical form and service levels. The City is currently failing to provide safe access to roadways, sidewalks, and building access particularly during winter months. Furthermore, the City chronically underfunds its own infrastructure leading to closures (Happyland pool) and outright negligence (Arlington Street Bridge). It is incredulous to believe infringing on the rights of its own citizens is somehow a priority when we as a city can't even keep up with basic maintenance. It is interesting how certain legislation gathers motion and support in this council over other legislation that is dogged at every turn and liable to perennial delay.

I find myself very much alarmed at the broad and sweeping restrictions that this bylaw proposes. The ability for people in Canada to assemble and protest is not only a federally-enshrined right but also a key and necessary capacity for people to organize for change. Stratified society hears most loudly from the best-connected which creates outcomes in decision-making that favour very specific interests first. Quelling the ability for people to protest without penalty will have a chilling effect on groups of people who do not have the ability to wield the levers of power for themselves, or by proxy through a lobby organization, social club or personal connection.

Furthermore, preventing organized or ad-hoc protest only turns up the pressure. As people struggle to find community and positive connection amidst the historical, alarming, and violent local and world events around us, protest and demonstration are critical ways for

peaceful change to be rallied for. In a similar manner that labour peace was achieved through legislated rights to strike (notably carved-out in this proposed by-law), free organization to protest in the "town square" avoids pressure building up that is released in more harmful ways. The effective limitation on the gathering and motion of marches, protests and rallies in the downtown effectively prevents such events from happening where they are felt and heard, and would instead remove them to where they can be ignored. Such a change would create significantly more tension among people who are hoping to have their voices heard.

This bylaw appears to exist to implement a roadblock to social connection, the progress of human rights and the ability of people disconnected from the direct exertion of power to create change for themselves. It is an alarming step towards fascist attitudes from our own city council, when we can see clearly in a sister city to us merely hours away the desire to suppress people's ability to gather, organize, connect, feel, rally, and chart their own future being exerted upon good and innocent folk.

We must see this step for what it is - a measure to control, quell, quiet and conquer people who feel like they must speak up when their needs are not met and when their current social reality does not measure up to an ideal of the Winnipeg in which they could be living in. The job of a city councillor is often seen as one of an elected manager; however free speech does not need management.

Rather than limit the speech of your own constituents should this not be a moment to listen, to empathize, and to understand the very real and pressing concerns of your neighbours. This is a first step in a very steep and rocky descent into the obstruction of the right to free speech, a right that people have fought for and a right we should be supporting now more than ever.

I ask of you - please vote in opposition of this bylaw.

Sincerely,
Joshua Schmidt

To members of the Executive Policy Committee, regarding the proposed Safe Access to Vulnerable Infrastructure By-law:

It is my understanding that regulations prohibiting disruptive protest at reproductive health clinics, vaccination sites, and religious buildings already exists at the provincial level. I am concerned that this newly-proposed legislation is not only unnecessary, but has a serious potential to be abused. Restricting our Charter rights to public action is fundamentally antidemocratic, and as a citizen I oppose and reject this proposed by-law unconditionally.

This by-law is overreaching and clearly violates the Canadian Charter of Rights and Freedoms. The bizarrely long list of institutions and the vague language as to what constitutes a "nuisance demonstration" gives the city far too much power over its citizen's rights as Canadians. Thus I strongly oppose this by-law.

The proposed changes are too sweeping, this feels very wrong to include banning protests from places like university campuses and from city hall. Historically these are important places to protest, and deserve to be kept. Places like abortion clinics or k-12 schools are different, and this should be reviewed accordingly.

This Council is absolutely out of order in even considering this overstepping of our charter protected rights. It is delusional thinking that a democratic institution would attempt to silence its citizens and would constitute a violent escalation by the city to peaceful assembly. I guess any reason to justify the uninterrupted, unjustifieable, yearly increases in police funding, eh?

How dare you pull our right to peaceful protest into jeopardy? This is a protected right under the Canadian Charter of Human Rights under sections 2(b) and 2(c).
The suggestions to ban and fine peaceful protesters are absolutely appalling, at any period in history, but especially while protests are allowing the people to be heard and sparking change globally. How dare you feign interest in the protection of our most vulnerable while your plan is to actively silence / punish those brave enough to speak up. You make me sick. Do better. Listen to the people you represent - the forcing of silence only leads to revolt.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed, Jules Wyskwar-Sumonja.

I oppose the agenda item because it is a blunt cudgel used to restrict people's rights under the Charter. Something should be not legal only when people are doing something that isn't legal, not when it's viewed as a nuisance. Given everything going on in the world right now, we should be looking to strengthen and enshrine our democratic rights, not restrict them and give them away.

Dear Executive Policy Committee,

I am writing both as a Winnipeg resident and as a postsecondary researcher and educator to express my strong disagreement with the recommendations you are currently considering for the proposed 'Safe Access to Vulnerable Infrastructure By-Law.'

As a professor of Urban and Inner-City Studies at the University of Winnipeg, I teach my Urban and Community Planning students about the many times that policymakers and planners have used 'nuisance by-laws' to attempt to control dissent in Canadian cities. Nuisance by-laws have been introduced in the name of 'safety' many times in the past, and have often in effect limited the ability of marginalized communities to be heard and seen and to thrive in a diverse and vibrant public realm. Nuisance by-laws have targeted Indigenous communities in Ontario and Chinese community members in British Columbia, as just two examples.

I teach my students this history as an important cautionary tale, so that they understand how common it is for an apparently technical, spatial approach to undermine the well-being of people with less power in our cities. The proposal that is currently under discussion is unfortunately a very effective opportunity to show my students how the same patterns continue today.

The proposed by-law is inappropriately broad, inconsistent with the values of a free and democratic public environment, and is fundamentally unnecessary, considering that we have existing protections against hate, violence, threats and intimidation.

I urge you to chart a different course and to drop further consideration of this proposed by-law.

A healthy city doesn't have to hide protest by pushing it out of public space. A healthy city needs *more* space for dissent and hard conversations about current events and issues. The proposed by-law would be a step backwards and would have a chilling effect on what should be a vibrant culture of debate and disagreement in public.

Sincerely,

Julie Chamberlain

Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Justin Ceron

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

This by-law is fundamentally anti-democratic, and it is embarrassing that anyone has even considered adopting this by-law. It screams either intentionally anti democratic thinking or willful ignorance about how this by-law will be enforced in the real world.

Dear Executive Policy Committee,

I'm writing to express shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. I was stunned to see this under consideration, particularly given the quick erosion of rights to freedom of expression in our neighboring country. This bylaw would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposal.

This bylaw would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. "Vulnerable" infrastructure is not more important than our vulnerable populations having the opportunity to make their voices heard.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but also lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" bylaw would not do anything to further prevent property damage, hate crimes, or violence from taking place, as these acts are already criminalized. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the horrifying suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy. I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear members of the EPC
Re: Safe Access to Vulnerable Infrastructure By-Law
This bylaw is using a nuclear bomb to tackle a problem that doesn't even exist in the first place.
Is anyone truly lacking safe access?
Can infrastructure is be inherently "vulnerable" (other than to fire or poor construction or earthquakes, etc.)?
The qualifier "nuisance" added to "protest" is meaningless because any protest that achieves its goal of attracting attention to its cause generally does so by being a little bit of a "nuisance."
Life does not give anyone a pass on being annoyed or inconvenienced at times. Sometimes it's incidental: protestors are blocking the sidewalk where you want to pass and you have to go around or push your way through the crowd with a 100 "excuse me"s. Sometimes it's instrumental: a protestor's sign or chant rankles because at some level you know their critique has hit home.
There is no justifiable reason to legislate an escape from an experience of slight discomfort.
There are circumstances with a legitimate need to protect people from the perceived threat of protestors: no one seeking medical care should fear having to run a gauntlet of condemned for the perceived morality of the treatment they need. No one should fear harassment or belittlement for attending earnest and wholesome worship along with fellow believers. But it is not the building itself that is is vulnerable. The protections needed are already enshrined in hate speech laws. When the building is used for community

purposes or political events, it sheds its religious protection.
Perhaps the most alarming part of this bylaw is the argument Councillor Duncan advanced for why he wants it enacted now: “we want to avoid the chaos happening in Minneapolis right now.”
Sir, that chaos is being caused by a gang of deputized thugs, anonymously harassing and abducting ordinary people for no good reason.
If you want to avoid being subject to protests, listen well to your constituents and support policies on the basis of how they lead to flourishing for all Winnipeggers, not how they serve aims of political opportunity.
I implore you all to oppose this bylaw which tramples on the very basis of democracy, the rights to expression and participation in political systems.
Sincerely
K Braun
PS While I have your attention, might I mention the Chief Peguis Trail Extension West is part of an utter boondoogle that will lock future generations into inevitable bankruptcy while depriving the present of good things like libraries and properly compensated firefighters and maintenance in city parks and expanded safe bicycle paths and ploughed sidewalks so seniors and folks with wheeled mobility aids aren’t trapped inside all winter, and grants for community organizations that provide youth with inspiration and opportunity, and so on.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

At a time like this, facing a climate collapse, multiple genocides and rampant unchecked police violence and corruption, the thought of suppressing the peoples' ability to gather and protest is abhorrent. It is a disgusting overreach which challenges some of our most basic democratic rights. It will do nothing but make people more angry and disenfranchised than they already are. Please, do not pass this motion.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

I am vehemently opposed to banning protests, especially at a time when it is necessary to stand together in non-violent ways to ensure our safety. The current laws concerning violence and protection of property in the context of protests are ample. The message being sent by this ban is concerning and generating fear among people who are marginalized and is not demonstrative of trust in the process of civil discourse.

This bylaw will annihilate our right to protest within a 100 meters of "nuisance protest zones" which happen to cover most of downtown including city hall. This is an attack on our charter rights, undermining one of the pillars of a functioning democracy: freedom of speech and assembly. I strongly disagree with and oppose this proposal.

In brief, I have concerns regarding the prohibitionist nature of the by-law as it currently is being proposed. There are already policies in place to protect individuals entitled to access healthcare and other institutions safely. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

Rather than a blanket approach, greater specificity is needed in order to have my public support for this policy.

Sincerely,

Winnipeg Resident

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg

Peaceful protests are important to allow, no matter what the content or the location. I understand that certain protests can be harmful to others, but I believe those should be dealt with on a case-by-case basis so that we can keep our rights to protest. By restricting where people can protest, it opens the door to restrictions on what we can protest, or if we're allowed to protest at all, which is a very scary thought. Always, but especially right now, we need to be amplifying our voices, NOT silencing them.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Kat Derbecker

Dear Executive Policy Committee,

I'm writing to you today to express my utter dismay that the City of Winnipeg would consider a violation of our Charter-protected rights in the form of the Safe Access to Vulnerable Infrastructure By-Law.

The right to freedom of expression and peaceful assembly is fundamental to Canadian culture and a functioning society in general. For this reason, I am in opposition to the proposed bylaw and implore you to reject it.

This by-law would limit the ability of Winnipeggers to advocate and stand up for human rights, oppose unjust violations of the same, and make known our values and convictions.

Public protests and demonstrations have long been used to help win and defend human rights for workers and tenants, women, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, this by-law would infringe on constitutional rights and silence the voices of marginalized communities. It could lead to police overreach, and even result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place. These acts are already criminal and we have sufficient means of addressing them. Instead, peaceful protests would be severely limited and our rights would be violated.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of our democracy.

Considering the alarming suppression of human rights we are right now witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy. There is no room in Canada for this type of toxic, anti-rights rhetoric.

I strongly implore you to reject further consideration of the proposed bylaw.

Signed in good faith,
Katelynd Brosowsky

I am concerned that broad rules such as the proposed ones may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. We as a society need to protect freedom of expression and association, a crucial cornerstone of a free and fair democracy. The proposed by-law puts the above at risk! Let's change the proposed by-law so it upholds the Charter of Rights, and protects our democracy.

Dear Executive Policy Committee,
I am writing to you today over concerns that the "Safe Access to Vulnerable Infrastructure By-law" would infringe on our Canadian Charter rights to freedom of expression and peaceful assembly, therefore I'm in opposition to the bylaw.

I've been a witness to seeing how protests in schools are necessary to allow students to fight back any nonsense schools may try to throw at them, to ensure improvements in student's school life, and ensure all students are welcome.
I've been a witness to seeing how doctors and nurses will protest around hospitals to ensure their unions are heard, their safety and patients safety are assured, and that they're paid fairly for their life saving work.
I've been a witness to seeing how protests are essential to bring accountability, safety, equitability, among many things forward to ensure that everyone is heard, to ensure things improve.
I've both been a witness and part of communities that take effort in improving things for people with disabilities, 2SLGBTQIA+, Vulnerable road users, etc. That in itself is often seen as a form of protest on it's own, heck, people just simply being themselves and existing, is also often seen as a form of protest.

Protests are by design supposed to be at least somewhat disruptive, but they are not a nuisance, they are essential and part of our culture.

Protests have been essential to help ensure that people with disabilities, the 2SLGBTQIA+ community, vulnerable road users, students, elders, aboriginals, other minority groups, and other vulnerable groups in ensuring access to the following: Safety, Access, Respect, Fairness, Justice, Equitability, Diversity, Inclusion, Education, Employment, Income,

Health, Food, Water, Self Expression, Beliefs, and more.

If protests are restricted, the most vulnerable in our society are at risk of losing their self expression, safety, visibility, and anything else that protests have helped them access in the first place... and will not help our community in getting any better as a result.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Katie Derksen

Dear Executive Policy Committee,

I'm writing to you today to express my concern and opposition for the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law that - due to its broad language - could potentially restrict Charter-protected rights to freedom of expression and peaceful assembly.

