Age-friendly plans: The city has failed to protect seniors. They must walk further to get on a bus, or stay home if they cannot walk further. They are at risk waiting for a bus. Bus stops are too close to roads. A bus hit a shelter in Winnipeg recently. A bus passenger was killed because the stop was too close to the road, and no deflecting wall was installed. More will die because no such walls are provided to protect stops. An Ottawa bus killed riders because the driver climbed the curb. The city has failed to prevent this from happening here. The city still fails to remind seniors to stand on the curb until it is safe to cross at a crosswalk. The city and province are putting seniors in mortal danger when they move drug dealers and users from encampments into senior apartment buildings. When seniors recognize danger, and ask for court protection, they are ignored. Because the courts and the city show no sign of caring about the safety of seniors, changes are needed in these plans. Getting a newsletter from gov does not reduce these deadly dangers.
