As a regular user of the Harte Trail and member of the community, I strongly support the motions to relocate the stop signs at:

Harstone Road and Glenbush Street / Harte Trail

Elmhurst Road and Ridgewood Avenue / Harte Trail

The Harte Trail is a heavily used corridor for both pedestrians and cyclists. Currently, motor vehicle traffic at these crossings is uncontrolled, creating confusion and risks for trail users and drivers alike.

Relocating the stop signs to these trail crossings is a simple, practical, and feasible measure that will significantly reduce risks for trail users and demonstrate Council's commitment to active transportation and road safety.

I respectfully urge the Committee to support these motions.

Public engagement (optional)

I consent to being contacted to participate in potential public engagement related to this matter.
Yes

I am writing to formally support the relocation of the stop signs at Harstone at Glenbush and Elmhurst at Ridgewood to prioritize the safety of Harte Trail users. Currently, the stop sign placement requires vehicles to stop for the adjoining three-way street intersections rather than at the trail crossing itself. This configuration often leads to vehicles crossing the trail while accelerating or failing to yield, creating unnecessary risks for the pedestrians and cyclists who frequent this active transportation corridor.

By transitioning the dead-end street to a one-way stop and moving the stop signs to the Harte Trail, the City will significantly improve sightlines and ensure drivers come to a complete halt where the most vulnerable travelers are present. This simple infrastructure adjustment is a low-cost, high-impact way to protect the families and commuters who rely on the trail, and aligns with our community's commitment to safe, accessible transit for all ages and abilities.

I'm writing in support of the motion going before the Standing Policy Committee on Public Works on March 4th to relocate stop signs at two intersections in my neigborhood near the Harte Trail - one at Harstone Road and Glenbush Street, and one at Elmhurst Road and Ridgewood Avenue.

The Harte Trail is a heavily used corridor for both pedestrians and cyclists. Currently, motor vehicle traffic at these crossings is uncontrolled, creating confusion and risks for trail users and drivers alike.

Relocating the stop signs to these trail crossings is a simple, practical, and feasible measure that will significantly reduce risks for trail users and demonstrate Council's commitment to active transportation and road safety.

I respectfully urge the Committee to support these motions.

Sincerely,
Jonathan Cote

I support the relocation of the North/South stop signs at Glenbush and Harstone, to be set back South, to the Harte Trail.
This would be more beneficial for the safety of trail users, crossing across Harston where it intersects the trail. Some vehicles come at high rates of speed, North bound from Wilkes, not even acknowledging the trail crossing. So I am in full support of this request.

As a community member and a regular user of the Harte Trail, along with my wife and our dog, I support relocating the stop signs at:

Harstone Road and Glenbush Street / Harte Trail

Elmhurst Road and Ridgewood Avenue / Harte Trail

These crossings currently require trail users to rely on driver judgment, which creates uncertainty and unnecessary risk. The Harte Trail is heavily used by pedestrians and cyclists, and these intersections should reflect that reality.

Relocating the stop signs to the trail crossings is a simple, practical step that will improve safety and better support active transportation in our community.

I urge the Committee to support these motions.

As a regular user of the Harte Trail and member of the community and user of the roadways as both a cyclist and driver, I strongly support the motions to relocate the stop signs at:

Harstone Road and Glenbush Street / Harte Trail

Elmhurst Road and Ridgewood Avenue / Harte Trail

The Harte Trail is a heavily used corridor for both pedestrians and cyclists. Currently, motor vehicle traffic at these crossings is uncontrolled, creating confusion and risks for trail users and drivers alike. As an avid user of both the trail and specific roads, I have been confused and concerned about the uncontrolled intersection of the trail at these sites and worry that this is just an accident waiting to happen.

Relocating the stop signs to these trail crossings is a simple, practical, and feasible measure that will significantly reduce risks for trail users and demonstrate Council's commitment to active transportation and road safety.

I respectfully urge the Committee to support these motions.

Public engagement (optional)

I consent to being contacted to participate in potential public engagement related to this matter.