This by-law has the potential to limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. If the proposed by-law is passed, I am concerned that it could infringe on constitutional rights, silence marginalized communities' voices, lead to unjustified enforcement by police as a result of opportunities for broad interpretation of the by-law, and limit options for responding to hate. The Canadian Civil Liberties Association (CCLA) has also expressed concerns that the broad rules under the by-law may unfairly restrict Charter-protected peaceful demonstrations and free speech, and echo that such laws often harm marginalized groups who rely on protest to advocate for social change.

In light of recent international events and the alarming suppression of rights and freedoms we are witnessing in the U.S. and in other parts of the world, it is essential that we continue to protect freedom of expression and association, a crucial cornerstone of a free and fair democracy, here in Winnipeg.

I urge you to uphold the Charter, protect our democracy, and reconsider passing the

proposed bylaw.

Thank you,

Katie Fowler

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Kayla Nelson

The right to protest is a charter right, the recommendations are, simply put, a violation of our basic rights. Trying to limit free speech by fining people for non-violent protest is not okay and will not be stood for.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This is an absolutely vile proposition. If anybody has seen what is going on in the US right now, it's plain to see that this is a step in that very direction. I for one, don't want to live under a fascist leader, and I hope that others don't either. Pardon my language, but it is absolutely fucked up that the right to protest is even something that is being voted on.

To: Executive Policy Committee
I'm writing to register my concern with the Safe Access to Vulnerable Infrastructure By-law. While I understand the intent of the bylaw is to protect vulnerable people, the scope of the law is very broad. This would make the by-law very open to interpretation and subject to the city interpretation how it is enforced. The Special Characteristics, Social disadvantage and designated facility definitions are meant to be a catch all, however nearly any gathering and location could be interpreted to fit those definitions. The jurisdictional scan the policy analysts did note a limit to the scope that it looks like the city too each of those limits, then combined them to be more inclusive.
The provincial government's "The Safe Access to abortion Services act" is a GOOD example of this sort of legislation – the scope is well defined and limited to only what it's trying to protect. This should have been used in the jurisdictional scan.
This ability to interpret such a broad scope of definitions would lead to enforcement overreach, and would violate the rights of Winnipeg to gather, and make their voices heard.

Part D of the Bylaw "hat nuisance demonstrations include, but are not limited to harassing or intimidating another person(s), obstructing the passage of pedestrians or motor vehicles thereby rendering passage impassable or difficult, using amplifiers or microphones" does not include an AND, but a comma – so any gathering obstructing pedestrians and vehicles could be included in this bylaw. The "but are not limited to" can mean any protest. The scope of the bylaw absolutely needs to be clearer to prevent overreach.
One of the things that makes Winnipeg so unique is the variety of gatherings, and protests. IT makes for a livable city where Winnipeggers can celebrate, protest, and gather. This legislation would mute that uniqueness and a chill on civil liberties at a time when it's absolutely needed.
I strongly suggest removing the considerations of this bylaw.

I believe the proposed by-law violates Winnipegers' charter rights to freely express themselves while leaving the door open to quash any protest the city doesn't like via its opaque wording.

What has been proposed by the city goes against the both the spirit of freedom fundamental to Canada as well as the culture of Winnipeg itself. It is frankly shameful to think that the city which is host to the Canadian Museum for Human Rights and the site of the historic 1919 general strike would even consider such a misguided bylaw. Further, the vague perimeters of the proposed rule in themselves give enough reason for its dismissal as the last thing the citizens of our great city need is a ruling whose application is unclear, unfair, and whose vagueness gives the city a blank cheque to decide as it pleases what constitutes as "acceptable" protest.

I ask the Councillors of the Executive Policy Committee to think of the people of Winnipeg, people who are as diverse in their backgrounds as they are in their opinions and beliefs, and remember that every one of them by the nature of the freedoms granted to them by this country and its charter are entitled to be able to peacefully demonstrate in support of those opinions and beliefs - regardless of how the city or its councillors may feel about them. We live in times wherein democracy, and expression are increasingly under threat where people flee their countries and immigrate to ours to escape regimes that restrict their citizen's speech unfairly. In this moment we find ourselves in, Winnipeg should not seek to adopt draconian policies but rather act in the preservation of the rights of its citizenry. I strongly oppose this proposed by-law, and sincerely hope the committee decides to go in a different direction.

Thank you very much for your time.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Kelsey M

The attempt to limit freedom of speech and freedom of expressions for the people of Winnipeg is wholly undemocratic and an overstep for a city government. This is a clear attempt to undermine the purpose of protest and infringe on charter rights. You may not agree with every protests cause but they have a right to occur nonetheless. Suggestions otherwise are disgraceful and trumpian.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression

has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I understand the City of Winnipeg and Even Duncan's intent to protect vulnerable communities, but the legislation as it stands has more potential to harm vulnerable communities and all Winnipeg residents who wish to express their rights and protest. 100-metre buffer zones in most public places, including University campuses, will severely impede our charter rights. Saving money from a police budget is not an adequate enough excuse to diminish rights in the face of ongoing political strife here and elsewhere.

Dear Executive Policy Committee,

This message is to express my absolute opposition and disgust regarding the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

This By Law does not help you or anyone in this city. We are all recipients of community members who used their voices, energy, and bodies to fight in hopes that we can afford the social changes and quality of life we enjoy today. You and I owe our lives to the people that love us enough, way before they met us, who speak, gather, and advocate for our well-being. This By Law would limit the fundamental freedoms Winnipeggers have used to advocate for social and policy changes that we currently benefit from as a nation. This ByLaw will criminalize peaceful protests and gatherings that are not only essential for change but also integral to living such as celebrations, grieving practices, and bicycle group rides.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg or anywhere in the world, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

This ByLaw will not only further increase the harm that is inflicted upon marginalized folks who rely on these freedoms for social and policy change, but also uphold the power of the few who benefit from silencing the voices of equity and justice.
This is control and subjugation disguised as safety for all.

I urge you to stop further consideration or reconsideration of any By Law that prevents us from coming together as a community.

With Sincerity and a heavy heart,

Kevin C

This proposed bylaw is deeply concerning because it reframes peaceful protest, one of the few tools available to marginalized communities, as a nuisance simply for being visible, disruptive, or uncomfortable to those in power. Public protest is not meant to be convenient. It is meant to draw attention to injustice, especially when traditional political channels have failed or excluded certain voices. By restricting protests in public spaces and near decision makers, this bylaw targets the very places where democratic accountability is most meaningful and shields institutions and politicians from criticism rather than addressing genuine safety concerns. The City already has ample tools to deal with violence, obstruction, or harassment, and creating a protest specific enforcement regime sends a clear message that political expression, particularly when it challenges dominant narratives, is the problem being managed. This is especially alarming given Winnipeg's racial history and present realities, where laws that rely on discretion and vague concepts like nuisance are rarely enforced equally and have historically been used to police Indigenous peoples, racialized communities, and solidarity movements far more harshly than state aligned or socially accepted gatherings. The threat of severe fines will not deter harmful conduct. It will deter participation by students, low income residents, and racialized people who already face disproportionate surveillance and punishment. Protecting institutions from public discomfort is not a neutral policy choice. It reflects whose voices are valued and whose are treated as expendable. If City Council adopts this bylaw, it will signal that the City is more concerned with preserving political comfort and quiet streets than with upholding democratic engagement, racial justice, and the right of communities to speak out against oppression in the public spaces that belong to all of us.

This impeaches on everyone's freedom of speech and decreases the likelihood of individuality. How will we bring injustice to light if we are not given the space to protest? It is absolutely ridiculous to ban protests.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Kianna Bovell

I find this not only racially charged given the fact that a majority of Indigenous and POC who are PEACEFULLY trying to promote change would be negatively affected. But also to try and prevent people from disagreeing with something is disgusting. Human beings have a God given right to like or not like something.
We as a city, Province and country need to do better. Instead of fostering a society of inclusion and coexistence you are attempting to put a bylaw in place that would silence those who just got a voice.
It truly makes me ashamed to be a part of a city that would do such a thing

The decision by the executive committee to ban protests is deeply concerning. Peaceful protest is a fundamental civil liberty and a cornerstone of a democratic society. When citizens are prevented from speaking out—especially on urgent issues like the protection of abused animals—it weakens transparency and accountability. Advocacy for animal welfare is not extremism; it is compassion in action. Silencing peaceful voices does not solve problems—it only pushes them further from public view. We should be protecting both civil liberties and vulnerable animals, not restricting the very freedoms that allow people to stand up for them.

I strongly apposed this proposed bylaw as it is a slippery slope to infringing our human Charter of rights to free expression. This is not a move to protect families from intimidation or the use of resources but for control. The use of "intimidation" is concerning as well. We are allowed to peacefully protest to showcase our concerns and unity.

As far as I understand the Safe Access to Vulnerable Infrastructure By-Law is too general and has the potential to be used against those who want to organize demonstrations or protests in an orderly fashion. Orderly protest is critical to democracy whether I agree with the demonstrators or not. If there is a demonstration or protest that current laws deem to be a threat to vulnerable infrastructure then I would think there are already current laws to keep the vulnerable public safe.

Dear Executive Policy Committee,

I'm writing to you today to express my disgust, utter heartbreak and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, a province and as a nation.

From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate and injustice.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests are being targeted and would be severely limited. This type of authoritarian and undemocratic restrictions of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these restrict Charter-protected peaceful demonstrations and free speech, and that such laws will harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Witnessing the extreme and violent suppression of rights and freedoms in the U.S. over the last few months, it is sickening to think that a by-law like this would be passed in our city to stifle our voices as people to stand peacefully for what we believe is right. I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to absolutely drop further consideration of the proposed demonstrations bylaw.

Signed,
Kirsten Kay

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

In a time of uncertainty, fear, and further divide, it is critical that now more than ever our city stands with the voice of the people and does NOT follow the decisions happening in the South to silence the voices of communities.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy. Please make me proud to be a Winnipeger, and not be fearful for my rights as a citizen to peacefully assemble in these spaces.

I implore you to drop further consideration of the proposed demonstrations bylaw. Be the positive change we want to see in the world, protect our freedoms, do not fall into the slippery slope that many other countries and cities are doing. Protect the voices of your community.

Signed,

Kirsten Kruse

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Kiana

I urge the Council to reject this by-law based on the following grounds:

Infringement of Charter Rights.
This by-law directly conflicts with Section 2 of the Canadian Charter of Rights and Freedoms, specifically the freedom of expression and peaceful assembly. By creating "buffer zones" where certain types of speech are prohibited, the city is acting as a censor. The Canadian Civil Liberties Association has repeatedly warned that such measures often fail the "minimal impairment" test required by law.

Vague and Subjective Language.
The definitions of "nuisance" and "acts of discouragement" are dangerously broad. These terms grant enforcement officers excessive discretion to decide which protests are "acceptable" and which are not. This creates a chilling effect where citizens may avoid legitimate peaceful protest for fear of arbitrary fines or harassment.

Redundancy of Existing Enforcement.
Public safety and access are already protected under the Criminal Code of Canada, which contains provisions against intimidation (Section 423), causing a disturbance (Section 175), and mischief. This by-law is a redundant use of city resources that seeks to solve with "zoning" what should be handled through existing criminal and provincial statutes.

Impairment of Democratic Dissent.
By-laws that mandate large exclusion zones—often up to 100 metres—effectively push dissent out of sight and out of mind. Protests are meant to be heard by those in power; relegating them to distant street corners undermines the very purpose of public

demonstration in a healthy democracy.

In conclusion, the city should not be in the business of restricting where and how citizens can peacefully express their views. I call on Council to vote against this by-law and instead rely on existing legal frameworks to manage public safety.

Every meaningful protest action is a "nuisance demonstration" to those being protested. While I can support Provincial legislation that came into effect last year creating a protest buffer zone of at least 50 metres around facilities whose main purpose is to provide abortions, in order to protect women's rights and physical safety, expanding such "buffer zones" to any protests near schools, libraries, cultural centres, cemeteries or other locations crosses the line to infringement of Charter rights and freedom of expression.

Winnipeg has a long, vibrant and proud history of civil disobedience movements that called attention to critical threats against, and abuses of, human rights. From the Winnipeg General Strike to the Battle at Old Market Square; from Idle No More to Every Child Matters; protesting against oppression and genocide is part of what it means to be a Winnipegger, and is a basic human right deserving of the utmost protection and respect.

Protesting is a right protected by the charter of rights and freedoms. The idea that a rich white man is looking to limit our rights to protest leads me to wonder what stake he has in this game. I am vehemently opposed to this bylaw

Please note that I am writing on behalf of myself alone, as a private citizen and a resident of the City of Winnipeg.

I am extremely concerned about the impacts of this proposed bylaw and its impacts on the ability of Winnipeggers to peacefully protest for important causes and to protect our rights.

There is existing provincial legislation that protects people from harassment and from being impeded in accessing essential services. I see no significant gaps in this legislation that would require additional involvement by municipal lawmakers.

This type of regulation also falls outside of the scope of typical municipal governance. It is not the responsibility of the city to determine where protests can and cannot be held.

Many of the sites covered by this proposed legislation are the very sites where protests, rallies, and other mobilizations would logically occur. For example, students protesting unfair policies at their schools, healthcare workers speaking out against dangerous or unjust workplace actions, or residents resisting hate-promoting actions by religious leaders or groups.

I ask the EPC to please stand united in opposition to this proposed bylaw, that infringes on the democratic rights of all of us within a free society.

Sincerely,
Kristen Hardy

Dear Members of the Executive Policy Committee,

I am alarmed by the City's consideration of the Safe Access to Vulnerable Infrastructure By-Law. This measure would severely limit the ability of Winnipeggers to gather peacefully and advocate for a better community—rights that are protected under the Canadian Charter of Rights and Freedoms.

Our city has a proud history of using public demonstration to win essential rights for Indigenous peoples, environmental protections, the 2SLGBTQIA+ community, and many others. This by-law threatens to stifle that progress. Rather than making us safer, it risks marginalized voices being silenced and grants too much discretion for police overreach.

The CCLA has already warned that such broad rules often harm those who rely on protest most. At a time when democratic freedoms feel increasingly fragile, I ask you to stand up for our rights and reject this by-law.

Yes, physical safety is a right for everyone, but the police already possess the necessary powers to protect the public from genuine threats or violence. They do not require a new by-law to fulfill this mandate. The sweeping nature of this proposal reveals that it isn't truly about safety or property access—it is about prohibiting peaceful assembly because it is inconvenient. Suppressing speech simply because it is deemed a "nuisance" is a

dangerous overreach that undermines the core values of our democracy.

Sincerely,
Kristen Masters

From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members as well as protections for the environment. At times like these, when there are many overlapping hardships, concerns, and issues that our communities are faced with, removing access to community demonstrations that are peaceful and constructive, is to remove a significant aspect of public life, which is, to utilize our voices for the values that we stand for. If we cannot organize, gather, and speak publicly, in our own communities, where people are most impacted, where we live/work/play, this will hinder community engagement in our city and lead to frustrations and disconnect while hindering progress. This is not the city that we want to see. I urge you to remember your legal obligations to uphold the Charter and protect our democracy by dropping further consideration of the proposed demonstrations by-law. Thank you, signed, Kristen Wiltshire

Dear Executive Policy Committee,

I am a resident and property owner in Winnipeg. I am your fellow citizen and your neighbour. I am not a "nuisance", as the proposed 'Safe Access to Vulnerable Infrastructure' bylaw would paint me.

In a time of growing authoritarianism, the proposed bylaw eats at our constitutionally protected protest rights, and our right to speak out against injustice. Our neighbours in the USA are being shot by government agents at protests; yet in the name of peace, in the name of preventing such tragedies from being repeated in our city, you propose to institute a draconian law which does nothing to prevent the crimes it claims to address. Hate speech is already illegal. Vandalism is already illegal. What new safety does this proposed bylaw supposedly grant Winnipeg?

All voices belong in the public space, but this by-law silences voices that are deemed 'inappropriate'. Sixteen percent (16%) of the city will be restricted from peaceful protest, including City Hall. This by-law allows for racist application and targeting of unpopular/controversial groups or issues when it is deemed expedient. It is said that laws who's only punishment is a fine is really only a law for poor people. The fines in the proposed bylaw are not tied to income; therefore, the wealthy may simply choose to pay them, while the marginalised are silenced.

You are our elected representatives who are already supposed to listen to us, and discuss, and consult. Are you so afraid of disagreement that you must use the power of the state to silence Winnipeg's citizens? How far down the road to authoritarianism will Winnipeg walk today?

Signed,

Kristofer Isaak

I believe it is our right as a people to be able to peacefully protest anywhere and however we feel just. This is not just my own opinion but a right given to us under the Canadian Charter of Human Rights under section 2.C “the right to peaceful assembly”. And therefor furthering this By-law is restricting one of our foundational right as Canadian citizens.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I am a resident and homeowner in Winnipeg.

In a time of growing authoritarianism, this proposed by-law erodes our constitutionally protected protest rights and our right to speak out against injustice. We are watching our brothers and sisters in the USA being shot by government agents at protests, and you would seek to grant greater power to our own police force to bring force to protests.

All voices belong in the public space, this by-law silences voices when they are deemed inappropriate. Sixteen percent (16%) of the city will be restricted from peaceful protest, including City Hall. This by-law allows for racist application and targeting of unpopular/controversial groups or issues when it is deemed expedient.

In suggesting set fines that are not tied to income you embolden demagogues and the wealthy, while at the same time disproportionately silencing the marginalized.

We say NO! to this By-law, because we must otherwise our rights are infringed and our voices are silenced.

We are your fellow citizens and your neighbours, we are not a nuisance. You are our elected representatives who are already supposed to listen to us, and discuss, and consult. Are you so afraid that you must use the power of the state to silence its citizens? How far down the road to authoritarianism will Winnipeg walk today?

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

The right to protest is fundamental to Canada. And punishing people for exercising that right in public is inexcusable. 'Nuisance' is also too vaguely worded, and could be used to mean whatever is wanted in the moment. Depending on the enforcers whims and personal biases.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Lainie Nichols

Dear Executive Policy Committee,

We are writing to express our concern and strong opposition to the City of Winnipeg's proposed "Safe Access to Vulnerable Infrastructure By-Law."

If passed, this by-law would restrict our Charter-protected rights to freedom of expression and peaceful assembly. This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for marginalized community members, as well as protections for the environment.

If passed, we are concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices and prevent crucial democratic expression.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

Please vote against this proposed bylaw.

Sincerely,

Climate Action Team Manitoba (CAT)

Dear Executive Policy Committee,

I am appalled that the City of Winnipeg is considering the Safe Access to Vulnerable Infrastructure By-Law. This by-law would restrict our Charter-protected rights to freedom of expression and peaceful assembly and for that reason, I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, would seriously restrict peaceful protests, which again would seriously restrict our Charter-protected freedom of expression and peaceful assembly. This undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Laura Pringle

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

I am writing to express strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

In Canada, the right to peaceful assembly and freedom of expression are protected under the Charter of Rights and Freedoms. The ability to publicly and peacefully demonstrate is not a privilege — it is a fundamental democratic right. Throughout our history, social progress has depended on people being able to gather, speak out, and advocate for change.

Policies that broadly restrict public demonstrations risk disproportionately silencing minorities and vulnerable communities — the very groups who have historically had to fight the hardest to have their rights recognized and protected. Many of the freedoms we value today were secured because people were allowed to protest injustice. Limiting where and how people can demonstrate may unintentionally strip away the voice and power of those who need it most.

While safety and access to essential infrastructure are important goals, any by-law must be carefully balanced to ensure it does not undermine constitutional freedoms. Vague or overly broad restrictions create a dangerous precedent and risk chilling lawful, peaceful expression.

I love Canada because we are a democracy grounded in rights, dialogue, and civic participation. Protecting infrastructure should not come at the cost of eroding fundamental freedoms. We are not a country that suppresses peaceful dissent — and we must be cautious not to move in that direction.

I urge City Council to reconsider this by-law, ensure meaningful public consultation, and prioritize solutions that protect both public safety and constitutional rights.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Leigh Bridges

This is slippery slope type changes that limit your right to protest. It could allow law enforcement to give fines to protesters.

Banning university campus and school protests is a huge violation of free speech. Student protests have a long and important history in fighting back - successfully - against authoritarian governments. This is a fundamental basic of democracy, and we shouldn't be pretending it's anything but creeping fascism.

This bylaw would essentially take away our right to protest in Winnipeg, which is an essential pillar of democracy - if you really don't want us to end up like the states, then stop pushing laws and bylaws that restrict our rights so heavily that we have no choice but to fight, tooth and nail, for our freedoms! This proposed bylaw would be oppressive and unjust and would attempt to silence the people of this city, who deserve the right to speak their mind. This CANNOT pass.

I'm extremely concerned by the wording of the Safe Access to Vulnerable Infrastructure By-Law that is being proposed by the city. While a generous interpretation of the by-law suggests it would restrict harmful and disruptive protests at hosspitals and schools for children, the contents of the bylaw will severely limit the ability of all people in Winnipeg to peacefully protest.

This by-law will give an extreme amount of leeway in declaring any protest as a "nuisance demonstration" - if one person at the protest simply uses a recording microphone, it would be up to the discretion of enforcement to fine all persons at the protest $500 to $5000. If the protest is large, police could claim that they are "obstructing pedestrians" by the mere fact of people being there. And if the protest is against the actions of a government or nation, then it opposes "actions of a group related to a nationality." Aggressive enforcement of this by-law can find any pretense to declare almost any protest as a "nuisance protest." In particular, I fear that this by-law will be used as a pretense to crush any pro-Palestine protests by claiming they are "anti-Israel" and therefore against the actions of a group related to their nationality.

Furthermore, I find the definition of "designated facilities" to be overly broad. Including universities in this definition is a huge overreach - many students have actively participated in making their voices heard through protests and demonstrations, and this would allow large fines to all students who participate in protests on campus. Furthermore, the city has not published a definite list of "designated facilities" - protests which are not about or related to any aspect of healthcare may find themselves unwittingly too close to a 'designated facility' that is a local pharmacy, or a mental health councillor's office that happens to be in the area and not outwardly marked as such.

The actions presented in this by-law as harmful are already covered by existing criminal law - hate crimes, violence, and threats are already criminal offences. Thus, the by-law only serves to limit what is currently legal protesting, and does so with a heavy hand.

Please do not pass this by-law. Even if it is not used as an authoritarian tool to crush peaceful protests today, it will be in the future.

Regards,
Leo

I rarely write in on matters of politics, but I am so incredibly concerned about this infringement on freedom of speech and freedom to protest. This limits fundamental freedoms that the generations before us worked so hard to earn and protect. This is a massive backslide to a society where the marginalized are silenced. I can only imagine (with horror) in 5, 10 years when some horrific injustice happens that should bring people to the streets, telling my children "Well, we used to be able to protests these types of injustices freely, but that was taken away by the City of Winnipeg in 2026."

It is unbelievable to me that this by-law is receiving consideration. What happens when something tragic happens now? And the community wants to come together in vigil? We can't do so freely. What happens when human rights are violated and people wan to voice their concern and support vulnerable people? You can only do it in this small box, according to the rules of those with all the power? This doesn't make sense. It is undemocratic and an infringement on the most basic of freedoms. Same on any Councilor who votes in favor of this motion. There are other policy levers to address unsafe protests. This is a terrible overreach of power.

Dear Executive Policy Committee,

I'm writing to you today to express my dismay at the proposal of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

This by-law does not appear to define nuisance. Who decides which protests are a nuusance? By their nature, protests may intrude on the physical and cognitive space of those in the area. Non-violent protests, which are the only kind I have witnessed in Winnipeg, are protected by the Charter of Human Rights. As it stands the By-law is open to interpretation, manipulation, and weaponization against voices who oppose power structures and the status quo.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression

has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,
I'm writing to you today to implore you to vote down the proposed Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. I am shocked that the City of Winnipeg's elected officials, watching the fascist suppression of protest and assembly rights occurring in our sister city of Minneapolis, would consider contributing to this repressive political trend and entrenching this in law in our city. As a member of many of the communities this bylaw claims to protect, I stand firmly against the restriction of free expression and assembly in public spaces and believe strongly that safety for marginalized groups comes form robust democracy and public participation. For this reason I am against the proposed bylaw and ask you to vote against it today.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

I am told that passing this agenda item will make it more difficult to peacefully protest, moreover as most things, it affects the indigenous populations the most as it puts more red tape around certain fires, and ceremonies. I Do not dig this.

This by-law is on its face wrong and anti-democratic. for one thing "nuisance protests" is incredibly broad, and this would infringe on the rights of Canadians to make their voices heard. Protesting is an essential way to communicate in a democracy. The areas restricted by this by-law are too broad. People need to be able to protest where it matters, not in some supposedly 'safe' place where they won't cause a 'nuisance'. These types of by-laws have a history, not just in Winnipeg but around the laws, of being unfairly applied to minorities who do not have power or whose positions may not be popular. It doesn't matter how popular the issue is, people have the right to make their voices heard. I do not approve of this by-law and I will be taking note of any council member who votes on it.

Comments
Dear Members of the Executive Policy Committee,

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If

the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Comments
Dear Councillors,

I am writing to express my opposition to the proposed "Safe Access to Vulnerable Infrastructure By-law". While it may be well-intentioned, I fear that this by-law will bar protest from places where such expressions are most appropriate, expose residents to onerous fines and conflicts with law enforcement, and infringe upon our rights under the Canadian Charter of Rights and Freedoms.

As a faculty member at the University of Winnipeg, I am particularly concerned about the inclusion of "post-secondary institution[s]" among the "designated facilities" where this by-law would prohibit "nuisance demonstrations". Universities are traditionally places of protest, where students and faculty express and debate views of a political or social nature. As a matter of course, these expressions may be "nuisances", even causing clashes of views and discomforting those in power. But these are some of the purposes of a university. We hold up the student-led civil rights and anti-war protests of the 1960s as exemplars of political action, and yet this by-law would outlaw such expressions from our campuses.

Likewise, the dense and interconnected geography of a city like Winnipeg means that many of these "designated facilities" are within 100m of political offices and other sites where protest may be most warranted. As a concrete example, part of RRC Polytech's campus is immediately across the street from City Hall, rendering the entirety of the council chambers within the 100m buffer zone. Does this mean that no protests will be permitted at City Hall? For another example, Wab Kinew's constituency office is across the street from a medical facility and near a community centre, while Obby Kahn's is across the street from a mosque. Does that make the offices of the leaders of the two major political

parties in this province off-limits to protests? At a bare minimum, the proposed list of "designated facilities" is far too broad and the 100m buffer zone far too large.

Having lived in the United States between 2011 and 2022, I once lauded that country's deep commitment to free speech and expression. But now, one need only look south to our neighbours in Minnesota to see how far those freedoms have been eroded, and in such a short time, sinking even to the use of deadly state violence on protesters. While this by-law does not go so far, it proposes substantial fines, the very threat of which will have a chilling effect on speech, and empowers members of the Winnipeg Police Service to intervene in protests, opening the door to clashes between armed officers and the public.

In Canada, Section 2 of the Charter of Rights and Freedoms ensures our fundamental freedoms of expression and assembly. These freedoms are crucial to our democracy, where ideas can be debated in public, and political representatives confronted by their constituents. These expressions may be uncomfortable, they may obstruct traffic, and they may even be a "nuisance", but that is price we pay to live in a democracy. When words or actions rise to the level of threats or hate speech, there are already existing legal mechanisms to intervene which balance public safety with Charter rights.

For all of these reasons, I urge council to reject this proposed by-law.

Respectfully,

Iian Smythe, PhD
Assistant Professor of Mathematics
University of Winnipeg
Member of the University of Winnipeg Faculty Association

Comments
I am writing to express my opposition to the proposed “Safe Access to Vulnerable Infrastructure By-law”. Rather than promoting safety, what this bylaw actually does is restrict freedom of expression and discourage dissent. Dissent is important to a functioning democracy. As authoritarianism rises south of the border, it is deeply alarming to see my city considering new repressive measures here as well. Sweeping anti-protest bylaws are not a strong strategy for helping people get the medical care, education, or community services that they need.

The proposed fines and tricky appeals process outlined in this draft bylaw will discourage most people from participating in demonstrations, but will be especially punishing to people who have less money. The impacts of this bylaw would fall along lines of race, class, gender, Indigeneity, etc., and make ongoing struggles for rights even more difficult. This contradicts the City’s commitment to social equity as stated in OurWinnipeg2045.

The proposal itself has also come forward in a way that restricts public input due to the lack of consultation and very short timeframe between the announcement of the agenda with the proposal and the first vote. It’s almost like proponents of the bylaw are trying to sneak it past during the winter months when there’s a long weekend and they think people won’t be paying attention…

Other people have definitely explained the problems with this proposed bylaw far more eloquently than I have here. Just please don’t pass this, it is a big step in the wrong direction and we are all so tired already.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Lili Dupas

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Protesting should be everyone’s right. Canada has never had a large number of violent protests. We always carry respect for the community and the environment when protesting

Are you kidding me!? Banning peaceful protest from all cultural centers, municipal buildings, schools, ...!!? These are what the society is made of. These are the places that protests would need to happen if things go wrong. What do we have left? Dog poop in the park? Squirrels chewing telephone lines? No, this Bill is aiming to ban my basic rights as a citizen of Winnipeg.

I can’t believe this is actually an agenda item. By limiting protests in this way you are undermining democracy. Give your heads a shake. This is an absolutely stupid idea.
I am a law abiding senior citizen and am not in the habit of rocking the boat but I believe in the right to protest. If this were in place in Minneapolis right now, all the good work people have been doing in defending their neighbours against ICE would be criminal.
Drop this. Don’t do it. It is wrong and flies in the face of democracy.

Public protest is a protected right. I live in the heart of downtown Winnipeg (unlike the vast majority of EPC members) and protests happen here frequently and I think it's GREAT. When people can gather to protest and/or support causes, it strengthens our democracy. Democracy is under attack the world over, even just a few hours away in the US, we have seen their leadership engage in violent attacks on peaceful protesters. We cannot go down that road. We must protect our right to protest and EPC should do what it's supposed to do and work for us.

While I understand that we want people to still be able to access areas under protest, these proposed changes basically quash protests as a whole as a 100 meter buffer zone on public places is too large. Also, this bill is too vague, allowing for misinterpretation and abuse by law enforcement. Also, this may be a "read the room" kind of moment. ICE protests are happening just south of us. People's civil liberties are being violated constantly and Council is choosing now to try to undermine protesting in Winnipeg? Not a good look. The bill needs work and should not be passed.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw. I am a first year law student currently studying the Charter in my constitutional law class, this by-law directly contradicts what we know to be Charter protected rights and freedoms.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. I'm additionally concerned that the punishment is a fine, this directly targets, the less affluent in our community and is deplorable that Winnipeg would seek to financially punish those who are already marginalized for expressing their opinions.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy. I want to say I am proud to live in Winnipeg, should this by-law be passed I would no longer confidently say this.
I implore you to drop further consideration of the proposed demonstrations bylaw.

This is a Charter violation. The wording is way too vague and the 100m zone essentially bans protests in the downtown area.

Dear Executive Policy Committee,

I am submitting comments today to express my deep frustration and concern at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. This proposed change would restrict citizen's Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in strong opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes since the early beginnings of our city. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place. Instead, peaceful protests with concerned and engaged citizens would be severely limited. This type of suppressing freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the United States of America, I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely,
Lisa Hunt

Dear Executive Policy Committee,
I oppose Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law, which restricts Charter rights to free expression and peaceful assembly.
Peaceful protests drive social change for diverse communities. This by-law threatens constitutional rights and may silence marginalized groups, enabling police overreach.
Existing laws already address property damage and violence.
The Canadian Civil Liberties Association notes these restrictions disproportionately impact marginalized people. This contradicts Winnipeg's status as a "Human Rights City."
Winnipeg should defend Charter freedoms essential to democracy. Please withdraw this by-law.
Thank you
Lisa Tarko

Dear Mayor Gillingham and Councillors

I'm writing to you today to express my opposition to the proposed bylaw regarding Safe Access to Vulnerable Infrastructure By-Law, as it would restrict our Charter-protected rights to freedom of expression and peaceful assembly.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From sit-ins, vigils and rallies to round dances and blockades, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police and security overreach, and

result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018. I appreciate the carve-out for labour union activities like strike pickets, but I do not believe in dividing the rights of some against others who are more vulnerable and lack clear legislative protections such as those in place for unions.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Louise Dela Cruz

I am writing to express my strong opposition to the proposed by-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is essential to a democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I urge the Committee to reject this proposal in its current form. If the Council believes action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation, not broad restrictions on proximity.

Do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

I understand the desire to protect our communities - as a parent and an educator, I feel strongly about the need to prevent harm. This by-law, however, will perpetuate harm, not prevent it. By designating a huge percentage of our city as protest-free zones, council would be violating the Charter rights of the citizens of our city, and preventing everyone from being able to voice their concerns and speak to their beliefs freely. Schools and post-secondary institutions are meant to be places that students can learn and fight for what they believe in, not ones where they must tow the line.

The by-law is too open for interpretation and abuse for it to be passed in our city. I hope council can see that this by-law will do more to hurt this city than help it. Please vote against this overwhelmingly restrictive recommendation.

Our right to protest is an important corner stone of our society.
This is so disappointing that we would not be able to protest on the same streets that the Winnipeg General Strikers walked for their rights over 100 years ago. Their protest was opposed by the same type of people who are proposing this ban now. Their protest made international differences.
Be on the right side of this.

The Charte of Rights and Freedoms affirms firstly the fundamental right to meet with anyone and participate in peaceful demonstrations. This includes the right to protest against a government or institution and was created for that reason being that Canada is a democracy.
Other rights include:
the right to protest against unreasonable laws that could lead to imprisonment or harm and;
The right to protect Equality Rights regardless of personal characteristics such as race, nationality, ethnicity, colour, religion, sex, age, or mental or physical disability, sexual orientation, residency, marital status, or citizenship. Most rallies and protest marches are in support of anyone of the above with the direct purpose of pressuring the government or institution to provide the Equality Right. Existing laws protect against assaults, threats, property damage, after 11 pm noise and overweight and industrial vehicles driving or parking on some primary roadways. The police are already charged with enforcing those laws. Inconvenience is not given as an excuse to bypass the provisions of the Charter of Rights and Freedoms as was reinforced by the Supreme Court in response to the Federal Government's actions concerning the Convoy Protest in Ottawa.
Evidently the Honourable Councillor Evan Duncan does not feel he is subject to the Canadian Charter of Rights and Freedoms and apparently he also feels tha Manitoba's Premier Wab Kinew 's office should be exempt from the scope of the Charter as well.
I am opposed to this councillor's motion to restrict the Canadian Charter held Rights and Freedoms of Winnipeg's and Manitoban's Remember many of the public buildings and places included are exactly that publicly owned by the public for the public.

Dear Mayor Gillingham and members of EPC,

I'm writing to you today to oppose the Safe Access to Vulnerable Infrastructure By-Law that is being considered.This by-laws infringes on our right to freedom of expression. I fear for the health of our democracy if we can no longer gather to protest unfair laws and practices.

This by-law will silence the voices of marginalized communities, encourage police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

Please drop further consideration of the proposed demonstrations bylaw.

Sincerely,

Rev. Lynda Trono

I would like to express my objections to the proposed by-law which will limit fundamental freedoms as laid out in Section 2 of our Charter of Rights and Freedoms. It is understandable to want to regulate assembly around the stated vulnerable institutions, however, it is a slippery slope and very concerning to be using this as justification to erode Charter Rights. What limitations would be placed on the limitations of rights? There would be no guarantee that other section 2 freedoms would not somehow become included into the bylaw when someone deemed it necessary, or the bylaw is vague enough to be easily expanded, again, when someone thinks it should be. Also municipalities really don't have the authority under the charter to override the charter using the notwithstanding clause, which is why those that have done so are now facing legal challenges for violating charter rights. And rightfully so. There is no reasonable justification for enacting the bylaws. Our right to peaceful assembly is fundamental to a functioning democracy, and protected. Government can not decide for the citizenry when and where the expression of opinion or dissent can occur and still have a healthy democracy. It is the right of Canadian citizens to not be silenced, to express disagreement with government or business or industry, within the reasonable limits of laws of a free and democratic society. Police are already available to cover protests that are not peaceful. The attempt to install a bylaw that is redundant, I repeat, is concerning. I hope my objections are clear, thank you for your time.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Mabel Thomas

I oppose the proposed Safe Access to Vulnerable Infrastructure By-law. The term "nuisance protest" is poorly defined, granting enforcement far too much discretion and creating uncertainty for anyone exercising their rights to protest.

The by-law would restrict protest in public spaces that are essential for democratic engagement, including large areas of the city such as university campuses and City Hall. Its broad scope and lack of clarity risk repercussions for individuals engaging in legitimate expression.

I urge the Committee not to proceed with this by-law in its current form.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed, MS

To the Executive Policy Committee,

I am writing to you today to make known my opposition to the Safe Access to Vulnerable Infrastructure By-Law. This by-law would restrict fundamental and protected rights, including freedom of expression and the right to peaceful assembly.

From peaceful protests to vigils to rallies to round dances, the right to peaceful assembly is an essential part of Canada's history and a driving force behind our society's progress. Public demonstrations are an intrinsic part of marginalized groups, like Indigenous peoples and 2S/LGBTQIA+, getting recognition and support from the government.

Furthermore, peaceful protest is an essential part of Winnipeg's history, with the 1919 general strike being a coveted part of our identity as Winnipeggers. A remainder of that strike is just across the street from City Hall, with the overturned streetcar sculpture.

My concern is also rooted in the concern for the safety of groups that are victims of systemic and systematic inequities and are often the targets of police violence and governmental violence. These groups are often the ones involved in activism.

I recognize that this by-law was probably drafted with good intentions, aiming to protect vulnerable populations, such as children and frontline workers. However, the nature of this type of legislature leads the city of Winnipeg on a slippery slope of restricting those who disagree with the government. The United States government and what is happening in Minnesota right now should serve as a stark reminder to Winnipeg's city councils of the dangers of government and executive overreach and the resulting abuses of citizens.

I implore you to drop any consideration for this By-Law and uphold Winnipeggers' Charter rights.

Thank you,
Madison, a concerned Winnipegger

Citizens should have the right to peacefully assemble to protest and/or raise awareness to any and all injustices occurring and committed against us and the climate. To take this away is to take away a fundamental human function of dignity and standing up to oppression of all forms and would be a grave violation of citizens' ability to exercise this.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Mallory D

I am opposed to the recommendations wholesale because I value my Charter right to free speech. This by-law is a transparent attempt to curtail protest wrapped in the more marketable veneer of protecting "vulnerable infrastructure". It's no coincidence that the 100 metre zone around schools, community centres, places of worship, hospitals, healthcare facilities, and more would conveniently include the public offices of elected officials and City Hall itself, making it punishable by a fine of up to $5000 per person if one were to even attend a protest where another used a microphone or blocked a road. You enjoy the freedoms won for you by protestors of the past. Our City proudly honours the 1919 Strike with murals and a statue across from your place of work. And yet you are attempting to increasingly surveil, criminalize, punish, and fine anyone participating in similar actions today. The Prairie Green and Brady Landfills were only searched for the remains of the murdered Indigenous women Morgan Harris, Marcedes Myran, and Ashlee Shingoose because of community-led blockades. Were those families fighting for the dignity of their lost loved ones a “nuisance” to you? The language of this by-law is dangerously vague and will undoubtedly be applied not in the service of protecting but rather punishing the vulnerable whose cries you would rather ignore, whose lives you considered unworthy of value. In November, you came for the unhoused, using another by-law based on the same false premise as this one, to callously destroy over a dozen encampments, the only available shelter for people living on the street, because you would simply rather bulldoze them out of existence than employ any of the evidence-based solutions to reducing homelessness because those rely on the demonstrably effective but far too compassionate approaches of housing-first and poverty reduction. Now you're coming for the community organizers, protectors, and people of conscience whose voices you would rather silence than listen to despite listening to the people of this city being the purported purpose of your positions. This by-law is a horrific overreach and abuse of power. It will be challenged and ultimately defeated. I suggest you save yourselves the

time, the struggle, and the bad press by scrapping it now.

This sets a dangerous precedent for future bad actors. Individuals should be able to protest where they deem necessary. Make rules about what is acceptable during protest. But to not allow us our right to protest, silences our right to free speech and protest. A similar law was passed in the states and has since been used Don Lemon.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) (https://www.google.com/url?q=https://ccla.org/&sa=D&source=editors&ust=1770839175506396&usg=AOvVaw2EDI6DiW8rYGn-nN-31w1f) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. I am specifically concerned by the broad and ill-defined language used to describe the types of "vulnerable infrastructure" that are considered needing protection by this bylaw, and ask if passed exactly where would Winnipeggers would be able to exercise our freedom for peaceful assembly?

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This motion is excessively broad, infringing on the right to lawful protest. It sounds more like a motion to discourage all protests rather than to ensure that protests remain safe or that vulnerable/minority populations remain protected. Individuals and groups with power don't need protection or the right to protest in the same way. Sometimes, spontaneous protests are held exactly to ensure protections for vulnerable populations and this motion would disallow that. It rather sounds like the City wants to intimidate protestors. Protests and the related freedom of speech are a critical component of our democracy, even if we don't always like what we hear. It is essential that we safe-guard the right of citizens to lawfully protest when new (often minority) perspectives and ideas need to be heard. Discomfort does not mean danger. There are sufficient laws in place to address the concerns without being so heavy-handed.

1) The language of "nuisance demonstration" is offensive. The "nuisance" may be someone else's fight for rights. A "nuisance" is not a danger.

2) "Obstructing the passage of pedestrians or a motor vehicle" can be misconstrued. Sometimes, stopping a vehicle may be protecting the vulnerable people.

3) Feeling "intimidated" can be exaggerated by someone with ill intent.

4) The 100 m restriction is too large (covering too much of the city when aggregated). Two cities in the jurisdictional scan recommend 50 metres.

5) The phrasing around microphones and amplification without permits effectively extends the space limit to far more than 100 metres, meaning that amplified meetings can be interpreted as being a "nuisance".

6) The scope/number of types of buildings included in the motion is too broad for Winnipeg. In the jurisdiction scan, Brampton and Oakville are just about places of worship, addressing very particular protests. Calgary addresses recreational centres and libraries only in response to specific incidents. Toronto, a much larger city with a history of far more complex incidents, includes schools, childcare centres, and places of worship (but has a 50 m limit). Only Vaughn has broad coverage to address its particular incidents.

This motion, if it is to be considered at all, requires further work. Vulnerable populations (including children, of course) should be protected. And people in positions of powerful should listen better so that protests aren't needed as much.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Mariah Santos

My comment is that assembly and peaceful demonstration are essential to democracy and restrictions would undermine this. I believe that it is important to acknowledge that a protestor should not impede, intimidate, harass or incite hate in any way. However I do believe existing laws would ensure this, and the further restrictions would prevent free expression.

In brief, I have concerns regarding the prohibitionist nature of the by-law as it currently is being proposed. There are already policies in place to protect individuals entitled to access healthcare and other institutions safely. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

Rather than a blanket approach, greater specificity is needed in order to have my public support for this policy.

Sincerely,

Winnipeg Resident

Dear Executive Policy Committee,

I moved to Winnipeg as a young adult to go to school, the month that Donald Trump was inaugurated into power as the President of the United States of America, just a short drive south of us. This destabilization of power, a global phenomenon with local implications, pushed me from fear into a deep desire to effect change in our good world - to push for more justice, more trust, more mutual care. I attended my first protest that month, at merely 18 years old - and it changed me.

Protests are an essential way for my neighbours and me here in our home city of Winnipeg to make our voices heard as we stand together for a better and more just world. Protests are a way of being community together - not only are statements made in public, but relationships are formed on the ground, in the real world. Protests are essential to what makes this city vibrant, alive, loud, and community-oriented. I wouldn't want it any other way.

I am shocked and dismayed by the proposed by-law to limit the ability of my neighbours and me to protest in MOST of downtown - including near sites of powerful decision-making such as Wab Kinew's office and city hall. The proposed ban radius made sense to me at first glance (I don't want to harm people), but at the end of the day this radius makes up most essential spaces for us to advocate for a better world. This in itself is unjust, and infringes on our rights to peaceful protest.

I am asking you, dear Executive Policy Committee, to rescind this proposal entirely. Do not let this kind of fear-based legislation go through in a city as warm and vibrant as Winnipeg! We are better than that. You are better than that. Together we must make this city the

community-oriented, better-world-striving place I have known it to be since I moved here in 2017. I love this city - I love its loud voice for justice. Do not silence my city. Our city. This city, our neighbours, deserve to be heard. Whether or not you or I agree with their statements. Let us make our voices heard.

With deep sincerity,

Marina Klassen

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the

Charter and protect our democracy.

This by-law infringes on Canadians right to freedom of expression and to protest. We are allowed to publicly protest peacefully to show our support and criticism of any cause. This by-law already admits that we are allowed to protest in these areas. It specifically exempts picketing lines for union workers. Why is it that this group is exempt while the rest of Winnipeg has to face these demonstrable fines? Why is it that you restrict the greater public but save a select few. This by-law is messy and does not seek to maintain our charter rights. It's filled with biases and contradictions. All Winnipeggers have the right to freedom of expression and this law restricts that. Please don't mimic the face it government we see just below us. Protests are an integral part of our democracy and they need to be secured. If Canada were to have our own ICE, students on university campus's and high schools alike would not be able to protest the government stealing our neighbours. Don't attack your citizens' rights and implement this by-law. Stop what your doing for the sake of your constituents and our democracy.

I am strongly opposed to this bylaw. As the Canadian Civil Liberties Association has pointed out: "the police already have broad powers to protect access to property and to intervene in the event of a threat to human physical safety, including during protests. Therefore, a new bylaw is simply unnecessary". I believe this bylaw is trying to prevent peaceful protest. In a democratic society, citizens should not be fined for protesting! A recent letter to the editor of the Winnipeg Free Press (Jan 15 2026) applauded the newspaper's coverage of the protests across Canada in support of the protesters in Tehran. Can you imagine if the Islamic Republic cracked down on protestors? Oh wait, they did. And now your by-law is the thin edge of the wedge looking to crackdown on protest here too. This by-law, and the proposed fines, is simply appalling. How can we have the Canadian Museum for Human Rights in our city and this kind of oppressive by-law? Have any of you been to the CMHR? It is filled with exhibits about citizens who protested to try to make the world a better place. I implore you to drop further consideration of this bylaw that endangers democracy.

Dear Executive Policy Committee,

I am concerned that this item was ever tabled for consideration in the first place and sincerely hope the proposals therein are promptly dismissed as unconstitutional, inherently anti-democratic in nature and wholly antithetical to the rights and interests of each and every citizen. I trust you will see through the thin and flimsy veil of disguising this act of coercion as a matter of public safety - proposing the adoption of this bylaw is a violence in itself, against us all, not excluding those who have brought it forth. Coercion such as this is the true threat to our public safety.

At a time such as we are seeing in the world we should be looking here at home to strengthen our democracy and our mutual care for the importance of each and every voice at the table. The right to peaceful assembly, to free and open association, to vocalising dissent, to the free use of our common spaces - these are essential , fundamental bedrocks of basic dignity.

Thank you for your time and consideration - I trust you'll do the right thing and treat this matter with care. It is no small thing.

I am writing to express my opposition to the proposed bylaw. This proposal would effectively ban otherwise-lawful protest across an absurdly large swathe of our city, and uses an overly-broad definition of a "nuisance demonstration" that can be abused to supress almost any rally or demonstration. Provincial and federal law already provides the basis for law enforcement to intervene in cases of risks to public safety, harassment, and hate speech, so the proposed bylaw offers little in terms of public benefit, just a means to stifle activism that does not fall into these categories.

Furthermore, this bylaw can easily be manipulated by bad actors to insulate themselves from any expression of community opposition, and runs a risk of further marginalizing vulnerable groups. As written, this bylaw would enable some truly Orwellian scenarios; for instance, if a church decides they would like to host a presentation by avowed white supremacists, protests against said church would fall within the definition of a nuisance demonstration. Indeed, given that white supremacy is an idea related to the specified characteristic of race, any protest against it runs the risk of falling afoul of this bylaw because of its overly broad definitions. The amplification definition also results in absurdities; for instance, because of its proximity to the RRC campus, any protest at City Hall for any reason that happens that uses a megaphone or other amplification would also fall within the definition.

The proposed bylaw is ill-conceived and disastrous for civil liberties. It stifles free expression and the right to protest, puts vulnerable communities at further risk, protects purveyors of hate, and offers no meaningful benefit. I urge council to reject the recommendation and vote against this terrible bylaw.

I am concerned that this bylaw will be racist in it's application, limiting protests and rallies promoting Indigenous rights, among other things. Even for protests that I do not agree with, they still have a right to protest and I feel that this bylaw violates rights protected by the Charter of Rights and Freedoms.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.
The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise.
Prohibiting "nuisance demonstrations" within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.
Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day.
Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Mathew Kucheravy-Logan

To the Executive Policy Committee

I am writing to state my firm opposition to the draft legislation regarding public assembly restrictions. The proposed measures represent a significant overreach that threatens essential liberties.

The Canadian Charter of Rights and Freedoms protects the right to gather and express dissent. These protections are the foundation of a democratic state. The government should only interfere with these rights in the most limited and specific cases. The current proposal uses vague definitions that allow for arbitrary enforcement. When the state has the power to decide what qualifies as a public disturbance, it can silence any group that it finds inconvenient. This creates a dangerous precedent where the definition of an acceptable protest changes based on the political climate.

Public assembly is often meant to be disruptive. This disruption is the method by which citizens bring attention to serious issues. If the state removes the ability to disrupt public life, it effectively removes the right to be heard.

Any limits on assembly must be narrow. These limits should only apply to critical infrastructure where safety is paramount. Medical facilities and primary education centers for minors are appropriate examples. Transitional housing for those in precarious positions also warrants protection. These rules should not apply to universities, colleges, or other centers for adult learners. Adults must be expected to encounter and process diverse viewpoints in public.

The law must also be applied without bias. There is no logical reason to grant special

treatment to trade unions or worker organizations. If a picket line blocks access to a medical facility, the harm to the public is the same regardless of who is holding the signs. Exempting specific groups from these safety requirements is unfair and contradicts the justification for the law.

The committee should abandon this draft. The city should rely on existing criminal laws to handle actual safety threats. Creating broad new powers to suppress assembly will result in costly legal battles and a loss of freedom.

This proposed by-law is a significant overreach of government. It will criminalize free speech by providing penalties that disproportionately affect those who are not well off - in other words, those who have the most to protest. This does nothing to assist with any reduction in hatred or ill will among communities; instead, it creates an environment where those who uphold the status quo can be insulated from differing points of view. Including schools and post-secondary institutions in this is particularly galling as they are supposed to be bastions of free speech, individual expression, and places where ideas can be debated and aired. Community centres could easily refuse space to groups who are willing to speak out against injustice. The expansive list of locations and range proposed would mean whole swaths of the city, the areas where people are most likely to gather, would be off-limits, so protests could be shunted into easy to ignore areas (which is no doubt what our mayor and his lapdogs prefer - out of sight, out of mind).

Shame on the EPC for wanting to chill public debate. Shame on them for wanting to ignore the problems that face this city.

The proposed bylaw violates 2(b) and 2(c) of the Charter of Rights and Freedoms. Peaceful protest is an important part of our culture and is necessary to inact change. Thid by law would prevent protest at many important gathering places and add additional red tape and fear of fines to community organizers. We already have legislation to prevent hate speech and violent protest, additional laws are not required

Limiting protests and banning them in places where protesting has historically succeeded in creating widespread, positive change is an front to my charter rights as a Canadian citizen. Schools and universities have always been a place for dialog, discourse, and in many cases places of protest against fascism, racism, corporate greed, and the suppression of worked rights. Enacting such a bill is slowly opening the door for racists with enough money to silence opinions, limit discourse, and most importantly limit my freedom my expression and freedom of movement. If I cannot be who I am in a publicly funded space and support those with limited voices through means of protesting, than Canada can no longer claim to be True and Free. This bill needs to be struck down immediately in order to protect what Canadians have fought so hard to earn.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,

Megan Gair

Dear Executive Policy Committee,
I am writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. Because of this reason, I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms that Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, as well as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous peoples, radicalized and the 2SLGBTQIA+ community members, as well as protections for our environment.

If passed, I have deep concern that the by-law could not only infringe on constitutional rights, but also silence marginalized communities' voices, lead of police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed deep concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and freedom of speech, and that such laws often harm marginalized groups who rely on protest to advocate for changes in our society.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are currently witnessing in the United States, I strongly urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed, Megan H.

I am opposed to the bylaw as presented. The right to peacefully, if inconveniently, protest is a protected Charter right and must be maintained as such.

I am strongly against this by-law.
Firstly, as the police already have the ability to monitor and step in, in case of a breach of law or someone's rights, which would include any threat of harm made towards a person, and this by-law does not change that, it seems like a poor solution to the proposed issue of the police struggling to maintain peace at protests. I would want to know what specifically is causing the issue, especially if the solution is to limit peoples rights.
Secondly, a law based on location alone, does not need to make exceptions for reasonable, peaceful protests. This impedes the people's charter rights to freedom of speech. For example, say someone wants to hold a peaceful vigil at a cemetery, or a school? This is just one reasonable form of peaceful protest that could be limited by this law. The truth is this gives far too much power to the government, which creates a massive conflict of interest when it comes to protesting government backed ideas using our right to freedom of speech. The point of protest is for the people to have a voice and be seen, and this law will sensor the peoples voice undoubtedly, whether it intends to or not.
As more proof of this second point, the wording of this law is so vague as to raise questions about its application. What is meant by 'nuisance' and who will be determining what is and is not a nuisance? How many human rights issues were considered 'nuisances' before people protested and spoke up about it to have it made into law? I firmly believe this law would impede the ability to people to defend their rights and speak out against injustice, and that is simply unacceptable.
Also, this law will deter people from attending legal, peaceful protests. Councillor Evan Duncan is very concerned with detering people from attending public spaces without condemnation. In a quote he says, “Every Winnipegger has the right to safely access places of worship, healthcare providers, and other facilities without fear, intimidation, or obstruction. That right must be respected and protected,”
(https://www.winnipeg.ca/news/2026-02-10-law-drafted-address-nuisance-

demonstrations-keeping-winnipeggers-safe-designated-locations), but why doesn't that feeling extend to protesters? Are they not also a part of the community with a right to access? Isn't it a communities right to speak up in and about those public spaces? It is clear this law does not respect everyone and is not fair to the citizens of this city.
In summation, this law is a violation of the rights of the citizens of Winnipeg. A protest is meant to be reasonably disruptive and visible, and the police have authority to address issues of violence/harm if it occurs, so there's no reason to add more limits to our rights. To limit this right, prior to an actual breach in law, is to limit our Charter right to freedom of speech, is to add adendums to our freedoms. That is a violation of how law works in Canada, as the charter of rights comes first in consideration legally. Creating a by-law to police our rights is not only morally wrong, it is a reversal of our rights, which is a decision that cannot be made municipally, and frankly should not be made at all.

Demonstrations are democratic and the people of Winnipeg have a right to expression and freedom of assembly.
The proposed limitations are concerning, and an overstep by the city. Limiting non-violent protests and placing decision makers out of reach of protestors violates a core aspect of a functioning democracy.

I strongly oppose agenda item #7. People deserve the right to protest. Effectively. To ban protesting is a far overstep of the government. There are a lot of protests I did not agree with (freedom rally being a big one) but even then it is important that people have the ability to express their outrage when they feel there is injustice. that loss of freedom would be detrimental to our society. There needs to be a line somewhere between safe protests for those attending and those working. While I understand protests cannot be the Wild West out there it's still important that the people are allowed to protest. Given our current political climate we witness first hand how important protesting is. Our neighbors are having their rights completely stripped from them. That calls for protesting. And manitobans deserve the ability to protest if injustices are committed against them.
Thank you.

As a lawyer and a person who believes in democracy and constitutional protections, I am strongly opposed to this by-law. It will restrict protests in a huge area about 78km2 including some of the most meaningful locations - city hall, university campuses. This by-law as written does not minimally infringe on constitutional rights but instead will have the opposite effect. Institutional democracy requires free and open discourse including protests in public spaces. With the rise of facism in other countries including our closest neighbour, it concerns me that the city would consider such a sweeping ban on people's rights to public dissent. I urge the EPC to consider that minorities across all categories have relied on the very acts that this by-law intends to prohibit to gain basic rights such as the right for people of colour and women to vote, the right of women to hold their own bank accounts, the right to marry whoever one chooses. I urge the city to consider the collective impact that limiting protests will have on any future advances of human rights. If this by-law proceeds, it will be apparent that limiting such future advances was the city's goal all along. There are ways to create regulations around safe protests and access to critical spaces like hospitals without putting a sweeping 78km off limits.

To the members of the Executive Policy Committee,

I'm writing to you today to express my grave concern and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently employ as a community, and even as a nation to stand up for the most vulnerable and opressed groups of peoples. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting. I am deeply concerned by Councillor Duncan's comments on CJOB on February 10th saying this legislation is to prepare for the chaos down south coming our way. Even if we did, which is incredibly backwards, this legislation wouldn't be the right way to do it. We would want to ensure our government doesn't do something like this.

There is already provincial legislation establishing buffer zones around abortion services. If the City's objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Mercedes Schmidt

February 12, 2026

Members of the Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Sincerely.

Mia Schorpion

Dear Executive Policy Committee,

I'm writing to you today to express my opposition to the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law. This By-law would have the impact of restricting our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment. I myself have been an organizer of many such rallies and vigils that I believe are critical to the creation and building of strong communities and citizens.

If passed, I am deeply concerned that this by-law would not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, result in inadequate options for responding to hate, and limit one of the critical ways citizens engage in democracy. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules

such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I strongly believe issues around right to public protest should not be within the jurisdiction of Municipal government.

The city should make a formal request to the Manitoba Government to work with the city to address the need for such a law. Any such law should be specific and as limited as possible. (Similar to the Provincial Abortion Protest Law) It should be carefully written to avoid subjective interpretation.

This proposed law as drafted is too broad and could be interpreted subjectively and potentially abusively.

As someone who requires regular access to healthcare service, I do believe the safe access to healthcare services is a critical issue. I don't believe this drafted by-law is the correct and balanced solution.

Please work with the province to solve this issue before pursuing such a law at the municipal level.

This obvious infringement of Charter section 2 rights is so ripe for abuse. The intentionally vague wording and definitions leave interpretation entirely up to police and city officials in order to suppress legally protected expression. In a world where we see MAGA suppressing free speech on the other side of the border, movements like this edge to are that very very dark line. While it is entirely noble to want safe and peaceful protests, there are already laws that allow enforcement of protest restrictions established by the Supreme Court.

This proposed by-law sets a very dangerous precedent.

I am opposed to the recommendations of Winnipeg Public Service to approve the Safe Access to Vulnerable Infrastructure By-Law because it is poorly conceived and a disgraceful affront to human freedoms and rights to belief, expression, and assembly.

Page 3 of the draft by-law includes what masquerades as a definition of "nuisance demonstration." Item a) is redundant, vague, and disingenuous. The "specified characteristics" it references are already protected by the many declarations and charters with jurisdiction in our City, as well as by law in The Human Rights Code of Manitoba (C.C.S.M. c. H175), where people of great privilege, such as employers and landlords, are forbidden to discriminate based on protected characteristics. Every protest I've gone to, and an overwhelming majority of any protest I'm aware of in our precious city, have been specifically to advocate for the dignity of all persons and an end to all forms of discrimination against these so-called specified characteristics. It seems that this by-law could easily be employed disingenuously by those who wish to conceal social and systemic injustices that must be loudly and publicly denounced. Item (b) of the same

definition is incompetently formatted and the syntax is nonsensical. As it currently reads, there is a conflation of amplification with both the definition of "place of worship" and obstruction of pedestrians or motor vehicles. This by-law seems so ill-conceived that its author's cannot be bothered to make sense in their drafting of it. I fear that it will be used in the same reckless fashion if the recommendations are accepted.

I am deeply concerned that the disingenuous reference to specified characteristics is telling of the true intentions of this recommendation and the by-laws other municipalities have so cynically adopted. These true intentions seem to be the curtailing of our human rights to belief, expression, and assembly. Too often, the most privileged among us count their minor inconvenience as a violation of their rights. It is no wonder that wealthy individuals and organizations would prefer not to hear how their monopolization of resources comes at the cost of human dignity and lives. And so they lobby for laws such as this, that can be used to characterize lawful expression and assembly as "nuissance," so that they do not need to feel the appropriate shame for the way their privilege has come at the highest of costs to the oppressed.

Finally, I cannot understate my outrage that this proposed by-law characterizes so many of our cherished venues for assembly and democratic discourse as "vulnerable infrastructure." How poignant that this by-law claims that the very bones of our body politic-- our healthcare facilities, cultural landmarks, places of education and worship-- are vulnerable. If the city of Winnipeg has become a place that is too cowardly to face public discourse in public spaces because of the uncomfortable truths this discourse reveals, I and all defenders of freedom in this city must learn to hold great pride for taking part in what this shameful recommendation calls "nuisance demonstrations." And we will not stop until our voices are heard, amplification or no.

Obviously not a good idea in the long-run, even if there is some argument for its implementation in the short-term. Way too much potential for future abuse if this by-law is passed. These rights were too hard-won to diminish them in this way.

I am utterly disappointed and disgusted by the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law because it would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

Any hand waving or excuses that the committee makes to say that "oh it doesn't infringe on your freedoms," should look at the incredibly vague reasoning and wording that is used. This wording will allow for incredible overreach to occur and for peaceful protests to be shut down.

This By-law is undemocratic and incredibly Draconian.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

I implore you to drop further consideration of the proposed demonstrations bylaw.

This bylaw is creating a problem where there is none. Ask yourself how often you have been inconvenienced or harmed by a peaceful protest?

This bylaw goes way too far in what it is attempting to inhibit. Will bike memorials for people who have been killed by people driving cars now be deemed as a protest?

This bylaw has the potential to make criminal the simple act of speaking out together against government overreach. It would make criminal protests similar to what is happening in Minneapolis.

If you want to make Winnipeg safer for all, limit vehicular speeds, improve accessibility for active transit, do something about crumbling rental houses like the one that resulted in the death of two women, and invest in property reduction.

We need to get to the root of what actually may make Winnipeg unsafe for residents and not pretend that protests are a daily issue affecting Winnipeggers.

I am writing to express my strong opposition to the proposed by-law on 'nuisance' demonstrations.

I am also dismayed to see citizens exercising their Charter rights to freedom of expression and peaceful assembly being framed as 'nuisances' by our elected officials.

The description of what would count as a 'nuisance' demonstration is so broadly and vaguely defined, it would appear to encompass any form of protest or demonstration that is not related to a labour dispute.

Police already have the power to address unlawful actions if protesters commit them, e.g., threats and harassment. This renders the proposed by-law unnecessary, which makes this by-law - with steep proposed penalties - seem like a clear attempt to suppress peaceful protest.

I strongly urge you to drop this proposed bylaw, which would create significant harms to the fundamental rights of Winnipeggers.

In light of the social upheaval happening to our neighbours to the south, I feel this by-law is ill advised. Recent history with regard to the missing indigenous women demonstrates to me that some aspects of our system of government can be affected by racism.
I would like to preserve my right to buy an inflatable frog suit and take to the streets if any such shenanigans make their way north.

Dear Executive Policy Committee,
I'm writing to express my opposition to the proposed bylaw, "Safe Access to Vulnerable Infrastructure," that would restrict the Charter-protected rights of all to freedom of expression and peaceful assembly. I'm asking the committee to oppose it as well—clearly and resoundingly.
As a Winnipegger, I am proud of the City of Winnipeg's efforts to be recognized as a "Human Rights City." This by-law poses a threat to those very rights.
This by-law is not about preventing property damage, hate crimes, or violence from taking place—those acts are already criminal.
However, this by-law is about putting in place broad rules that will unfairly restrict Charter-protected peaceful demonstrations and free speech, laws that often harm marginalized groups who rely on protest to advocate for social change, and will jeopardize the safety of those who gather. Please read the concerns expressed by the Canadian Civil Liberties Association (CCLA).
This by-law has no place here. This is an issue of protecting human rights and the freedom of expression and association, a crucial cornerstone of a free and fair democracy.
I urge you to remember your legal obligations to uphold the Charter and protect our democracy and to clearly oppose any further consideration of the proposed demonstrations by-law.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
Michelle Panting

This by-law will do more harm than good, restricting our Charter-protected rights to freedom of expression and peaceful assembly. To quote the Canadian Civil Liberties Association, "disruptive, non-violent protest is part and parcel of a vibrant functioning democracy."

Most of the city is 100 meters from proposed banned locations. This will limit the people ability to protest almost everywhere, encouraging more destructive and violent demonstrations, since laws are being broken anyways. Let the people speak peacefully where ever they please.

Through this January in Minneapolis, we have all seen the erosion of assembly rights - police and federal agents cracking down heavily on protesters decrying abduction, deportation, and execution of immigrants and American citizens. An escalation like this cannot be allowed to happen in Winnipeg. The criminalization of protests, no matter the subject or on what side of a political or ideological spectrum, is a slippery slope towards what seems to be imminent in the States, a road heading to increased police power and authoritarianism and a surveillance state, if unchecked. Councillor Duncan's proposed definitions of both "nuisance" and "intimidation" are just vague enough that those who wish to squash protests of any sort can apply them to nearly any event with ease. It is also a backwards move to ban protesting on post-secondary campuses - students have always been at the forefront of social movements, and attempting to shift university-aged people from forward thinkers to complacent pawns is both bad optics and simply unlikely to happen.

Pragmatically, this proposition is also simply unlikely to prevent anyone from protesting. What a complete waste of city resources it would be to send more cops and by-law enforcement to protests en masse, trying to charge everyone at any given event $500, following up, enforcing, only for people to develop bad faith in the city and have even more to protest about.

Protests need to be seen, need to be disruptive in some way, in order to affect any sort of change. People need to be able to demonstrate publicly. The logic of buffer zones makes sense in a vacuum but in reality is an overstep on the city's part. A healthy democratic society needs to be able to protest that which it thinks is worth protesting, and these recommendations are in opposition to what a healthy democratic society needs and

mostly only in favour of those who currently hold some type of power. Protests are for the people.

Dear Executive Policy Committee,

I'm am absolutely shocked to learn the City of Winnipeg is considering the so-called Safe Access to Vulnerable Infrastructure By-Law -- it's a draconian approach that directly attacks our Charter-protected right to freedom of expression and peaceful assembly. This is a highly disturbing and and genuinely misguided approach to governance. What on earth are you doing?

I am a disabled person who has attended numerous protests in support of Indigenous people and other vulnerable communities (including and beyond my own) since I moved to Winnipeg almost 20 years ago. I read the news about this horrific proposed legislation this morning, and I am grateful to my fellow community members for drawing attention to a means for me to demonstrate my opposition to what the Executive Policy Committee is considering today. I am thus co-signing the points they've prepared because I agree with them completely. The points below were written by members of my community and I am submitting them as my own and ask that you take them with equal consideration as anything I may have written independently.

I am opposed to the Safe Access to Vulnerable Infrastructure By-Law because:

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for

many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Regards,
Milena Lye

Dear Executive Policy Committee,

I am writing in regards to the Safe Access to Vulnerable Infrastructure By-Law. I am shocked that this would even be considered, as it would infringe on Charter-protected rights to freedom of expression and peaceful assembly. I am strongly opposed to the proposed bylaw.

This bylaw would impede the fundamental freedoms of Winnipeggers to advocate for social and political change, and make this city a better place for all of us. This would disproportionately harm marginalized groups, who are those most in need of protection.

The by-law itself seems unlikely to reduce property damage, hate crimes, or violence, which are already criminal acts.

I urge you to drop consideration of this proposed bylaw, especially in a time in which we are witnessing alarming and draconian suppression of rights and freedoms to the South in the U.S.

To protect our democracy, this by-law mustn't be passed.

Sincerely,
Milo Klassen

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations by law.

Dear Executive Policy Committee,
I'm writing out of concern about the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

While I understand the intention of this by-law may be to prevent intimidation, it would also limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but further marginalize underrepresented communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. Who determines what is a "nuisance?" This type of undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change. Discomfort is part of the change process.

Given the nightmarish suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Dear Executive Policy Committee,
I am writing in opposition to the Safe Access to Vulnerable Infrastructure By-Law. I believe this by-law to be vague, inappropriate, and in violation of rights protected by the Charter. The ambiguity in what constitutes a "nuisance" protest would impact not only violent or problematic outings, but also vitally important community movements, public demonstrations, and meetings. This interference opens a door for charter protected rights like freedom of expression and peaceful assembly to be called into question or walked back. These rights have a history of uplift our communities and country into improved workers rights, marriage equality, bodily autonomy for women, and countless other freedoms we take for granted today. We should not allow these rights to be another thing we take for granted, and I am writing in hopes that you will see that Winnipeg is not willing to lose them.
I implore you to drop all consideration,
Morgan Speers

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.
The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to

advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.

Public engagement (optional)

I consent to being contacted to participate in potential public engagement related to this matter.

Dear Executive Policy Committee,

I am writing to express my opposition to the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law. I am concerned that this proposal would place significant restrictions on the Charter-protected rights of freedom of expression and peaceful assembly.

Winnipeg has a long history of residents using peaceful public demonstrations to advocate for meaningful social and policy change. Vigils, rallies, round dances, and protests have played an important role in advancing workers' and tenants' rights, Indigenous rights, racial justice, 2SLGBTQIA+ equality, and environmental protections. Limiting these forms of public participation risks weakening one of the most important tools communities have to influence democratic decision-making.

The proposed by-law raises serious concerns about potential infringement on constitutional rights. I am particularly worried it could silence marginalized communities and create conditions that enable police overreach. Additionally, the by-law does not appear to provide new measures to prevent property damage, hate crimes, or violence, as these acts are already addressed through existing criminal laws. Instead, the most likely result would be increased restrictions on lawful and peaceful protest. Such measures appear inconsistent with Winnipeg's efforts to work toward designation as a United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association has also raised concerns that broadly written restrictions of this nature can unintentionally limit Charter-protected demonstrations and free expression. Historically, policies like these have disproportionately affected

marginalized groups who rely on public protest to advocate for social change. Freedom of expression and association are essential pillars of a strong and fair democracy. Given the concerning suppression of rights and freedoms currently being witnessed in the United States, it is especially important that Winnipeg continues to uphold its legal obligations under the Charter and actively protect these fundamental freedoms.

For these reasons, I respectfully urge the Committee to discontinue further consideration of the proposed demonstrations by-law.

Sincerely,
Nadine Huberdeau

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

I pity the country
I pity the state
And the mind of the man
Who thrives off hate
Small are the lives
Of cheats and of liars
Of bigoted news press
Fascist town crier
Deception annoys me
Deception destroys me
The Bill of Rights froze me
Jails they all know me
Frustrated are church men
The saving of soul men
The tinker, the tailor
The colonial governor
They pull and they paw me
They're seeking to draw me
Away from the roundness of life
Silly civil servants
They thrive off my body

Their trip is with power
Back bacon and welfare
Police they arrest me
Materialists detest me
Pollution it chokes me
Movies they joke me
Politicians exploit me
City life it jades me
Hudson Bay fleece me
Hunting laws freak me
Government is bumbling
Revolution's rumbling
To be ruled in impunity
Is tradition continuity
I pity the country
I pity the state
And the mind of the man
Who thrives off hate

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Comments
I do not agree with the phrasing used in safe access to vulnerable infrastructure by law. Section 7 appendix b for it is far too vague yet at the same time, Limiting on what protest can be on. Don't get me wrong, I don't disagree on every point given just that some seem too vague of a concept such as Page 4 specific characteristics section k. Source of income for that could go for many things. Does a protest against Fossil fuel companies or proposed mining access such as the case in the silica mines being proposed in southern Manitoba, count as going against someone's personal income? For those directly limit the income and stop the people who want to start construction of those from making income and possibly even losing income because they cannot begin or start the processes. Then I also want to bring up the limitations of some buildings, for they don't make much sense such as post-secondary institution and libraries, a prime example could be the free Palestine protests that happened at the University of Winnipeg they didn't do any harmful acts besides setting up tents and a barrier that didn't even block main pathways at the University, but they would count as a nuisance protest under these legislative acts, which then leads to my final issue that I can see with this on Page 3, section "intimidation" A and B I agree that there should not be discrimination against a group in a protest, but people who disagree with a protest that is not discriminatory, such as a solidary protest with the American protesters against ice could count under these parameters listed here as a nuisance protest even though it is trying to spread awareness and show support against an immoral group and or showed general disagreement with foreign policy, which under the formatting of this proposal they would count as a nuisance for they, A target a specific group, B a source of income and finally could even make some people feel "unsafe". A possible change to still help deal with " nuisance protests" a work around could be that a specific number of people have to sign a petition to boycott specific type of protest, if they feel unsafe or otherwise instead of it just being outright banned/ fined. For protests have been a part of Manitoba for a long time. From the Manitoba general strike to the more

modern lemay forest protest, they may seem like a nuisance but to me I see them as way of people voicing their opinions in a constructive manner. I do agree that we need some kind of rules around protests, but these are much too vague lead to many voices going unheard in public spaces.
Thank you for your time.

#7 Safe Access to Vulnerable Infrastructure By-Law

Support or oppose recommendations
I am opposed to the recommendations

Submit comments in writing checkbox
Submit comments in writing

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

I oppose the proposed “Safe Access to Vulnerable Infrastructure By-law.” Its vague terms like “nuisance” and “intimidating” give excessive discretion to shut down peaceful protests, despite existing laws already addressing violence and hate. This risks infringing on Charter-protected freedoms of expression and assembly.

The broad exclusion zones and fines of up to $5,000 would deter lawful civic participation and may be applied selectively. I urge Council to reject this bylaw and protect democratic rights in Winnipeg.

This is in violation of the principles of democratic engagement in society. This will silence virtually all areas of the city with these limitations. All demonstrations can be considered "nuisances" by someone and all gatherings can be considered "demonstrations", so this can and will be weaponized against people trying to make the City of Winnipeg a more engaged and thriving place.

I oppose the proposed by-law and am deeply concerned that this will infringe on Fundamental Freedoms outlined in the Canadian Charter of Rights and Freedoms, specifically freedoms of expression and peaceful assembly. The proposed by-law clearly states that there are already protections in the Labour Relations Act, the Human Rights Code and provincial statutes that restrict violent and hateful demonstrations, and I firmly believe that the City of Winnipeg already has the tool that it needs to mitigate and punish hate speech and harassment on its streets.

Whatever political or symbolic goals are perceived to be "won" through this by-law will not outweigh the limitations it places on our collective freedom of expression and right to assembly.

Canadians have freedom of peaceful assembly. As long as protestors are not violating the 'peaceful' aspect of this, there should be no issue. I do not believe it is the place of the city to infringe upon Charter Rights.

Dear Executive Policy Committee,

I am writing to you as a Winnipeg resident and an engineering professional to express my alarm regarding the proposed "Safe Access to Vulnerable Infrastructure" By-Law. I am strongly opposed to this proposal.

As someone who works in a technical field, I understand the need for safety and security protocols. However, this by-law appears to use the guise of "protecting infrastructure" as a backdoor to restrict Charter-protected rights to freedom of expression and peaceful assembly.

Broadly defining public spaces as "vulnerable infrastructure" to shut down dissent is a dangerous overreach. Real safety is achieved through proper design and existing criminal laws that already address property damage and violence. We do not need new bylaws that effectively criminalize standing on a sidewalk.

This proposal would severely limit the fundamental freedoms Winnipeggers have used to win rights for workers, Indigenous communities, and 2SLGBTQIA+ neighbours. It solves nothing that isn't already covered by the Criminal Code, but it does risk silencing marginalized voices and inviting police overreach.

Winnipeg has been striving to be a "Human Rights City" since 2018. Passing a by-law that the Canadian Civil Liberties Association has flagged as a threat to democracy is a step in the exact opposite direction.

We are seeing rights and freedoms eroded globally. I urge you not to import that erosion

here. Please drop this by-law and focus on solutions that actually make our city safer without sacrificing our democracy.

Regards,
Nick

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Despite the comments to media about what this proposed bylaw is intended to accomplish, the actual plain language of the bylaw as it currently stands goes much further in its definitions and is overly broad and vulnerable to partisan interpretations. It's current carve-outs - and in all likelihood, attempts to make further carve-outs in response to opposition to the bylaw like mine and others - is and will be paltry and does not address the core problem of making governments the arbitrator of what is or isn't acceptable types/causes/locations to protest.

This is extremely dangerous overreach and the mere fact that it is to be considered and discussed is already problematic. Freedom to protest is extremely important, and yes, there can and must be limits - but broad rules such as these may and are often used to unfairly restrict Charter-protected peaceful demonstrations and free speech of marginalized groups who rely on protests to advocate for social change. Laws are already in place to prevent property damage, hate crimes, and violence from taking place - enforce or reinforce those instead of curtailing and limiting freedom of expression.

For these reasons and more, the EPC must not further consider this bylaw, and start from scratch.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed, Dani Jo Lea

I oppose this bylaw full heartedly as it infringes on freedom of speech and the right to peacefully protest. It appears to be a bylaw to instill fear in protestors, fear of showing up and standing up for vulnerable communities and voicing a desire for change or opposing policies made they disagree with. This bill should not be allowed to go forward as it is undemocratic and unconstitutional.

Dear Executive Policy Committee,

I am writing to express my opposition to the City of Winnipeg's proposed Safe Access to Vulnerable Infrastructure By-Law, which would restrict Charter-protected rights to freedom of expression and peaceful assembly.

This by-law would limit the fundamental freedoms Winnipeggers have long relied on to advocate for social and policy change. I am concerned it could infringe on constitutional rights, silence marginalized voices, and enable police overreach—without doing anything to prevent property damage, hate crimes, or violence, which are already illegal. Instead, it would severely restrict peaceful protest.

As Winnipeg works toward recognition as a UCLG "Human Rights City," this type of restriction on democratic freedoms sends the wrong message. The Canadian Civil Liberties Association has also warned that broad measures like this can unjustly limit peaceful demonstrations and disproportionately impact marginalized communities.

Protecting freedom of expression and association is essential to a healthy democracy. I urge you to uphold the Charter and discontinue consideration of this proposed by-law.

Sincerely,

Nick Dixon

The proposed by-law represents a significant imposition on the right to free speech and is ripe for abuse. Existing protections are sufficient for addressing any issues that may arise with protests, without the overbroad suppression of peaceful protest - including by users of vulnerable infrastructure, such as students, as well as by members of the broader community.

I believe that every citizen of winnipeg should have the freedom to protest and the freedom of expression, the only exception being when the exercising of these rights infringes upon the rights of others. I don't think the city should be allowed to decide for the people what is or isn't worthy of protesting, and this by-law would allow law makers the power to over-step where their authority should reasonably end within our free country.

The elements of this proposition regarding "the expression by any means, including graphic, written or oral, of objection or disapproval towards an idea, action, person or group" in "view of the public" is utterly ridiculous.

This proposition is a clear violation of Canadian charter rights pertaining to freedom of expression. This clear violation would mean that it would almost immediately be brought to court by civil rights and civil liberty organization, costing the city a large amount of money to fight. If the city did choose to fight this until the bitter end, it would almost certainly lose, making the whole endeavor a waste of time and money.

Think, if you make nonviolent protest illegal and violent protest illegal, people WILL just choose to protest violently. The only reason we have disruptive protests to worry about is because murderous riots are a crime.

In summary, this proposition would be cutting off the nose to spite the face.

I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

This agenda is limiting the possibility of people to protest and it is absolutely unacceptable. This agenda violates the freedom of speech and the rights of people to express their opinion. It also provides a huge gap in the law for the police to fine or arrest people with no reason.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

To the Executive Policy Committee,

As you know, the right to protest is protected under the Canadian Charter of rights and freedoms Section 2(b) Freedom of expression and 2(c) The right to peaceful Assembly.

These rights permit peaceful gatherings rather than breaking-point public outrage, they're places to feel heard and are symbolic of public education.
Fining people for speaking out against the harms in their community is decidedly unCanadian.
I'd like you to consider that we are not creating a safer, wealthier or more educated community promoting by-laws to excuse police harassment of people that are already hurting.

Hoping our politics continue to shift from arguing the parameters of basic rights - to creating meaningful changes outside of policing minor inconveniences.

-N.J Daniels.

Dear Executive Policy Committee,

As a Winnipeg resident and a citizen of our great democracy, I write to you to express my consternation that the City is considering the Safe Access to Vulnerable Infrastructure By-Law. I strongly oppose this proposed bylaw, as it infringes upon Winnipeggers' rights to freedom of expression and peaceful assembly.

For generations, Winnipeggers have been peacefully assembling to demonstrate not only their Charter-protected rights, but their commitments to liberty, equality, and justice. Public demonstrations are crucial avenues for change. The many rights which our city's people are currently able to enjoy, regardless of colour or creed, attest to such gatherings' necessity—and their effectiveness.

Like you, I am deeply concerned by the hateful acts of property damage which currently plague our city. This by-law, however, will do little to prevent these despicable crimes. Instead, it will limit our ability to come together and express that hatred has no place in our community.

Canada is a free and fair nation, and Winnipeg (at least until now) a free and fair city. I ask you: will Winnipeg lead by example? Or will our city open the doors to the kind of repressive legislation that appears better-suited to our neighbours south of the border?

I beseech you to defend our democracy by safeguarding the rights enshrined in our Charter. Please, cease consideration of this by-law.

Thank you for your time.

Sincerely,

Noah Kaldeway

This is blatantly anti-democratic. This is shocking and disappointing. Protesting at schools is an essential part of public discourse. The number of locations covered in this bill are so vast that it nearly covers the whole city. This is excessive. Section 2b of the Canadian Charter of Rights and Freedoms protects "freedom of thought, belief, opinion and expression". This directly contravenes these protections.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.
The wording is very vague and wide reaching. This is not going to protect women getting abortions (which there already is a Provincial law providing a protest buffer zone around abortion clinics, by the way), but it's going to restrict protest of all kinds in a sweeping way. Councillor Duncan, the author of the bylaw, had this to say:

"I think that as things evolve globally we see a lot of change out there. The chaos that is unfolding south of us right now is a clear indicator that it's coming our way and if we don't put these things in place to stop that, it's going to be your neighborhood next, it's going to be your place of worship next. And we don't want that to happen."
This is a massive red flag for what this bylaw really is. Duncan sees people in Minnesota protesting against ICE's authoritarian overreach and thinks "The protests are the problem." If this doesn't make it clear what the intentions behind this are, then I don't know what will.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting "nuisance demonstrations" within such expansive perimeters effectively removes meaningful

opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.

Dear Executive Policy Committee,
I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.
This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,

Olga Boltushenko

The right to protest shouldn't be infringed on. Fining people for causing nuisance while protesting kneecaps our ability to cause change through protesting: protests should be allowed to be inconvenient. Doling out fines is also unjust because it only affects people who can't pay the fines, restricting the right to protest from poor people whose right to protest is the most crucial out of any group.

This is an overreach and would prevent protest IN FRONT OF CITY HALL, and where the streetcar was pushed over in 1919. Effective peaceful protests are inconvenient and when you make peaceful revolution impossible violence is inevitable. Provincial legislation that came into effect last year created a buffer zone of at least 50 metres around facilities whose main purpose is to provide abortions. Other facilities that provide surgical or medical abortion services, including hospitals, pharmacies and doctors' offices, have the option to request a buffer zone. This bylaw is unnecessary and prevents reasonable protests.

The motion introduced by City Councillor Evan Duncan (Charleswood–Tuxedo–Westwood) to effectively ban protests within 100 metres of “vulnerable social infrastructure” will have serious implications for all public demonstrations in Winnipeg. Virtually every significant gathering space in the city for public rallies would be impacted. Concerned citizens could face severe fines for simply gathering to express their views on issues that impact Winnipeggers, Manitobans, and Canadians at large. This is a grave threat to freedom of assembly and expression in our city. If you value civil liberties, then you must oppose this punitive and regressive proposal.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

Having a by-law that allows police to simply give fines to demonstrators that they do not agree with is a massive over reach. Regardless of the fact that we have a right to peaceful assembly, fines that are issued will still need to be challenged and/or fought in court, wasting everyone's time. Furthermore, fines are only consequences to lower classes and minorities. Fines are irrelevant to people with money.

This quite clearly targets minority groups.

This quite clearly disincentivizes protest of all kinds due to the simple fact that holding a sign anywhere in a public place can earn you a fine that you will need to spend time fighting, regardless of its validity.

If passed, I am concerned that this by-law could not only infringe on constitutional rights,

but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

I am opposed to this proposed by-law because it infringes on our rights as Canadians to protest freely. This would set a dangerous precedent for infringing on our rights to free speech and to organize in community in protest. This is a clear example of beurocratic overreach and would not benefit the community in any way. We have the right to protest and this would limit this right drastically. This by-law cannot be passed. The community will not allow it. Winnipeg has a rich working class tradition of struggle against the ruling class and this goes against that historical fight and would be a huge slap in the face to all those courageous Manitobans that fought for their rights during the red river rebellion, 1919 general strike and the countless indigenous struggles. I urge the council to reconsider this proposed by-law and not allow it to be passed for the sake of our future generations as well as all those who came before us. With the current political climate and with everything going on in the usa with government repression of mass movements, we must not allow this authoritarian wave to reach our city. Thank you.

To the committee,

This bylaw is regressive and puts at risk the charter rights of Canadians. I can get behind wanting to ensure that people have safe access to spaces but this should be covered by existing laws.
The restrictions in this by-law effectively silence Winnipeggers by forcing them to exercise there right to free speech to locations where no one will here them. The term “nuisance” here is offensive and disrespectful. Protest is supposed to be uncomfortable, it is supposed to get the attention of those who would otherwise not know or choose to ignore the issues at hand, and it is often the last resort for people who have been unable to get support in a society that would rather leave them behind. There’s a reason why these bylaws have started seeing charter challenges.

I would like to believe that this was drafted by people truly trying to offer protection to those wishing to access spaces they have a right to, but between the way the federal government has put their fingers on the scale with respect to protests and strikes and the behaviour of the US government towards its citizens, I have become far too pessimistic to give that belief much weight.

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Opposition to Item No. 7 Safe Access to Vulnerable Infrastructure By-law

Executive Policy Committee – February 17, 2026

This submission is in opposition to the proposed Safe Access to Vulnerable Infrastructure By-Law. As it stands, it would seriously limit Winnipegger's right to protest — rights that have shaped so many positive changes in our city. For that reason, we can't support this by-law.

Protests, vigils, rallies, and round dances are the tools communities rely on when they need to be heard and have played a huge role in advancing environmental action.

This by-law could end up silencing marginalized voices, increasing police involvement where it isn't needed and risks restricting peaceful protest in a way that doesn't reflect Winnipeg's commitment to becoming a UCLG "Human Rights City."

The Canadian Civil Liberties Association has also raised red flags, noting that broad rules like this often undermine Charter rights and disproportionately affect groups who depend on public demonstrations to advocate for change.

At its core, this is about protecting freedom of expression and association — the foundation of any healthy democracy. With rights being rolled back in other places, we are asking Council to uphold its Charter obligations and reject this by-law.

Pam Lucenkiw

Dear Executive Policy Committee,

I'm writing to you today to express my disapproval at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. With more restrictions on public demonstrations, we have no freedom, and we have no Canada.

If this is passed, this would infringe on the constitutional rights of everyone. This isn't about silencing one specific group, but silencing everyone. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

What if there is a bill that is passed that causes farmers to lose crops because they couldn't protest against it, or a new bill that restricts religious freedom because no one could have a peaceful assembly that offered safe suggestions? The safety concern of demonstrations is understandable, but if there was a focus on the city building community and providing people with what they need, maybe there would be less safety concerns on opposing groups.

I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I implore you to drop further consideration of the proposed demonstrations bylaw.

Signed,
Parker

Restricting additional areas where we can protest, is adding further limitations to our freedom of expression and freedom of peaceful assembly. The minor discomfort or inconvenience caused by peacefully protesting, doesn't outweigh the consequences of encroaching on the right to protest. There are plenty of issues in the world where protesting is used to spread awareness and to educate others; such as climate change, systemic violence, and/or political issues. Making peaceful protests accessible and facilitated ensures that these freedoms can be exercised without being suppressed or silenced.

Dear Executive Policy Committee,

I am alarmed, but not at all surprised that the City of Winnipeg is considering passing a by-law that would severely impact and restrict Charter-protected rights to freedom of expression and peaceful assembly. I am vehemently in opposition to this proposed bylaw.

As I hope you've considered - though to be perfectly frank, my hopes for this committee and council in general are devastatingly low - this by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am certain that you clowns and your greasy friends would utilize this by-law to infringe on constitutional rights and silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate.

The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited.

Conflating the discomfort of certain groups with safety is a dangerous This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.

This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.

I am demanding drop any consideration of this proposed demonstrations bylaw, and issue a vehement apology to Winnipeggers - allowing Councillor Duncan to propose this nonsense is such a colossal waste of our collective time and energy.

Disrespectfully,
Pascale Nowicki

I strongly oppose the proposed restrictions on the right protest. At a time when the gap between the wealthy and those that are poverty stricken is growing; when terrible atrocities are occurring around the world; when humanitarian measures are being denied and the environment is being degraded it is critical that people speak up and protest. To restrict peaceful protest erodes democracy and moves us further and further towards fascism.

This measure is anti-democratic. There are existing laws to prevent threats and hate speech that exist for good reasons. However, this measure goes beyond that to stifle the voices of the people you represent. The ability to protest, to draw attention to a cause should be fundamental in our country.

From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.
If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely

limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) “Human Rights City” since 2018.
The Canadian Civil Liberties Association (CCLA) has expressed concerns that broad rules such as these may unfairly restrict Charter-protected peaceful demonstrations and free speech, and that such laws often harm marginalized groups who rely on protest to advocate for social change.
This is an issue of protecting freedom of expression and association, a crucial cornerstone of a free and fair democracy. Given the alarming suppression of rights and freedoms we are witnessing in the U.S., I urge you to remember your legal obligations to uphold the Charter and protect our democracy.
I implore you to drop further consideration of the proposed demonstrations bylaw.
Signed,
GoldStar the Screaming Eagle

Dear Executive Policy Committee,

I'm writing to you today to express my shock and alarm at the City of Winnipeg's consideration of the Safe Access to Vulnerable Infrastructure By-Law that would restrict our Charter-protected rights to freedom of expression and peaceful assembly. It is for this reason that I am in opposition to the proposed bylaw.

This by-law would limit the fundamental freedoms Winnipeggers have used to advocate for many social and policy changes that we currently enjoy as a community, and even as a nation. From vigils and rallies to round dances, public demonstrations have been used to help win rights for workers and tenants, Indigenous, racialized and 2SLGBTQIA+ community members, as well as protections for the environment.

If passed, I am concerned that this by-law could not only infringe on constitutional rights, but silence marginalized communities' voices, lead to police overreach, and result in

inadequate options for responding to hate. The City's proposed "Safe Access" by-law would not do anything to further prevent property damage, hate crimes, or violence from taking place—acts that are already criminal. Instead, peaceful protests would be severely limited. This type of draconian and undemocratic curtailing of the freedom of expression has no place in the City of Winnipeg, which has been striving towards the status of United Cities and Local Governments (UCLG) "Human Rights City" since 2018.

To whom it may concern:
I am writing today to register my deep concern regarding the proposed bylaw to restrict the right to protest in the city of Winnipeg.
I object to this proposal in the strongest possible sense, and urge you to withdraw this legislation immediately. The city claims that this bylaw will not inhibit free speech, or the right to gather and demonstrate peacefully, but it will do exactly that. By creating large zones around areas where peaceful protest can occur, this bylaw gives excessive power to institutions and a few privileged people of influence to dictate what is a "safe" distance for people to gather. We are not talking about hateful, anger-filled confrontations. We are not talking about people committing acts of violence; no, we are talking here about the right for people to gather and express their opinion. So long as a demonstration does not infringe on the constitutional rights of others, then it is guaranteed under the Canadian Charter of Rights and Freedoms that such a demonstration is a given right.

Comments
I am writing to express my strong opposition to the proposed Safe Access to Vulnerable Infrastructure By-law.

While protecting public safety and ensuring unobstructed access to essential services are legitimate municipal objectives, this by-law is drafted in a manner that is overly broad, vague, and constitutionally vulnerable. It risks infringing on the freedoms of expression and peaceful assembly guaranteed under sections 2(b) and 2(c) of the Canadian Charter of Rights and Freedoms.

The proposed 100-metre buffer zones would apply not only to hospitals and facilities serving vulnerable populations, but also to schools (including post-secondary institutions), libraries, cultural centres, community centres, cemeteries, and places of worship. These locations are often precisely where matters of public concern arise. Prohibiting “nuisance demonstrations” within such expansive perimeters effectively removes meaningful opportunities for peaceful, lawful protest in relation to decisions, events, or speakers hosted at those sites.

The definition of “intimidation” is also concerning. Language such as conduct “reasonably expected” to cause fear, incite hatred, or deter access is subjective and open to broad interpretation. Laws that restrict Charter-protected activity must be carefully tailored, clear, and minimally impairing. This proposal fails that standard. It relies heavily on enforcement discretion, which is not a substitute for precise legislative drafting.

There is already provincial legislation establishing buffer zones around abortion services. If the City’s objective is to prevent obstruction, harassment, or threats, existing Criminal Code provisions and targeted bylaws addressing obstruction can be enforced. Expanding

protest-free zones across large portions of the city is not a minimally impairing response.

Freedom of peaceful protest is a cornerstone of democratic society. It protects all viewpoints, not only those currently popular or aligned with the government of the day. Municipal regulation must be proportionate, evidence-based, and Charter-compliant. This by-law, as drafted, is not.

I respectfully urge the Committee to reject this proposal in its current form. If Council believes further action is necessary, it should be narrowly tailored to essential services and focused strictly on preventing obstruction and true intimidation—not broad restrictions on proximity.

Please do not set a precedent that weakens fundamental democratic freedoms in Winnipeg.
